tiptoe (tip'tō), *n.* [< ME. *tipto*; < *tip*[1] + *toe*.] 1. The tip of a toe: used in the plural, with reference to posture or movement on the ends (balls) of the toes of both feet, literally or figuratively.

He moste winke, so loude he wolde cryen,
And stonden on his *tiptoon* therwithal.
Chaucer, Nun's Priest's Tale, l. 487.

Upon his *tiptoes* nicely up he went.
Spenser, Mother Hub. Tale, l. 1009.

O how on *tip-toes* proudly mounts my muse!
Stalking a loftier gait than satires use.
Marston, Scourge of Villanie, ix. 5.

2. The ends of the toes collectively; the forward extremity of the foot, or of the feet jointly: in the phrase *on tiptoe* (*a tiptoe*), indicating cautious or mincing movement, or a stretching up to the greatest possible height: also used figuratively.

He that outlives this day, and comes safe home,
Will stand *a tiptoe* when this day is named,
And rouse him at the name of Crispian.
Shak., Hen. V., iv. 3. 42.

They stoop forward when they should walk upright; they shuffle along *a tip Toe*, curtesy on one Side.
C. Shadwell, Humours of the Army, ii. 1.

Tipula (tip'ū-lă), *n.* [NL. (Linnæus, 1735), < L. *tipula*, *tippula*, a water-spider. Cf. *Typhia*.] A notable genus of crane-flies, typical of the family *Tipulidæ*. It now includes only those species in which the discoidal cell of the wings is present and emits two veins, the upper always forked, and in which the antennæ are thirteen-jointed. Over 70 species occur in North America. *T. oleracea* of England, the cabbage-gnat or cabbage crane fly, often does great damage to cabbages, its larvæ gnawing through the roots. This is one of the insects called in Great Britain *daddy-long-legs* or *father-long-legs* (a name given in the United States to certain phalangiids).

Tipularia (tip-ū-lā'ri-ą), *n.* [NL., < *Tipula* + *-aria*.] 1. A genus of fossil crane-flies, found in the lithographic limestone rocks of Bavaria. *T. teyleri* is the only species. *Weyenburgh*, 1869. —2. [(Nuttall, 1818): so named from a resemblance of the flower to a crane-fly: see *Tipula*.] A genus of terrestrial orchids, of the tribe *Epidendreæ*, subtribe *Liparideæ*. It is characterized by flowers with a long slender spur, a lip with the two lateral lobes small and short, a narrow erect column, and four unappendaged and finally slender-stalked pollinia. The 2 species are natives, one of the Himalayas, the other of the United States. They are herbs with large solid bulbs on a short root-stock, producing a solitary ovate leaf and an unbranched elongated scape bearing a loose raceme of small greenish and purple-tinged flowers. *T. unifolia* is a rare plant of sandy woods from Vermont and Michigan to Florida: a book-name is *crane-fly orchis;* about Washington, D. C., it is known as *tallowroot*, from the appearance of the cut bulbs. It resembles the puttyroot in developing its leaf in autumn after flowering, and differs in the smaller size, ovate shape, and purple under surface of the leaf.

1, the inflorescence of *Tipularia unifolia*; 2, the rhizome with the leaf; *a*, a flower; *b*, the fruit.

tipularian (tip-ū-lā'ri-ąn), *a.* and *n.* [< *Tipula* + *-arian*.] I. *a.* Pertaining or related to the genus *Tipula;* belonging to the *Tipulidæ*, as a crane-fly; tipulary.

II. *n.* A crane-fly, daddy-long-legs, or some similar insect.

tipulary (tip'ū-lā-ri), *a.* [< *Tipula* + *-ary*.] Same as *tipularian*.

Tipulidæ (ti-pū'li-dē), *n. pl.* [NL. (Leach, 1819), < *Tipula* + *-idæ*.] A large and widespread family of nematocerous dipterous insects, the crane-flies of the United States and the daddy-long-legs of England, including the largest of the *Nematocera*. The legs are extremely long and slender, the thorax bears a V-shaped suture, the wings have numerous veins and a perfect discal cell, and the ovipositor is composed of two pairs of long horny pointed valves, for laying eggs in the ground or other firm substances. The larvæ are footless, gray in color, pointed at one end, and move by means of transverse swellings below the body. They live usually in the earth or in decomposing wood, seldom in the water, and rarely on the leaves of trees. When feeding underground on the roots of plants, they occasionally do great damage to cultivated crops. The species of the anomalous genus *Chionea* are wingless and are found on snow. (See *snow-fly*.) The family is divided into nine or more sections. About 300 species, of 52 genera, have been described from North America.

tip-up (tip'up), *n.* 1. In *fishing*, same as *tilt*[1], 6.—2. In *ornith.*, same as *fiddler*, 4. See *teeter-tail*, and cut under *Tringoides*.

tip-wagon (tip'wag″ǫn), *n.* A wagon that can be emptied by tipping it; a tip-cart.

tip-worm (tip'wėrm), *n.* The larva of a gall-fly, *Cecidomyia oxycaccana*, which works in the terminal buds of the cranberry-vine. [U. S.]

tirade (ti-rād'), *n.* [< F. *tirade*, a passage, a long speech in a play, formerly a pull, draught, shooting, = Pr. Sp. *tirada*, < It. *tirata*, a drawing, pulling, < *tirare*, draw, pull, protract, prolong: see *tire*[2].] 1. A long-drawn passage in speech or writing; an uninterrupted sequence of expression or declamation on a single theme, as in poetry, the drama, or conversation.

Sometimes the *tirade* [in the chanson de geste] is completed by a shorter line, and the later chansons are regularly rhymed. *Encyc. Brit.*, IX. 638.

2. In specific English use, a long vehement speech; an outpour of vituperation or censure.

Gabriel took the key, without waiting to hear the conclusion of the *tirade*.
T. Hardy, Far from the Madding Crowd, xxxvi.

3. In *music*, a diatonic run or slide inserted between two tones that are separated by a considerable interval, producing a kind of portamento effect.

tirailleur (ti-ra-yėr'), *n.* [F., a soldier (shooter) in the skirmish-line, < *tirailler*, shoot often or irregularly, < *tirer*, draw, shoot: see *tire*[2].]

1. A skirmisher.—**2.** In the French army, a sharp-shooter; a skirmisher; one of an organized body of light troops for skirmish duty. The title *tirailleurs* was first applied in 1792 to French light-armed troops who were thrown out from the main body to bring on an action, cover an attack, or generally to annoy or deceive the enemy.

tirannye†, tirandye†, *n.* Obsolete forms of *tyranny*.

tirant†, *n.* An obsolete form of *tyrant*.

tirasse (ti-ras′), *n.* [< F. *tirasse*, a draw-net, a strap, < *tirer*, draw: see *tire*[2].] In *organ-building*, same as *pedal coupler* (which see, under *pedal*).

tiraunt†, tirauntrie†. Old spellings of *tyrant, tyrantry*.

tiraz, *n.* A costly silk stuff of which the most famous manufacture seems to have been at Almeria in Spain, under the Moorish domination: it is mentioned as woven with inscriptions, the names of distinguished men, etc.

tire[1] (tīr), *v.*; pret. and pp. *tired*, ppr. *tiring*. [Early mod. E. also *tyre;* < ME. *tiren, tirien, teorien,* < AS. *teorian*, intr. be tired, tr. tire, fatigue; cf. ME. *a-teorien*, < AS. *ā-teorian*, tire; appar. a secondary form of *teran*, tear: see *tear*[1]. The verb has also been referred to ME. *terien, teryen, terwen, terren, tarien,* < AS. *tergan*, vex (see *tar*[2], *tarry*[2]), also to *tire*[2], pull, seize (see *tire*[2]).] **I.** *intrans.* To become weary, fatigued, or jaded; have the strength or the patience reduced or exhausted.

As true as truest horse that yet would never *tire*.
Shak., M. N. D., iii. 1. 98.

I *tired* of the routine of eight years in one afternoon. I desired liberty. *Charlotte Brontë*, Jane Eyre, x.

Nor mine the sweetness or the skill,
But mine the love that will not *tire*.
Tennyson, In Memoriam, cx.

II. *trans.* **1.** To make weary, weaken, or exhaust by exertion; fatigue; weary: used with reference to physical effect from either physical or mental strain.

Tired limbs, and over-busy thoughts,
Inviting sleep and soft forgetfulness.
Wordsworth, Excursion, iv.

Last year, Esther said innocently, she had no one to help her, and the work *tired* her so.
H. B. Stowe, Oldtown, p. 452.

Music that gentlier on the spirit lies
Than *tir'd* eyelids upon *tir'd* eyes.
Tennyson, Lotos-Eaters, Choric Song.

2. To exhaust the attention or the patience of, as with dullness or tediousness; satiate, sicken, or cause repugnance in, as by excessive supply or continuance; glut.

The feast, the dance; whate'er mankind desire,
E'en the sweet charms of sacred numbers *tire*.
Pope, Iliad, xiii. 798.

Dramatic performances *tired* him [William of Orange].
Macaulay, Hist. Eng., vii.

I often grew
Tired of so much within our little life.
Tennyson, Lucretius.

To tire out, to weary or fatigue to the point of exhaustion.

And some with Patents, some with Merit,
Tir'd out my good Lord Dorset's Spirit.
Prior, To Fleetwood Shepherd (1689).

=**Syn.** *Tire, Fatigue, Weary, Jade.* These words are primarily physical, and are in the order of strength. One may become *tired* simply by standing still, or *fatigued* by a little over-exertion. *Fatigue* suggests something of exhaustion or inability to continue exertion: as, *fatigued* with running. *Weary* implies protracted exertion or strain gradually wearing out one's strength. *Jade* implies the repetition of the same sort of exertion: as, a horse will become *jaded* sooner by driving on a dead level than if he occasionally has a hill to climb. All these words have a figurative application to the mind corresponding to their physical meaning. See *fatigue, n.*, and *wearisome*.

tire[1] (tīr), *n.* [< *tire*[1], *v.*] The feeling of being tired; a sensation of physical or mental fatigue. [Colloq.]

I have had a little cold for several days, and that and the *tire* in me gives me some headache to-day.
S. Bowles, in Merriam, I. 293.

Brain-tire. Same as *brain-fag*.

tire[2]† (tīr), *v.* [Early mod. E. *tyre;* < ME. *tiren, tyren* (= Dan. *tirre*, tease, worry), < OF. (and F.) *tirer* = Sp. Pg. *tirar* = It. *tirare*, < ML. *tirare*, draw, drag, pull, extend, produce, protract, prolong, etc.; prob. of Teut. origin, < Goth. *tairan* = AS. *teran*, etc., tear: see *tear*[1], with which *tire*[2] seems to have been in part confused in ME. Cf. *tire*[1], prob. from the same ult. root.] **I.** *trans.* **1.** To draw; pull; drag.

Blauncheflur bid forth hire suere [neck],
And Floriz agen hire gan *tire*.
King Horn (E. E. T. S.), p. 71.

2. To pull apart or to pieces; rend and devour; prey upon.

Thow endurest wo
As sharpe as doth he Sysiphus in helle,
Whose stomak fowles *tyren* everemo.
Chaucer, Troilus, i. 787.

II. *intrans.* **1.** To engage in pulling or tearing or rending; raven; prey: used especially in falconry of hawks pouncing upon their prey, and in analogous figurative applications.

Upon whose breast a fiercer gripe doth *tire*
Than did on him who first stole down the fire.
Sir P. Sidney (Arber's Eng. Garner, I. 510).

And, like an empty eagle,
Tire on the flesh of me and of my son.
Shak., 3 Hen. VI., i. 1. 268.

Thus made she her remove,
And left wrath *tyring* on her son, for his enforced love.
Chapman, Iliad, i. 422.

Rivet him
To Caucasus, should he but frown; and let
His own gaunt eagle fly at him, to *tire*.
B. Jonson, Catiline, iii. 1.

Hence—**2.** To be earnestly engaged; dwell; dote; gloat.

I grieve myself
To think, when thou shalt be disedged by her
That now thou *tirest* on, how thy memory
Will then be pang'd by me.
Shak., Cymbeline, iii. 4. 96.

tire[3]† (tīr), *n.* [Early mod. E. also *tyre;* < OF. (and F.) *tire*, a draught, pull, stretch, fling, length of course, etc. (in a great variety of senses) (= Sp. Pg. *tiro*, a draught, shot, cast, throw, = It. *tiro*, a draught, shot, etc.), < *tirer*, draw: see *tire*[2], *v.* The form *tier*, once a mere var. spelling of *tire* (like *fier* for *fire*), is now pronounced differently, and, with *tire*, is by some referred to a different source: see *tier*[2].] **1.** A train or series. [Rare.]

Such one was Wrath, the last of this ungodly *tire* [of passions]. *Spenser*, F. Q., I. iv. 35.

2. A row; rank; course; tier; especially, a row of guns; a battery.

Hauing spent before in fight the one side of her *tire* of Ordinance, . . . she prepared to cast about, and to bestow on him the other side. *Hakluyt's Voyages*, I. 609.

In posture to displode their second *tire*
Of thunder. *Milton*, P. L., vi. 605.

3. A stroke; hit. *Cotgrave.*

tire[4] (tīr), *v. t.*; pret. and pp. *tired*, ppr. *tiring*. [Early mod. E. also *tyre;* < ME. *tiren, tyren;* by apheresis from *attire, v.*] **1.** To adorn; attire; dress. See *attire*.

Goth yond to a gret lord that gayly is *tyred*.
William of Palerne (E. E. T. S.), l. 263.

She painted her face, and *tired* her head. 2 Ki. ix. 30.

She speaks as she goes *tired* in cobweb-lawn, light, thin.
B. Jonson, Every Man out of His Humour, ii. 1.

2. To prepare or equip for; make ready; set up.

But built anew with strength-conferring fare,
With limbs and soul untam'd, he *tires* a war.
Pope, Iliad, xix. 168.

tire[4] (tīr), *n.* [By apheresis from *attire, n.*] **1.** Attire; dress.

He tore Dame Maudlin's silken *tire*. *Scott.*

2†. Furniture; apparatus; machinery.

Immediate sieges, and the *tire* of war,
Roll in thy eager mind. *J. Philips*, Blenheim.

tire[5] (tīr), *n.* [Early mod. E. also *tyre;* perhaps a modified form of *tiar*, to simulate *tire*[4]; otherwise simply a particular use of *tire*[4].] A head-dress. See *tiara*.

On her head she wore a *tyre* of gold.
Spenser, F. Q., I. x. 31.

The best dresser of *tires* that ever busked the tresses of a Queen. *Scott*, Abbot, xxxi.

Paston Letters, I. 511.

★ **tire**[7] (tīr), *n.* [Prop. *tier;* < *tie*[1] + *-er*[1].] A continuous band of metal or other substance placed around a wheel to form the tread. The tire may serve to resist shock, or hold the wheel together, or reduce wear, etc. Metal tires were formerly made in sections and bolted to the wheel, but in modern practice the tire is always a continuous band, expanded by heat and shrunk on over the wheel, at once to compress it and to secure a firm hold. Tires of rubber, either solid or (now almost universally) of tubing of various kinds, inflated with air (see below), are used for bicycles, tricycles, racing-sulkies, carriages, etc. Also *tyre.*—**Pneumatic tire,** a tire consisting of a tube made of some strong and durable fabric, generally coated with rubber and inflated with air, used on bicycles, etc. In the *double tire* an inner air-tight tube of thin rubber is protected by a strong, unelastic outer tube. Various devices have been used to prevent puncturing.

tire[7] (tīr), *v. t.*; pret. and pp. *tired*, ppr. *tiring*. [< *tire*[7], *n.*] To put a tire upon; furnish with tires: as, to *tire* a wheel or a wagon. Also *tyre*.

The tread may be turned down like the tread of a steel-*tired* wheel, and will not glaze over and become smooth like iron. *Elect. Rev.* (Amer.), XVI. x. 2.

tire[8], *n.* See *tier*[1], 2.

tire-bender (tīr′ben″dėr), *n.* A machine for bending the tires of wheels to fit the rim. It consists of three rolls placed in a triangular position in a strong frame, two being geared together. The third roll is adjustable in relation to the others to cause the rolled tire to bend to a circle of any desired radius. Provision is made for releasing the finished tire from the machine.

tire-bolt (tīr′bōlt), *n.* A screw-bolt by which a tire is fastened upon a wheel-center. If the wheel is made with retaining rings, the bolts are passed through these, and thus secure at once rings, center, and tire. See cut under *bolt*.

tiredness (tīrd′nes), *n.* The state of being tired; weariness; exhaustion.

It is not through the *tirednesse* or age of the earth, . . . but through our owne negligence, that it hath not satisfied vs so bountifully as it hath done.
Hakewill, Apology, p. 143.

tire-drill (tīr′dril), *n.* A machine for boring the holes for the bolts in tires. It has an adjustable clamp to hold the tire opposite the drill, which is advanced by a screw and crank.

tire-heater (tīr′hē″tėr), *n.* A furnace or other device for heating a tire to cause it to expand, that it may be fitted over the rim of a wheel.

tireless[1] (tīr′les), *a.* [< *tire*[1], *v.*, + *-less*.] Not tiring or becoming tired; not yielding to fatigue; untiring; unwearying. [A word analogous in formation to *ceaseless, exhaustless, relentless*, etc., and long in every-day use, though omitted from dictionaries.]

He [the gaucho] was courageous and cruel, active and *tireless*, never more at ease than when on the wildest horse. *Harper's Mag.*, LXXXII. 866.

tireless[2] (tīr′les), *a.* [< *tire*[7] + *-less*.] Without a tire: as, a *tireless* wheel.

tirelessly (tīr′les-li), *adv.* In a tireless manner; without becoming tired; unweariedly.

She [Queen Victoria] does not go to the theatre, leaving that branch of the public duty of a sovereign to the Prince of Wales, who *tirelessly* pursues it.
New York Tribune, March 22, 1891.

tirelessness (tīr′les-nes), *n.* The property or character of being tireless; indefatigability.

tireling† (tīr′ling), *a.* [Early mod. E. also *tyreling;* < *tire*[1] + *-ling*[1].] Tired; fatigued; fagged.

His *tyreling* Jade he fiersly forth did push
Through thicke and thin, both over banck and bush.
Spenser, F. Q., III. i. 17.

tirelire (tēr′lēr), *n.* [< F. *tirelire*, a money-box, formerly also a Christmas box (also the warbling of a lark: see *tirra-lirra*).] A saving-box, popularly called "savings-bank," usually made of baked clay, and of simple form, which must be broken in order to get at the money.

tireman (tīr′man), *n.*; pl. *tiremen* (-men). [< *tire*[4] + *man*.] **1.** A man who attends to the attiring of another; a dresser, especially in a theater; a valet. [Obsolete or rare.]

Enter the *Tiremen* to mend the lights.
B. Jonson, Staple of News, Ind.

2. A dealer in clothes and articles of dress. *Halliwell.*

tire-measurer (tīr′mezh″ūr-ėr), *n.* An instrument for measuring the circumference of a wheel or a tire. It consists essentially of a graduated wheel turning in a frame held by a handle, and in use is caused to run over the circumference of the wheel or tire to be measured.

tirement† (tīr′ment), *n.* [Early mod. E. *tyrement;* < *tire*[4] + *-ment*.] An article of apparel; attire.

Owre women in playes and tryumphes haue not greater plentie of stones of glasse and crystall in theyr garlandes, crownes, gerdels, and suche other *tyrementes*.
Peter Martyr (tr. in Eden's First Books on America, ed. [Arber, p. 89).

tire-press (tīr′pres), *n.* A powerful hydraulic press for forcing the tires upon or removing them from the rims of locomotive driving-wheels.

tire-roller (tīr′rō″lėr), *n.* A rolling-mill for wheel-tires. The rolls overhang their bearings, and can be moved to or from each other to admit the tire between them. *E. H. Knight.*

tire-setter (tīr′set″ėr), *n.* A machine for setting a tire upon a wagon- or carriage-wheel. The tire is placed loose upon the wheel, and the machine, by the aid of thin steel bands which are drawn tight by means of a screw, upsets the tire, and presses it upon the wheel.

tire-shrinker (tīr′shring″kėr), *n.* A machine for shortening a tire when, by shrinkage of the wheel, it has become loose. The tire is heated, and placed in the machine, which compresses the heated part, and thus reduces the diameter of the tire.

tiresmith (tīr′smith), *n.* One who makes tires and other ironwork for coaches, etc. *Imp. Dict.*

tiresol† (tēr′sol), *n.* [< OF. **tiresol*, < *tirer*, draw, + *sol*, sun: see *tire*[2] and *sol*[1].] A sun-umbrella; a sunshade.

Next to whom cometh the King with a *Tiresol* ouer his head, to keepe off the Sunne.
Purchas, Pilgrimage, p. 538.

tiresome (tīr′sum), *a.* [< *tire*[1] + *-some*.] 1. Tending to tire; exhausting the strength; fatiguing: as, a *tiresome* journey.

Being of a weak constitution, in an employment precarious and *tiresome*, . . . this new weight of party malice had struck you down.
Swift, To Dr. Sheridan, Sept. 11, 1725.

2. Exhausting the patience or attention; wearisome; tedious; prosy.

It would be *tiresome* to detail all the troubles of the Copts under the tyranny of the Moos'lims.
E. W. Lane, Modern Egyptians, II. 337.

The bees keep their *tiresome* whine round the resinous firs on the hill. *Browning*, Up at a Villa.

His generosity to his troops of *tiresome* cousins has been, at all events, without graciousness.
The Academy, May 11, 1889, p. 330.

=Syn. 1 and 2. *Tedious*, *Irksome*, etc. See *wearisome*.—2. Dull, humdrum.

tiresomely (tīr′sum-li), *adv.* In a tiresome manner; wearisomely.

tiresomeness (tīr′sum-nes), *n.* The state or quality of being tiresome; wearisomeness; tediousness.

I should grow old with the *Tiresomeness* of living so long in the same Place, tho' it were Rome itself.
N. Bailey, tr. of Colloquies of Erasmus, I. 345.

tire-valiant† (tīr′val″yant), *n.* A head-dress for women.

Thou hast the right arched bent of the brow, that becomes the ship-tire, the *tire-valiant*, or any tire of Venetian admittance. *Shak.*, M. W. of W., iii. 3. 60.

tirewoman† (tīr′wum″an), *n.*; pl. *tirewomen* (-wim″en). [< *tire*[4] + *woman*.] A woman employed to dress, or to attend to the dressing or dresses of, others; a lady's-maid; a female dresser in a theater; a tiring-woman.

The bride next morning came out of her chamber, dressed with all the art and care that Mrs. Toilet, the *tire-woman*, could bestow on her. *Steele*, Tatler, No. 79.

tiriak†, *n.* An obsolete variant of *theriac*.

tiriba (tē-rē′bä), *n.* [Tupi.] A Brazilian wedge-tailed parrakeet, *Conurus leucotis*, about 9 inches long, of a green color, with red on the head, wings, and tail, and white ear-coverts.

When the wind blaws loud and *tirls* our strae.
Remains of Nithsdale Song, p. 33.

3. To strip of something; uncover; unroof; divest, as of covering or raiment.

Suppose then they should *tirle* ye bare,
And gar ye fike.
Ramsay, Poems, I. 300. (*Jamieson.*)

[Scotch in all uses.]

To tirl the pin. See *to tirl at the pin*, under I.

tirl[1] (tėrl), *n.* [< *tirl*[1], *v.*] 1. A twirl or whirl; a vibration, or something vibrating or whirling.

The young swankies on the green
Took round a merrie *tirle*.
Ramsay, Poems, I. 262. (*Jamieson.*)

2. A turn; a try.

She would far rather had a *tirrle*
From an Aquavitae barrel.
Cleland, Poems, p. 23. (*Jamieson.*)

[Scotch in both uses.]

tirl[2] (tėrl), *n.* [< *tirl*[1], *v.*, as a var. of *thirl*[1], *v.*] A substitute for a trundle-wheel or lantern-wheel in a mill. It has 12 arms consisting of boards set in an upright wooden shaft about 4 feet long, with an iron spindle which passes up through the nether millstone, and is fastened to and turns the upper one. See *tirl-mill*. [Shetland.]

tirlie-whirlie (tėr′li-hwėr′li), *n.* and *a.* [< *tirl*[1] + *whirl*[1], with dim. termination.] **I.** *n.* 1. A whirligig, teetotum, or similar toy.—2. An ornamental combination of irregular or twisting lines.

tirne†, *v. t.* A Middle English form of *turn*.

tirot, *n.* The more correct spelling of *tyro*.

tirocinium (tī-rō-sin′i-um), *n.* [L., < *tiro*, a raw recruit: see *tyro*.] The first service of a soldier; hence, the first rudiments of any art; a novitiate. The word is used by Cowper as a title for a poem on schools.

tiroire (F. pron. tē-rwor′), *n.* [F.] A tail-like appendage to a hawk's hood. See *hood*.

tirolite, *n.* See *tyrolite*.

tiront (tī′ron), *n.* [Also *tyrone*; < F. **tiron* = Sp. *tiron* = It. *tirone*, < L. *tiro*(*n*-), recruit, novice: ★see *tyro*.] A tyro.

T-iron (tē′ī″ėrn), *n.* An angle-iron having a flat flange and a web, and in section resembling the letter T. Also written *tee-iron*.

Tironian (tī-rō′ni-an), *a.* [< L. *Tironianus*, of or pertaining to Tiro, < *Tiro*(*n*-), Tiro (see def.).] Of or pertaining to Tiro, the learned freedman, pupil, and amanuensis of Cicero.—**Tironian notes**, the stenographic signs or system of signs used by the ancient Romans. This system, though older than Tiro, and probably Greek in origin, was named after him, apparently as the first extensive practitioner of the art of stenography in Rome. In it parts of the ordinary letters, or modifications of these parts, represent the letters. Several of these modifications answered to one consonant, each of them representing the consonant with a different vowel. In addition to this, words were much abbreviated, and in course of time the total outline of a syllable or word so written often became more or less conventionalized. The number of such signs amounted to five thousand or upward. Although involving long training and a considerable strain on the memory, this system seems to have practically answered all the purposes of modern stenography. It was still in familiar use as late as the ninth century. From these Tironian notes (*notæ Tironianæ*) the shorthand-writers were called *notaries* (*notarii*).

tironism†, *n.* See *tyronism*.

tirr (tir), *v. t.* [A dial. var. of *tire*[1], < ME. *tiren*, etc.: see *tire*[2], *tear*[1].] To tear; uncover; unroof; strip; pare off with a spade, as sward, or soil from the top of a quarry. [Scotch.]

tirra-lirra (tir′ä-lir′ä), *n.* [An imitative var. of **tirelire* (= LG. *tierlier*), < OF. *tirelire*, *tirelyre*, the warbling of a lark, < *tirelirer* (> LG. *tierliren*) (= OIt. *tirelirare*), warble as a lark; a rimming word appar. of imitative intent.] The note of a lark, a horn, or the like.

The lark that *tirra-lyra* chants. *Shak.*, W. T., iv. 3. 9.

"*Tirra-lirra*" by the river
Sang Sir Lancelot.
Tennyson, Lady of Shalott, iii.

tirret (tir′et), *n.* [Also *tiret*; < OF. *tiret*, draft, pull, tug, line, etc., dim. of *tire*, draft, pull: see *tire*[3].] 1†. A leather strap for hawks, hounds, etc. *Halliwell.*—2. In *her.*, a bearing representing the swivel part of a fetter or prisoner's chain: it is sometimes said to represent a pair of handcuffs, and there is confusion between this bearing and *turret*.

tirrit (tir′it), *n.* [Appar. intended as a blunder for *terror*; for the termination, cf. *worrit*.] Terror; affright: a fanciful word put by Shakspere into the mouth of Mrs. Quickly.

Here's a goodly tumult! I'll forswear keeping house, afore I'll be in these *tirrits* and frights.
Shak., 2 Hen. IV., ii. 4. 220.

tirrivee, tirrivie (tir′i-vē, -vi), *n.* [Appar. a capricious word, vaguely imitative. Cf. *tervee*, *tervy*.] A fit of passion, especially when extravagantly displayed, as by prancing, stamping, etc.; a tantrum. *Jamieson.* [Scotch.]

A very weel-meaning good-natured man, . . . and indeed so was the Laird o' Glennaquoich too . . . when he wasna in ane o' his *tirrivies*. *Scott*, Waverley, lxix.

tirwhit†, *n.* Same as *tirwit*. *Skinner.*

tirwit (tėr′wit), *n.* [Formerly also *tirwhit*; imitative.] The common European lapwing or pewit, *Vanellus cristatus*. See cut under *lapwing*.

tiry (tīr′i), *a.* [< *tire*[1] + *-y*[1].] In a tired condition; liable to become tired, or to give out from fatigue. [Colloq.]

My horse began to be so *tiry* that he would not stirre one foote. *Coryat*, Crudities, I. 33, sig. D.

'tis (tiz). A contraction of *it is*, very common in prose speech and writing in the seventeenth and eighteenth centuries, but now chiefly used in poetry. The colloquial contraction of *it is* is *it's*. [In recent times often printed with an intermediate space, *'t is*.]

tisan†, *n.* An obsolete spelling of *ptisan*.

tisane (tē-zan′), *n.* [F.: see *ptisan*.] A decoction with medicinal properties. Compare *ptisan*.—**Tisane de Champagne**, a quality of champagne wine, lighter and less heady than ordinary champagnes. *Larousse.*—**Tisane de Feltz**, a decoction of sarsaparilla, isinglass, and sulphuret of antimony, official in the French Codex. It was formerly reputed to be an excellent antisyphilitic remedy.

tisar, *n.* In *glass-manuf.*, the fireplace or furnace used to heat the annealing-arch for plate-glass.

Tischeria (ti-shē′ri-ä), *n.* [NL. (Zeller, 1839), named after Von *Tischer* (1777–1849), a German naturalist.] An important genus of tineid moths, of the family *Lithocolletidæ*, of minute size and wide distribution. Their larvæ make large flat mines on the upper side of the leaves of various plants. About 20 species occur in the United States. *T. malifoliella* is a well-known apple-leaf feeder.

tishew†, *n.* An old spelling of *tissue*.

Tishri, Tisri (tish′ri, tiz′ri), *n.* [Heb. *tishrī*, < Chald. *sherā*, open, begin.] The first month of the Hebrew civil year, and the seventh of the ecclesiastical, answering to a part of our September and a part of October.

tisic†, **tisical**†, etc. Obsolete spellings of *phthisic*, etc.

Tisiphone (ti-sif′ō-nē), *n.* [L., < Gr. Τισιφόνη, Tisiphone, lit. 'avenger of murder,' < *τίνειν*, repay, requite, + *φόνος*, murder.] 1. In *classical myth.*, one of the Furies, the others being Alecto and Megæra.—2. [NL.] In *zoöl.*, a generic name of certain insects and reptiles. *Hübner*; *Fitzinger*.

Tissa (tis′ä), *n.* [NL. (Adanson, 1763).] A genus of plants, the sand-spurreys, belonging to the family *Silenaceæ*, and also known as *Buda* (Adanson, 1763), *Spergularia* (Persoon, 1805), and *Lepigonum* (Fries, 1817). The names *Tissa* and *Buda* were both first assigned to the genus in the same book and on the same page; and, as priority is considered to attach to *Tissa*, the name first printed on the page, all the others become synonyms. See *Spergularia*.

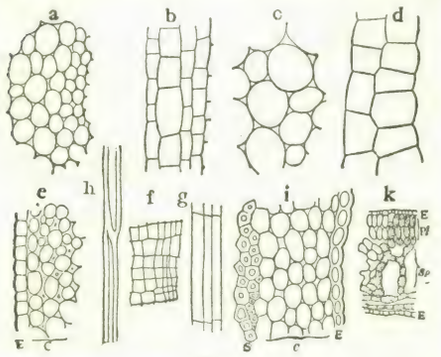
tissick†, *n.* An obsolete spelling of *phthisic*.

tisso (tis′ō), *n.* Same as *teeso*.

tissue (tish′ö), *n.* and *a.* [< ME. *tissue*, *tishew*, ★*tissew*, *tyssew*, *tysseu*, < OF. *tissu*, a ribbon, fillet, head-band, or belt of woven stuff, < *tissu*, m., *tisse*, f., woven, plaited, interlaced, pp. of **tistre* = Pr. *teisser* = Sp. *tejer* = Pg. *tecer* = It. *tessere*, < L. *texere*, weave: see *text*.] **I.** *n.* 1. A woven or textile fabric; specifically, in former times, a fine stuff, richly colored or ornamented, and often shot with gold or silver threads, a variety of cloth of gold; now, any light gauzy texture, such as is used for veils, or, more indefinitely, any woven fabric of fine quality: a generic word, the specific sense of which in any use is determinable only by its connection or qualification.

The firste thousand, that is of Dukes, of Erles, of Marquyses and of Amyralles, alle clothed in Clothes of Gold, with *Tysseux* of grene Silk. *Mandeville*, Travels, p. 233.

The vpper garment of the stately Queen
Is rich gold *Tissue*, on a ground of green.
Sylvester, tr. of Du Bartas's Weeks, ii., The Decay.



His skill in the judgment of rich *tissues* . . is exceeding. *J. F. Cooper*, Water-Witch, xxvii.

2†. A ribbon, or a woven ligament of some kind.

His helme to-hewen was in twenty places
That by a *tyssew* henge his bak byhynde.
Chaucer, Troilus, ii. 639.

3. In *biol.*, an aggregate of similar cells and cell-products in a definite fabric; a histological texture of any metazoic animal: as, muscular, nervous, cellular, fibrous, connective, or epithelial *tissue;* parenchymatous *tissue.* All parts of such organisms are composed of tissues, and the tissues themselves consist either of cells or of cell-products, of which delicate fibers are the most frequent form. Any tissue is an organ, but *tissue* specially notes the substance of any organ, or the mode of coherence of its ultimate formative constituents, rather than its formation in gross, and requires a qualifying word for its specification.

4. Specifically, in *bot.*, the cellular fabric out of which plant-structures are built up, being composed of united cells that have had a common origin and have obeyed a common law of growth. The tissue-elements are the cells in their various modifications, and, although seemingly diverse as to

Tissue.

Parenchyma.—*a*, transverse section of the cortex in the stem of *Datura Tatula*; *b*, longitudinal section of the same; *c*, transverse section of the pith in the stem of the same plant; *d*, longitudinal section of the same; *e*, the collenchymatous tissue in the stem of the same plant, transverse section (*C*, collenchyma; *E*, epidermis).

Prosenchyma.—*f*, transverse section of the intrafascicular cambium in the stem of the same plant; *g*, longitudinal section of the same; *h*, the ends of two sclerenchymatous cells from the stem of *Cardamine bulbosa*; *i*, transverse section of the stem of the same plant (*S*, sclerenchyma; *C*, cortex; *E*, epidermis); *k*, transverse section of leaf of *Saxifraga hieracifolia* (*E*, epidermis; *Pl*, palisade-cells; *Sp*, spongy parenchyma).

form, size, and function, may be reduced to two principal types: namely, parenchyma in its widest sense, including parenchyma proper, collenchyma, sclerotic parenchyma, epidermal cells, suberous parenchyma, etc., and prosenchyma in its widest sense, including prosenchyma proper, typical wood-cells, tracheids, ducts, bast-cells, sieve-cells, etc. See *parenchyma* and *prosenchyma.*

5. Figuratively, an interwoven or interconnected series or sequence; an intimate conjunction, coördination, or concatenation.

We shall perceive . . . [history] to be a *tissue* of crimes, follies, and misfortunes.
Goldsmith, Citizen of the World, xlii.

It is not easy to reconcile this monstrous *tissue* of incongruity and dissimulation with any motives of necessity or expediency. *Prescott*, Ferd. and Isa., ii. 17.

6. Same as *tissue-paper.* See *paper.*—7. In *photog.*, a film or very thin plate of gelatin compounded with a pigment, made on a continuous strip of paper, and used, after bichromate sensitization, for carbon-printing.

The *tissue* is prepared in three varieties of colour, . . . indian ink, sepia, and photographic purple.
Workshop Receipts, 1st ser., p. 273.

8. In *entom.*, the geometrid moth *Scotosia dubitata:* an English collectors' name.—**Accidental tissue,** any tissue that grows in or upon a part to which it is foreign. It may be similar to a tissue normally found elsewhere in the body (analogous), or unlike any of the normal tissues of the organism (heterologous). A bony tumor growing in muscle is an example of analogous accidental tissue; cancer, of heterologous.—**Adenoid, adipose, aqueous, areolar, basement, cartilaginous, cavernous, chordal, cicatricial tissue.** See the qualifying words.—**Adventitious tissue.** Same as *accidental tissue.*—**Cellular tissue.** (*a*) In *bot.*, parenchyma. See def. 4 and *cellular.* (*b*) In *zoöl.*, areolar tissue. See def. 3.—**Cloth of tissue†.** See *cloth.*—**Conducting tissue,** in *bot.*, loose cellular tissue forming the body of the stigma and filling or lining the axis of the style, through which the pollen-tubes make their way to the cavity of the ovary. Also *conductive tissue.*—**Connective tissue.** See *connective.*—**Cribriform tissue.** (*a*) In *bot.*, cribrose cells, or sieve-cells, taken collectively; sieve-tissue. See *sieve-cell.* (*b*) In *zoöl.*, areolar tissue.—**Dartoid, elastic, epidermal, erectile tissue.** See the adjectives.—**Fatty tissue.** Same as *adipose tissue.*—**Felted, fibrilliform, fibrous, filamentous, gelatigenous, gelatinous tissue.** See the adjectives.—**Fundamental tissue.** See *fundamental cells,* under *fundamental.*—**Glandular woody tissue.** See *glandular.*—**Granulation tissue.** See *granulation.*—**Healing tissue,** in *bot.*, a general name for the cellular matter produced for the repair of injury in plants. Where any part of a plant has suffered serious mechanical injury by which the deeper tissues are exposed, the surface of the wound exhales moisture very rapidly, and soon becomes dry. This drying of the exposed tissues is fatal to their component cells, and the organic contents soon undergo chemical decomposition. This decomposition would very soon extend to neighboring cells were it not arrested by the tissues for repair. The principal healing tissue is cork. The soft tissues just below the wound immediately become merismatic and behave precisely like normal cork-meristem, covering the entire wound with a grayish or brownish film, which is in unbroken connection with the edges of the wound. Another form of repair is by callus, in which some of the cells at the exposed surface give rise to elongated sac-like bodies, which fill up the greater part of the injured cavity, and serve as a new epidermis. *Goodale*, Phys. Bot.—**Indifferent tissues.** See *indifferent cells,* under *cell.*—**Interstitial, lardaceous, laticiferous, leprous, lymphoid, muscular, osteogenic tissue.** See the adjectives.—**Laminated tissue,** cellular tissue.—**Osteoid tissue,** a tissue, formed of cells with large nuclei, lying in angular cavities of a faintly striated cartilage-like intercellular substance. It arises from lymphoid medullary cells, or from the periosteum, and it becomes converted into bone by impregnation with lime-salts, together with slight morphological modifications.—**Reticular tissue.** Same as *adenoid tissue.*—**Retiform connective tissue.** Same as *adenoid tissue.*—**Sclerous tissue,** a collective term embracing the cartilaginous, fibrous, and osseous tissues.—**Sieve-tissue.** See *cribriform tissue,* above.—**Splenic tissue.** Same as *spleen-pulp.*—**Sporogenous, sustentacular, tracheary,** etc., **tissue.** See the adjectives.—**Vegetable tissue.** See def. 4.

II. *a.* Made of tissue.

Her head was decked with a gypsy hat, from which floated a blue *tissue* veil. *Harper's Mag.*, LXXVIII. 440.

★**tissue** (tish′ö), *v. t.*; pret. and pp. *tissued*, ppr. *tissuing*. [< *tissue*, *n.*] 1. To weave with threads of silver or gold, as in the manufacture of tissue.

The chariot was covered with cloth of gold *tissued* upon blue. *Bacon*, New Atlantis.

2. To clothe in or adorn with tissue.

Crested knights and *tissued* dames
Assembled at the glorious call. *Wharton.*

tissued (tish′öd), *p. a.* [< *tissue* + *-ed*2.] Variegated in color; rich and silvery as if made of tissue.

With radiant feet the *tissued* clouds down steering.
Milton, Nativity, l. 146.

tissue-paper (tish′ö-pā″pėr), *n.* [So called as being used to place between the folds of the fine silk fabric called *tissue;* < *tissue*, 1, + *paper.*] See *paper.*

tissue-secretion (tish′ö-sē-krē″shọn), *n.* In *Actinozoa*, the sclerenchyma of sclerodermic corals, secreted by the polyps themselves and ★not by the cœnosarc: opposed to *foot-secretion.*

tit1 (tit), *n.* [Also *tet;* < (*a*) ME. *tit, titte, tette,* < AS. *tit* (*titt-*) = MD. *titte* = MLG. LG. *titte* = MHG. G. *zitze* (cf. Sw. *tisse,* < G. ?); mixed in E. with (*b*) E. *teat,* < ME. *tete,* < OF. *tete, tette,* F. *tette* (also *teton, tettin*) = Sp. Pg. *teta* = It. *tetta* (also *zitta, cizza, zezzolo*), teat (cf. F. *teter* = Sp. *tetar* = It. *tettare,* suckle); root unknown. (*c*) Cf. OHG. *tuttā, tutā, tutto, tuto,* MHG. *tutte, tute,* dim. *tütel,* teat; Icel. *tāta,* teat; W. *didi, did,* teat; Gr. τιτθός, τίτθη, teat. The relations of these last forms are uncertain.] A teat. See ★*teat.*

tit2 (tit), *n.* [< ME. **tit* (found only in comp.: see *titmouse*), < Icel. *tittr,* a little bird, = Norw. *tita,* a little bird (cf. Icel. *titlingr,* > E. *titling*); perhaps connected with *tit*3, 'a small thing.' The word appears also in *titlark, titling*1, *titmouse,* and terminally in *tomtit, bottle-tit, coal-tit, thrush-tit, wren-tit,* and other names.] One of several small birds. Specifically—(*a*) A titling or pipit. See *titlark.* (*b*) A tomtit or titmouse. (*c*) With a qualifying word, or in composition, one of many different birds which resemble or suggest titmice, especially of India and the East Indies. See phrases and words following.—**Azure tit** or **titmouse,** *Parus* (*Cyanestes*) *cyanus,* in part blue, and widely distributed in the northern Palearctic region. *Pennant*, 1785; *Latham*, 1787.—**Bearded tit.** See *bearded.*—**Cape tit,** a penduline titmouse of South Africa, *Ægithalus pendulinus.*—**Gold tit,** an American titmouse, *Auriparus flaviceps,* of Texas to California and southward, 4 inches long, ashy and whitish with the whole head golden-yellow. See *titmouse.*—**Ground tit.** See *wren-tit.*—**Hill tit,** one of numerous and various small oscine birds of the hill-countries of India: very loosely

Hill tit (*Minla igneotincta*).

used. See *hill-tit, Liotrichidæ,* and *Siva,* 2. All these birds are now usually thrown into the non-committal family *Timeliidæ.* In illustration of the group may be noted the members of the genus *Minla,* as *M.* (formerly *Liothrix*) *igneotincta,* of the Himalayan region and southward, and

Hill tit (*Liothrix lutea*).

of *Liothrix* proper, as *L. lutea.* See also *tit-babbler* (with cut).—**Hudsonian** or **Hudson's Bay tit,** *Parus hudsonicus,* of New England and northward, resembling a chickadee, but marked with brown.—**Long-tailed tit.** See *titmouse* (with cut).—**Penduline tit,** any titmouse of the genus *Ægithalus,* with six or eight wide-ranging species in Europe and Africa, as *Æ. pendulinus.*—**Siberian tit,** *Parus cinctus.*—**Toupet tit.** See *toupet,* 2.—**Tufted tit,** a United States crested titmouse, *Parus* (*Lophophanes*) *bicolor;* the peto. See cut under *titmouse.* (See also *bottle-tit, bush-tit, coal-tit, thrush-tit, wren-tit.*)

tit3 (tit), *n.* [Early mod. E. also *titt;* appar. orig. 'something small.' Cf. *tit*2, *titty*2. Cf. also *tot*1.] 1. A small or poor horse.

The nag or the hackeneie is verie good for trauelling. . . . And if he be broken accordinglie, you shall haue a little *tit* that will trauell a whole daie without anie bait. *Stanihurst*, Descrip. of Ireland, ii. (Holinshed's Chron., I.).

The Modern Poets seem to use Smut as the Old Ones did Machines, to relieve a fainting Invention. When Pegasus is jaded, and would stand still, he is apt, like other *Tits,* to run into every Puddle.
Jeremy Collier, Short View (ed. 1698), p. 6.

2. A child; a girl; a young woman: a depreciatory term.

I wonder that any man is so mad to come to see these rascally *tits* play here. *B. Jonson*, Cynthia's Revels, Ind.

3. A bit; morsel. *Halliwell.*

[Obsolete or rare in all uses.]

tit4 (tit), *n.* [In the phrase *tit for tat,* a variation of *tip for tap:* see under *tip*2, *n. Tit* and *tat* in this phrase are in themselves meaningless; the phrase is often written with hyphens, *tit-for-tat,* and indeed is better so written, being practically one word.] In the phrase *tit for tat* (literally, in the original form *tip for tap,* 'blow for blow'), a retaliatory return; an equivalent by way of repartee or answer: as, to give a person *tit for tat* in a dispute or a war of wit.

Tit for tat, Betsey! You are right, my girl.
Colman and Garrick, Clandestine Marriage, v. 2.

I have had my *tit-for-tat* with John Russell, and I turned him out on Friday last.
Palmerston, in McCarthy's Hist. Own Times, xxiii.

tit5† (tit), *v. t.* [< ME. *titten, tytten,* origin obscure; cf. *tight*1, *v.*] To pull tightly. (*Halliwell,* under *titte* (2).)

And the feete uppward fast knytted,
And in strang paynes be streyned and *tytted.*
Hampole, MS. Bowes, p. 210. (*Halliwell.*)

tit5† (tit), *n.* [< ME. *titte;* < *tit*5, *v.*] A pull.

Yf that tre war tite pulled oute
At a *titte,* with al the rotes oboute.
Hampole, Pricke of Conscience, l. 1915 (Morris and Skeat's [Spec. Eng. Lit.).

tit6†, *adv.* A Middle English variant of *tite*1.

Titan1 (tī′tạn), *n.* [< ME. *Titan, Tytan,* < OF. *Titan,* F. *Titan* = Sp. *Titán* = Pg. *Titão* = It. *Titano* = G. Dan. Sw. *Titan,* < L. *Titan,* rarely *Titanus* (pl. *Titanes, Titani*), < Gr. Τιτάν (pl. Τιτᾶνες, Τιτῆνες), a Titan; cf. τιτώ, day, < √ *τι,* lighten, illumine.] 1. In *mythol.*, one of a race of primordial deities, children of Uranus and Ge (Heaven and Earth), or their son Titan, supposed to represent the various forces of nature. In the oldest accounts there were six male Titans (Oceanus, Cœus, Crius, Hyperion, Japetus, and Kronos), and six female (Theia, Rhea, Themis, Mnemosyne, Phœbe, and Tethys). They were imprisoned by their father Uranus from their birth, but, after unmanning and dethroning him, were delivered by Kronos. Zeus, son of Kronos, compelled him to disgorge his elder brothers and sisters, whom he had swallowed at their birth, and after a terrible war thrust the Titans (except Oceanus) into Tartarus, under guard of the hundred-armed giants. In the later legends, Titan, the father of the Titans, yielded the supreme power to his younger brother Kronos, but regained it, and was finally overcome by the thunderbolts of Zeus (Jupiter), son of Kronos (Saturn), who then became the supreme god. The Titans in their wars are said to have piled mountains upon mountains to scale heaven, and they are taken as the types of lawlessness, gigantic size, and enormous strength.

'Tis an old tale; Jove strikes the *Titans* down,
Not when they set about their mountain-piling,
But when another rock would crown the work.
Browning, Paracelsus, iv.

2. Any one of the immediate descendants of the Titans, as Prometheus and Epimetheus.—3. The sun personified, Titan being at times substituted by the Latin poets for Helios as god of the sun.

And *Titan*, tired in the mid-day heat,
With burning eye did hotly overlook them.
Shak., Venus and Adonis, l. 177.

4. The sixth in order of the eight satellites of the planet Saturn, and the largest, appearing as a ninth magnitude star. See *satellite*.—5. A genus of beetles. *Matthews*.

titan[2] (tī′tan), *n.* [= F. *titane* = Sp. Pg. It. *titanio*, < NL. *titanium*: see *titanium*.] 1. A calcareous earth; titanite.—2. Titanium.

titanate (tī′ta-nāt), *n.* [< *titan(ic)*[2] + *-ate*[1].] A salt of titanic acid.

Titanesque (tī-ta-nesk′), *a.* [< *Titan*[1] + *-esque*.] Characteristic or suggestive of the Titans, or of the legends concerning them; of Titanic character or quality.

His extraordinary metaphors, and flashes of *Titanesque* humour. *Froude*, Carlyle (First Forty Years), xx.

Titaness (tī′tan-es), *n.* [< *Titan*[1] + *-ess*.] A female Titan; a woman of surpassing size or power.

So likewise did this *Titanesse* aspire
Rule and dominion to herselfe to gaine.
Spenser, F. Q., VII. vi. 4.

Titania (tī-tā′ni-ą), *n.* [< L. *Titania*, poetically applied to Diana (as well as to Latona, Pyrrha, and Circe), fem. of *Titanius*, of the Titans, < *Titan*, Titan: see *Titan*.] 1. The queen of Fairyland, and consort of Oberon.

Oberon. Now, my *Titania*; wake you, my sweet queen.
Titania. My Oberon! what visions have I seen!
Shak., M. N. D., iv. 1. 80.

2. A genus of lepidopterous insects. *Hübner*, 1816.

titanian[1] (tī-tā′ni-an), *a.* [< L. *Titanius*, of the Titans, < *Titan*, Titan: see *Titan*.] Same as *titanic*[1]. *Johnson*, in Boswell, I. 174.

titanian[2] (tī-tā′ni-an), *a.* [< *titanium* + *-an*.] Same as *titanic*[2].

titanic[1] (tī-tan′ik), *a.* [= F. *titanique* = Sp. *Titánico* = Pg. It. *Titanico*, < L. as if **Titanicus* (for which *Titaniacus*), < Gr. Τιτανικός, of or pertaining to a Titan or the Titans, < Τιτάν, Titan: see *Titan*[1].] Of, pertaining to, or characteristic of the Titans; hence, enormous in size, strength, or degree; gigantic; superhuman; huge; vast.

titanic[2] (tī-tan′ik), *a.* [< *titanium* + *-ic*.] Of or pertaining to titanium.—**Titanic acid**, TiO_2, titanium dioxid. When prepared artificially it is a white tasteless powder which assumes a yellow color when gently heated. It is fusible in the oxyhydrogen flame. It is insoluble in water, in hydrochloric acid, and in dilute sulphuric acid. It occurs in nature in three forms, as rutile, octahedrite or anatase, and brookite. Also called *titanic oxid* or *anhydrid*.—**Titanic iron ore.** Same as *ilmenite*.—**Titanic schorl**, a name of rutile.

titanical (tī-tan′i-kal), *a.* [< *titanic*[1] + *-al*.] Same as *titanic*[1].—**Titanical stars**†, the planets.

titaniferous (tī-ta-nif′e-rus), *a.* [< NL. *titanium* + L. *ferre*, = E. *bear*[1], + *-ous*.] Containing titanium: as, *titaniferous* iron.—**Titaniferous cerite.** Same as *tscheffkinite*.—**Titaniferous iron ore, titaniferous oxid of iron,** ilmenite.

titanite (tī′ta-nīt), *n.* [< *titanium* + *-ite*[2].] An ore of titanium. See *sphene*.

titanitic (tī-ta-nit′ik), *a.* [< *titanite* + *-ic*.] Same ★as *titanic*[2].

titanium (tī-tā′ni-um), *n.* [NL., so called in fanciful allusion to the Titans; < L. *Titan*, < Gr. Τιτάν, Titan: see *Titan*.] Chemical symbol, Ti; atomic weight, 48.1. A metal which is not found native, but as artificially prepared is a dark-gray powder having a decided metallic luster, and resembling iron in appearance. It occurs, in the form of the dioxid, in three different crystalline forms—rutile, brookite, and anatase—and is also found quite frequently in combination with the protoxid of iron, mixed with more or less of the peroxid of the same metal. (See *ilmenite*.) Titanium appears to be a pretty widely distributed element, having been found in many minerals and rocks, as well as in clays and soils resulting from their decomposition, but it nowhere occurs in considerable quantity in any one locality; it has also been detected in meteorites and in the sun. Titanium is very remarkable in its power of combining with nitrogen at a high temperature. Certain copper-colored cubical crystals which are not infrequently found in the "bear" of blast-furnaces, and were supposed by Wollaston to be pure titanium, were shown by Wöhler to consist of a cyanonitrid of that metal. As titanium enters into the composition of so many iron ores, it is natural that it should have been found in many kinds of pig-iron. Its presence in small quantity does not appear to have an injurious effect. A considerable number of patents have been taken out for supposed improvements in the manufacture of iron and steel in which titanium has played an important part. A so-called "titanic steel" was at one time advertised; but several chemists of high reputation have declared themselves unable to detect any titanium in it. The chemical relations of titanium are peculiar: in some respects it stands midway between tin and silicon; in other ways it is allied to iron, chromium, and aluminium. See the supplement.

titanium-green (tī-tā′ni-um-grēn), *n.* Titanium ferrocyanide, precipitated by potassium ferrocyanide from a ferruginous solution of titanic chlorid, recommended as an innocuous substitute for Schweinfurt green and other arsenical green pigments. The color, however, is far inferior to that of Schweinfurt green.

Titanomachy (tī-ta-nom′a-ki), *n.* [Gr. Τιτανομαχία, < Τιτάν, Titan, + μάχη, battle.] The battle or war of the Titans with the gods. *Gladstone*, Contemporary Rev., LI. 760.

Titanomys (tī-tan′ō-mis), *n.* [NL. (Von Meyer, 1843), < Gr. Τιτάν, Titan, + μῦς, mouse.] A genus of fossil duplicident rodents, of the family *Lagomyidæ*, related to the living pikas, but characterized by the single upper and lower premolar, instead of two such teeth.

Titanotheriidæ (tī-tā″nō-thē-rī′i-dē), *n. pl.* [NL., < *Titanotherium* + *-idæ*.] A family of extinct perissodactyls, based on the genus *Titanotherium*.

titanotherioid (tī-tā-nō-thē′ri-oid), *n.* and *a.* [< *Titanotherium* + *-oid*.] **I.** *n.* A titanotherium, or a related mammal. *Nature*, XLI. 347.

II. *a.* Resembling or related to the genus *Titanotherium*.

Titanotherium (tī-tā-nō-thē′ri-um), *n.* [NL. (Leidy, 1853), < Gr. Τιτάν, Titan, + θηρίον, a wild beast.] 1. A genus of gigantic perissodactyl mammals from the Miocene of North America.—2. [*l. c.*] A member of this genus.

titan-schorl (tī′tan-shôrl), *n.* Native oxid of titanium.

tit-babbler (tit′bab″lėr), *n.* A hill-tit, *Trichostoma rostratum*, inhabiting the Malay peninsula, Sumatra, and Borneo. It was originally described by Blyth in 1842 as *Trichostoma rostratum*, and

Tit-babbler (*Trichostoma rostratum*).

has since been placed in six other genera, with various specific names. It is 5 inches long, with red eyes, bluish feet, and varied brownish coloration. The name extends to other hill-tits which have improperly been placed in *Trichostoma*, the one here named being the only member of this genus in a proper sense.

titbit (tit′bit), *n.* [Also *tidbit*; < *tit*[3], a bit, morsel, + *bit*.] A delicate bit; a sweet morsel.=Syn. *Delicacy*, *Dainty*, *Tidbit*. See *delicacy*.

tite[1] (tīt), *adv.* [Also spelled *tight*, and confused with *tight*[1]; also *tith*; < ME. *tite*, *tyte*, *tit*, *tyt*, erroneously *tigt*, also *tid*, < Icel. *tītt*, quickly, neut. of *tīdhr*, frequent, usual, eager (superl. in the phrase *sem tīdhast*, quickly, immediately). Cf. *titely*.] Quickly; soon; fast: as, run as *tite* as you can. [Obsolete or prov. Eng. and U. S.]

Then the troiens full *tyt* tokyn there hertes.
Destruction of Troy (E. E. T. S.), l. 6518.

As *tit* as thei come him to the sothe for to telle,
Thei sett hem doun softly that semly be-fore.
William of Palerne (E. E. T. S.), l. 852.

And who fyndis hym greued late hym telle *tyte*.
York Plays, p. 304.

As tite† (without a following *as*), quickly; immediately.

I shal telle the *as tite* what this tree hatte.
Piers Plowman (B), xvi. 61.

tite[2]†, *a.* An old spelling of *tight*[1]. *Bailey*.

tite[3]†. A Middle English form of *tideth*, third person singular present indicative of *tide*[1].

titel†, *n.* A Middle English form of *tittle*[2].

titely† (tīt′li), *adv.* [Also spelled *tightly*, and confused with *tightly*[1]; also *tithly*; < ME. *tytly*, erroneously *tigtly*, also *tidliche*, *tidlike*, < Icel. *tīdhuliga*, frequently, < *tīdhr*, frequent (neut. *tītt*, quickly): see *tite*[1].] Quickly; soon.

With-out tarying to his tent *tytly* thai yode,
And were set all samyn the souerain before.
Destruction of Troy (E. E. T. S.), l. 1094.

Hold, sirrah, bear you these letters *tightly*;
Sail like my pinnace to these golden shores.
Shak., M. W. of W., i. 3. 88.

titer†, **titerer**†. Old spellings of *titter*[1], *titterer*.

tit-for-tat (tit′fôr-tat′), *n.* See *tit*[4].

tith† (tith), *adv.* [A var. of *tite*[1], < ME. *tit*, *tid*, quickly: see *tide*[1].] Same as *tite*[1].

Of a good stirring strain too, she goes *tith*.
Fletcher, Loyal Subject, iii. 4.

tithable (tī′ᵺa-bl), *a.* and *n.* [Also *titheable*; < *tithe* + *-able*.] **I.** *a.* 1. Subject to the payment of tithes, as property; capable of being tithed.

It is not to be expected from the nature of these general commentaries that I should particularly specify what things are *tithable* and what not, the time when, or the manner and proportion in which, tithes are usually due. *Blackstone*, Com., II. iii.

2†. Assessable for tithes, or for the payment of any tax to a parish, as a person.

They [Virginians] call all negroes above sixteen years of age *tithable*, be they male or female, and all white men of the same age. *Beverley*, Virginia, iv. ¶ 18.

II.† *n.* A person by or for whom tithes or parish taxes were payable.

Their parishes are accounted large or small, in proportion to the number of *tithables* contained in them, and not according to the extent of land. *Beverley*, Virginia, iv. ¶ 33.

★**tithe**[1] (tīᵺ), *a.* and *n.* [Formerly also *tythe*; < ME. *tithe*, *tythe*, *tethe*, < AS. *teótha* for **teóntha*, < *teón*, *tién*, *týne*, ten: see *ten*, *tenth*.] **I.**† *a.* Tenth.

Every *tithe* soul, 'mongst many thousand.
Shak., T. and C., ii. 2. 19.

II. *n.* 1. A tenth; the tenth part of anything; hence, any indefinitely small part.

I have searched . . . man by man, boy by boy; . . . the *tithe* of a hair was never lost in my house before.
Shak., 1 Hen. IV., iii. 3. 66.

2. A contribution or tax for some public use, either voluntary or enforced, of one tenth of the quantity or of the value of the subject from or on account of which it is paid; hence, any ratable tax payable in kind or by commutation of its value in money. The levying of tithes in kind on natural productions or the proceeds of industry was generally practised in ancient times, for both civil and ecclesiastical uses; and this is still the prevalent method of taxation for all purposes in Mohammedan countries. It was established and definitely regulated for the support of religion among the Hebrews; and it was revived for the support of the Christian church by a law of Charlemagne about the beginning of the ninth century, after some previous fluctuating use of it. Ecclesiastical tithes were always more or less oppressive and unequal in their incidence, and they have been generally abolished except in Great Britain, where they are still maintained, mainly in the shape of commuted rent-charges upon land. As there recognized, *tithe* is defined as the tenth part of the increase annually arising from the profits of land and stock and the personal industry of the inhabitants, allotted for the maintenance of the clergy or priesthood, for their support, and other church purposes. Under the ancient Jewish law, tithes of all produce, including flocks and cattle, were to be given to the Levite, and of this tithe or tenth a tenth was to be given to the priests. In modern ecclesiastical usage, tithes are divided into personal, predial, and mixed: *personal*, when accruing from labor, art, trade, and manufacture; *predial*, when issuing directly from the earth, as hay, wood, grain, and fruit; and *mixed*, when accruing from beasts which are fed from the ground. Another division of tithes is into great and small. *Great tithes* consist of all species of corn and grain, hay and wood; *small tithes*, of predial tithes of other kinds, together with mixed and personal tithes. In England great tithes belong to the rector, and are hence called *parsonage* or *rectorial tithes*; and the others are due to the vicar, and are hence called *vicarage tithes*. (See *altarage*, 2.) In England tithes are now often impropriated to laymen, ecclesiastical corporations, etc. Several acts of Parliament have been passed for the commutation of tithes in England and Ireland, the usual form being the conversion of tithes into a rent-charge called the *tithe rent-charge*, payable in money, and chargeable on the land. In regard to tithes in Scotland, see *teind*.

3†. A tax assessed by the vestry of a parish.—**Commutation of tithes**, in England and Ireland, the conversion of tithes into a rent-charge payable in money, and chargeable on the land. See *Commutation of Tithes Act*, under *commutation*.—**Composition of tithes.** Same as *real composition* (*b*) (which see, under *real*[1]).—**Saladin tithe**, a general tax on movable property and revenues from land levied in France and England in 1188 for the support of the third crusade, organized for the recovery of the Holy Land from the sultan Saladin. See *Ordinance of the Saladin Tithe*, under *ordinance*.—**Tithars of the tithes.** See *tithar*.

tithe[1] (tīᵺ), *v.*; pret. and pp. *tithed*, ppr. *tithing*. [Formerly also *tythe*; < ME. *tithen*, *tythen*, *tethen*, < AS. *teóthian*, tithe, < *teótha*, tithe, tenth: see *tithe*[1], *a.*] **I.** *trans.* 1. To subject to tithes or the payment of a tithe; impose a tithe or tenth of or upon.

When thou hast made an end of *tithing* all the tithes of thine increase. Deut. xxvi. 12.

2. To pay tithes on; give or yield up a tithe of.

Military spoil, and the prey gotten in war, is also tythable, for Abraham *tythed* it to Melchizedek.
Spelman, Tythes, xvi.

3†. To take or reckon by tenths or tens; take tithe or every tenth of.

Which Armie (saith Fernandes) he [the King] *tythed* out of his people, taking one onely of ten.
Purchas, Pilgrimage, p. 463.

The multitude are *tith'd*, and every tenth only spar'd.
Milton, Hist. Eng., vi.

To tithe mint and cumin, to exercise rigid authority or close circumspection in small matters, while neglecting greater or more important ones: with reference to Mat. xxiii. 23.

II.† *intrans.* To pay tithes. *Piers Plowman* (A), viii. 65.

For lamb, pig, and calf, and for other the like,
Tithe so as thy cattle the Lord do not strike.
Tusser, January's Husbandry, st. 42.

tithe[2]†, *v. t.* [ME. *tithen, tuthen,* < AS. *tīthian, tythian* (= OS. *tugithōn* = MHG. *ge-zwīden*), concede, grant.] To concede; grant. *Rob. of Gloucester.*

tithe-commissioner (tīᵺ′kọ-mish″ọn-ėr), *n.* One of a board of officers appointed by the English government for arranging propositions for commuting or compounding for tithes. *Simmonds.*

tithe-free (tīᵺ′frē), *a.* Exempt from the payment of tithes.

tithe-gatherer (tīᵺ′gaᵺ″ėr-ėr), *n.* One who collects tithes.

titheless (tīᵺ′les), *a.* [< *tithe*[1] + *-less.*] Tithe-free.

tithe-owner (tīᵺ′ō″nėr), *n.* A person to whom tithes are due; one who owns the right to receive and use the tithes of a parish or locality. In Great Britain many laymen are tithe-owners, through impropriation. *Encyc. Brit.*, XXIII. 412.

tithe-payer (tīᵺ′pā″ėr), *n.* One who pays tithes; a person from whom tithes are due.

tithe-pig (tīᵺ′pig), *n.* One pig out of ten, paid as a tithe or church-rate. *Shak.*, R. and J., i. 4. 79.

tithe-proctor (tīᵺ′prok″tọr), *n.* A levier or collector of tithes or church-rates.

tither[1] (tī′ᵺėr), *n.* [< ME. *tithere, tythere;* < *tithe*[1] + *-er*[1].] **1.** One who levies or collects tithes.—**2.** A tithe-payer.

Smale *tytheres* weren foule yshent.
Chaucer, Friar's Tale, l. 12.

3. An advocate or a supporter of tithes; one who maintains the principle of ecclesiastical tithing. [Rare.]

Tithers themselves have contributed to thir own confutation, by confessing that the Church liv'd primitively on Alms. *Milton*, Touching Hirelings.

tither[2] (tiᵺ′ėr), *indef. pron.* A Scotch form of *tother.*

The tane o' them is fu' o' corn,
The *tither* is fu' o' hay.
Willie and May Margaret (Child's Ballads, II. 173).

tithe-stealer (tīᵺ′stē″lėr), *n.* One who evades the payment of tithes, or who dishonestly withholds some part of the tithes due from him.

The 'squire has made all his tenants atheists and *tythe-stealers.* *Addison*, Spectator, No. 112.

tithing[1] (tī′ᵺing), *n.* [< ME. *tithing, tething, tending, teonding,* < AS. *teóthing, teóthung,* a tithing, tithe, decimation, a band of ten men; verbal n. of *teóthian*, tithe: see *tithe*[1], *v.*] **1.** In *old Eng. law*, a decennary; a number or company of about ten householders, or one tenth of a hundred (which see), who, dwelling near each other, were regarded as constituting a distinct community for some purposes of civil order and police regulation, the several members being treated as sureties or free pledges to the king for the good behavior of each other. Although this institution has long ceased, the name and corresponding territorial division are still retained in many parts of England.

2. The act of levying or taking tithe; that which is taken as tithe; a tithe.

tithing[2]†, *n.* Tidings. *Alliterative Poems* (ed. Morris), ii. 498.

tithing-man (tī′ᵺing-man), *n.* [< ME.**tithing-man,* < AS. *tēothingmann;* < *tithing*[1] + *man.*] **1.** In *old Eng. law*, the chief man of a tithing: same as *headborough.*—**2.** In England, a peace-officer; an under-constable; in *early New England hist.*, a town officer elected each year to exercise a general moral police (derived from the constabulary functions of the English tithing-man) in the town. Later his functions were nearly confined to preserving order during divine service and enforcing attendance upon it. An officer called the *tithing-man*, with similar moral police duties, was also, in the seventeenth century, chosen in Maryland manors.

The oldest people in New England remember the *tithing-man* as a kind of Sunday Constable, whose special duty it was, in the old parish meeting-house, to quiet the restlessness of youth and to disturb the slumbers of age.
Johns Hopkins Hist. Studies, I. 1.

tithing-penny† (tī′ᵺing-pen″i), *n.* A small sum paid to the sheriff by each tithing, etc., for the charge of keeping courts.

tithly† (tith′li), *adv.* [A var. of *titely*, as *tith* of *tite*[1].] Same as *titely.*

I have seen him trip it *tithly.*
Beau. and Fl. (*Imp. Dict.*)

Tithonian (ti-thō′ni-an), *a.* [< L. *Tithonus,* < Gr. Τιθωνός, in Gr. myth. the brother of Priam and consort of Eos or Aurora, and endowed with immortality.] A name given by Oppel to a peculiar facies of Upper Jurassic rocks extensively developed in southern France and on the southern side of the Alps. The series thus named is characterized by limestones of very uniform lithological character, as if deposited in deep water when the conditions of deposition were for a long time remarkably uniform in character.

tithonic (ti-thon′ik), *a.* [= F. *tithonique,* < Gr. Τιθωνός, Tithonus: see *Tithonian.*] Pertaining to or denoting those rays of light which produce chemical effects; actinic. See *actinism.*

tithonicity (tith-ō-nis′i-ti), *n.* [< *tithonic* + *-ity.*] That property of light by which it produces chemical effects; actinism.

tithonographic (ti-thō-nō-graf′ik), *a.* [< Gr. Τιθωνός (see *tithonic*) + γράφειν, write.] Fixed or impressed by the tithonic rays of light; photographic.

Draper also did something like the same thing, but not quite the same thing, in what he called a *tithonographic* representation of the solar spectrum.
J. N. Lockyer, Spect. Anal., p. 81.

tithonometer (tith-ō-nom′e-tėr), *n.* [< Gr. Τιθωνός (see *tithonic*) + μέτρον, measure.] An instrument devised by Dr. John W. Draper (1844) to measure the tithonic or chemical action of light-rays by their effect in causing the chemical union of chlorin and hydrogen. See the quotation.

The *tithonometer* consists essentially of a mixture of equal measures of chlorine and hydrogen gases evolved from and confined by a fluid which absorbs neither. This mixture is kept in a graduated tube so arranged that the gaseous surface exposed to the rays never varies in extent, notwithstanding the contraction which may be going on in its volume, and the muriatic acid resulting from its union is removed by rapid absorption.
Amer. Jour. Sci., XLVI. 218.

tithymal† (tith′i-mal), *n.* [Also *tithymall, tithimal, titimal,* < OF. *tithymale,* < L. *tithymalus, tithymallus,* < Gr. τιθύμαλος, spurge, euphorbia.] A plant of the genus *Euphorbia;* spurge.

titi[1], *n.* See *tee-tee.*

★**titi**[2] (tē′tē), *n.* Same as *buckwheat-tree.*

Titianesque (tish-ia-nesk′), *a.* [< *Titian* (see def.) + *-esque.*] Characteristic of or resembling the works of the Venetian painter Titian (Tiziano Vecellio, 1477–1576). *Athenæum*, No. 3261, p. 537.

titifill†, *n.* See *titivil.*

titil†, *n.* and *v.* An obsolete form of *title, tittle*[2].

titillate (tit′i-lāt), *v. t.*; pret. and pp. *titillated*, ppr. *titillating.* [< L. *titillatus*, pp. of *titillare* (> It. *titillare* = Sp. *titilar* = Pg. *titillar* = F. *titiller*), tickle.] To tickle; excite a tickling or tingling sensation in; hence, to excite pleasurably; exhilarate; elate.

The gnomes direct, to every atom just,
The pungent grains of *titillating* dust.
Pope, R. of the L., v. 84.

titillation (tit-i-lā′shọn), *n.* [< F. *titillation* = Pr. *titillacio* = Sp. *titilación* = Pg. *titillação* = It. *titillazione,* < L. *titillatio(n-)*, a tickling, < *titillare*, pp. *titillatus*, tickle: see *titillate.*] **1.** The act of titillating, or the state of being titillated; a tickling or itching sensation or state of feeling; hence, a passing or momentary excitation, physical or mental.

A poor auricular transient *titillation.*
Rev. S. Ward, Sermons, p. 166.

The vulgar intellectual palate hankers after the *titillation* of foaming phrase. *Lowell*, Study Windows, p. 281.

2. That which titillates; something having titillating properties. [Rare.]

Your Spanish *titillation* in a glove
The best perfume. *B. Jonson*, Alchemist, iv. 2.

titillative (tit′i-lā-tiv), *a.* [< *titillate* + *-ive.*] Tending to titillate or tickle. *Imp. Dict.*

titimale†, *n.* Same as *tithymal. Halliwell.*

titivate, tittivate (tit′i-vāt), *v. i.* and *t.*; pret. and pp. *titivated, tittivated*, ppr. *titivating, tittivating.* [Appar. a factitious word, based perhaps on *tidy*[1], with a Latin-seeming termination as in *cultivate.*] To dress or spruce up; get or put into good trim; smarten, or smarten one's self. [Colloq. or slang.]

The girls are all so *titivated* off with false beauty that a fellow loses his heart before he knows it.
Dow's Sermons, I. 151. (*Bartlett.*)

Let me go down and settle whilst you call in your black man and *titivate* a bit. *Thackeray*, Virginians, xlviii.

titivil†, *n.* [Also *titifill*, early mod. E. *tyttyfylle;* origin obscure.] A knave; a jade.

titlark (tit′lärk), *n.* [< *tit*[2] + *lark*[1]. Cf. *titmouse.* Cf. Shetland *teetick*, titlark.] A small lark-like bird; hence, specifically, in *ornith.*, a titling; a pipit; any bird of the genus *Anthus* or subfamily *Anthinæ* (see these words, and *pipit*). There are many species, of most parts of the world. The common titlark of the United States is *A. ludovicianus*, which abounds in eastern parts of the country and in Canada. Several are common English birds, as the meadow-pipit or moss-creeper, *A. pratensis;* the tree-pipit or field-titlark, *A. arboreus;* and the sea-titlark or rock-pipit, *A. obscurus.* See *rock-pipit*, cut under *Anthus*, and phrases under *lark.*

title (tī′tl), *n.* [< ME. *title, titel, titil, titill*, a title, a stroke over an abridged word (a tittle), an epistle, < OF. *title, titre, tiltre*, a title, a stroke over an abridged word to indicate letters wanting, F. *titre*, a title, a stroke over an abridged word, right, claim, standard (of gold and silver), document, title in law, title-deed, head (of a page), etc., = Pr. *titol, tiltre, titule*, point or dot over *i*, = Sp. *título*, title, *tilde*, a stroke over a word, an accent, tilde, = Pg. *título*, title, *til*, a stroke over a word, an accent, tilde, = Cat. *títtla*, mark, sign, character, = It. *titolo*, title, = Wallach. *title*, circumflex, = D. *titel* = OHG. *titul*, MHG. *titel, tittel*, G. *titel* = Sw. Dan. *titel*, < L. *titulus*, title, a superscription, label, notice, token, etc., ML. also a stroke over an abridged word, a tittle; with dim. term. *-ulus*, from a root unknown. Cf. *tittle*[2] and *tilde*, doublets of *title.*] **1.** An inscription placed on or over something to distinguish or specialize it; an affixed individualizing term or phrase. [Obsolescent.]

And Pilate wrote a *title*, and put it on the cross.
John xix. 19.

Tell me once more what *title* thou [a casket] dost bear.
Shak., M. of V., ii. 9. 35.

2. A prefixed designating word, phrase, or combination of phrases; an initial written or printed designation; the distinguishing name attached to a written production of any kind: as, the *title* of a book, a chapter or section of a book, etc.; the *title* of a poem. The title of a book in the fullest sense includes all the matter in the title-page preceding the author's name or whatever stands in place of it. It may be either a single word or a short phrase, or be divided into a leading and a subordinate title connected by *or;* or it may be extended by way of description to the larger part of a closely printed page, according to a practice formerly very common. The title by which a book is quoted, however, is nearly always the shortest form that will serve to designate it distinctively. For bibliographical purposes, especially in the cases of old, rare, and curious books, the entire title-page, word for word and point for point, is regarded as the title, and when copied the actual typography is often indicated, as by a vertical bar after each word which ends a line, etc.

They live by selling *titles*, not books, and if that carry off one impression, they have their ends.
Dryden, Life of Lucian.

3. Same as *title-page*, in some technical or occasional uses.—**4.** In *bookbinding*, the panel on the back of which the name of the book is imprinted.—**5.** A descriptive caption or heading to a document; the formula by which a legal instrument of any kind is headed: as, the *title* of an act of Congress or of Parliament; the *title* of a deed, a writ, or an affidavit.—**6.** In some statutes, law-books, and the like, a division or subdivision of the subject, usually a larger division than *article* or *section.*—**7.** A characterizing term of address; a descriptive name or epithet.

Katharine the curst!
A *title* for a maid of all *titles* the worst.
Shak., T. of the S., i. 2. 180.

8. Specifically, a distinguishing appellation belonging to a person by right of rank or endowment, or assigned to him as a mark of respect or courtesy. Titles in this sense may be classified as—(1) *titles of office*, whether hereditary or limited to chosen incumbents, as emperor or empress, king or queen, president, judge, mayor, bishop or archbishop, rector, deacon, general, admiral, captain, etc.; (2) *hereditary titles of nobility*, as duke, marquis, earl, viscount, baron (the five British titles of nobility, of which any except the first may be held as a *title of courtesy* by the son and heir, or even the grandson, of the holder of a higher title), count, etc.; (3) *titles of distinction* or *merit*, as baronet (hereditary) and knight in Great Britain, and those conferred by membership of honorary orders, or the like; (4) *titles of attribution*, pertaining to specific offices or ranks, or bestowed upon certain historical persons, as your, his, or her Majesty, Highness, Grace, Honor, etc., and various epithets prefixed or appended to names, as the Honorable or Right Honorable (Hon. or Rt. Hon.), Reverend or Right Reverend (Rev. or Rt. Rev.), the Great, the Fair (Philip the Fair), the Catholic (Ferdinand the Catholic), etc.; (5) *titles of degree* (commonly called *degrees*), as doctor of divinity (D. D.), of laws (LL. D.), of philosophy (Ph. D.), or of medicine (M. D.),

master of arts (M. A. or A. M.), etc.; (6) *titles of direct address*, prefixed to names in either speech or writing, as Lord, Lady, Sir, Mister (Mr.), Mistress (Mrs.), Miss, Monsieur (M. or Mons.), Madame (Mme.), Doctor (Dr.), Professor (Prof.), Judge, General, etc. Titles of office are subdivided into *royal* or *imperial titles* (including those distinctively pertaining to members of sovereign families), *civil, judicial, ecclesiastical, military, naval*, etc. *Titles of honor* are such titles belonging to any of the above classes as denote superior rank or station, or special distinction of any kind.

9. Titular or aristocratic rank; titled nobility or dignity. [Rare.]

Tom never fails of paying his obeisance to every man he sees who has *title* or office to make him conspicuous; . . . *Title* is all he knows of honour, and civility of friendship. *Steele*, Tatler, No. 204.

10. A grade or degree of fineness; especially, the number of carats by which the fineness of gold is expressed.

Caret . . . is only an imaginary weight; the whole mass is divided into twenty-four equal parts, and as many as there are of these that are of pure gold constitute the *title* of the alloy. *F. Vors*, Bibelots and Curios, p. 58.

Jewellers solder with gold of a lower *title* than the article to be soldered. *Workshop Receipts*, 1st ser., p. 364.

11. A claim; a right; a designated ground of claim; a conferred or acquired warrant; an attributed privilege or franchise.

Therfor a *title* he gan him for to borwe
Of other sicknesse, lest men of him wende
That the hote fire of love him brende.
Chaucer, Troilus, i. 488.

Make claim and *title* to the crown of France.
Shak., Hen. V., i. 2. 68.

12. An inherent or established right; a fixed franchise; a just or recognized claim.

Even such an one [an ill prince] hath a *title* to our prayers and thanksgivings. *Bp. Atterbury*, Sermons, I. viii.

I have the same *title* to write on prudence that I have to write on poetry or holiness.
Emerson, Essays, 1st ser., p. 201.

13. In *law*: (*a*) Ownership: as, the *title* was not in the husband, but in his wife; her *title* was subject to encumbrance. (*b*) The channel through which an owner has acquired his right; the collection of facts from which, by the operation of law, his right arises: as, an abstract of *title* sets forth the chain of instruments, etc., by which the owner became owner. (*c*) Absolute ownership; the unencumbered fee. In a contract to convey title or to warrant the title, the word is usually understood in this sense, in which it includes the right of property, the right of possession, and actual possession. (*d*) The instrument which is evidence of a right; a title-deed. *Title* is more appropriately used of real property; *ownership* of personal, but also to some extent of real property. Among the older commentators on Roman law it was usual to call *title* (*titulus*) the contract or other legal act which was the remote cause of a person's acquiring property (for example, a contract of sale), while the immediate cause (for example, delivery) was called *modus*. In order to have ownership there had to be a perfect titulus and modus. This doctrine is alien to the Roman jurists, and is now universally repudiated.

14. Hence, a source or evidence of any right or privilege; that which establishes a claim or an attribution: as, Gray's "Elegy" is his chief *title* to fame; his discharge is his *title* of exemption.—**15.** *Eccles.*: (*a*) Originally, a district in the city of Rome with taxable revenue; hence, a district in that city attached to a parish church; a Roman parish church, as distinguished from a basilica or an oratory. The clergy belonging to these churches received the epithet "cardinal," whence the title *cardinal*.

In the Roman Church parish churches or *Titles* seem to have been first instituted in the time of Pope Marcellus (304). *Cath. Dict.*, p. 118.

(*b*) A fixed sphere of work and source of income, required as a condition of ordination. Since the Council of Chalcedon, A. D. 451, it has always been the rule to refuse to admit to ordination any one not appointed to officiate in a particular church. Since the eleventh century a title in the present sense has been expressly required. The term has gradually changed its connotation from the idea of locality to that of assured support and of a warrant for orders. The Roman Catholic Church requires as title for orders nomination to a benefice sufficient for maintenance, sufficient private income, a guarantee of support from some person or persons, or monastic poverty as entitling to maintenance by the order. In the Church of England a cure of souls, chaplaincy, fellowship, or the like is required, or residence as master of arts with sufficient private means. In the American Episcopal Church engagement with some church, parish, or congregation, with some diocesan or recognized general missionary society, as instructor in some incorporated institution, or as chaplain in the national army or navy is requisite for admission to priest's orders.

The candidates . . . must each have a *title* for orders—that is, a sphere of labour under some clergyman, with a proper stipend for his support—before he can be ordained. *A. Fonblanque, Jr.*, How we are Governed, p. 86.

16†. Same as *tittle*[2]. *Wyclif*, Mat. v.—**Abstract of title.** See *abstract.*—**Bastard title.** See *bastard.*—**Bonitarian title.** See *bonitarian.*—**Cloud on a title,** in *law*, something that renders a holder's title to land or other property doubtful, as the existence of an adverse instrument or claim the validity or justice of which is not yet known or adjudicated; an instrument which apparently and on its face is valid, and impairs a person's title to land, but which can be shown to be invalid by proof of extrinsic facts, although its invalidity has not yet been judicially declared, as a fraudulent mortgage or assessment on the land, or a judgment affecting its ownership, founded on a false affidavit of notice to the defendants.—**Color of title.** See *color.*—**Courtesy title.** See *courtesy*, and def. 8.—**Declaration of Title Act.** See *declaration.*—**Equitable title.** See *equitable estate*, under *estate.*—**Extension of title.** See *extension.*—**Good holding title.** See *marketable title.*—**Half title.** See *half-title.*—**Lucrative title,** in *Spanish Mexican law*, title created by donation, devise, or descent. *Platt.*—**Marketable, onerous, passive title.** See the adjectives.—**Pierced for title,** specially prepared for the title, as leather for a book-cover is which has had an addition between the bands of one or more squares of colored leather, on which the title is put. This is done only on calf, vellum, or sheep.—**Progress of title.** See *progress.*—**Running title.** See *running.*—**Side title,** a title placed on the upper cover of a bound book, as when the back is too narrow to admit a line of letters, or when the book so treated is usually to be exposed on a table.—**Title by forfeiture, by prescription, by succession.** See *forfeiture*, etc.—**Title of entry.** See *entry*, 10 (*a*).—**Title rôle.** See *rôle.*—**Unity of title,** the title of two or more joint tenants, or tenants in common, or persons alleged so to be, derived or deduced immediately from one and the same source by one and the same act or fact.=**Syn. 7.** *Designation*, etc. See *name.*

title (tī′tl), *v. t.*; pret. and pp. *titled*, ppr. *titling*. [= OF. *tituler* = Sp. After adjectives, it points to the person or thing with respect to which, or in whose interest, a quality is shown or perceived: as, a substance sweet *to* the taste; an event painful *to* the mind.

16. *To* is used as ordinary "sign" of the infinitive (like the corresponding *zu* in German, *à* and *de* in French, *a* and *di* in Italian, *att* in Swedish, etc.). In Anglo-Saxon, the verbal noun after *tō* took a special dative form — e. g., *tō etanne*, 'to or for eating'— distinguishing it from the simple infinitive, as *etan;* but this distinction of form has been long since lost, and the two constructions have also been confounded and mixed.

And hopen that he be *to* comynge [i. e., to come] that shal hem releue. *Piers Plowman* (C), xviii. 313.

Thanne longen folk *to* gon on pilgrimages.

Sir T. Browne, Christ. Mor., iii. 26.

Many would like *to* make it a penal offence *to* preach discontent to the people. *H. Spencer*, Social Statics, p. 167.

(*a*) *To* is not used before the infinitive after the ordinary auxiliaries, as *do*, *will*, *can*, *may*, etc.; also not after various other verbs, as, *see*, *hear*, *let*, etc.; while after a few it is sometimes omitted or sometimes retained against more common usage to the contrary. After a noun or an adjective *to* is always used.

Being mechanical, you ought not [*to*] walk
Upon a labouring day without the sign
Of your profession. *Shak.*, J. C., i. 1. 3.

We are ready *to* try our fortunes
To the last man. *Shak.*, 2 Hen. IV., iv. 2. 43.

(*b*) *To* was formerly used even after another preposition, especially *for*, and is still so used dialectally and vulgarly: as, what are you going *for to* do? Rarely after other prepositions, as *from;* but very commonly after *about*, *about to* signifying immediate futurity: as, he is *about to* go.

For not to have been dipt in Lethe lake
Could save the sonne of Thetis *from to* die.
Spenser, Ruins of Time, l. 429.

What went ye out *for to* see? Mat. xi. 9.

(*c*) After *be* and *have*, the infinitive with *to* denotes something future, especially with the implication of duty or necessity: as, it is still *to* do (or *to* be done); I have it *to* do (or have *to* do it).

We are still *to* seek for something else. *Bentley.*

(*d*) Colloquially, an infinitive after *to*, when it is a repetition of a preceding infinitive, is often omitted: as, I don't go because I don't wish *to*.

You carry your business cares and projects about, instead of leaving them in the City, . . . or seeming *to*.
Dickens, Little Dorrit, xxxiii.

One can persuade himself, if he is determined *to*, that certain of Shakspere's sonnets are of a biographical character. *R. H. Stoddard*, The Century, XXII. 913.

"I should wish you to find from themselves whether your opinions is correct." "Sir, *to you*," says Cobbs; "that shall be done directly." *Dickens*, Holly Tree, ii.

Would to God, would to Heaven, and similar precative phrases, are modern adaptations, with *to* inserted to note the direction of the wish or aspiration (perhaps after such phrases as "I make my vow *to* God," "I vow *to* God," etc.), of the earlier Middle English phrase *wolde God*, where *God* is the subject, and *wolde* the optative (subjunctive) imperfect of *will* as a principal verb; literally, "(I wish that) God *would will* (that . . .)." The words *wolde God* (in three syllables) could easily slide into the more modern-seeming *would to God*, where *to* is grammatically inexplicable.

to[2]**†.** An old spelling of *too*[1], *toe*, *two*.

to[3] (tō), *n.* [Jap., < Chinese *tow*, a peck (or bushel).] A Japanese grain and liquid measure containing 1097.52 cubic inches, or a little less than half an imperial bushel.

to-[1]. A prefix of Anglo-Saxon origin, being the preposition and adverb *to*[1] so used: as in *to-name*. In *to-day*, *to-morrow*, *to-month*, *to-night*, *to-year*, it is not properly a prefix, but the preposition coalesced with its noun. In *to-ward* it is the adverb as the principal element, with suffix *-ward*.

to-[2]. [< ME. *to-*, *te-*, < AS. *tō-* = OS. *ti-* = OFries. *to-*, *te-*, *ti-* = MLG. LG. *te-* = OHG. *zir-*, *zar-*, *zur-*, *zi-*, *za-*, *ze-*, MHG. *zer-*, *zur-*, *zu-*, G. *zer-* = Goth. *twis-*, apart, = L. *dis-*, apart, away (see *dis-*, *dia-*). Parallel with this prefix is a noun-prefix OHG. *zur-* = Icel. *tor-* = Goth. *tuz-* = Gr. δυσ- = Skt. *dus-*, evil, heavy (see *dys-*); ult. connected with *two*, *twi-*.] A prefix of Anglo-Saxon origin, meaning 'apart, away,' and denoting separation, negation, or intensity. It is common in Anglo-Saxon and Middle English, but is almost wholly obsolete in English. A relic of its use remains in the archaic *all to* used as a quasi-adverb in *all to break*, *all to split*, *all to broken*, etc., where the adverb is really *all*, and *to* is properly a prefix of the verb, *tobreak*, *tosplit*, etc., in early modern English separated from the verb (being in Middle English, like other prefixes, commonly written separate), and often written with *all* as one word, *alto*, taken as an adverb qualifying the verb. (See *all*, *adv.*, 1.) Such verbs are properly written without a hyphen; examples are *tobeat*, *tobear*, *tobite*, *toblast*, *toblow*, *toburst* (*tobrest*), *tobruise*, *todeal*, *tofall*. This prefix is often confused, by readers and editors of Middle English texts, ★with the preposition *to*, the sign of the infinitive.

toad (tōd), *n.* [Early mod. E. also *tode;* also Sc. *tade*, *taid*, *taed*, *ted;* < ME. *tode*, *toode*, *tades*, *tadde*, < AS. *tādige*, *tādie*, toad; root unknown. The Dan. *tudse*, Sw. *tåssa*, toad, are prob. unrelated. Hence, in comp., *tadpole*, q. v.] **1.** A batrachian or amphibian of the family *Bufonidæ* or some related family. Toads are generally distinguished among the salient tailless batrachians from the frogs, in that they are not aquatic (except when breeding), and lack the symmetry and agility of frogs; but the strong technical differences between the bufoniform and raniform amphibians are not always reflected in the various applications of these popular names. (Compare the common use of *frog* and *toad* in *tree-frog*, *tree-toad*, and in *nurse-frog* and *obstetrical toad.*) Toads have a stout clumsy body more or less covered with warts, generally large parotoids (see cut under *parotoid*), no teeth, the hind feet scarcely or not webbed, and the hind limbs not fitted for extensive leaping. They are perfectly harmless, notwithstanding many popular superstitions to the contrary. They feed mainly on insects, and some are quite useful in gardens. They are tenacious of life, like most reptiles, but there is no truth in the stories of their living in solid rock. The fable of the jewel in the toad's head may have some basis of fact in the piece of glistening cartilage which represents an unossified basioccipital. There are numerous kinds of toads, found in nearly all parts of the world. They are mostly of the genus *Bufo*, as well as of the family *Bufonidæ*, though several other families include species to which the popular name applies. In Europe the common toad is *B. vulgaris;* the

rush-toad or natterjack is *B. calamita*. The commonest toad of America is *B. lentiginosus*, which sports in many color-variations. See phrases below, and cuts under *tadpole*, *Brachycephalus*, *Hylaplesia*, and *agua-toad*.

2. Figuratively, a person as an object of disgust or aversion: also used in deprecating or half-affectionate raillery. Compare *toadling*.

"Yes," responded Abbot, "if she were a nice, pretty child, one might compassionate her forlornness; but one really can not care for such a little *toad* as that."
Charlotte Brontë, Jane Eyre, iii.

Accoucheur toad. Same as *obstetrical toad.*—**Cell-backed toad,** a toad which carries its eggs and tadpoles in holes in the back; specifically, the Surinam toad. See cuts under *Pipa* and *Nototrema*.—**Horned toad** (or **frog**), the popular name of all the small lizards of western North America with a flattened rounded form, the head horned, the back warty, and the habits sluggish. They are neither toads nor frogs (batrachians), but lacertilians or lizards, of quite another class of animals, and of the family *Iguanidæ*. All belong to the genus *Phrynosoma*, of which there are 8 or 9 species. See *Phrynosoma* (with cut). Also called *toad-lizard.*—**Midwife toad.** Same as *obstetrical toad.*—**Obstetrical toad,** the nurse-frog, *Alytes obstetricans*. See cut under *Alytes.*—**Running toad.** Same as *natterjack.*—**Spade-footed toad.** See *Scaphiopus*, and cut under *spade-foot.*—**Surinam toad,** *Pipa americana*, a large and ugly toad representing the family *Pipidæ*. See *Pipa* and *Aglossa.*—**Toad in a (the) hole,** in *cookery*, a piece of beef baked in batter.—**Tree toad.** See *tree-toad.*—**Walking toad.** Same as *natterjack.*

toadback (tōd'bak), *n.* A variety of potato.

Amer. Nat., XXIV. 316.

toad-back (tōd'bak), *a.* In *carp.*, resembling the back of a toad in section: said of a rail.

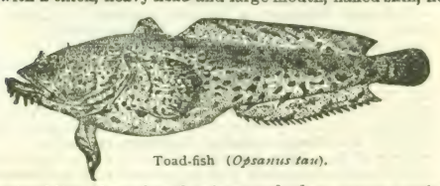
toad-eater (tōd′ē″tėr), *n.* [< *toad* + *eater*. As with *beef-eater*, the simple etymology fails to satisfy some writers, and fictions like that quoted from Brewer are invented to explain the word.] **1†.** A mountebank's boy who ate, or pretended to eat, toads (supposed to be poisonous), in order to give his master an opportunity to show his skill in expelling poison.

> Be the most scorn'd Jack-pudding of the pack,
> And turn *toad-eater* to some foreign quack.
> *Tom Brown*, Satire on an Ignorant Quack (Works, I. 71). [(*N. and Q.*, 3d ser., I. 129.)

2. A fawning, obsequious parasite; a mean sycophant; a toady.

> *Toad-eater.* . . . It is a metaphor taken from a mountebank's boy's eating toads, in order to show his master's skill in expelling poison; it is built on a supposition . . . that people who are so unhappy as to be in a state of dependence are forced to do the most nauseous things that can be thought on, to please and humour their patrons.
> *Sarah Fielding*, Adventures of David Simple (1744).

> I am retired hither like an old summer dowager; only that I have no *toad-eater* to take the air with me in the back part of my lozenge-coach, and to be scolded.
> *Walpole*, Letters, II. 52.



> At the final overthrow of the Moors, the Castilians made them their servants, and their active habits and officious manners greatly pleased the proud and lazy Spaniards, who called them *mi todita* (my factotum). Hence a cringing, officious dependent, who will do all sorts of dirty work for you, is called a *todita* or *toad-eater*.
> *Brewer*, Phrase and Fable.

toad-eating (tōd′ē″ting), *n.* Servile or sycophantic complaisance; sycophancy.

> Without the officiousness, the inquisitiveness, the effrontery, the *toad-eating*, the insensibility to all reproof, he [Boswell] never could have produced so excellent a book. *Macaulay*, Boswell's Johnson.

toad-eating (tōd′ē″ting), *a.* Pertaining to or characteristic of a toad-eater or sycophant; ★sycophantic.

toad-fish (tōd′fish), *n.* **1.** A fish of the genus *Batrachoides* or *Opsanus*, especially *O. tau*; the oyster-fish or sapo, of the Atlantic coast of the United States from Massachusetts to the West Indies. It is a very ugly fish, of ungainly form, with a thick, heavy head and large mouth, naked skin, no

lateral line, three dorsal spines, and when young a series of tufts or cirri on the back and sides; the lips have fleshy appendages; the color is dusky-olive with irregular black markings both on the body and on the fins.

2. A lophioid fish, *Lophius piscatorius*, so called from its uncouth aspect; the fishing-frog, sea-devil, wide-gab, or angler. See cut under *angler*.—**3.** A swell-fish, as *Spheroides maculatus*, the common puffer of the Atlantic coast of the United States, 12 inches long. Also called *swell-toad*.—**4.** The frog-fish or mouse-fish, *Pterophryne tumida*. *D. S. Jordan.*

toad-flax (tōd′flaks), *n.* A plant of the genus *Linaria*, primarily *L. Linaria*, the common toad-flax, a showy but pernicious plant, otherwise known as *ranstead* and *butter-and-eggs*. Other plants receiving this name are the ivy-leafed toad-flax or Kenilworth ivy, *Cymbalaria Cymbalaria* (*Linaria Cymbalaria* of Miller) (see *ivy*[1]), and the three-birds toad-flax, *Linaria triornithophora*, a European plant cultivated for its large purple long-spurred flowers borne in whorls of three, and suggesting little birds. Several others are desirable in gardens, as the dwarf *L. alpina*, alpine toad-flax, and the tall *L. Dalmatica*, with showy sulphur-yellow flowers; the plant, however, is difficult to eradicate.—**Bastard toad-flax.** (*a*) In America, a plant of the genus *Comandra*, of the *Santalaceæ*, which consists of 4 species, 3 North American and 1 European, low herbs or undershrubs, sometimes parasitic on roots. The common American plant is *C. umbellata*, with leaves like those of toad-flax and white flowers in umbel-like clusters. (*b*) In England, *Thesium Linophyllon*, which has leaves like those of toad-flax.—**Ivy-leafed toad-flax.** See def.

The Inflorescence of Toad-flax (*Linaria Linaria*).

> A most *toad-spotted* traitor. *Shak.*, Lear, v. 3. 138.

toadstone[1] (tōd′stōn), *n.* [< *toad* + *stone*.] Any one of various natural or artificial objects resembling a toad in form or color, or which were believed to have been formed within the body of that animal, and which for many centuries, and over a large part of Europe, were held in high regard, and preserved with the greatest care. The earliest reference to objects of this kind is that of Pliny, who, under the name of "batrachites," described various stones which were said by him to resemble the frog in color, although he does not speak of their being possessed of any special virtues. This is the only reference to the toadstone to be found in classic authors; but much later on the names "crapodinus" and "bufonites" are found in various learned works written in Latin; while the word "crapaudine" appears in French as early as the fourteenth century, and "krottenstein," "cradenstein," and "krötenstein" not much later in German. Albertus Magnus and others also gave the name of "borax" to a stone supposed by them to be found in the head of the toad. This latter was the most common form of belief in regard to the origin of the toadstone, and it was very generally thought that it was endowed with special virtues if the animal could be made to surrender it voluntarily. Toadstones were preserved at the shrines of saints, worn as amulets, or set in rings, or in other ways treasured by their owners as charms, or antidotes to poison, or as having special therapeutic qualities, or simply as natural curiosities. Some of these objects were bits of rock, or of jasper, or of other semi-precious or perhaps really precious stones, toad-like in color or shape; others were fossils of various kinds, such as brachiopods, fragments of crinoids, teeth of fossil fish, etc. Shakspere refers to the toadstone in the lines:

> Sweet are the uses of adversity,
> Which, like the toad, ugly and venomous,
> Wears yet a precious jewel in his head.
> (As you Like it, ii. 1. 12–14.)

> If he would send his eyes, I would undertake
> To carry 'em to the jeweller; they would off
> For pretty *toadstones*.
> *Shirley*, The Brothers, ii. 1.

toadstone[2] (tōd′stōn), *n.* [An accom. form, simulating *toadstone*[1], of G. *todtes gestein*, lit. 'dead (i. e. unproductive) rock.'] In *geol.*, a volcanic rock varying in texture from a soft crumbly ash to a hard close-grained greenstone, several beds of which occur in the magnesian limestone of the lead-mining district of Derbyshire. The toadstone has the position of an interbedded rock, is irregular in thickness, and traversed by numerous veins and faults. It much resembles the so-called whinsill of Yorkshire, Durham, and Northumberland. Also called *toadrock*.

toadstool (tōd′stōl), *n.* [Early mod. E. also *toadestoole*, *todestoole*; < *toad* + *stool*.] A common name for numerous umbrella-shaped fungi which grow abundantly on decaying vegetable matter. It is usually restricted to the old genus *Agaricus*, but also is extended to various allied fungi, and, still further, is sometimes applied to almost any fungus that is large enough to attract general attention, such as *Hydnum*, *Lycoperdon*, *Morchella*, etc. Popularly, the name *toadstool* is applied only to those fungi supposed to be poisonous, as distinguished from *mushrooms*, or edible forms. This is a distinction difficult to maintain, as many species belonging to the genus *Agaricus*, or closely allied genera, may or may not be poisonous. It frequently happens that an edible species is associated with and resembles a highly poisonous species, or grows in similar places, and can be distinguished only by a competent authority or by a careful microscopical examination. Also called *toad's-cap*, *toad's-hat*, *toad's-meat*, *frogstool*.

toady[1] (tō′di), *a.* [< *toad* + *-y*[1].] Ugly and repulsive, like a toad; hateful; beastly. [Rare.]

> Vice is of such a *toady* complexion that she naturally teaches the soul to hate her. *Feltham*, Resolves, i. 13.

toady[2] (tō′di), *n.*; pl. *toadies* (-diz). [Said to be shortened from *toad-eater*; but rather an adaptation of *toady*[1], *a.*, to express the meaning of *toad-eater*. *Toad-eater* would hardly be "shortened" to *toady*.] **1.** A sycophant; an interested flatterer; a toad-eater.

> Young Bull licked him [young Lord Buckram] in a fight of fifty-five minutes. . . . Boys are not all *toadies* in the morning of life. *Thackeray*, Book of Snobs, v.

2. A coarse rustic woman. *Scott.* (*Imp. Dict.*)

toady[2] (tō′di), *v.*; pret. and pp. *toadied*, ppr. *toadying*. [< *toady*[2], *n.*] **I.** *trans.* To fawn upon in a servile manner; play the toady or sycophant to.

> The tutors *toadied* him. The fellows in hall paid him great clumsy compliments. *Thackeray*, Book of Snobs, v.

II. *intrans.* To play the sycophant; fawn; cringe.

> What magic wand was it whose touch made the *toadying* servility of the land start up the real demon that it was? *W. Phillips*, Speeches, p. 135.

toadyish (tō′di-ish), *a.* [< *toady*[2] + *-ish*.] Having the character of a toady; given to toadyism; toad-eating; boot-licking.

toadyism (tō′di-izm), *n.* [< *toady*[2] + *-ism*.] The practices of a toady; sycophancy; servile adulation. *Thackeray*, Book of Snobs, iii.

to-and-fro (tö′and-frō′), *a.* and *n.* [< *to and fro*: see under *fro*.] **I.** *a.* Forward and backward; alternate: as, *to-and-fro* motion.

II. *n.* **1.** A movement or motion forward and backward in alternation.

> When the mesmerizer Snow
> With his hand's first sweep
> Put the earth to sleep,
> 'Twas a time when the heart could show
> All — how was earth to know,
> 'Neath the mute hand's *to-and-fro!*
> *Browning*, A Lover's Quarrel.

> She,
> Like some wild creature newly-caged, commenced
> A *to-and-fro*. *Tennyson*, Princess, ii.

2†. The bandying of a question backward and forward; a discussion. *Bp. Bale*, Vocacyon (Harl. Misc., VI. 459).

Toarcian (tō-är′si-an), *n.* [Named from *Thouars*, in western France.] In *geol.*, a division of the Lias lying between the Charmouthian, or Middle Lias, and the Bajocian, or lowest division of the Jurassic, according to the nomenclature of the French geologists. It is especially well developed in central and southern France, and its subdivisions are characterized chiefly by the presence of certain species of ammonites.

toast[1] (tōst), *n.* [Early mod. E. *toste*; < ME. *toost*, < OF. *toste*, < ML. *tosta*, a toast of bread (cf. OF. *tostee* = Sp. *tostada*, a toast), < L. *tosta*, fem. of *tostus*, pp. of *torrere*, parch, toast: see *torrent*.] Bread in slices superficially browned by the fire; a slice of bread so browned.

> Go fetch me a quart of sack; put a *toast* in 't.
> *Shak.*, M. W. of W., iii. 5. 3.

toast[1] (tōst), *v.* [Early mod. E. also *toste*; < ME. *tosten*, < OF. *toster* = Sp. *tostar* = Pg. *tostar*, toast (> *tostado*, toasted); from the noun.] **I.** *trans.* **1.** To brown by the heat of a fire: as, to *toast* bread or bacon.

> 'Tis time I were choked with a piece of *toasted* cheese.
> *Shak.*, M. W. of W., v. 5. 147.

2. To warm thoroughly: as, to *toast* one's feet. [Colloq.]

> Around these fires the more idle of the swarthy fellows squatted, and *toasted* their bare shins while they spun their wondrous tales. *The Century*, XXXVI. 323.

II. *intrans.* **1.** To brown with heat.

> There is a whiff of something floating about, suggestive of *toasting* shingles. *O. W. Holmes*, Professor, vii.

2. To warm one's self thoroughly at a fire.

> As we *tosted* by the fire. *W. Browne*, Shepherd's Pipe, i.

toast[2] (tōst), *n.* [A particular use of *toast*[1], *n.*, of anecdotal origin, according to the story given in the "Tatler" (No. 24, June 4, 1709). See the second quotation.] **1.** A person whose health is drunk, or who is named as the person to whom others are requested to drink; especially, a woman who is the reigning belle of the season, or in

some other way is specially indicated as a person often toasted; also, anything, as a political cause, the memory of a person, etc., to which a company is requested to drink.

I'll take my Death, Marwood, you are more Censorious than a decay'd Beauty, or a discarded *Toast*.
Congreve, Way of the World, iii. 10.

It happen'd that on a publick day a celebrated beauty of those times [of Charles II.] was in the Cross-Bath [at Bath], and one of the crowd of her admirers took a glass of water in which the fair one stood, and drank her health to the company. There was in the place a gay fellow, half-fuddled, who offered to jump in, and swore, tho' he liked not the liquor, he would have the *toast* (making an allusion to the usage of the times of drinking with a toast at the bottom of the glass). Tho' he was opposed in his resolution, this whim gave foundation to the present honour which is done to the lady we mention in our liquors, who has ever since been called a *toast*.
Tatler, No. 24 (June 4, 1709).

Her eldest daughter was within half-a-year of being a *toast*. *Steele*, Tatler, No. 95.

2. A call on another or others to drink to the health of some person named, or to the prosperity of some cause, etc.: often accompanied by a sentiment or motto; also, the act of thus drinking.

Let the *toast* pass—
Drink to the lass,
I'll warrant she'll prove an excuse for the glass.
Sheridan, School for Scandal, iii. 3.

3†. One who drinks to excess; a soaker.

When, having half din'd, there comes in my host,
A Catholic good, and a rare drunken *toast*.
Cotton, Voyage to Ireland, iii.

toast[2] (tōst), *v.* [< *toast*[2], *n.*] **I.** *trans.* To drink as a toast; drink to the health of; wish success or prosperity to in drinking; also, to designate as the person or subject to whom or to which other persons are requested to drink; propose the health of.

The gentleman has . . . *toasted* your health.
Farquhar, Beaux' Stratagem, iii. 1.

Careless. Now then, Charles, be honest, and give us your real favourite.
Charles S. Why, I have withheld her only in compassion to you. If I *toast* her, you must give a round of her peers, which is impossible — on earth.
Sheridan, School for Scandal, iii. 3.

II. *intrans.* To drink a toast or toasts; also, to propose a toast or toasts.

Friendship without Freedom is as dull as . . . Wine without *toasting*. *Congreve*, Way of the World, i. 8.

These insect reptiles, whilst they go on only caballing and *toasting*, only fill us with disgust.
Burke, Petition of the Unitarians.

toaster[1] (tōs'tėr), *n.* [< *toast*[1] + *-er*[1].] **1.** One who toasts something, as bread or cheese.—**2.** An instrument for toasting bread, cheese, etc.; especially, such an appliance other than a toasting-fork. Toasters for bread are often small gridirons of wire which hold the slice of bread fast without tearing it.—**3.** Something fit for toasting. [Colloq.]

"Come and look at 'em! here 's *toasters!*" bellows one with a Yarmouth bloater stuck on a toasting-fork.

Thackeray, Newcomes, xxxv.

tobacchian†, *n.* [< *tobacco* + *-ian*.] One who smokes tobacco; a smoker. [Rare.]

You may observe how idle and foolish they are that can not travell without a Tobacco pipe at their mouth; but such (I must tell you) are no base *Tobacchians*: for this manner of taking the fume they suppose to be generous.
Venner, Treatise of Tobacco (ed. 1637).

★ **tobacco** (tō-bak'ō), *n.* [Formerly also *tabacco*, *tabaco*, *tobacca*; = F. *tabac* (not in Cotgrave, 1611, who gives only *petum* and *nicotiane*), sometimes *tobac* = It. *tabacco* (1578), *tabacco* (1598) = D. *taback* (1659), now *tabak* = G. *tabak* = Dan. Sw. *tobak* = Bohem. *tabak* = Pol. *tabaka* = Russ. *tabakŭ* = Ar. *tobagh* (the usual Ar. name being different, *tutun*, *toton*, Pers. *tūtan*, Turk. *totūn*, > Pol. *tytun*) = NGr. *ταμπάκος*, *ταμπάκον* = Pers. Hind. *tambākū* (cf. Pers. *tumbeki*, Turk. *tunbeki*) = Chinese *tambako*, *tambaku* = Jap. *tabako* (< E.) (NL. *tabacca* (Camden, 1585), *tabacum* (Lobel, 1576; Bauhin, 1596)); < Sp. *tabaco*, formerly also *tabacco* = Pg. *tabaco*, < W. Ind. (Haytian or Caribbean) **tabacco* or **tabaco*, of uncertain meaning, conflicting accounts being given: (*a*) According to Charlevoix, in his "History of St. Dominique," the pipe used by the Indians in smoking was called *tabaco*. (*b*) According to Las Casas, the Spaniards in the first voyage of Columbus saw the Indians in Cuba smoking dry herbs or leaves rolled up in tubes called *tabacos*. (*c*) According to Clavigero, the word was one of the native names of the plant, namely the Haytian (cf. the quot. from Hakluyt). (*d*) According to Bauhin (1596) and Minsheu (1617), etc., *tobacco* was so called from an island of the same name, now called *Tobago*, near Trinidad (cf. *trinidado*, a former name of *tobacco*). (*e*) In another view, it was so called from *Tabaco*, said to be a province of Yucatan. (*f*) Other Indian names were *uppowoc* (see quot. from Hakluyt), *picietl* (Clavigero; Stevens, 1706), *picielt* (Bauhin, 1596), *peicielt*, or *pilciet* (Minsheu, 1617), *petum* or *petun* (a S. Amer. term) (see *petun*), *tomabona*, *perebecenuc* (Bauhin, 1596), etc. In Europe it was also called *nicotian*, *queen's herb* (F. *l'herbe de la royne*), etc.: see *nicotian*.] **1.** A plant of the genus *Nicotiana*, particularly one of several species affording the narcotic product of the same name. The most generally cultivated is *N. Tabacum*, a plant of South American origin, found in culture among the aborigines. It is of stately habit, 3 to 6 feet high; the leaves from ovate to narrowly lanceolate, the lower commonly 2 or 3 feet long; the flowers of purplish tints, 2 inches long, disposed in a terminal panicle. (See cut under *Nicotiana*.) Prominent cultivated forms are the variety *macrophylla*, known as Maryland tobacco, to which the Cuban and Manila tobaccos are accredited, and the variety *angustifolia*, Virginian tobacco. The only other species extensively grown is *N. rustica*, a much smaller plant with smaller greenish flowers, sometimes called *green tobacco* from the fact that the leaves retain much of their color when dry. It is suited to cool latitudes, and cultivated northward in Europe and in parts of Asia, yielding among others the Hungarian and Turkish tobaccos. *N. quadrivalvis* is grown by the Indians from Oregon to the Missouri river, and is their favorite kind, a low-branching, viscid-pubescent plant a foot high. Some other species are cultivated locally. The United States leads in the production of tobacco, but it is grown more or less in nearly all temperate and tropical lands. The quality depends greatly on climate, the Cuban or other fine varieties degenerating when planted elsewhere. Cuban tobacco is considered finest, that of Manila being named with it. Turkish tobaccos are famous, as also the Latakia of a district in northern Syria. Virginian tobacco ranks very high.

There is an herbe [in Virginia] which is sowed apart by it selfe, and is called by the inhabitants Vppowoc; in the West Indies it hath diuers names; . . . the Spanyards generally call it *Tabacco*. *Hakluyt's Voyages*, III. 271.

Into the woods thenceforth in haste shee went,
To seeke for hearbes that mote him remedy; . . .
There, whether yt divine *Tobacco* were,
Or Panachæa, or Polygony,
Shee fownd. *Spenser*, F. Q., III. v. 32.

2. The leaves of the tobacco-plant prepared in various forms, to be smoked, chewed, or used as snuff (see *snuff*). Tobacco-leaves are sometimes gathered singly; more commonly the stalks are cut, and suspended on sticks under shelter for drying, which requires several weeks. The leaves are then stripped and sorted, tied in bundles called *hands*, and "bulked" in compact circular heaps to secure a slight fermentation, which develops the properties valued; they are then packed for the manufacturer, who makes them into cigars, cheroots, cigarettes, and cut, plug, and roll tobacco, intended for smoking and chewing, and into snuff. The properties of tobacco are chiefly due to the alkaloid nicotine (which see). Medically considered, tobacco is a powerful sedative poison and a local stimulant, not now used internally unless in chronic asthma, but applied in some skin-diseases, hemorrhoids, etc. In its ordinary use as a narcotic it induces a physical and mental quiet very gratifying to the habituated, overcoming the distaste for its obnoxious properties, and making it the most nearly universal of narcotics. In large quantities it gives rise to confusion of the mind, vertigo, nausea, and at length to depression and dangerous prostration. Historically, tobacco was found in use among the Indians at the discovery of America, and associated with their solemn transactions. (See *calumet*.) It was unknown in the Old World before this time. It was introduced into Europe about 1559 by a Spanish physician, who brought a small quantity from America into Spain and Portugal. Thence its use spread into France and Italy. Sir Francis Drake introduced it into England about 1585, where tobacco-taverns soon became nearly as prevalent as ale-houses. Its use was opposed strongly by both priests and rulers. Pope Urban VIII. excommunicated users of tobacco; in Turkey and other countries its use was severely punished. The "Counterblast" of James I. of England is matter of history. The use of tobacco spread, however, in the face of all prohibitions.

Ber. Hearke you, my host, haue you a pipe of good *Tobacco?*
Ve. The best in the towne: boy, drie a leafe.
Boy. There 's none in the house, sir.
Ve. Drie a docke leafe.
Chapman, Humorous Day's Mirth.

I marle what pleasure or felicitie they haue in taking this roguish *tabacco!* it 's good for nothing but to choke a man, and fill him full of smoke and embers.
B. Jonson, Every Man in his Humour (ed. 1616), iii. 5.

Sublime *tobacco!* which from east to west
Cheers the tar's labour or the Turkman's rest.
Byron, The Island, ii. 19.

tocororo (tō-kō-rō'rō), *n.* [Also *tocoloro;* Sp. *tocororo*, < Cuban *tocororo* (sometimes given as *toroloco* or *tocoloro*), the Cuban trogon, so called from its note.] The Cuban trogon, *Prionotelus temnurus.*

tocsin (tok'sin), *n.* [Early mod. E. *tocksaine;* < OF. *toquesin, toquesing, touquesaint, toxsaint, tocsainct, toxant* (F. *tocsin* = Pr. *tocasenh*), the ringing of an alarm-bell, an alarm-bell, < *toquer*, strike (see *touch*), + *sin, sing* = Pr. *senh* = Pg. *sino* = Olt. *segno*, a bell, < L. *signum*, a signal, ML. also bell: see *sign.*] **1.** A signal given by means of a bell or bells; especially, a signal of alarm or of need; hence, any warning note or signal.

The priests went up into the steeple, and rang the bells backward, which they call *tocksaine*, whereupon the people . . . flocked together. *Fulke*, Answer to P. Frarine (an. 1580), p. 52. (*Todd.*)

That all-softening, overpowering knell,
The *tocsin* of the soul—the dinner-bell.
Byron, Don Juan, v. 49.

The death of the nominal leader . . . was the *tocsin* of their anarchy. *Disraeli.*

2. A bell used to sound an alarm; an alarm-bell.

Again the whiskered Spaniard all the land with terror smote;
And again the wild alarum sounded from the *tocsin's* throat. *Longfellow*, Belfry of Bruges.

3. *Milit.*, an alarm-drum formerly used as a signal for charging.

tocusso (tō-kus'ō), *n.* [Abyssinian.] An Abyssinian corn-plant or millet, *Eleusine Tocusso.*

tod1 (tod), *n.* [Early mod. E. *todd, todde, tode;* < ME. *todd*, < Icel. *toddi*, a tod of wool, bit, piece, = D. *todde*, tatters, rags (cf. D. *toot*, hair-net, Dan. *tot*, a bunch of hair or flax), = OHG. *zotta, zotā, zatā*, f., *zotto*, m., MHG. *zote, zotte*, m., f., G. *zotte*, a tuft of hair or wool. Cf. *tot*4.] **1.** A bush, especially of ivy; a thick mass of growing foliage.

At length, within an Yvie *todde*
(There shrouded was the little God),
I heard a busie bustling.
Spenser, Shep. Cal., March.

2†. An old weight, used chiefly for wool and varying in amount locally. It was commonly equal to 28 pounds.

And the seid wolle to be wayed in the yelde halle of the seid cite by the byer and the syller, and custom for euery *todd* j. d. *English Gilds* (E. E. T. S.), p. 384.

tod1† (tod), *v. i.* [< *tod*1, *n.*] To yield a tod in weight; weigh or produce a tod.

Every 'leven wether *tods;* every tod yields pound and odd shilling; fifteen hundred shorn, what comes the wool to? *Shak.*, W. T., iv. 3. 33.

tod2 (tod), *n.* [Early mod. E. *todde;* supposed to be so called from its bushy tail, < *tod*1, a bush.] A fox. [Old Eng. and Scotch.]

Drivest hence the wolf, the *tod*, the brock,
Or other vermin from the flock.
B. Jonson, Pan's Anniversary.

Frae dogs, an' *tods*, an' butchers' knives!
Burns, Death of Mailie.

tod3 (tod), *n.* [Abbr. of *toddy.*] A drink; toddy. [Colloq., U. S.]

Selleridge's was full of fire-company boys, taking their *tods* after a run. *T. Winthrop*, Cecil Dreeme, xiv.

todash†, *v. t.* [< ME. *todasshen, todaisshen;* < *to-*2 + *dash.*] To strike violently; dash to pieces.

His shelde *to-dasshed* was with swerdes and maces. *Chaucer*, Troilus, ii. 640.

Well it semed by their armes that thei hadde not soiourned, ffor theire sheildes were hewen and *to daissht.* *Merlin* (E. E. T. S.), ii. 246.

to-day, today (tȯ-dā'), *adv.* [< ME. *to-daye, to daye*, < AS. *tō dæge, tō dæg* (also *tō dæge thissum*), on (this) day: prop. a phrase: *tō*, prep., to, for, on; *dæge*, dat. sing. of *dæg*, day: see *to*1 and *day.* Cf. *to-night, to-morrow, to-month, to-year.*] **1.** On this (present) day: as, he leaves *to-day.* Compare *to-morrow.*

To-morrow let my Sun his beams display,
Or in clouds hide them; I have lived *to-day.*
Cowley, A Vote.

2. At the present time; in these days.

Man *to-day* is fancy's fool
As man hath ever been.
Tennyson, Ancient Sage.

To-day morning, this morning. [Prov. Eng.]—**To-day noon**, this noon. [U. S.]

to-day, today (tȯ-dā'), *n.* [< *to-day, adv.*] **1.** This present day: as, *to-day* is Monday.—**2.** This present time; the present age: as, the events of *to-day.*

Toddalia (to-dā'li-ạ), *n.* [NL. (Jussieu, 1789), from the Malabar name of *T. aculeata*—*kaka-toddali.*] A genus of polypetalous plants, of the family *Rutaceæ*, type of the tribe *Toddalieæ.* It is characterized by flowers with a two- to five-toothed calyx, as many petals and stamens, and a punctate fleshy or coriaceous fruit with two to seven cells, each usually with a single seed. There is but a single species, native in tropical and subtropical regions of the old world. They are shrubs, often climbers, and frequently spiny, with alternate leaves of three sessile lanceolate leaflets, and axillary or terminal cymes or panicles of small flowers followed by globular or lobed fruits resembling peas. For *T. aculeata*, see *lopez-root.*

Toddalieæ (tod-a-lī'ē-ē), *n. pl.* [NL. (Bentham and Hooker, 1862), < *Toddalia* + *-eæ.*] A tribe of dicotyledonous plants, belonging to the family *Rutaceæ.* It is characterized by regular flowers, in general polygamously dicœcious, with free petals, stamens, and disk, a terminal style entire at the base, and an embryo usually with flat cotyledons and without albumen. It includes nineteen genera, mainly tropical, among which are *Toddalia* (the type), *Anquetilia*, and *Ptelea.*

toddle (tod'l), *v. i.*; pret. and pp. *toddled*, ppr. *toddling.* [A var. of *tottle*, perhaps influenced by some association with *waddle:* see *tottle.*] To walk feebly; walk with short, tottering steps, as a child or an old man: said especially of children just beginning to walk.

I should like to come and have a cottage in your park, *toddle* about, live mostly on milk, and be taken care of by Mrs. Boswell. *Johnson*, in Boswell, ætat. 74.

The young lady had one of the children asleep on her shoulder; and another was *toddling* at her side, holding by his sister's dress. *Thackeray*, Philip, xvi.

=**Syn.** See *waddle.*

toddle (tod'l), *n.* [< *toddle, v.*] **1.** The act of toddling; an uncertain gait with short or feeble steps.

What did the little thing do but . . . set off in the bravest *toddle* for the very bow of the boat, in fear of losing sight of me! *R. D. Blackmore*, Maid of Sker, v.

2. A walk taken in a toddling fashion, as by a child or an invalid; loosely, a careless stroll. [Colloq.]

Her daily little *toddle* through the town. *Trollope*, Orley Farm, xv.

3. A toddler. [Rare.]

When I was a little *toddle*, Mr. and Mrs. Crewe used to let me play about in their garden. *George Eliot*, Janet's Repentance, iii.

toddler (tod'lėr), *n.* [< *toddle* + *-er*1.] One who toddles; especially, an infant or young child. *Mrs. Gaskell*, Mary Barton, i.

toddy (tod'i), *n.* [Formerly also *taddy*, also *taree;* < Hind. *tāri* (with cerebral *r*, hence also spelled *tādi*), < *tār*, Pers. *tār*, a palm-tree, from which this liquor is derived.] **1.** The drawn sap of several species of palm, especially when fermented. In India this is obtained chiefly from the jaggery, the wild date, the palmyra, and the cocoanut (see *toddy-palm*); in Borneo, from the areng; in West Africa, from *Raphia vinifera;* in Brazil, from the buriti. It is secured by cutting off the spadix at the time of efflorescence, by wounding the spathe, and by tapping the pith. It is a pleasant laxative drink when fresh, but soon ferments, and becomes intoxicating. Arrack is obtained from it by distillation. Vinegar is also made from the sap, and jaggery-sugar is obtained by boiling it.

They [the people of Industan] have . . . also *Taddy*, an excellent Drink that issues out of a tree. *S. Clarke*, Geograph. Descrip. (1671), p. 45.

If we had a mind to Coco-nuts, or *Toddy*, our Malayans of Achin would climb the Trees, and fetch as many Nuts as we would have, and a good pot of *Toddy* every Morning. *Dampier*, Voyages, I. 488.

2. A drink made of spirits and hot water sweetened, and properly having no other ingredients: this use is originally Scotch. Also colloquially *tod.*

A jug of *toddy* intended for my own tipple. *Noctes Ambrosianæ*, April, 1832.

toddy-bird (tod'i-bėrd), *n.* A bird which feeds on the juices of the palms in India. The name is not well determined, and probably applies to several different species. If given to a weaver-bird, it would probably be to a baya-bird, either *Ploceus baya* or *P. bengalensis.* As identified with *Artamus fuscus*, a toddy-bird is a sort of swallow-shrike, of a different family (*Artamidæ*).

toddy-blossom (tod'i-blos″um), *n.* Same as *grog-blossom.*

toddy-drawer (tod'i-drâ″ėr), *n.* A person who draws and sells toddy from the palm. *Encyc. Brit.*, XIV. 136. [Anglo-Indian.]

toddy-ladle (tod'i-lā″dl), *n.* **1.** A ladle like a punch-ladle, but smaller, often of silver or silver-gilt and richly decorated.—**2.** A name applied to the American aloe, *Agave Americana*, the juice of which makes pulque, a drink analogous to toddy.

toddyman (tod'i-man), *n.*; pl. *toddymen* (-men). One who collects or manufactures toddy. See *toddy*, 1. *Pop. Sci. News*, XXIII. 136.

toddy-palm (tod'i-päm), *n.* A palm which yields toddy; specifically, the jaggery-palm, *Caryota urens*, and the wild date-palm, *Phœnix sylvestris*, also the palmyra and cocoanut-palms.

toddy-stick (tod'i-stik), *n.* A stick used for mixing toddy or other drinks, and commonly tipped with a button, often roughened, for breaking loaf-sugar; a muddler.

Near by was a small counter covered with tumblers and *toddy-sticks.* *S. Judd*, Margaret, i. 6.

Todidæ (tō'di-dē), *n. pl.* [NL., < *Todus* + *-idæ.*] A small family of West Indian birds, represented by the genus *Todus;* the todies. They are picarian, and their nearest relatives are the kingfishers, bee-eaters, and motmots. The sternum is four-notched openly; cæca are present; the oil-gland is tufted; the carotids are two. The myological formula is the same as in *Meropidæ* and *Momotidæ.* The feet are syndactyl; the bill is long, straight, and flat, with its tomial edge finely serrate; the tail is very short. The plumage is brilliant green, carmine-red, and white. These elegant little birds are represented by about 6 species of the single genus *Todus.* They most nearly resemble some of the small kingfishers in general aspect and mode of life. They nest in holes in banks. The family has been much misunderstood, and misplaced in the ornithological system. See *tody* (with cut).

todine (tō'din), *a.* Of or pertaining to the todies or *Todidæ:* as, *todine* affinities.

Todirostrum (tō-di-ros'trum), *n.* [NL. (Lesson, 1831), < *Todus* + L. *rostrum*, beak.] A genus of diminutive *Tyrannidæ* (not *Todidæ*), having the beak somewhat like that of a tody,

Todirostrum maculatum.

ranging from southern Mexico to southern Brazil and Bolivia. There are at least 15 species, some of ornate coloration. *T. maculatum* is only 3½ inches long.

todlowrey (tod-lou'ri), *n.* [Also *todlowrie;* < *tod*2 + *lower*1 + *-y*2.] **1.** A fox; hence, a

crafty person. *Scott*, Fortunes of Nigel, xxxi. [Scotch.]—2. A bugbear or ghost. *Halliwell.* [Prov. Eng.]

to-do (tŏ-dō′), *n.* [< *to do*, like *ado* < *at do*: see *ado*.] Ado; bustle; fuss; commotion. [Colloq.]

"What a *to-do* is here!" would he say; "I can lie in straw with as much satisfaction."
Evelyn, Diary, March 22, 1675.

todrawt, *v. t.* [ME. *todrawen*, *todragen*, < AS. **tōdragan*, < *tō-*, apart, + *dragan*, draw: see *to-*[2] and *draw*.] To draw asunder; drag violently.

They as in partye of hir preye *to-drowen* me crying and debating therayeins. *Chaucer*, Boethius, i. prose 3.

todrivet, *v. t.* [ME. *todriven*, < AS. *todrīfan* (= OFries. *todrīva* = OHG. *zatrīban*, MHG. *zetrīben*), drive asunder, < *tō-*, apart, + *drīfan*, drive: see *to-*[2] and *drive*.] To drive apart; scatter.

Al his folk with tempest al *to-driven*.
Chaucer, Good Women, l. 1280.

tod's-tail (todz′tāl), *n.* The club-moss, *Lycopodium clavatum*. [Scotch.]

tod-stove (tod′stōv), *n.* [< *tod*[1] + *stove*[1].] A stove for burning wood, made of six iron plates fastened together by rods or bolts in the form of a box. Also called *box-stove*.

Todus (tō′dus), *n.* [NL. (Linnæus, 1766; earlier in Browne, "Hist. Jamaica" (1756), p. 476, and Gesner, 1555), < L. *todus*, some small bird. Cf. *tody*.] The only genus of *Todidæ*, with about six species, all West Indian, as *T. viridis*, the common green tody of Jamaica, called by the old writers *green sparrow*, *green humming-bird*, and *tomtit*. See *Todidæ*, and cut under *tody*.

tody (tō′di), *n.*; pl. *todies* (-diz). [Cf. F. *todier*, NL. *Todus*; < L. *todus*, some small bird.] 1. A bird of the genus *Todus* or family *Todidæ*.—2. One of several birds formerly misplaced in the genus *Todus*. They belong to the family *Tyrannidæ* and elsewhere. Thus, the royal or king tody is *Muscivora regia* ("*Todus*" *regius* of Gmelin, 1788); the Javan tody of Latham is a broadbill, *Eurylæmus javanicus*, of Java, Sumatra, Borneo, the Malay peninsula, etc.; the great-billed tody of Latham is another bird of this family, *Cymborhynchus macrorhynchus*.

Green Tody (*Todus viridis*), about two thirds natural size.
a, Outline of bill from above, slightly reduced.

toe (tō), *n.* [< ME. *to*, *too*, pl. *tos*, *toos*, usually *ton*, *toon*, < AS. *tā* (pl. *tān*, *taan*), contr. of **tāhe*, in an early gloss *tāhae* = MD. *teen*, D. *teen* = MLG. *tee* = OHG. *zēhā*, MHG. *zēhe*, G. *zehe* (G. dial. in various forms: Bav. *zechen*, Swabian *zaichen*, Swiss *zebe*, *zeb*, Frankish *zewe*, Thuringian *ziwe*, etc.) = Icel. *tā* = Sw. *tå* = Dan. *taa* (Teut. **taihōn*, **taihwōn*, **taiwōn*), toe; connections unknown. Not connected with L. *digitus*, finger, toe, Gr. δάκτυλος, finger, toe. The Teut. word is applied exclusively to the digits of the foot.] 1. A digit of the foot, corresponding to a finger of the hand: as, the great *toe;* the little *toe;* the hind *toe* of a bird.

The fairest feete that euer freke [person] kende,
With *ton* tidily wrought, & tender of hur skinne.
Alisaunder of Macedoine (E. E. T. S.), l. 194.

Come, and trip it, as you go,
On the light fantastick *toe*.
Milton, L'Allegro, l. 34.

2. A digit of either foot, fore or hind, of a quadruped, especially when there are three or more (a large single toe, or a pair of large toes, inclosed in horn, being commonly called *hoof*). No animal has normally more than five toes; most quadrupeds have five, then four, three, two, and one, in decreasing number of instances. No bird has naturally more than four, though some breeds of poultry are regularly five-toed by perpetuation of an original sport comparable to the sexdigitate polydactylism of man; a few have only three; the African ostrich alone has two. Five toes is the rule in reptiles and batrachians, a lesser number being exceptional among those which have limbs, as lizards, crocodiles, turtles, frogs, newts, etc. In some lizards, as those which scramble over walls and ceilings, the toes function as suckers by means of adhesive pads (see *gecko*); batrachians which habitually perch on trees are similarly equipped (see *tree-toad*); in a rare case, toes serve as a sort of parachute (see cut under *flying-frog*). In some mammals, as seals, the toes are united in the common integument of the flippers. Three and sometimes four toes are connected in web-footed birds. The joints or phalanges of toes are typically and usually three apiece, but this number is often reduced to two or one in the case of lateral toes, as the human great toe. In birds a remarkable rule prevails, that the joints of the toes, from first to fourth toe, run two, three, four, five; the exceptions to this rule are comparatively few. The toes of most animals end in nails or claws, and are often long and movable enough to serve as organs of prehension, like fingers. See cuts under *bird*[1], *digitigrade*, *Plantigrada*, *bicolligate*, *palmate*, *semi-palmate*, and *totipalmate*.

Lyk asur were his [the cock's] legges and his *toon*.
Chaucer, Nun's Priest's Tale, l. 42.

3. The fore part, end, or tip of the hoof of an ungulate, as the horse.—4. The end of a stocking, shoe, or boot which contains or covers the toes: as, square or round *toes;* a hole in the *toe*.—5. A piece of iron welded under the front of a horseshoe, opposite the heels, to prevent slipping. See cut under *shoe*.—6. A projection from the foot-piece of an object to give it a broader bearing and greater stability.

Buttress walls should be placed at intervals, opposite to one another, and strutted apart at their *toes* by an inverted arch. *Encyc. Brit.*, IV. 450.

7. A barb, stud, or projection on a lock-bolt.—8. In *mach.*: (*a*) The lower end of a vertical shaft, as a mill-spindle, which rests in a step. (*b*) An arm on the valve-lifting rod of a steam-engine. A cam strikes the toe and operates the valve. Such toes are known respectively as *steam-toes* and *exhaust-toes*. *E. H. Knight.*—**Balls of the toes**, fleshy and callous pads or protuberances on the under side of the toes of any foot, and especially such formations at the bases of toes. In digitigrade quadrupeds these balls form the whole *sole*, as explained under that word. In birds they are technically called *tylari*.—**From top to toe.** See *top*[1].—**Great toe**, the toe on the inner side of the foot, corresponding to the thumb.—**Hammer-toe**, an affection in which the second phalanx of one or more of the toes is permanently flexed upon the first.—**Hind toe**, in *ornith.*, the hallux. When there are two hind toes, as in zygodactyl or yoke-toed birds, the inner one is the hallux, or hind toe proper, excepting in trogons, in which the outer one is the hallux. In the three-toed woodpeckers, where the hallux is wanting, the reversed outer toe takes the name and place of *hind toe*.—**Little toe**, the outermost and smallest toe on the human foot, and the corresponding digit in some other cases, irrespective of its actual relative size.—**Toe-and-heel pedal.** See *pedal*.—**To tread on one's toes.** See *tread*.—**To turn up one's toes**, to die. [Slang.]

toe (tō), *v.*; pret. and pp. *toed*, ppr. *toeing*. [< *toe*, *n.*] **I.** *trans.* 1. To touch or reach with the toes.

The rushers [in foot-ball] draw up in line facing each other and *toeing* a line which marks the centre of the field. *Tribune Book of Sports*, p. 124.

2. To furnish or provide a toe to or for; mend the toe of: as, to *toe* a stocking.—**To toe a nail**, to drive a nail obliquely. See *toe-nail*, 2.—**To toe a seam** (*naut.*). See *seam*[1].—**To toe the mark.** See *mark*[1].—**To toe the scratch.** See *scratch*[1].

II. *intrans.* To place or move the toes, as in walking or dancing.—**To toe in or out**, to turn the toes inward or outward in walking.

toe-biter (tō′bī′tėr), *n.* A tadpole.

toe-cap (tō′kap), *n.* A cap or tip, of leather, morocco, or patent leather, sometimes of metal, covering the toe of a boot or shoe. Also *toe-piece*.

toed (tōd), *a.* [< *toe* + *-ed*[2].] 1. Furnished or provided with a toe or toes: chiefly in composition with a qualifying word: as, long-*toed*, short-*toed*, black-*toed*, five-*toed*, pigeon-*toed*.

They all bowed their snaky heads down to their very feet, which were *toed* with scorpions.
Howell, Parly of Beasts, p. 39. (*Davies.*)

2. In *carp.*, noting a brace, strut, or stay when it is secured to a beam, sill, or joist by nails driven obliquely. *E. H. Knight.*

toe-drop (tō′drop), *n.* Inability to raise the foot and toes, from more or less complete paralysis of the muscles concerned. Compare *wrist-drop*.

toeless (tō′les), *a.* [< *toe* + *-less*.] Lacking or deprived of a toe or toes.

toe-nail (tō′nāl), *n.* 1. A nail growing on one of the toes of the human foot. See *nail*.—2. A nail driven in obliquely to fasten the end of a board or other piece of timber to the surface of another. *Car-Builder's Dict.*

Toe-piece, 15th century.
(From Viollet-le-Duc's "Dict. du Mobilier français.")

toe-piece (tō′pēs), *n.* 1. In *armor*, the piece forming the end of the solleret and inclosing the toes; also, the accessory or additional piece forming a long and pointed termination to the solleret. See cut in preceding column.—2. ★Same as *toe-cap*.

toe-ring (tō′ring), *n.* A ring made to wear on one of the toes, as is customary among some peoples that go barefoot or wear sandals.

toe-tights (tō′tīts), *n. pl.* In *theatrical costume*, tights with separate toes like the fingers of a glove.

toe-weight (tō′wāt), *n.* A knob of brass or iron screwed into the hoof or fastened to the shoe of a horse, for the purpose of correcting an error of gait in trotting, or of changing a pacing horse into a trotter.

tofall (tō′fâl), *n.* [Also *toofall*, misspelled *tuefall*, dial. *teefall;* < ME. *tofal* (= D. *toeval* = MLG. *toval* = MHG. *zuoval*, G. *zufall;* cf. Icel. *tilfelli* = Sw. *tillfälle* = Dan. *tilfælde*); < *to*[1] + *fall*[1].] 1. Decline; setting; end.

For him in vain, at *to-fall* of the day,
His babes shall linger at the unclosing gate!
Collins, Ode on Popular Superstitions of the Highlands.

2. A shed or building annexed to the wall of a larger one, and having its roof formed in a single slope with the top resting against the wall; a lean-to.

Tofalle, schudde. Appendicium, . . . appendix, teges.
Prompt. Parv., p. 495.

A new *tofall* for eight kyne.
Close Roll, 16 *Hen. VI.*, quoted in N. and Q., 7th ser., [VII. 61.

tofana (tō-fä′nä), *n.* [It.] See *aqua Tofana*, under *aqua*.

toff (tof), *n.* [Origin obscure.] A dandy; a fop; a swell. *Leland.* [Slang, Eng.]

Persons with any pretensions to respectability were vigorously attacked, for no earthly reason save that they were *toffs*. *Daily Telegraph*, Feb. 9, 1886. (*Encyc. Dict.*)

toffy, toffee (tof′i), *n.* Same as *taffy*[1]: the usual forms of the word in Great Britain.

Tofieldia (tō-fēl′di-ä), *n.* [NL. (Hudson, 1778), named after Mr. *Tofield*, an English botanist.] A genus of melanthiaceous plants, type of the tribe *Tofieldieæ*. It is characterized by septicidal fruit, nearly sessile flowers, six introrse anthers, and three very short styles. There are about 15 species, natives of north temperate and cold regions, with 1 or 2 species in the Andes. They are erect perennials from a short or creeping rootstock, with linear leaves, all or chiefly radical, and small flowers in a terminal spike. A book-name for the species is *false asphodel*. *T. palustris*, the Scotch asphodel, the only British species, produces short grassy leaves, and little yellowish-green flowers, compacted into globular or ovoid heads; it occurs in Canada with whitish flowers. Three other species are natives of the eastern United States, and two others of northwestern America.

toforet (tō-fōr′), *adv.* and *prep.* [< ME. *tofore*, *tovore*, *toforn*, *toforen*, < AS. *tōforan* (= OS. *teforan* = MLG. *tovoren* = MHG. *zuovor*, *zuovorn*, G. *zuvor* = Dan. *tilforn*), before, < *tō*, to, + *foran*, before: see *to*[1] and *fore*[1]. I took no "*long togs*" with me; . . . being dressed like the rest, in white duck trousers, blue jacket, and straw hat. *R. H. Dana, Jr.*, Before the Mast, p. 131.

tog[2] (tog), *v. t.*; pret. and pp. *togged*, ppr. *togging*. [< *tog*[2], *n.*] To dress. [Slang.]

He was *tog'd* gnostically enough. *Scott*, St. Ronan's Well, iv.

Scrumptious young girls you *tog* out so finely,
Adorning the diggings so charming and gay.
Chambers's Journal, July, 1879, p. 368. (*Encyc. Dict.*)

★**toga** (tō'gä), *n.* [< L. *toga*, a mantle, lit. a covering, < *tegere*, cover: see *tect*, *tegument*. Cf. *toge*.] The principal outer garment worn by the ancient Romans. It was a loose and flowing mantle or wrap, of irregular form, in which it differed from the kindred Greek garment, the himation, which was rectangular. It was made of wool, or sometimes (under the emperors) of silk, and its usual color was white. It covered the whole body with the exception of the right arm, and the right to wear it was an exclusive privilege of the Roman citizen. The *toga virilis*, or manly robe, was assumed by Roman youths when they attained the age of fourteen. The *toga prætexta*, which had a deep purple border, was worn by the children of the nobles, by girls until they were married, and by boys until they were fourteen, when they assumed the toga virilis. It was also the official robe of the higher magistrates, of priests, and of persons discharging vows. The *toga picta* was ornamented with Phrygian embroidery, and was worn by high officers on special occasions, such as the celebration of a triumph. The *trabea* was a toga ornamented with horizontal purple stripes; it was the characteristic uniform of the knights (*equites*) upon festival days. Persons accused of any crime allowed their togas to become soiled (*toga sordidata*) as a sign of dejection; candidates for public offices whitened their togas artificially with chalk; while mourners wore a *toga pulla* of natural black wool. See also cut in next column.

togated (tō'gā-ted), *a.* [< L. *togatus*, wearing or entitled to wear the toga (< *toga*, toga: see *toga*), + *-ed*[2].] 1. Dressed in a toga or robe; draped in the classical manner.

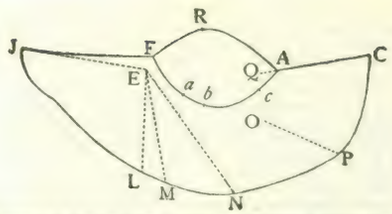

Diagram of Roman Toga (according to Müller, in "Philologus").

FRA, sinus of toga. As worn, point E was placed on the left shoulder, the edge FJ hanging down free in front of the body; the whole of the remainder of the garment was then thrown diagonally around the back, so that *a* on the seam of the sinus came under the right elbow, and *b* at the middle of the waist in front; the seam was now directed upward, so that the point *c* approximately covered E, where the garment first touched the body. The last third of the toga, OPCQ, was thrown over the left shoulder and fell to the ground in voluminous folds, draping the back. The so-called umbo or nodus of the toga was found at F, over the left breast, at the point of junction of the sinus. Point L fell over the left calf, point M over the right, and point N over the left wrist.

toggle-iron (tog'l-ī″ėrn), *n.* The form of whalers' harpoon now in general use, having a movable blade instead of fixed barbs; the instrument used in first striking a whale (when explosives are not employed), for fastening it to the whale-boat by means of a tow-line, so that the boat may be hauled up to the whale, and the latter be killed by hand-lancing at close quarters, or by bomb-lancing at longer range.

Toggle-iron.

It consists of a harpoon-shank and socket without any stationary barbed flukes; upon the extreme end of the shank is a blade, working upon the principle of a toggle. This blade has a cutting edge for penetrating the blubber, and a dull back which prevents it from cutting its way out when the line is hauled upon. Also called simply the *iron*.

toggle-joint (tog'l-joint), *n.* In *mech.*, a joint formed of plates or bars hinged together in such manner that when at rest the two parts form a bend called the *knuckle;* an elbow- or knee-joint. It is used by applying power, by any mechanical means such as a screw, a piston, or a lever, against the knuckle, when the tendency of the two leaves or bars to extend exerts a powerful pressure. This device is much used in printing-presses and other presses. See *toggle-press*. See also cuts under *skate* and *stone-breaker*.

Toggle-joint.

toggle-lanyard (tog'l-lan″yärd), *n.* See the quotation.

It [the toggle] has a hole near one end, through which a rope is attached, which is termed the *toggle-lanyard*. This lanyard is used in handling or confining the toggle. *C. M. Scammon*, Marine Mammals, p. 312.

tohu bohu (tō′hö bō′hö). [F. *tohu-bohu*; from the Heb. words in Gen. i. 2, translated 'without form' and 'void.'] Chaos.

It was surely impossible any man's reason should tell him the particular circumstances of the world's creation, as that its material principal was a *tohu* and *bohu*, that it was agitated by the divine spirit, that severall portions were form'd at severall times, that all was finished in six dayes space, etc. *Bp. Parker*, Platonick Phil., p. 85.

toil[1] (toil), *v.* [Early mod. E. also *toyle*; < ME. *toilen, toylen* (Sc. *toilge, tulge*), appar. < OF. *toiller, touiller, toouiller, teouiller*, F. *touiller*, mix, entangle, trouble, besmear; origin unknown. Cf. *toil*[1], *n.* The sense 'labor, till' appears to be due in part to association with *till*[1] (ME. *tillen, tilen, tolen, tulien*, etc.), and the form is near to that of MD. *tuylen, teulen*, till, labor (see *till*[1]); but the AS. verb could not produce an E. form *toil*, and a ME. verb of such general import could hardly be derived from MD. The sense 'pull' may be due in part to association with *till*[3], *toll*[2].] **I.**† *trans.* 1. To pull about; tug; drag.

The dispitous Iewes nolde not spare
Til trie [choice] fruit weore tore and *toyled.*
Holy Rood (ed. Morris), p. 143.

II. *intrans.* 1. To work, especially for a considerable time, and with great or painful fatigue of body or mind; labor.

Master, we have *toiled* all the night, and have taken nothing. Luke v. 5.

See yonder poor, o'erlabour'd wight,
So abject, mean, and vile,
Who begs a brother of the earth
To give him leave to *toil.*
Burns, Man was Made to Mourn.

All things have rest; why should we *toil* alone,
We only *toil*, who are the first of things?
Tennyson, Lotos Eaters, Choric Song.

2. To move or travel with difficulty, weariness, or pain.

The king of men, by Juno's self inspir'd,
Toil'd through the tents, and all his army fir'd.
Pope, Iliad, viii. 267.

Slow *toiling* upward from the misty vale,
I leave the bright enamelled zones below.
O. W. Holmes, Nearing the Snow-Line.

=**Syn.** 1. To drudge, moil, strive. See the noun.

toil[1] (toil), *n.* [Early mod. E. also *toyle*; < ME. *toil, toile, toyle* (Sc. *tuilye, tuilue, toolye*, etc.); from the verb.] 1†. Confusion; turmoil; uproar; struggle; tussle.

than its nominal value, and in its being issued, as a rule, by private persons, without governmental sanction, as a guaranty that the issuer will on demand redeem the token for its full nominal value in the legal currency of the country. Tokens have generally been issued by tradesmen to provide a convenient small change when there was an absence or scarcity of the government coinage of the smaller denominations of money. Leaden tokens, now very scarce, were issued by tradesmen under Elizabeth and James I. In 1613 took place the (quasi-governmental) issue of Harrington tokens. (See *Harrington.*) During the Commonwealth and under Charles II. (1648–72) the tradesmen and tavern-keepers of nearly all English towns issued brass and copper tokens, generally inscribed with the name, address, and trade of the issuer, and with the nominal value of the piece, usually 1d., ½d., or ¼d. These specimens are known to collectors as the "seventeenth-century tokens." The "eighteenth-" and "nineteenth-century tokens" were issued by English tradesmen and by other persons between 1787 and 1813. They are larger and of much better workmanship than the earlier tokens, and are generally struck in copper and bronze (2d., 1d., ½d., etc.), though some specimens were issued in silver (1s., 6d., etc.). In 1811 silver tokens for 5 shillings, 3 shillings, and 18 pence were issued by the Bank of England, and were known as the "Bank tokens." See also cut under *tavern-token.*

(ML.) *tolōnēum*, *tolōnium*, popular forms of LL. *telōnēum*, *telōnium*, < Gr. *τελωνεῖον*, also *τελώνιον*, a tollhouse, custom-house, < *τελώνης*, a collector or farmer of taxes, < *τέλος*, tax, toll, custom.] A tax paid, or duty imposed, for some use or privilege or other reasonable consideration.

An abbot of Abingdon, in return for a *toll* of herrings which their barges paid in passing, consented to cut a new channel for their transit.
J. R. Green, Conquest of England, p. 421.

Therfor ȝelde ȝe to alle men dettis, to whom tribut, tribut, to whom *tol*, *tol* [custom, A. V.].
Wyclif, Rom. xiii. 7.

Toulouse the riche,
I ȝif the . . .
The *tolle* and the tachementez, tavernez and other,
The towne and the tenementez with towrez so hye,
That towchez to the temperaltee, whilles my tyme lastez.
Morte Arthure (E. E. T. S.), l. 1568.

The word *toll*, in its earliest use, appears to have signified a franchise enjoyed by lords of manors, and is defined by Glanvill as the liberty of buying and selling in one's own land. *Encyc. Brit.*, XXIII. 436.

(*a*) The payment claimed by the owners of a port for goods landed or shipped there.

Of wine, a *toll* in the strictest sense of the term was taken by the king's officer from every ship having in cargo ten casks or more, on the arrival of the ship at a port in England—viz., one cask from a cargo of ten up to twenty casks, and two casks from a cargo of twenty or more, unless the *toll* formed the subject of a composition in the way of a money payment.
S. Dowell, Taxes in England, I. 83.

(*b*) The sum charged by the owners of a market or fair for goods brought to be sold there, or for liberty to break the soil for the purpose of erecting temporary structures. (*c*) A portion of grain retained by a miller as compensation for grinding. (*d*) A fixed charge made by those concerned in the maintenance of roads, streets, bridges, etc., for the passage, as at a toll-gate, of persons, goods, and cattle. (*e*) A compensation for services rendered, especially for transportation or transmission: as, canal *tolls*, railway *tolls*, and other charges have raised the price of wheat.

As the expense of carriage is very much reduced by means of such public works, the goods, notwithstanding the *toll*, come cheaper to the consumer than they would otherwise have done.
Adam Smith, Wealth of Nations, v. 1.

The estimate for special despatches includes telegraph *tolls* and pay of the correspondents who furnish the news.
The Century, XL. 260.

Toll thorough, the toll taken by a town for persons, cattle, or goods going through it, or crossing a bridge or ferry maintained at its cost.

Toll thorough is paid for the use of a highway. In this case, if charged by a private person, some consideration, such as repair of the highway, must be shown, as such a toll is against common right. *Encyc. Brit.*, XXIII. 436.

Toll traverse, the toll exacted for passage or traffic over private land, bridges, ferries, etc.—**Toll turne**, or **turn toll**, a toll paid at the return of beasts from a fair or market where they were not sold.—**To run toll**, to avoid the payment of toll by running through the toll-gate. =Syn. *Duty*, *Tribute*, etc. See *tax*.

toll[1] (tōl), *v.* [< ME. *tollen* = Icel. *tolla* = Sw. *tulla* = Dan. *tolde*, tax, take toll; from the noun.] I. *intrans.* 1. To pay toll or tailage, as on a purchase.

As ich leyue for the lawe asketh
Marchauns for here merchaundise in meny place to *tollen*.
Piers Plowman (C), xiv. 51.

I will buy me a son-in-law in a fair, and *toll* for this; I'll none of him. *Shak.*, All's Well, v. 3. 149.

2. To take toll; exact or levy toll; especially, to take a portion of grain as compensation for grinding.

Wel coude he stelen corn and *tollen* thryes.
Chaucer, Gen. Prol. to C. T., l. 562.

No Italian priest
Shall tithe or *toll* in our dominion.
Shak., K. John, iii. 1. 154.

II.† *trans.* To take as a part of a general contribution or tax; exact as a tribute.

Like the bee, *tolling* [var. *culling*] from every flower
The virtuous sweets. *Shak.*, 2 Hen. IV., iv. 5. 75.

For the Customers of the King of Turkeman *tolled*, of euery flue and twentie, one. *Purchas*, Pilgrimage, p. 422.

toll[2] (tōl), *v. t.* [Also irreg. *tole*, formerly *toal;* < ME. *tollen*, later sometimes *tolen*, draw, allure, entice, *tollien*, also *tullen*, draw, allure, entice, *tille*, < AS. **tyllan* in *for-tyllan*, draw away from the mark, allure: see *till*[3].] 1†. To draw; pull; tug; drag.

But as a traytour atteynted thei *toled* hym and tugged hym. *York Plays*, p. 482.

The sensitive appetite often, yea and for the most part, *toaleth* and haleth the will to consent and follow her pleasures and delights. *T. Wright*, Passions of the Mind, i. 8.

2. To tear in pieces. *Halliwell* (under *tole*). [Prov. Eng.]—3. To draw; invite; entice; allure.

'Tis a mermaid
Has *tol'd* my son to shipwreck.
Middleton and Dekker, Roaring Girl, i. 1.

The farmer *tolled* the animal out of his sty, and far down the street, by tempting red apples.
R. T. Cooke, Somebody's Neighbors, p. 60.

toll[3] (tōl), *v.* [Formerly also *tole;* a particular use of *toll*[2], pull, the sense having passed from 'pull a bell,' i. e. pull the rope so as to make the bell sound, to 'make the bell sound.'] **I.** *trans.* 1. To cause (a bell) to sound with single strokes slowly and regularly repeated, as for summoning public bodies or religious congregations to their meetings, for announcing a death, or to give solemnity to a funeral; specifically, to ring (a bell) by striking it with a hammer without swinging.

To *Toll* a Bell, which is to make him strike onely of one side. *Minsheu*, 1617.

I heard the bell *toll'd* on thy burial day.
Cowper, My Mother's Picture.

A bell of very moderate weight will soon pull an ordinary wall to pieces if rung in full swing across it. The bells in "bell gables" can hardly ever be safely rung for that reason, but only *tolled*.
Sir E. Beckett, Clocks, Watches, and Bells, p. 372.

2. To give out or utter by tolling or striking, as the sound of a bell or a clock.

And bells *toll'd* out their mighty peal,
For the departed spirit's weal.
Scott, L. of L. M., vi. 30.

Clear and loud
The village-clock *tolled* six.
Wordsworth, Influence of Natural Objects.

3. To call attention to or give notice of by slowly measured sounds of a bell; ring for or on account of.

A sullen bell,
Remember'd *tolling* a departing friend.
Shak., 2 Hen. IV., i. 1. 103.

One set slow bell will seem to *toll*
The passing of the sweetest soul
That ever look'd with human eyes.
Tennyson, In Memoriam, lvii.

II. *intrans.* To give out the slowly measured sounds of a bell when struck singly and at regular intervals, as in calling meetings, or at funerals, or to announce the death of a person.

The clocks do *toll*,
And the third hour of drowsy morning name.
Shak., Hen. V., iv. (cho.).

Toll for the brave!
The brave that are no more!
Cowper, Loss of the Royal George.

The Curfew Bell
Is beginning to *toll*.
Longfellow, Curfew.

toll[3] (tōl), *n.* [Formerly also *tole;* < *toll*[3], *v.*] The sounding of a bell with slowly measured single strokes.

But here some seventeen years after they were bid to a bitter banquet: all slaine at the *tole* of a bell throughout the whole Island, which is called to this day the Sicilian Even-song. *Sandys*, Travailes, p. 185.

toll[4] (tōl), *v. t.* [< L. *tollere*, lift up, take away: see *tolerate*.] In *law*, to take away; vacate; annul.—**To toll an entry**, in *law*, to annul and take away a right of entry.

tollable (tō'la-bl), *a.* [< *toll*[1] + *-able*.] Subject to the payment of toll: as, *tollable* goods.

tollage (tō'läj), *n.* [< *toll*[1] + *-age*.] Toll; exaction or payment of toll.

By taxyng and *tollage*. *Skelton*, Colyn Cloute, l. 364.

By Leofric her Lord yet in base bondage held,
The people from her marts by *tollage* who expell'd;
Whose Duchess, which desir'd this tribute to release,
Their freedom often begg'd.
Drayton, Polyolbion, xiii. 270.

tollart†, *n.* [Also *tollur:* "so called because bounds are terminated by holes cut in the earth, which must be renewed and visited once a year" (< Corn. *toll, doll*, a hole), "or because he receives the tolls or dues of the lord of the soil" (see *toller*[1]). *Borlase* (*Jago*).] Same as *bounder*, 3.

toll-bait (tōl'bāt), *n.* Minced or chopped bait thrown overboard to toll, lure, or attract fish; gurry-bait; tollings. It is usually chum or stosh, and is often salted to keep until wanted for use. The process of using toll-bait is often called *chumming* or *chumming up*. Also *throw-bait*.

In the old style mackerel fishing, however, clams were chopped up (often with a mixture of menhaden) and sprinkled overboard as *toll-bait* to attract the mackerel to the surface. *Fisheries of U. S.*, V. ii. 594.

toll-bar (tōl'bär), *n.* A bar or beam, or (now usually) a gate, thrown across a road or other passage at a tollhouse, for the purpose of preventing passengers, vehicles, cattle, etc., from passing without payment of toll; a turnpike. [Prov. Eng. and Scotch.]

It would often be nearly 1 o'clock A. M. before we reached the Newington *toll-bar*, which was our general point of separation. *Harper's Mag.*, LXXX. 448.

toll-book (tōl'bůk), *n.* A book in which horses, cattle, and goods to be sold at a fair were entered for payment of tolls.

Some that were Maides
E'en at Sun set, are now perhaps i' th' *Toale-booke*.
C. Tourneur, Revenger's Tragedy, ii. 2.

tollbooth (tōl'böth), *n.* [Also *tolbooth;* < ME. *tolbothe* (= G. *zollbude* = Sw. *tullbod* = Dan. *toldbod*); < *toll*[1] + *booth*.] 1†. A booth, stall, or office where tolls, taxes, or duties are collected.

And whanne Jhesus passide fro thennus, he say a man, Matheu bi name, sittynge in a *tolbothe* [at the receipt of custom, A. V.; at the place of toll, R. V.].
Wyclif, Mat. ix. 9.

2. A town jail: so called with reference to the fact that the tollbooth or temporary hut of boards erected in fairs and markets, in which the customs or duties were collected, was often used as a place of confinement or detention for such as did not pay, or were chargeable with some breach of the law in buying or selling; hence, any prison.

The Maior refused to give them the keys of the *Tollbooth* or town-prison.
Fuller, Hist. Cambridge, vii. 25. (*Davies.*)

Adjacent to the *tolbooth*, or city jail of Edinburgh, is one of three churches into which the cathedral of St. Giles is now divided, called, from its vicinity, the Tolbooth Church. *Scott*, Heart of Mid-Lothian, ii.

3. A town hall. *Halliwell*. [Prov. Eng.]

tollbooth (tōl'böth), *v. t.* [< *tollbooth*, *n.*] To imprison in a tollbooth. *Bp. Corbet.*

toll-bridge (tōl'brij), *n.* A bridge where toll is paid for passing over it.

toll-collector (tōl'kŏ-lek″tor), *n.* 1. A functionary who collects tolls and charges.

The *Toll Collector* [of Chepping Wycombe] is appointed by the common council, during pleasure, to receive the tolls and stallage of the market and fair, and the quit-rents of the corporation. *Municip. Corp. Report*, 1835, p. 43.

2. A counter or registering device to indicate the number of persons passing a turnstile.—3. In a grain-mill, a device attached to the feed to take out the toll, or miller's compensation. *E. H. Knight.*

toll-corn (tōl'kôrn), *n.* Corn taken at a mill in payment for grinding.

toll-dish (tōl'dish), *n.* A dish or bowl for measuring the toll in mills. See *toll*[1] (*c*). Also formerly called *toll-hop*.

The millers *tolle-dish* also must be according to the standard. Now millers are to take for the tolle but the twentieth part, or 24 part, according to the strength of their water, and custome of the realm.
Dalton, Countrey Justice (1620). (*Nares.*)

"Take thy staff, Miller," he added, "and keep thy head," . . . the thieves in the meantime laughing and crying to their comrade, "Miller, beware thy *toll-dish* [humorously for head]!" *Scott*, Ivanhoe, xi.

toller[1] (tō'lėr), *n.* [< ME. *tollere, tollare*, < AS. *tollere, tolnere* = OFries. *tolner* = D. *tollenaar* = MLG. *tollener, toller* = OHG. *zollanāri, zolneri*, MHG. *zolnære, zolner*, G. *zöllner* = Dan. *tolder;* as *toll*[1] + *-er*[1].] 1. One who collects taxes; a toll-gatherer.

tollery†, (tō'lėr-i), *n.* [< ME. **tollerie, tolrie;* < *toll*[1] + *-ery*.] The taking of tolls; tax-collecting.

Petre wente agen to fishing, but Mathew not to his *tolrie*.
Wyclif, Select Works (ed. Arnold), II. 138.

Tolletan (tol'e-tan), *a.* [ME. *Tolletane*, < L. *Toletanus*, pertaining to *Toletum*, < *Toletum*, a town in Spain, now *Toledo*.] Of or pertaining to Toledo.—**Tolletan tables**, same as *Alphonsine tables* (which see, under *Alphonsine*): so called as being adapted to the city of Toledo. Also *tables Toletanes*.

His *tables Tolletanes* forth he brought
Ful wel corrected, ne ther lakked nought.
Chaucer, Franklin's Tale, l. 545.

toll-free (tōl'frē), *a.* Free from the obligation of paying toll or duty.

A remission of the feefarm of their city to the extent of 50*l.* a year, in order that all persons visiting York might be made *toll-free*. *J. Gairdner*, Richard III., ii.

Behould the Teeth, which *Toul-free* grinde the food,
From whence themselues do reap more grief then good.
Sylvester, tr. of Du Bartas's Weeks, i. 7.

toll-gate (tōl'gāt), *n.* A gate where toll is taken; a toll-bar.

It afforded a southern stranger a new kind of pleasure to travel so commodiously without the interruption of *toll-gates*.
Johnson, Journey to Western Islands (Works, VIII. 211).

toll-gatherer (tōl'gaᴛʜ″ėr-ėr), *n.* [< ME. *tolgadere;* < *toll*[1] + *gatherer*.] One who collects tolls or duties.

Matheu, that was of Judee, . . . fro the office of a *tolgaderer* . . . was clepid to God. *Wyclif*, Prol. to Mat.

Toll-gatherers are ever ready to search and exact sound tribute. *Sir T. Herbert*, Travels (ed. 1638), p. 36.

toll-hall†, (tōl'hâl), *n.* [Early mod. E. also *tolehall;* < *toll*[1] + *hall*.] Same as *tollbooth*.

Skinners rew [row] reaching from the pillorie to the *tolehall*, or to the high crosse.
Stanihurst, Descrip. of Ireland, iii. (Holinshed's [Chron., I.).

toll-hop†, (tōl'hop), *n.* A toll-dish.

tollhouse (tōl'hous), *n.* [Formerly also *tolhouse;* < ME. *tolhous;* < *toll*[1] + *house*[1].] 1. Same as *tollbooth*. [Now prov. Eng. and rare.]

Our Sauyor Crist goyng by sawe the publycan named Leui, otherwyse Mathew, syttynge at the *tolhous*.
Sir R. Guylforde, Pylgrymage, p. 49.

May not this person have been connected with the *tolhouse* or "tolbooth" (as our town halls were called in the Middle Ages)? In this place [Great Yarmouth] the name of *tolhouse* is still retained [1889].
N. and Q., 7th ser., VIII. 213.

2. A house placed on or beside a road near a toll-gate, or at the end of a toll-bridge, where the toll-taker is stationed.

tolling[1] (tō'ling), *n.* [Also *toling;* verbal n. of *toll*[2], *v.*] 1. The use of toll-bait to attract fish; the practice or method of drawing fish, as a school of mackerel, by means of gurry, chum, or stosh thrown overboard. The tolling is done by one of a crew while the others fish.—2. *pl.* Toll-bait.—3. A method of decoying or luring ducks. See the quotation. [U. S.]

The system pursued on the Chesapeake Bay and the North Carolina Sounds, and known as *toling*, is the most successful. It is as follows: A small dog, an ordinary poodle, or one very much similar to that, white or brown in color, and called the toler breed, is kept for the purpose. It is trained to run up and down on the shore in the sight of the ducks, directed by the motion of his owner's hand. The curiosity of the ducks is excited, and they approach the shore to discover the nature of the object which has attracted their attention. They raise their heads, look intently, and then start in a body for the shore. *Dogs of Great Britain and America*, p. 271.

tolling[2] (tō'ling), *n.* [Formerly also *toling;* verbal n. of *toll*[3], *v.*] 1. The act of sounding a bell. See *toll*[3].—2. The sound produced by a bell under single measured strokes of the clapper.

It [the campanero] is especially celebrated for its extraordinary voice, which is compared with the *tolling* of a bell. *Stand. Nat. Hist.*, IV. 475.

The great superiority of tone of bells ringing in full swing over *tolling*, and even of *tolling* over striking by a clock hammer, has been often noticed.
Sir E. Beckett, Clocks, Watches, and Bells, p. 373.

3. A peculiar bell-like sound said to be made by bees before they swarm. [Scotch.]

Most observers also affirm that in the evening before swarming an uncommon humming or buzzing is heard in the hive, and a distinct sound from the queen, called *tolling* or calling. Mr. Hunter compares it to the notes of a pianoforte. *Edin. Encyc.*, art. Bee, quoted in Jamieson.

tolling-lever (tō'ling-lev″ėr), *n.* A lever or shank projecting from the top of the clapper, and pulled by means of a light rope, to sound the bell. It is designed to save the heavy swinging of the bell in a weak tower. *Sir E. Beckett*, Clocks, Watches, and Bells, p. 371.

toll-man (tōl'man), *n.* A toll-gatherer; the keeper of a toll-bar.

And now the turnpike-gates again
Flew open in short space;
The *toll-men* thinking, as before,
That Gilpin rode a race.
Cowper, John Gilpin.

tol-lol (tol-lol′), *a.* [Perhaps from *tolerable.*] Tolerably good; pretty fair. [Slang.]

tol-lol-ish (tol-lol′ish), *a.* Tolerable. [Slang.]

Lord Nelson, too, was pretty well—
That is, *tol-lol-ish!*
W. S. Gilbert, Mystic Selvagee.

tollon (tō-lōn′), *n.* [Also *toyon.* Amer. Sp.] The Californian holly, *Heteromeles arbutifolia.*

tolo (tō′lō), *n.* [African.] The koodoo, *Strepsiceros kudu*, an African antelope. See *koodoo.*

tolosa-wood (tō-lō′sä-wùd), *n.* An Australian shrub or tree, *Pittosporum bicolor.*

tolsester† (tōl-ses′tėr), *n.* [ME. **tolsester* (ML. *tolsestrum*), < *toll*[1] + *sester, sexter* (< L. *sextarius*): see *sester, sexter.*] A duty paid by tenants of some manors to the lord for liberty to brew and sell ale. *Imp. Dict.*

tolsey† (tōl′si), *n.* [< *toll*[1] + *-sey* (for *see*[2] ?).] A tollbooth; also, a place where merchants usually assembled and commercial courts were held.

The place under it is their *Tolsey* or Exchange, for the meeting of their merchants.
Defoe, Tour through Great Britain, III. 239. (*Davies.*)

tolt (tōlt), *n.* [< ML. *tolta* (OF. *tolte*, etc.), < L. *tollere*, take away: see *toll*[4].] In *old Eng. law*, a writ whereby a cause depending in a court-baron was removed into a county court.

Toltec (tol′tek), *n.* [Nahuatl *toltecatl*, artisan: pl. *tolteca.*] A member of a tribe which, according to tradition, coming from the north, occupied the Mexican plateau during several centuries previous to the advent of the Aztecs. Probably the traditions relating to the Toltecs originated through the amalgamation of historical reminiscences of a tribe whose capital was the city of Tula or Tollan, which was destroyed in prehistoric times, with those relating to a mythical people which was ruled by the god Quetzalcohuatl. A third group of traditions relating to the Toltecs describes them as the prehistoric tribe who were the inventors of all the arts and of all the knowledge that flourished in Mexico at the time of the conquest. They were believed to have invented the Mexican calendar. According to tradition they had their origin in the west, beyond the sea. Cf. Cyc. of Names.

Toltecan (tol′te-kan), *a.* [< *Toltec* + *-an.*] Relating to the family of ancient civilized peoples dwelling in Mexico, and in Peru and various parts of South America. *Encyc. Brit.*

tolter (tol′tėr), *v. i.* [< ME. *tolteren*; cf. *totter.*] To struggle; flounder. *Halliwell.* [Prov. Eng.]

tolu (tō-lū′ or tō′lū), *n.* [Short for *Tolu balsam* or *balsam of Tolu*, so called as being brought from *Tolu*, now *Santiago de Tolu*, in the United States of Colombia. The origin of *Tolu* in this name is not ascertained.] A balsam obtained from incisions through the bark of *Toluifera Balsamum*, an evergreen tree 60 or 80 feet high, found in the uplands of the United States of Colombia. It is a semi-fluid substance, becoming at length hard and brittle, of properties like those of the balsam of Peru, but less decided. It is somewhat used in medicine, and much more in perfumery, for burning pastilles. More fully named *balsam of tolu.*

Tolu-tree (*Toluifera Balsamum*).

toluene (tol′ū-ēn), *n.* [< *tolu* + *-ene.*] Methyl benzene ($C_6H_5.CH_3$), a hydrocarbon forming a colorless mobile liquid having the odor of benzene, and of specific gravity 0·883 at 32° F. It is soluble to some extent in alcohol, ether, and fixed and volatile oils, and dissolves iodine, sulphur, and many resins. It is obtained by the dry distillation of tolu and many other resinous bodies, by the action of potash on benzylic alcohol, and by heating toluic acid with lime. Also *toluol.*

tolug†, *v. t.* [ME. *toluggen, tologgen*; < *to-*[2] + *lug*[1].] To pull about.

Liȝtliche Lyer lepe awey thanne,
Lorkynge thorw lanes *to-lugged* of manye.
Piers Plowman (B), ii. 216.

toluic (tō-lū′ik), *a.* [< *tolu* + *-ic.*] Pertaining to or produced from tolu.—**Toluic acid**, an aromatic monobasic acid ($C_6H_4.CH_3.CO_2H$), a homologue of benzoic acid. It has three isomeric modifications.

toluol (tol′ū-ol), *n.* [< *tolu* + *-ol.*] Same as *toluene.*

tolutation† (tol-ū-tā′shọn), *n.* [< LL. *tolut-*, in *tolutim*, on a trot, *tolutaris*, trotting (< *tollere*, lift: see *tolerate*), + *-ation.* Cf. *trot*[1].] A pacing or ambling. *Sir T. Browne*, Vulg. Err., iv. 6.

tolu-tree (tō-lū′trē), *n.* The tree yielding tolu. See *tolu.*

Tolypeutes (tol-i-pū′tēz), *n.* [NL. (Illiger, 1811), < Gr. τολυπεύειν, wind off, achieve, < τόλυπη, a clue, ball.] A genus of armadillos, of the family *Dasypodidæ*, including the three-banded armadillo or apar, *T. tricinctus.* Two others are described. See cut under *apar.*

tolypeutine (tol-i-pū′tin), *a.* and *n.* [< *Tolypeutes* + *-ine*[1].] **I.** *a.* Relating or belonging to the genus *Tolypeutes*; like an apar.

II. *n.* A member of the genus *Tolypeutes.*

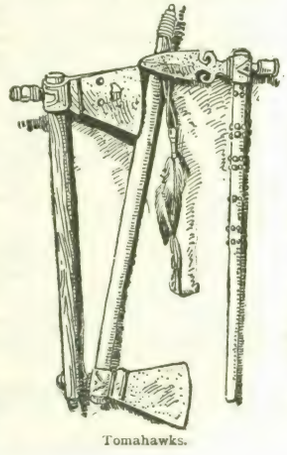
★*Stand. Nat. Hist.*, V. 50.

tom[1] (tom), *n.* [< ME. *Tomme, Thomme*, abbr. of *Thomas*, < LL. *Thomas*, < Gr. Θωμᾶς, < Heb. *Thoma*, lit. 'twin.' Cf. *Thomas Didymus*, 'Thomas the twin,' the name of one of the apostles.] **1.** [*cap.* or *l. c.*] A familiar form of the common Christian name *Thomas.* Used, like the name *Jack*, as a generic name for a man or a fellow, implying some degree of slight or contempt: as, a *tom*-fool; *Tom* o' Bedlam.

It happened one time that a *Tom* of Bedlam came up to him, and had a mind to have thrown him from the battlements, saying, "Leap, *Tom*, leap."
Aubrey, Lives (Thomas More).

"*Tom* Raw, the Griffin," a name which used to be applied to a subaltern in India for a year and a day after his joining the army. *N. and Q.*, 7th ser., X. 172.

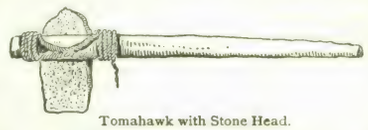
2. Used, like *jack*, attributively or in composition with the name of an animal, a male: as, a *tom*-cat; hence, as a noun, a male; specifically, a male cat.



Tom = "male" is commonly used in the neighbourhood of Liphook, Hampshire, when little animals or birds are spoken of. The word frequently stands by itself, as in the question "Is it only the *toms* which sing?" i. e., only the male nightingales and cuckoos; but it also appears in numerous compounds. I have heard *tom*-rat, *tom*-rabbit, *tom*-mouse, *tom*-hedgehog, *tom*-ferret, *tom*-weasel, *tom*-robin, *tom*-thrush, *tom*-blackbird, *tom*-pigeon, *tom*-turkey. *Tom*-cock is rarely used in referring to the domestic fowl, but such words as *tom*-brahma and *tom*-bantam are quite common. A sparrow, however, is a jack-sparrow, and a dog or larger animal is, I believe, never a *tom.*
N. and Q., 7th ser., VI. 109.

Cats in each clime and latitude that dwell,
Brown, sable, sandy, grey, and tortoiseshell,
Of titles obsolete, or yet in use,
Tom, Tybert, Roger, Rutterkin, or Puss.
Huddesford, Monody on Dick, an Academical Cat, Salmagundi, 1791. (Quoted in N. and Q., 7th ser., V. 350.)

3†. The knave of trumps at gleek.



Tom, the knave, is nine, and tidie, the four of trumps, is four: that is to say, you are to have two apiece of the other two gamesters. *Wit's Interpreter*, p. 365. (*Nares.*)

4. A close-stool. *Halliwell.* [Prov. Eng.]—**5.** A machine formerly used in gold-washing, first in the southern Atlantic States, and later in California, where, however, it was soon superseded by the sluice. It is a trough set in an inclined position, about 20 inches wide at the upper and 30 at the lower end, near which for a short distance the wooden bottom is replaced by one of perforated sheet-iron, the holes being about an inch in diameter. Through these holes the finer gravel and sand with the gold pass into a somewhat wider flat box with riffles, on which the precious metal is caught by the help of the current and the necessary amount of stirring with the shovel. The *tom* is something like the "rocker," except that it is longer, and has no rocking motion. Both are very rough and cheap machinery; and most of the stuff originally worked by their aid has been washed over again, and sometimes a great number of times.—**Bottle Tom**, the bottle-tit, a bird.—**Long tom.** (*a*) *Naut.*, a long gun as distinguished from a carronade; a large gun, especially when carried amidships on a swivel-carriage, etc., as distinguished from the smaller guns carried in broadside. (*b*) Same as def. 5, above. (*c*) A kind of large pitcher or water-can in use in England in the early part of the nineteenth century.—**Old Tom.** See *old.*—**Tom and Jerry**, a highly spiced drink, which is made of eggs, sugar, rum, spices, hot milk, etc.—**Tom Cox's traverse.** See *traverse.*

Tomahawks.

tom[2]†, *n.* A Middle English form of *toom. Alliterative Poems* (ed. Morris), iii. 135.

tomahawk (tom′ą-hâk), *n.* [Formerly also (given as Indian) *tomahack* (Smith), *tamahaac* (Webster), *tamohake* (Strachey); of Amer. Ind. origin: Algonkin *tomehagan*, Mohegan *tumnahegan*, Delaware *tamoihecan*, a tomahawk: explained by Lacombe from the Cree dialect—*otomahuk*, knock him down, *otámahwaw*, he is knocked down.] **1.** The war-ax of the Indians of North America. The head was sometimes the horn of a deer put through a piece of wood in the form of a pickax, sometimes a long stone sharpened at both ends, used in the same way. After the

Tomahawk with Stone Head.

advent of white traders iron was brought into use for the heads. The tomahawk is also used as a hatchet. (*Capt. John Smith.*) The blunt side of the head is sometimes formed into a pipe-bowl which communicates with a tubular hollow made in the handle, the whole serving as a tobacco-pipe.

It was and is the custom of the Indians to go through the ceremony of burying the *tomahawk* when they made peace; when they went to war they dug it up again. Hence the phrases "to bury the *tomahawk*" and "to dig up the *tomahawk*" are sometimes used by political speakers and writers with reference to the healing up of past disputes or the breaking out of new ones. *Bartlett.*

Then smote the Indian *tomahawk*
On crashing door and shattering lock.
Whittier, Pentucket.

2. In *her.*, a bearing representing a hatchet of some fanciful form, supposed to be an Indian tomahawk.—**To bury the tomahawk.** See the quotation from Bartlett, above.

★**tomahawk** (tom′ą-hâk), *v. t.* [< *tomahawk, n.*] To strike, cut, or kill with a tomahawk.

I have noticed, within eighteen months, the death of an aged person who was *tomahawked* by the Canadian savages on their last incursion to the banks of the Connecticut River. *Everett*, Orations, I. 385.

tomalley, tomally (to-mal′i), *n.* [Carib *taumali, taomali* (Davies, 1666), the inner parts of the crab, any piquant meat or sauce, = Galibi *toumaly*, also *touma*, sauce, broth, soup. Hence (through Sp.) *tamal*, q. v.] The soft yellowish or greenish hepatic substance or so-called liver of the lobster.

toman, tomaun (tō-män′, -mân′), *n.* [Sometimes also *tomand*; = It. *tomano* (Florio), < Pers. *tōmān*, a coin so called, < Tatar *tōmān*, ten thousand.] A current gold coin of Persia, worth, nominally, 10 krans, but actually worth about 90 cents.

His chief would lose at least three thousand *tomans* of his income were this brigandage suppressed.
O'Donovan, Merv, xii.

tomata†, *n.* An obsolete form of *tomato. Jefferson*, Notes on Virginia (1787), p. 64.

★**tomato** (tō-mä′tō or tō-mā′tō), *n.*; pl. *tomatoes* (-tōz). [Formerly also *tomata*; = F. *tomate*, < Sp. Pg. *tomate*, < Nahuatl *tomatl*, a tomato.] The fruit of a garden vegetable, *Lycopersicon Lycopersicum*, native in tropical South America, now widely cultivated for its esculent fruit in temperate as well as tropical lands; also, the plant itself. The stem is ordinarily weak and reclining, much branched, becoming 4 feet long, but in a French variety—the upright or tree tomato—erect, and sustaining its own fruit. The leaves are interruptedly pinnate, and stain green by contact. It has a small yellow flower, the parts of which are often multiplied in cultivation. The fruit is a berry, normally one- or two-celled and small; under culture, often many-celled and complicated in structure as if by the union of several fruits, large and of a depressed-globose form. A simple pear-shaped form exists; and in the cherry-tomato, *L. cerasiforme*, and the variety *pimpinellifolium*, called currant-tomato, the fruit is scarcely larger than a large currant, and is borne in long racemes. The color is commonly some tint of red, sometimes yellow, in one variety nearly white. The tomato-fruit is of a soft, pulpy texture and peculiar slightly acid flavor. It is nutritious and wholesome, with laxative and antiscorbutic properties. The tomato was introduced into Europe early in the sixteenth century; but its esculent use in northern countries began much later. In the United States it was known only as a curiosity till about 1830. It is often called *love-apple*, a translation of the French *pomme d'amour*, which is a corruption of the former Italian name *pomo dei Mori*, the plant having reached Italy through Morocco. From this name aphrodisiac properties have been ascribed to it.—**Cannibal's tomato**, a Polynesian shrub, *Solanum Uporo*, with dark glossy foliage, and berries of the size, shape, and color of small tomatoes. The fruit is made into a sauce, and the leaves are used as a vegetable formerly considered a requisite of a cannibal feast.—**Cherry-tomato, currant-tomato.** See def.—**Husk-tomato.** Same as *strawberry-tomato.*—**Strawberry-tomato.** See *strawberry-tomato.*—**Tomato catchup.** See *catchup.*—**Tomato hawk-moth**, the tomato-sphinx.—**Tree-tomato.** (*a*) See def. (*b*) See *Cyphomandra.*

tom-trot (tom'trot'), *n.* A sweetmeat for children, made by melting sugar, butter, and treacle together. When it is cooling and rather stiff, it is drawn out into pieces. *Halliwell.*

I want toffy; I have been eating *Tom Trot* all day. *Disraeli*, Coningsby, i. 9.

tom-turkey (tom'tėr'ki), *n.* [< *tom*[1] + *turkey*.] A turkey-cock.

I never heard that a *tom-turkey* would set on eggs. ★*H. B. Stowe*, Oldtown, p. 64.

ton[1] (tun), *n.* [A form of *tun*, phonetically archaic, retained in designations of measure prob. by reason of its use in statutes, where the F. and ML. forms are usually favored: see *tun*[1].] 1†. A cask; hence, a measure of capacity used for wine. See *tun*[1], 1. — 2. A measure of capacity: used (*a*) for timber, 40 feet of oak or ash timber, sometimes 48 or 50 feet of hewn; (*b*) for flour, 8 sacks or 10 barrels; (*c*) for potatoes, 10 to 36 bushels; (*d*) for wheat, 20 bushels; (*e*) for earth or gravel, 1 cubic yard, sometimes 23 cubic feet; (*f*) for grindstones, 15 cubic feet; (*g*) for Portland stone, 16 cubic feet; (*h*) for salt, 42 bushels; (*i*) for lime, 40 bushels; (*j*) for coke, 28 bushels; (*k*) for the carrying capacity of a ship, 40 cubic feet (*actual tonnage*); (*l*) for a ship's displacement, 35 cubic feet.

Here arrived yesterday a Dutch ship of 300 *tons*, with 250 *tons* of salt, sent by Mr. Onge from Lisbon. *Winthrop*, Hist. New England, II. 430.

3. A measure of weight, equal to 20 hundredweight or 2,240 pounds avoirdupois (the long ton), or in the United States and Canada to 2,000 pounds (the short ton). — **Metric ton,** a measure of weight equal to 1,000 kilograms, or 2,204.6 pounds. — **Register ton.** See *tonnage*, 2.

ton[2] (ton), *n.* [< F. *ton*, tone: see *tone*[1]. Hence *tonnish*.] The prevailing mode; high fashion; style; air of fashion. See *bon-ton*.

Nature . . . made you, . . . and it then made something very lovely; and if you would suffer us of quality to give you the *ton*, you would be absolutely divine. *Colman*, Jealous Wife, ii.

As praying's the *ton* of your fashion;
A prayer from the muse you well may excuse.
Burns, Ye Sons of Old Killie.

ton[3]†, *indef. pron.* See *tone*[2].

ton[4]†, *n.* A Middle English plural of *toe*.

-ton. [< ME. *-toun*, < AS. *-tūn*, being the word *tūn*, town, used in composition: see *town*.] A form of *-town*, being the word *town* used in place-★names, as *Ashton*, *Hampton*, *Wolverton*, *Merton*.

tonal (tō'nal), *a.* [< *tone*[1] + *-al*.] 1. In *music*, of or pertaining to tones.

With this *tonal* system . . . it has become possible to construct works of art of much greater extent, and much richer in forms and parts, much more energetic in expression, than any producible in past ages.
Helmholtz, Sensations of Tone (trans.), p. 382.

2. Pertaining to tonality: as, a *tonal* fugue.—**Tonal fugue**, in *music*. See *fugue*.—**Tonal imitation**, in *music*, imitation within the limits of the tonality of the piece.

tonalite (tō′nal-īt), *n.* [< *Tonale* (see def.) + *-ite*[2].] A name proposed by Vom Rath for a variety of quartz diorite especially rich in biotite: it is largely developed near Tonale on the borders of Tyrol.

tonality (tō-nal′i-ti), *n.* [< F. *tonalité;* as *tonal* + *-ity*.] 1. In *music:* (*a*) The character or quality of tone.

This exquisite quality of *tonality* came to the ear with astonishing sweetness and the winning charm of artlessness come of the truest vocal art.
The Churchman, LIV. 469.

(*b*) Same as *key*[1], 7 (*a*).

The Greeks, among whom our diatonic scale first arose, were not without a certain esthetic feeling for *tonality*, but . . . they had not developed it so decisively as in modern music.
Helmholtz, Sensations of Tone (trans.), p. 371.

2. In *painting*, the scheme of color of a picture; system of tones.

The flesh-painting is, however, timid, and wanting in brilliancy, while the general *tonality* lacks force and accent. *The Academy*, May 25, 1889, p. 365.

tonally (tō′nal-i), *adv.* In *music*, in a tonal manner; with careful observance of tonality.

And by this I do not mean merely bits that are rhythmically and *tonally* coherent.
E. Gurney, Nineteenth Century, XIII. 443.

to-name (tō′nām), *n.* [Also erroneously *tue-name;* Sc. also *tee-name;* < ME. *toname, tonome* (= D. *toenaam* = MLG. *toname* = MHG. *zuoname*, G. *zuname;* cf. Sw. *tillnamn* = Dan. *tilnavn*); < *to*[1] + *name*[1].] A name added to another name; a surname; specifically, a name in addition to the Christian name and surname of a person, to distinguish him from others of the same name, and usually indicating descent, place of residence, or some personal quality or attribute. Such to-names are often employed where the same families continually intermarry, and where consequently the same name is common to many individuals. They prevail especially among the fisher population of the east coast of Scotland, where in some places they are called *tee-names*.

Thai theifs that steills and tursis hame,
Ilk ane of thame hes ane *to-name;*
Will of the Lawis;
Hab of the Schawis.
Sir R. Maitland of Lethington, Complaint against the [Thieves of Liddesdale.

"They call my kinsman Ludovic with the Scar," said Quentin. "Our family names are so common in a Scottish house that where there is no land in the case we always give a *to-name.*" *Scott*, Quentin Durward, iii.

The possession of a surname, a *to-name*, a name in addition to the Christian name, had begun in the twelfth century to be looked on as a needful badge of noble birth.
E. A. Freeman, Norman Conquest, V. 378.

tonarion (tō-nā′ri-on), *n.* [< Gr. τονάριον, a pitch-pipe, < τόνος, tone: see *tone*[1].] A kind of pitch-pipe sometimes used for the guidance of orators in ancient times.

tondino (ton-dē′nō), *n.* [It., dim. of *tondo*, a plate: see *tondo*.] A plate having a small bowl-shaped center and a broad flat rim or marly, especially in Italian decorated wares such as majolica.

tondo (ton′dō), *n.* [< It. *tondo*, a plate, salver, sphere, < *tondo*, round, abbr. of *rotondo*, < L. *rotundus*, round: see *rotund, round*[1].] A plaque or dish with a flat rim very wide in proportion to the size of the center, and usually decorated with especial reference to the border painted ★upon this rim or marly. Compare *tondino*.

tone[1] (tōn), *n.* [Early mod. E. also *toone* (not found in ME., where the older form *tune* occurs); < F. *ton* = Pr. *ton* = Sp. *tono* = Pg. *tono* = It. *tuono* = D. *toon* = MHG. *tōn, dōn*, G. *ton* = Sw. *ton* = Dan. *tone* (Teut. < F. or L.), < L. *tonus*, a sound, tone, etc., < Gr. τόνος, a sound, tone, accent, tension, force, strength, a cord, sinew, lit. a stretching, < τείνειν, stretch, = L. *ten-d-ere*, stretch: see *tend*[1], *thin*[1]. From the same Gr. source are ult. E. *intone, tonal, tonic, atonic, atony, diatonic, entasis, tune, attune*, etc.] 1. Any sound considered with reference to its acuteness or gravity (pitch), openness, dullness, purity, sweetness, harshness, or the like (quality or timbre), or loudness or softness (strength or volume).

Harmony divine
So smoothes her charming *tones* that God's own ear
Listens delighted. *Milton*, P. L., v. 626.

All day the wind breathes low with mellower *tone*.
Tennyson, Lotos-Eaters (Choric Song).

We catch faint *tones* of bells that seem blown to us from beyond the horizon of time.
Lowell, Among my Books, 2d ser., p. 196.

Specifically—2. In *musical acoustics*, a sound having definiteness and continuity enough so that its pitch and quality may be readily estimated by the ear, and so that it may be employed in musical relations; musical sound: opposed to *noise*. See *sound*[5]. Most tones are plainly composite, consisting of several relatively simple constituents called *partial tones*. Of these the lowest in pitch is usually the most prominent, and hence is called the *principal* or *fundamental tone*, while the others are called *accessory tones, overtones*, or *harmonics*. The difference in timbre between tones of different voices or instruments is due to differences in the number and relative intensity of their partial tones. When two tones are sounded together, they frequently generate *resultant tones*, which are further divided into *differential* and *summational tones*. See *resultant*. [The term *note* is, in music, commonly used interchangeably with *tone*, though properly belonging only to the visible sign by which the latter is represented.]

3. Modulation, inflection, or accent of the voice, as adapted to express sentiment, emotion, or passion.

Every *tone*, from the impassioned cry to the thrilling aside, was perfectly at his [Pitt's] command.
Macaulay, William Pitt.

Her warbling voice, a lyre of widest range
Struck by all passion, did fall down and glance
From *tone* to *tone*, and glided thro' all change
Of liveliest utterance. *Tennyson*, Fair Women.

The *tone* in which she spoke had become low and timid.
J. S. Le Fanu, Dragon Volant, ii.

4. An affected or artificial style of intonation in speaking or reading; a sing-song or measured rhythmical manner of speaking.

We ought, . . . certainly, to read blank verse so as to make every line sensible to the ear. At the same time, in doing so, every appearance of sing-song and *tone* must be carefully guarded against. *H. Blair*, Rhetoric, xxxiii.

5. In *music*, one of the larger intervals of a diatonic series or scale; a whole step or "whole tone" as distinguished from a *half-step* or *semitone*. The standard tones are the larger and the smaller major seconds, acoustically represented by the ratios 8:9 and 9:10 respectively. The compromise intervals by which these intervals are rendered in the system of equal temperament are also called *tones* or *whole steps*.

6. In *Gregorian music*, a melody or tune traditionally associated with a particular text; an ancient psalm-tune. See *chant* (*a*). The origin of these old melodies is disputed. They may have been composed in the early Christian period, but it is more likely that they were imitated either from ancient Greek melodies or from the songs of the ancient Hebrews. In the latter case, it is possible that they preserve some of the musical usages of the temple music.

7. In *med.*, the state of tension or firmness proper to the tissues of the body; the state in which all the parts and organs have due tension or are well strung; the strength and activity of the organs on which healthy functions depend; hence, that state of the body in which all the animal functions are performed with healthy vigor. See *tonicity*.

His form robust and of elastic *tone*.
Cowper, Table Talk, l. 218.

I have gained a good deal in strength and *tone*—and my head is just now beginning to show tokens of improvement. *S. Bowles*, in Merriam, II. 340.

8. State or temper of mind; mood.

The strange situation I am in, and the melancholy state of public affairs, . . . drag the mind down, by perpetual interruptions, from a philosophical *tone*, or temper, to the drudgery of private and public business.
Bolingbroke, To Pope.

The mind is not alway the same; by turns it is cheerful, melancholy, severe, peevish, &c. These differences may not improperly be denominated *tones*.
Kames, Elements of Criticism, II. xxv. § 9.

9. Tenor; spirit; strain; quality; specifically, the general or prevailing character or style, as of morals, manners, or sentiments, especially a marked degree of such style.

I object rather to your *tone* than to any of your opinions.
Sydney Smith, To Francis Jeffrey, Sept. 3, 1809.

Lord Palmerston for many years steadily applied his mind to giving, not indeed a mean *tone*, but a light *tone*, to the proceedings of Parliament.
W. Bagehot, Eng. Const., vi.

10. In *painting*, the prevailing effect of color, or the general effect produced by the management of light and shade in a picture: as, dark, light, or silvery *tone*. In color, tone is dependent upon quality—namely, that part of the luminosity or transparency of an object which is due partly to its local tint and partly to the light which falls upon it. In general, tone depends upon the harmonious relation of objects in shadow to the principal light. We speak of a deep tone, a rich tone, a vigorous or firm tone, a delicate tone, meaning the mode in which by harmonized relations rounded masses are made more or less distinct, and objects more or less prominent.

The *tone* of Haddon Hall, of all its walls and towers and stonework, is the gray of unpolished silver.
H. James, Jr., Trans. Sketches, p. 28.

11. A quality of color; a tint; a shade.

The *tones* of the marble of Pentelicus have daily grown more golden. *J. A. Symonds*, Italy and Greece, p. 212.

When in the golden western summer skies
A flaming glory starts, and slowly fades
Through crimson *tone* on *tone* to deeper shades.
R. W. Gilder, Undying Light.

A delicate fawn-tinted costume, in several *tones*, as the fashion experts say. *The Atlantic*, LXVI. 770.

12. In *chromatics*, see the first quotation.

By the *tone* of a colour we mean its brightness or luminosity, i. e. the total quantity of light it sends to the eye, irrespective of the optical composition of the light.
Field's Chromatography, Modernized by J. Scott Taylor, [p. 39.

The *tone* of the color varies with the duration of the impression as well as with the intensity of the light.
G. T. Ladd, Physiol. Psychology, p. 334.

13. In *photog.*, the color of a finished positive picture, in many processes due to a chemical operation supplementary to those of producing and fixing the picture: as, a print of a brown, gray, or black *tone;* also, sometimes, the color of the film of a negative, etc.—14. In *gram.*, syllabic accent; stress of voice on one of the syllables of a word.—**Characteristic tone.** See *characteristic*.—**Chest-tone**, in singing, same as *chest-voice*.—**Chromatic alteration of a tone.** See *chromatic*.—**Combinational tone**, in *musical acoustics*, the third tone that is generated by the sounding together of two differing tones. It is produced by the coincidence of certain vibrations in the two sets of vibrations. The phrase is applied both to the tones below the generating tones and to those above them. See *resultant*. Also called *combination tone, grave harmonic, resultant tone, Tartini's* or *differential tone* (below), *summational tone* (above).—**Covered tone**, in singing, a tone so resonated as to seem to be more or less shut into the mouth.—**Difference tone, differential tone.** Same as *combinational tone*.—**Discrete tones.** See *discrete*, 1.—**Fundamental tone.** See def. 1 and *fundamental*.—**Harmonic tone.** See *harmonic*.—**Head tone.** See *head-tone*.—**Heart-tones**, the sounds of the heart heard in auscultation of the chest.—**In a tone**, in agreement; of one way of thinking.

I complained to one, and to another; but all were *in a tone;* and so I thought I would be contented.
Richardson, Sir Charles Grandison, II. xl.

Leading tone. See *leading note*, under *leading*[1].—**Open tone.** (*a*) In singing, a tone so resonated as to seem to be projected from the mouth, and presented fully to the hearer. Opposed to *covered tone*. (*b*) In playing on musical instruments of the stringed and brass wind groups, a tone produced from an open string or without the use of valves or other modifiers of the pitch. Opposed to *stopped tone*.—**Organ tone.** See *organ*[1].—**Partial tone.** See *partial*.—**Participating tone**, in *music*, an accessory tone; especially, in a turn, one of the tones added to the principal tone.—**Passing-tone.** Same as *passing-note*.—**Pressure-tone**, in *music*, a tone produced with a sudden increase of force as soon as it is sounded. See *pressure-note*.—**Quarter tone**, in *music*. See *quarter-tone*.—**Resultant tone.** Same as *combinational tone*.—**Secondary tone.** Same as *harmonic*.—**Simple tone**, a tone that cannot be resolved into partial tones.—**Stopped tone**, in playing on musical instruments of the stringed and brass wind groups, a tone produced from a stopped string, or with the use of valves, or with the insertion of the hand into the bell, so as to modify the pitch.—**Summational tone.** See *combinational tone*.—**Suspended tone.** See *suspension*, 5.—**Sustained tone.** See *sustained*.—**Syncopated tone.** See *syncopate*.—**Tartini's tone.** Same as *differential* ★*tone*. See *resultant*, *a*.=**Syn. 1.** *Noise*, etc. See *sound*[5].

tone[1] (tōn), *v.*; pret. and pp. *toned*, ppr. *toning*. [Early mod. E. also *toone;* < *tone*[1], *n.* Cf. *tune, v.*] **I.** *trans.* 1. To tune. See *tune*.

To *Toone*, modulari.
Levins, Manip. Vocab. (E. E. T. S.), p. 168.

2. To utter in an affected or drawling tone.

Shutting the eyes, distorting the face, and speaking through the nose . . . cannot so properly be called preaching as *toning* of a sermon. *South*, Sermons, IV. i.

3. To give tone or quality to, in respect either to sound or to color or tint.

He had not forgotten the words; . . . whenever I spoke, they sounded in my voice to his ear; and their echo *toned* every answer he gave me.
Charlotte Brontë, Jane Eyre, xxxv.

A fine stucco, wrought to smoothness, *toned* like marble, and painted over with the blue and red and green decorations proper to the Doric style.
J. A. Symonds, Italy and Greece, p. 189.

4. In *photog.*, to alter the color, as of a picture in finishing it, to give it greater brilliancy or a more agreeable tint. This is performed by the action of a chemical solution of which the chief agent, in the case of ordinary silver prints on paper, is usually chlorid of gold, and changes the natural reddish hue to a deeper brown, or to black or gray, etc., as desired.

If not *toned*, it will have an unpleasant coppery color, which seems almost unavoidable in developed prints.
Lea, Photography, p. 262.

To tone down. (*a*) In *painting*, to soften the coloring of, as a picture, so that a subdued harmony of tint may prevail, and all undue glare be avoided. (*b*) To give a more subdued tone to; reduce or moderate the characteristic opinions or expressions of; render less confident, pronounced, or decided; soften.

It was very possible that her philosophic studies had taught her the art of reflection, and that, as she would have said herself, she was tremendously *toned down*.
H. James, Jr., Confidence, xvi.

To tone up, to give a higher tone or character to; make more vigorous; heighten; raise in pitch.

II. *intrans.* **1.** To take on a particular tone; specifically, to assume color or tint.

If the prints are fumed in a box, and are left in too long, they will *tone* to a cold blue. *Lea*, Photography, p. 277.

2. To harmonize in tone, color, or tint.

Beaded passementerie, which *tones* in with the delicate shades of blue, and pink chiffon, and dark velvet.
The Spectator (St. Louis), XI. 327.

To tone up, to gain in tone, strength, or vigor.

The Bensons passed through Washington the other day from the South, and spoke of going to Atlantic City to *tone up* a little before the season.
C. D. Warner, Their Pilgrimage, p. 28.

tone[2]† (tōn), *indef. pron.* [ME. *tone, ton, toon, tane*, in *the tone* (Sc. *the tane*), a misdivision of *thet one*, that one. Cf. *tother*.] One: originally and usually preceded by *the*, and usually followed by *the tother*. See etymology. Compare *tother*.

Thou sulde doo bathe [both] . . . *the tane* and *the tother*.
Hampole, Prose Treatises (E. E. T. S.), p. 29.

The toon yeveth conysaunce,
And *the tother* ignoraunce.
Rom. of the Rose, l. 5559.

Many other thinges, touchyng the pestilent secte of Luther and Tyndale, by *the tone* bygone in Saxony: and by *the tother* laboured to be brought into England.
Sir T. More, Worship of Images, Utopia, Int., p. xci.

tone-color (tōn′kul″o̤r), *n.* In *musical acoustics*, same as *timbre*.

The variety of *tone-colour* . . . and the brilliant effects obtainable by a full-sized band of artist-performers.
Grove, Dict. Music, IV. 472.

★**toned** (tōnd), *a.* [< *tone*[1] + *-ed*[2].] Having tone or a tone: much used in composition: as, high-*toned;* shrill-*toned*. Specifically—(*a*) In a state of proper tension; strung.

It may be doubted whether there ever existed a human being whose mind was quite as firmly *toned* at eighty as at forty. *Macaulay*, Hist. Eng., xiv.

(*b*) Tinted; slightly colored: noting paper and other fabrics: as, a two-*toned* ribbon. (*c*) In *photog.*, treated with chemicals to improve the color.—**Toned paper**, paper of a very pale amber tint, intermediate between warm buff and ivory-white.

What is often called *toned paper* is nearer the natural color—a yellowish shade—of the pulp.
Harper's Mag., LXXV. 120.

toneless (tōn′les), *a.* [< *tone*[1] + *-less*.] Without tone; unmodulated; unaccentuated.

His voice . . . was to Grandcourt's *toneless* drawl . . . as the deep notes of a violoncello to the broken discourse of poultry and other lazy gentry in the afternoon sunshine.
George Eliot, Daniel Deronda, xxix.

tonelessness (tōn′les-nes), *n.* The quality or state of being toneless; lack of tone, in any sense.

Any dulness or *tonelessness* on percussion at one apex must, in a doubtful case, be regarded as of great significance. *Lancet*, 1889, II. 1294.

tone-master (tōn′mȧs″tėr), *n.* A master or expert in the artistic use of tones; a trained and experienced musical composer.

tone-measurer (tōn′mezh″ū̆r-ėr), *n.* Same as *monochord*.

tone-syllable (tōn′sil″a̤-bl), *n.* An accented syllable. *Imp. Dict.*

tong[1] (tông), *n.* [< ME. *tonge, tange*, < AS. *tange, tonge*, also *tang* = OFries. *tange* = MD. *tanghe*, D. *tang*, a pair of tongs or pincers, = MLG. *tange* = OHG. *zanga*, MHG. G. *zange* = Icel. *tǫng* (*tang-*) = Sw. *tång* = Dan. *tang*, tongs; cf. OHG. *zangar*, MHG. *zanger*, biting, sharp, lively; Teut. √ *tang* = Gr. *δάκνειν* = Skt. √ *dañç, daç*, bite. Cf. *tang*[1].] **1.** One of a number of holding- and lifting-instruments of various forms. They may be grouped under three types: those consisting of two arms hinged or pivoted together near the upper or handle end, as the common fire-tongs; those consisting of two arms joined together by a spring at the top, as sugar-tongs; and those in which the two arms are joined together by a pivot near the lower end, as the blacksmiths' tongs. Their special names are chiefly descriptive of the shape of the short arms of the two levers that form the biting part or jaw, as *flat-bit tongs, crook-tongs*, etc. Tongs are also named from their use, as *bottle-tongs, crucible-tongs, wire-tongs*, etc. (See *ice-tongs, lazy-tongs, oyster-tongs, pipe-tongs, sugar-tongs*.) Now always used in the plural, and often in the phrase *pair of tongs*, designating one implement. The plural form is also rarely used as a singular. See cut in next column, and cuts under *pinching-tongs* and *punch*.

Tongs.

a, crucible-tongs; *b*, ice-tongs; *c*, ordinary fire-tongs; *d*, blacksmiths' tongs; *e*, bottlers' tongs; *f*, *f′*, *f″*, bottling-pliers; *g*, pin-tongs; *h*, watchmakers' tongs; *i*, pincer-tongs; *j*, flat-bit tongs; *k*, crook-bit tongs; *l*, hoop-tongs; *m*, smiths' pliers; *n*, angular-bit tongs; *o*, hammer-tongs.

Thu havest clivers [claws] suthe stronge,
Thu tuengst [twingest] thar-mid so [as] doth a *tonge*.
Owl and Nightingale (ed. Wright), l. 156.

The *tonges* that drow the nayles out
Of fet, of handes, al about.
Holy Rood (E. E. T. S.), p. 188.

With that the wicked carle, the maister Smith,
A paire of red-whot yron *tongs* did take
Out of the burning cinders, and therewith
Under his side him nipt. *Spenser*, F. Q., IV. v. 44.

He sat by the fireside, . . . writing the name of his mistress in the ashes with an old *tongs* that had lost one of its legs. *Irving*, Salmagundi, No. 2. (*Davies.*)

Sure the shovel and *tongs*
To each other belongs.
Lover, Widow Machree.

[Tongs were formerly used in rough burlesque music:

I have a reasonable good ear in music. Let 's have the *tongs* and the bones. *Shak.*, M. N. D., iv. 1. 32.]

2. In *diamond-cutting*, a two-footed wooden stand that has at one end a vise-like iron holder, into which the dop containing the diamond is fastened, holding the diamond against the wheel.—**3.** *pl.* A device for anchoring the body of a car to the track when it is not in use. *Car-Builder's Dict.*—**4.** *pl.* Trousers. [Slang, New Eng.]

The boys dressed in *tongs*, a name for pantaloons or overalls that had come into use. *S. Judd*, Margaret, i. 6.

Asparagus-tongs, a pair of tongs with broad flat blades, one of which has a hooked or turned-up end, to retain the stalks of asparagus. A spoon and a fork are sometimes hinged together in place of the blades.—**Clam-tongs**, an instrument for tonging clams, like oyster-tongs, but differing in the width of the head, which averages 3½ feet.—**Coral-tongs**, tongs used in the coral-fishery.—**Dog-tongs**. See the quotation.

We have never heard of *dog tongs* out of Wales. Mr. Owen figures one of these instruments, which it is not easy to describe without an illustration. They were used for catching dogs which were so ill-trained as to fight during the time of service. *N. and Q.*, 7th ser., I. 479.

Hammer and tongs. See *hammer*[1].—**Sardine-tongs**, small tongs, like sugar-tongs but with broad flat blades, used for lifting sardines out of the box without breaking them.—**Sliding tongs.** See *slide*.—**Tourmalin tongs.** See *polariscope*.

tong[1] (tông), *v.* [< *tong*[1], *n.*] **I.** *trans.* To seize, hold, or take with tongs.

Though there is a planting interest at Mobile, Ala., most of the oysters on sale are of native growth, and *tonged* in a part of the bay called the "gully."

Gael. *teanga* (for **denga*) = OL. *dingua*, L. *lingua* (> It. *lingua* = Sp. *lengua* = Pg. *lingoa, lingua* = F. *langue*), tongue; perhaps cognate with OBulg. *yęzuikŭ* = Bohem. *jazykyazuikŭ*, etc., = OPruss. *insuwis*, tongue, and possibly with Skt. *jihvā*, Zend *juhū*, tongue. The Gr. word is entirely different (see *glossa*). From the L. form of the word are derived E. *lingual*, etc., *language*[1].] **1.** The principal organ of the special sense of taste or the gustatory faculty; the lingual apparatus, or lingua. It is usually a fleshy and freely movable mass which partly fills the mouth, and has important functions in the acts of talking and eating. Together with the lips, teeth, and cheeks, the tongue serves to articulate, modulate, or qualify sounds produced in the windpipe, and in man is thus an organ of speech; it is equally concerned in the many natural cries of animals, the songs of birds, etc. It is a direct aid in the process of mastication, in directing food between the teeth, and in the act of swallowing or deglutition, by forcing food and drink from the mouth through the fauces into the pharynx. It is concerned in spitting, and in almost every action in which the mouth takes part. The tongue is often a prehensile organ, as for lapping or licking; sometimes a rasp or file, as in the lion and the snail; sometimes a dart or spear, as in woodpeckers, and in chameleons and many other reptiles. The tongue is rarely rudimentary or wanting in vertebrates, as in some birds and the aglossal batrachians. It is forked in serpents. Its structure and mechanism are more elaborate in some of the lower vertebrates, especially in birds and reptiles, than in mammals. In these last the tongue is chiefly a mass of muscle attached to the hyoid bone and lower jaw, and covered with mucous membrane. (*a*) In man the tongue is placed in the floor of the mouth, between the two branches of the lower jaw. The base or root of the tongue is fixed to the hyoid or tongue-bone; the top, sides, and dorsum are free; a median fold of mucous membrane, the bridle of the tongue, or *frenum linguæ*, runs to its tip. Like other median or azygous structures, the tongue consists of two symmetrical halves on the right and left of a middle vertical partition, or *septum linguæ*, of fibrous tissue; another sheet of such tissue, the *hyoglossal membrane*, connects the under side of the tongue with the hyoid bone. The intrinsic muscular fibers of the tongue constitute the *lingualis;* the extrinsic muscles (connecting

E, epiglottis; *RG*, median glosso-epiglottic recess; *G*, glandules at base of tongue; *A*, tonsil; *Pca*, circumvallate papillæ; *PM*, median one of these papillæ; *Pf*, fungiform papillæ; *PCo*, filiform papillæ; *PS*, wrinkles and furrows on the edges of the tongue.

it with other structures, yet forming a part of its substance) are the *hyoglossus*, the *geniohyoglossus*, *styloglossus*, *palatoglossus*, in pairs each, and a small part of the superior constrictor of the pharynx. These are arranged in a very intricate manner, with the result that not only does the tongue move in every direction, but also that its shape changes with its motions. The arteries of the tongue are derived chiefly from the lingual, but also from the facial and ascending pharyngeal. The nerves of the tongue are four pairs. The motor nerve is the hypoglossal. The nerves of common sensation and of the special gustatory sense are the lingual or gustatory branch of the trifacial, the lingual branch of the facial (the chorda tympani), and the lingual branch of the glossopharyngeal. Of these the last-named is specially concerned in gustation; the first, though named "gustatory," is simply sensory; the precise function of the chorda tympani is still in question. The lingual mucous membrane on the dorsum of the tongue is peculiar in several respects. It consists of a layer of connective tissue forming a corium supporting special papillæ, covered with epithelium. The corium is a network in which ramify numerous vessels and nerves. The papillæ are of three kinds: (1) large *circumvallate* papillæ, eight or ten in number, set in a ∧ at the back of the tongue, shaped like truncated cones set on end in cup-like depressions, whence the name; (2) middle-sized *fungiform* papillæ scattered irregularly over the surface, forming rounded red eminences like mushrooms, whence the name; (3) small conical or *filiform* papillæ, covering the anterior two thirds of the surface, each ending in a number of little processes. It is these that are specially concerned in the whitish coating or furring of the tongue. Besides these papillæ there are some other simple ones. The tongue is also furnished with two kinds of glands, *mucous* and *serous*. The microscopic structure of some papillæ includes certain bodies called *taste-buds*. The epithelium of the tongue is scaly, and resembles epidermis. At the base of the tongue behind is the epiglottis, and beyond this the opening of the larynx. (See also cuts under *mouth* and *tonsil*.) (*β*) In most mammals the tongue is longer, thinner, and more mobile than in man, though its structure is very similar. It is very slender and very protrusile in some, as the ant-eaters. (See cut under *tamandua*.) The fibrous septum may develop a special gristly structure, the so-called "worm" or *lytta*, as in the dog. (*γ*) In birds, with some exceptions, the tongue is very thin, flat, narrow, and horny, probably subserving but little the sense of taste; it is rudimentary in some, as the pelican, ibis, kingfisher, etc.; large and fleshy in some, as the parrot, flamingo, duck, goose, etc.; worm-shaped, barbed at the end, and extremely protrusile in the woodpecker (see cut under *sagittilingual*); slender and feathery in the toucan; and with a hard nail, a brush, and various other modifications in different birds. It is supported on a special glossohyal bone, and its hyoid basis and muscular arrangements are often highly developed. (*δ*) Among the notable tongues of reptiles are those which can be darted out to catch insects. (See cut under *Spelerpes*.) This is effected in various ways: in some cases, as in the toad, the tongue is fixed in front and free behind. The soft slender

Addison, Pretty Disaffection.

tongue-work (tung'wėrk), *n.* 1†. Work in the tongues; philological labor.

And let this comparison of a labouring man by the way put you in minde (gentle reader) of his labours that hath laboured so much and so long to saue you a labour, which I doubt not but he may as iustly stand vpon in this *toong work* as in Latin Sir Thomas Eliot Bishop Cooper, . . . after them Thomas Thomas and John Rider, have done amongst vs. *Florio,* It. Dict. (1598), To the Reader, p. [xii.].

2. Talk; babble. [Colloq.]

I've seen it again and again. If a man takes to *tongue-work,* it's all over with him. *George Eliot,* Felix Holt, xx.

tongue-worm (tung'wėrm), *n.* 1. A tongue-shaped worm; a tonguelet.—2. The so-called "worm" of the tongue of some animals, as dogs; the lytta.

tonguey, tonguy (tung'i), *a.* [< ME. *tungy;* < *tongue* + *-y*[1].] Fluent, or voluble in speech; loquacious; garrulous. [Now colloq.]

As a graueli steezing vp in the feet of an old man [as the climbing up a sandy way is to the feet of the aged, A. V.], so a *tungy* womman to a quyete man.
Wyclif, Ecclus. xxv. 27.

He jes' ropes in your *tonguey* chaps an' reg'lar ten-inch bores,
An' lets 'em play at Congress, ef they 'll du it with closed doors. *Lowell,* Biglow Papers, 2d ser., iii.

tonguing (tung'ing), *n.* [Verbal n. of *tongue, v.*] 1. The act or state of projecting like or as a tongue.

The *tonguing*-in of one series with the other is complete. *Quart. Jour. Geol. Soc.,* XLVI. 251.

2. In *hort.,* a process intended to promote the rooting of layers. See the quotation.

In *tonguing* the leaves are cut off the portion which has to be brought under ground, and a tongue or slit is then cut from below upwards close beyond a joint, of such length that, when the cut part of the layer is pegged an inch or two (in large woody subjects 3 or 4 inches) below the surface, the elevation of the point of the shoot to an upright position may open the incision, and thus set it free, so that it may be surrounded by earth to induce it to form roots. *Encyc. Brit.,* XII. 235.

3. In playing on musical wind-instruments, the act, process, or result of modifying or interrupting the tone by means of a stroke of the tongue, so as to produce a marcato or staccato effect. Tonguing is termed *single* when but one kind of stroke is used, as if to produce the consonant *t* over and over; *double,* when two strokes are used in alternation, as if to produce *t* and *k* alternately; *triple,* when three strokes are used; etc. Single tonguing only is applicable in instruments with a reed, like the oboe and the clarinet, and then operates like the "percussion" sometimes introduced into the harmonium, while double and triple tonguing are applicable to the flute, the trumpet, etc.

The accentuates and *tonguing* of Mr. Fox's piccolo solo.
Boston Daily Advertiser, Oct. 7, 1887.

tonguy, *a.* See *tonguey.*

tonic (ton'ik), *a.* and *n.* [< F. *tonique* = Sp. ★*tónico* = Pg. It. *tonico,* < NL. **tonicus,* < Gr. τονικός, < τόνος, tone, accent: see *tone*[1].] **I.** *a.* 1. Of or relating to tones or musical sounds.

In point of *tonic* power, I presume it [the organ] will be allowed preferable to all others.
W. Mason, Church Music, i.

2. Specifically, in *music,* of or pertaining to, or founded on, the key-note or tonic.—3. Of or pertaining to tension; increasing tension.

The others [muscles], however, are all slightly contracted, and would severally produce motion were they not balanced or out-balanced by their antagonist muscles. This pervading activity of the muscles is called their *tonic* state. *H. Spencer,* Prin. of Psychol., § 89.

4. In *med.,* increasing the strength or tone of the animal system; obviating the effects of weakness or debility, and restoring healthy functions; hence, bracing or invigorating to the mental or the moral nature.

Goethe says that in seasons of cholera one should read no books but such as are *tonic,* and certainly in the season of old age this precaution is as salutary as in seasons of cholera. *M. Arnold,* Essays in Criticism, 2d ser., p. 300.

Tonic chord, a chord having the key-note for its root.—**Tonic pedal,** an organ- or pedal-point formed on the key-note.—**Tonic section,** a section or period in the key of the original key-note of a piece, and closing with a tonic cadence.—**Tonic sol-faist,** one who uses or is expert in the tonic sol-fa system.—**Tonic sol-fa notation,** the form of musical notation used in the tonic sol-fa system. Tones are represented by the initial letters of their solmization syllables, **d** standing for *do,* **r** for *re,* **m** for *mi,* **f** for *fa,* **s** for *sol,* **l** for *la,* and **t** for *ti.* Higher and lower octaves are represented by superscript and subscript numerals, as m^1 for the higher *mi,* or s_1 for the lower *sol.* Time-values are indicated by placing the required letters on a line at proportional distances. The heavy beat or pulse at the beginning of a measure is indicated by a vertical bar, and all other principal pulses by pulse-marks [:]. As these pulses are equal in length, the pulse-marks are placed equidistant from each other, thus (in triple rhythm), | : : | : : , etc. A tone filling a pulse is indicated by its initial placed in the space belonging to the pulse. The continuance of a tone from one pulse to another is indicated by a dash filling the space of the second pulse. If a pulse is divided, the half-pulse is marked by a . in the middle of the space; quarter-pulses are similarly marked by a ,. The absolute pitch of the key-note is indicated at the outset by its letter-name. Modulations are marked not only by giving the letter-name of the new key-note, but by indicating in each voice-part the syllable-names in both the old and the new keys of the tone on which the transition takes place. Chromatic tones are solmizated in the usual way. The tune "America" ("God Save the Queen"), for example, begins thus:

Key F.

Tonic sol-fa system, the most extensive and important of the modern systems of classifying, explaining, and teaching the facts of music. The system is said to have originated in the efforts of Miss Sarah A. Glover, about 1812, to simplify the process of teaching music to children. Her experiments were taken up about 1850 by the Rev. John Curwen, and gradually developed into a scientific system. The name of the system indicates two of its fundamental characteristics—namely, emphasis on tonality, with its multifarious interrelations of tones, as the controlling factor in all musical construction, and the use of the Guidonian solmization as a guide to study, terminology, and notation. Melody and harmony are studied by constant reference to the ideal major and minor scales; and great use is made of a chart of these scales, with their closest relations, called a *modulator* (which see). Rhythmic and metric facts are similarly referred to ideal formulæ. The voice is treated as the chief instrument of musical performance. In order to do away with the arbitrary intricacies of the staff-notation, with its inherent dependence on the keyboard, and to force the mind of the singer to dwell constantly on the tonic qualities of tones, instead of on their supposed distance from each other, a notation has been devised which is now capable of representing all important musical facts. (See *tonic sol-fa notation.*) The remarkable success of the tonic sol-fa movement, particularly in Great Britain, is due, first, to its insistence on the basal truths of musical science to the exclusion of arbitrary traditions, and, second, to the highly systematic method of teaching these truths which its advocates have elaborated. Its importance is demonstrated not only by its immense popular success where it has been properly undertaken, but by its unmistakable influence on the terminology and methods of all scientific musical study. Although originally intended to apply only to vocal music, its principles have been extended to certain branches of instrumental music with success.—**Tonic spasm,** in *med.,* a steady and continuous involuntary muscular contraction enduring for a comparatively long time. It is opposed to *clonic spasm,* in which the muscles contract and relax alternately in very quick succession, producing the appearance of agitation. In tonic spasm, however, there is always a very slow alternate contraction and relaxation. The spasms of tetanus are tonic, those of epilepsy first tonic and then clonic.

II. *n.* **1.** In *med.*, any remedy which improves the tone or vigor of the fibers of the stomach and bowels, or of the muscular fibers generally. Tonics may be said to be of two kinds, medicinal and non-medicinal. Medicinal tonics act chiefly in two ways: either (*a*) indirectly, by first influencing the stomach and increasing its digestive powers — such being the effect of the vegetable bitters, the most important of which are calumba, camomile, cinchona-bark, gentian, salix, taraxacum, etc.; or (*b*) directly, by passing into and exercising their influence through the blood — such being the case with the various preparations of iron, certain mineral acids, and salts. The non-medicinal tonics are open-air exercise, friction, and cold in its various forms and applications, as the shower-bath and sea-bathing.

2. In *music*, same as *key-note*. See also *key*[1], 7 (*b*).

tonical† (ton'i-kal), *a.* [< *tonic* + *-al*.] Tonic.

tonically (ton'i-kal-i), *adv.* In a tonic manner; specifically, in *pathol.*, continuously; without ★alternating relaxation. *Lancet*, 1889, II. 654.

tonicity (tō-nis'i-ti), *n.* [< *tonic* + *-ity*.] **1.** Tone; the state or property of possessing tone or of being tonic; specifically, in *physiol.*, the elasticity of living parts — a property of the muscles which is distinct from true irritability, and determines the general tone of the solids. In virtue of this power the dilators of the larynx keep this organ open, the face is kept symmetrical, the sphincters are kept closed, etc.

2. In *music*. See the quotation.

Pleasantness of harmony is due to what he [Oettingen] calls the *tonicity* and phonicity of certain intervals and combined notes. *Tonicity* is the property of being recognized as a constituent of a single fundamental tone which is designated by the name tonic.
G. T. Ladd, Physiol. Psychology, p. 324.

Arterial tonicity, the contractility of the muscular fibers in the walls of the arteries in response to a stimulus, in contradistinction to the normal elasticity of the blood-vessels.

tonicize (ton'i-sīz), *v.* [< *tonic* + *-ize*.] To give tone or tonicity to. [Rare.]

This would spread a *tonicizing* analeptic influence throughout our English world of readers, and help to brace up the debility of their intellectual systems.
N. and Q., 7th ser., IX. 141.

to-night, tonight (tō-nīt'), *adv.* [< ME. *tonigt, to nigt*, < AS. *tō niht: tō*, to, at; *niht*, dat. of *niht*, night: see *to*[1] and *night*. Cf. *to-day, to-morrow*.] **1.** In the present night, or the night after the present day.

And *to-night* I long for rest.
Longfellow, The Day is Done.

2†. During the preceding night; last night.

I am bid forth to supper, Jessica.
. . . I am right loath to go: . . .
For I did dream of money-bags *to-night*.
Shak., M. of V., ii. 5. 18.

to-night, tonight (tō-nīt'), *n.* The present night; the night after the present day.

To-morrow, our Hero reply'd in a Fright:
He that 's hang'd before Noon ought to think of *To-night*.
Prior, Thief and Cordelier.

★

toning (tō'ning), *n.* [Verbal n. of *tone*[1], *v.*] The act of one who tones, in any sense; specifically, in *photog.*, the method or the art of tinting or coloring pictures by chemical means, to give them an agreeable tone or color; especially, the treatment of silver positive prints or transparencies in a bath which consists most commonly of a very weak solution of chlorid of gold in combination with other chemicals, to give a more pleasing color and also greater permanency to the picture. The colors obtainable by the gold toning-baths range from deep browns through bluish black to pure black and cool gray.

tonish, tonnish (ton'ish), *a.* [< *ton*[2] + *-ish*[1].] In the ton; fashionable; modish; stylish. [Colloq.]

She is very handsome, and mighty gay and giddy, half *tonish*, and half hoydenish. *Mme. D'Arblay*, Diary, I. 221.

tonishness (ton'ish-nes), *n.* The state or quality of being in high fashion; modishness. Also *tonnishness*.

Mrs. North, who is so famed for *tonishness*, exhibited herself in a more perfect undress than I ever before saw any lady, great or small, appear in upon a visit.
Mme. D'Arblay, Diary, I. 350. (*Davies.*)

★

tonite (tō'nīt), *n.* [< F. *tonner* or L. *ton(are)*, thunder, + *-ite*[2].] A blasting-powder which consists of macerated gun-cotton and barium nitrate. This compound is compressed into sticks with a recess formed at one end for the reception of a fulminate of mercury detonator.

tonitrous†, *a.* [< L. *tonitrus*, thunder, < *tonare*, thunder: see *thunder*.] Thunderous; boisterous. [Rare.]

A Boat full of Lambeth Gardeners, by whom Billingsgate was much outdone in stupendious Obscenity, *tonitrous* Verbosity, and malicious Scurrility.
Tom Brown, quoted in Ashton's Social Life in Reign of [Queen Anne, I. 195.

tonitruate†, *v. t.* [< LL. *tonitruatus*, pp. of *tonitruare*, thunder, < L. *tonitrus*, thunder: see *thunder*.] To thunder. [Rare.]

I cannot fulminate or *tonitruate* words
To puzzle intellects.
Randolph, To Master James Shirley.

tonjon (ton'jon), *n.* [Also *tomjohn*; < Hind. *tāmjān, tāmjhām*.] In India, a kind of sedan or open chair, swung on a pole, and carried by four bearers, in the manner of a palanquin.

tonka (tong'kä), *n.* [= F. *tonka, tonca*, < Surinam negro *tonca*. The bean is usually called *tonka-bean*, also written with a capital, *Tonka bean, Tonga bean*, as if named from a locality *Tonka*; also *Tonkin bean, Tonquin bean*, as if named from *Tonquin* in Farther India.] Same as *tonka-bean*.

tonka-bean (tong'kä-bēn″), *n.* **1.** The seed of the cuamara, *Coumarouna odorata*, a tall tree of Venezuela, Guiana, and neighboring regions. The seeds are of the shape of an almond, but much longer, and covered with a shining black skin. They are fragrant from the presence of coumarin, and are used entire to scent wardrobes, or pulverized in sachets, or in fluid extract in perfumery. They are applied, either entire or in powder, to flavor snuff. Also *Tonquin bean* (see *tonka*).

2. The tree producing the tonka-bean. See *cuamara*. — **Tonka-bean wood.** Same as *scentwood*.

tonkhoi, *n.* See *Streblus*.

tonn. An abbreviation of *tonnage*.

tonnage (tun'āj), *n.* [Formerly also *tunnage*; ★< ME. **tonnage*, < OF. **tonnage*, F. *tonnage*, < *tonne* (E. *ton*[1]) + *-age*.] **1.** The weight of goods carried in a boat or ship.

The ships employed herein are found by the king of Spain, . . . and the *tonnage* is divided into a certain number of bales, all of the same size.
Anson, Voyage Round the World, ii. 10.

2. The carrying capacity of a ship expressed in cubic tons. Until 1836 the tonnage of British ships was found by multiplying the square of the breadth by the inboard length, and then dividing by 94. This is now called the "old measurement" (O. M.), and, though far from exact, is still in use to some extent for ascertaining the tonnage of pleasure-yachts, etc. As the cubic ton of 100 cubic feet forms the unit of assessment for dock, harbor, and other dues, towage, etc., and as by the old system the depth of a ship was reckoned the same as the breadth, it became the interest of ship-owners to build vessels of narrow beam, but of increased depth. This resulted in a saving in tonnage-dues, but marred the sailing qualities and seaworthiness of the ships. In 1836 a new and more exact system of measurement was established by enactment of Parliament in the preceding year. In this system, known as the *Moorsom system*, as amended and elaborated in detail in later enactments, actual measurements of depth are made at certain intervals, the number of which depends on the length of the tonnage-deck of the vessel, and transverse areas at these points are computed, all measurements being put in feet and decimal parts of a foot. These transverse areas after being multiplied by certain numbers are added together, multiplied by one third the common distance between the areas, and then divided by 100. To this must be added the tonnage of all spaces above the tonnage-deck, the poop (if any), deck-houses, etc., which is obtained by multiplying the horizontal area by the mean height and dividing by 100 as before. These together give the *gross register tonnage*, each ton (called a *register ton*) containing 100 cubic feet. Certain deductions are allowed from the gross registered tonnage for sail-rooms, chart-room, boatswain's stores, crew-space, etc., and in addition, on steam-vessels, for propelling-machinery and bunker coal, according to certain arbitrary rules. After these deductions from the gross have been made, the remainder is the *net register tonnage*. The British system of measurement was adopted by the United States in 1864, and later by Denmark, Austria-Hungary, Germany, France, Italy, Spain, Sweden, the Netherlands, Norway, Greece, Russia, Finland, Hayti, Belgium, Japan, etc., and in its essentials by the International Tonnage Congress which met at Constantinople in 1873 in connection with fixing the basis for tolls for vessels passing through the Suez Canal. As applied in these different countries there are slight differences in the rules for the deduction of engine-room tonnage, and in the United States the number of transverse areas is greater. The rule followed in the United States before 1865, when the new measurement came into force, was to multiply the extreme length of the ship (less one third its breadth) by the breadth and the depth, and then divide by 95. In freighting ships, 40 cubic feet of merchandise is considered a ton, unless that bulk would weigh more than 2,000 pounds, in which case freight is charged by weight.

3. A duty or impost on ships, formerly estimated at so much per ton of freight, but now proportioned to the registered size of the vessels.

Tonnage is a Custome or Impost for Merchandize brought or caried in Tonnes and such like Vessels from or to other Nations after a certaine rate in euerie Tonne. . . . I haue heard it also a Dutie due to the Mariners for vnloading their shippe arriued in any Hauen, after the rate of euerie Tonne. *Minsheu*, 1617.

Tonnage-taxes on shipping are not levied by Great Britain, nor, it is believed, by any other of the maritime states of Europe except Spain. Prior to the war, also, there were no *tonnage*-taxes in the United States.
D. A. Wells, Our Merchant Marine, p. 179.

4. The ships of a port or nation collectively estimated by their capacity in tons: as, the *tonnage* of the United States.

No State shall, without the consent of Congress, lay any duty on *tonnage*. *Calhoun*, Works, I. 208.

About a million and a quarter of American wooden sailing-*tonnage* is reported as yet engaged in foreign trade.
D. A. Wells, Our Merchant Marine, p. 115.

Tonnage and poundage. See *tunnage*. — **Tonnage tax.** See def. 3 and *tax*.

tonnage (tun'āj), *v.*; pret. and pp. *tonnaged*, ppr. *tonnaging*. [< *tonnage*, *n.*] **I.** *trans.* To levy tonnage upon.

Nothing writt'n but what passes through the custom-house of certain Publicans that have the *tunaging* and the poundaging of all free spok'n truth.
Milton, Areopagitica, p. 40.

II. *intrans.* To have capacity or tonnage: followed by an accusative of quantity.

Sixteen vessels, which *tonnaged* in the aggregate 1,871 tons. *C. M. Scammon*, Marine Mammals, p. 241.

tonnage-deck (tun'āj-dek), *n.* The deck from which register tonnage is measured. It is the upper deck on ships with less than three decks, or the second deck from below if there are three or more decks.

tonne†, *n.* An obsolete spelling of *ton*[1].

tonnel†, **tonnell**†, *n.* Obsolete forms of *tunnel*.

tonner (tun'ėr), *n.* [< *ton*[1] + *-er*[1].] A vessel considered with reference to her tonnage: used in composition: as, a ten-*tonner*; a thousand-*tonner*. [Colloq.]

It is not so long ago that a 1,000 ton schooner was considered enormous. Now, a 1,500 *tonner* is scarcely remarked. *Sci. Amer.*, N. S., LXII. 34.

Tonnerre (to-nār'), *n.* [See def.] A red wine grown in the department of Yonne, France, in the neighborhood of Tonnerre, resembling Burgundy of the second and inferior grades, and keeping well.

tonnihood (ton'i-hůd), *n.* [A dial. form of **tawny-hood* (as if < *tawny* + *hood*), appar. var. of **tawny-hoop, tony-hoop*.] The bullfinch, *Pyrrhula vulgaris*. *Halliwell.* [Prov. Eng.]

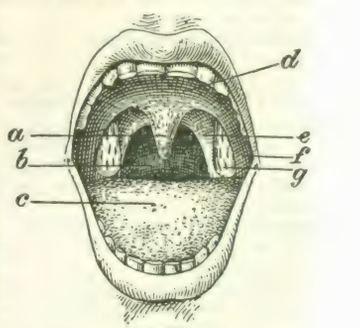
tonnish, tonnishness. See *tonish*, etc.

tonometer (tō-nom'e-tėr), *n.* [< Gr. *τόνος*, tone, ★+ *μέτρον*, measure.] **1.** In *music*, an instrument for measuring the pitch of tones; especially, a tuning-fork, or a graduated set of tuning-forks, whose pitch has been exactly determined. The term is used specifically for an exceptionally perfect set of forks prepared by Scheibler about 1833 for the establishment of a standard scale.

2. An instrument for measuring the degree of tension in the eyeball; also, one for determining the blood-pressure within the vessels.

tonometry (tō-nom'e-tri), *n.* [< Gr. *τόνος*, tone, + *-μετρία*, < *μέτρον*, measure.] **1.** The science or art of measuring or recording musical vibrations by means of a tonometer. — **2.** In *med.*, the measurement of the degree of tension in an organ, as in the eyeball.

tonotechnic (tō-nō-tek'nik), *n.* [< F. *tonotechnique*, < Gr. *τόνος*, tone, + *τέχνη*, art, handicraft: see *technic*.] The art of arranging the pegs on the barrel of a barrel-organ.



tonous (tō'nus), *a.* [< *tone*[1] + *-ous*.] Full of tone or sound; sonorous.

Tonquin bean. See *tonka-bean*.

Tonquinese (tong-ki-nēs' or -nēz'), *a.* and *n.* [< *Tonquin, Tonkin*, prop. *Tongking* (see def.), + *-ese*.] **I.** *a.* Pertaining to Tonquin (better Tongking), a French colonial possession south of China.

II. *n. sing.* and *pl.* An inhabitant or the inhabitants of Tonquin.

tonsil (ton'sil), *n.* [< F. *tonsille* = It. *tonsilla*, < L. *tonsilla*, in pl. *tonsillæ*, the tonsils; appar. a transferred use (of which the reason is not clear) of *tonsilla, tosilla*, a sharp-pointed pole stuck in the ground to fasten vessels to the shore, appar. dim. of *tonsa*, an oar (orig. a pole ?).] **1.** One of two prominent oval bodies situated in the recesses formed, one on each side of the fauces, between the anterior and posterior palatine arches. They are composed of lymphoid follicles, surrounded by less dense lymphoid tissue, arranged around the walls of a number of crypts. See also cut under *tongue*.

Tonsils.
a, uvula; *b*, pharynx; *c*, tongue; *d*, palate; *e*, posterior, and *f*, anterior pillar of the fauces, between which is *g*, the tonsil.

2. One of a pair of small

superficial lobes of the cerebellum; the cerebellar amygdala. Also *tonsilla* in both senses. —**Lingual tonsil**, a small collection of lymphoid tissue at the base of the tongue.—**Pharyngeal tonsil, Luschka's tonsil**, a mass of follicular lymphoid glands between the orifices of the right and left Eustachian tubes, at the summit of the pharynx.

tonsile (ton'sil), *a.* [< L. *tonsilis*, < *tondere*, pp. *tonsus*, shear, clip: see *tonsure*.] Capable of being or fit to be clipped; also, trimmed: as, a *tonsile* hedge. *Halliwell.* [Prov. Eng.]

There is not a more *tonsile* and governable plant in Nature; for the cypress may be cut to the very roots, and yet spring afresh. *Evelyn*, Sylva, I. xxiii.

tonsilla (ton-sil'ä), *n.*; pl. *tonsillæ* (-ē). Same as *tonsil*.

tonsillar (ton'si-lär), *a.* [= Sp. *tonsilar* = It. *tonsillare*, < NL. *tonsillaris*, < L. *tonsilla*, tonsil: see *tonsil*.] Of or pertaining to the tonsils: as, *tonsillar* arteries or follicles; *tonsillar* disease. —**Tonsillar artery**, a branch of the facial artery, distributed to the tonsils and the sides of the tongue near its root.—**Tonsillar nerves**, slender branches of the glossopharyngeal, distributed to the tonsils, soft palate, and pillars of the fauces.—**Tonsillar plexus**. See *plexus*.

tonsillary (ton'si-lā-ri), *a.* [< NL. *tonsillaris*: see *tonsillar*.] Same as *tonsillar*. *Quain*, Med. Dict., p. 1647.

tonsillitic[1] (ton-si-lit'ik), *a.* [< L. *tonsilla* + *-it-ic*.] Of or pertaining to the tonsils: as, *tonsillitic* nerves.

tonsillitic[2] (ton-si-lit'ik), *a.* [*tonsillitis* + *-ic*.] Of or pertaining to tonsillitis; affected with inflammation of the tonsils.

tonsillitis (ton-si-lī'tis), *n.* [NL. *tonsillitis*, < L. *tonsillæ*, tonsils, + *-itis*.] Inflammation of the tonsils. It is a very common form of sore throat, of varying severity.—**Follicular tonsillitis**, tonsillitis in which there is inflammation and increased secretion of the lining of the crypts or follicles of the tonsils.

tonsillotome (ton-sil'ō-tōm), *n.* [< L. *tonsilla*, tonsil, + Gr. *-τομος*, < *τέμνειν*, *ταμεῖν*, cut.] A surgical instrument for excising more or less of the tonsil.

tonsillotomy (ton-si-lot'ō-mi), *n.* [< L. *tonsilla*, tonsil, + Gr. *-τομία*, < *τέμνειν*, *ταμεῖν*, cut.] In *surg.*, excision of the tonsils.

tonsor (ton'sor), *n.* [< L. *tonsor*, *tosor*, a clipper, a barber, < *tondere*, pp. *tonsus*, shear, shave.] A barber; one who shaves. *Combe*, Dr. Syntax's Tours, ii. 2. [Rare.]

tonsorial (ton-sō'ri-al), *a.* [< L. *tonsorius*, of or pertaining to shearing or shaving, < *tonsor*, a shaver: see *tonsor*.] Pertaining to a barber or his functions. [Generally humorous.]

Margaret, taking her seat in the *tonsorial* chair, delivered herself into the hands of the professor [the barber]. *S. Judd*, Margaret, ii. 1.

tonsure (ton'sūr), *n.* [< ME. *tonsure*, < OF. (and F.) *tonsure* = Pr. Sp. Pg. It. *tonsura*, a shearing, clipping, the shaven crown of a priest, < L. *tonsura*, a shearing, clipping, in ML. the shaven crown of a priest, < *tondere*, pp. *tonsus*, shear, clip.] **1.** The act of clipping the hair, or of shaving the head, or the state of being shorn. —**2.** Specifically—(*a*) In the Roman Catholic and Greek churches, the ceremony of shaving or cutting off the hair of the head, either wholly or partially, performed upon a candidate as a preparatory step to his entering the priesthood or embracing a monastic life; hence, entrance or admittance into the clerical state or a monastic order. In the early church the clergy wore the hair short, but not shaven. The tonsure seems to be as old as the fifth or sixth century. In the Greek Church the hair is wholly shaved off. In the Roman Catholic Church a part only is shaved, so as to form a circle on the crown of the head, and the first tonsure can be given only by a bishop, a mitered abbot, or a cardinal priest.

Of the ecclesiastical *tonsure* there were known to the Anglo-Saxons, in the early period of their Church, two distinctive shapes—the Roman and the Irish; the Roman form was perfectly round; the Irish was made by cutting away the hair from the upper part of the fore head in the figure of a half-moon, with the convex side before. *Rock*, Church of our Fathers, i. 186.

(*b*) The bare place on the head of a priest or monk, formed by shaving or cutting the hair.

Among some of the monastic orders and friars the tonsure leaves only a circle of hair round the head; the *tonsure* of secular clerks, on the other hand, is small. *Rom. Cath. Dict.*, p. 798.

tonsure (ton'sūr), *v. t.*; pret. and pp. *tonsured*, ppr. *tonsuring*. [< *tonsure*, *n.*] To shave or clip the hair of the head of; specifically, to give the tonsure to.

Priests must not wear showy garments such as the bishop forbids, and they must have their moustaches and beard shaved, and be *tonsured* once a month. *The Academy*, Feb. 8, 1890, p. 100.

tonsured (ton'sūrd), *p. a.* **1.** Having received the tonsure; shaven; hence, clerical.

No ecclesiastical privilege had occasioned such dispute, or proved so mischievous, as the immunity of all *tonsured* persons from civil punishment for crimes. *Hallam.*

2. Having a bald spot on the head like a tonsure. [Rare.]

Bowing o'er the brook
A *tonsured* head in middle age forlorn.
Tennyson, The Brook.

tonsure-plate (ton'sūr-plāt), *n.* A round thin plate slightly convex so as to fit the top of the head, used to mark the line of the tonsure according to the Roman rite.

tontine (ton-tēn'), *n.* and *a.* [< F. *tontine* = G. *tontine*, < It. *tontina*, tontine, a life-insurance office; so called from Lorenzo *Tonti*, a Neapolitan banker, who originated the scheme (about 1653).] **I.** *n.* An annuity shared by subscribers to a loan, with the benefit of survivorship, the share of each survivor being increased as the subscribers die, until at last the whole goes to the last survivor, the whole transaction ceasing with his death. By means of tontines many government loans were formerly raised in England. The name is also applied to the number of those receiving the annuity, to their individual share or right, and to the system itself. The tontine principle has also been applied to life-insurance. See *tontine policy*, under II.

I hear he pays as many annuities as the Irish *tontine*. *Sheridan*, School for Scandal, i. 1.

II. *a.* Of, pertaining to, constituting, or involving the principle of the tontine: as, *tontine* profits; *tontine* funds; *tontine* insurance.—**Tontine policy**, a policy of insurance in which the policy-holder agrees, in common with the other policy-holders under the same plan, that no dividend, return-premium, or surrender-value shall be received for a term of years called the tontine period, the entire surplus from all sources being allowed to accumulate to the end of that period, and then divided among all who have maintained their insurances in force. This modification of ordinary life-insurance has been adopted, as optional with the insured, for the purpose of countervailing the tendency to burden long-lived and persistent policy-holders with a large amount of premium s in comparison of those whose lives fall in shortly after obtaining insurance. The effect is to reduce the sum payable on deaths after but few years' payment of premiums, and increase the sum payable on deaths occurring after a given number of years.

tontiner (ton-tē'nėr), *n.* [< *tontine* + *-er*[1].] One who shares in a tontine. *R. L. Stevenson* ★*and L. Osbourne*, The Wrong Box, i. [Rare.]

tonus (tō'nus), *n.* [NL., < Gr. *τόνος*, tone: see *tone*[1].] **1.** Tonicity.

Pretty and witty, wild, and yet, *too*, gentle.
Shak., C. of E., iii. 1. 110.

What, will these young gentlemen *too* help us to catch this fresh salmon, ha?
Dekker and Webster, Northward Ho, iv. 3.

Never was there a more complete victory, achieved *too* within the space of little more than an hour.
Prescott, Ferd. and Isa., ii. 12.

4. Likewise; in like manner; in the same way.

As God clothes himself with light as with a garment, so God clothes and apparels his works with light *too*.
Donne, Sermons, vi.

Lewis the Fourteenth in his old age became religious: he determined that his subjects should be religious *too*.
Macaulay, Leigh Hunt.

Too blame. See *blame*, *v. t.*, note.—**Too many.** See *many*[1].—**Too much for one.** See *much*.—**Too thin.** See *thin*[1].—**Too too.** (*a*) Quite too; altogether too: noting great excess or intensity, and formerly so much affected as to be regarded as one word, and so often written with a hyphen.

O, that this *too too* solid flesh would melt,
Thaw, and resolve itself into a dew!
Shak., Hamlet, i. 2. 129.

O *too-too* happy! had that Fall of thine
Not cancell'd so the Character diuine.
Sylvester, tr. of Du Bartas's Weeks, i. 6.

Their loues they on the tenter-hookes did racke,
Rost, boyl'd, bak'd, *too too* much white, claret, sacke.
John Taylor, Pennilesse Pilgrimage, quoted in N. and Q., [7th ser., X. 498.

The rigour and extremity of law
Is sometimes *too-too* bitter.
Ford, Perkin Warbeck, ii. 2.

Hence—(*b*†) As an adjective or an adverb, very good; very well: used absolutely. *Ray*, English Words (ed. 1691), p. 76. (*c*) As an adjective, superlative; extreme; utter; hence, enraptured; gushing: applied to the so-called esthetic school, their principles, etc., in allusion to their exaggerated affectation. See *estheticism*, 2. [Colloq.]

Let the exclusive *too-too* æsthetes tolerate the remark that music and painting do not exist for them, or even for the real masters in their respective arts, but for their power of addressing, influencing, and delighting the masses of mankind. *N. and Q.*, 7th ser., XI. 30.

too[2]†, *prep.* An obsolete spelling of *to*[1].

too[3]†, *n.* An old spelling of *toe*.

tooart (tö'ärt), *n.* [Native Australian.] A valuable eucalypt of southwestern Australia, *Eucalyptus gomphocephala*. It grows 120 feet high, with a clear trunk of 50 feet. The wood is one of the strongest known, very heavy, very durable under exposure, unwedgeable, and unusually free from defects. It is used in ship-building for beams, keelsons, sternposts, and other works below the line of flotation, where great strength is required and weight is not objectionable. It would be available for piles, and many other purposes. Also *tuart* and *tewart*.

took (tůk). Preterit and obsolete or vulgar ★past participle of *take*.

tool[1] (töl), *n.* [< ME. *tool*, *tole*, *tol*, < AS. *tōl*, in glosses also spelled *tool*, *tohl* = Icel. *tōl*, neut. pl., tools; perhaps a contr. of a Teut. base **tauila*, < AS. *tawian* = OHG. *zaujan*, *zoujan*, MHG. *zouwen*, G. *zauen* = Goth. *taujan*, prepare: see *taw*[1].] **1.** A mechanical implement; any implement used by a craftsman or laborer at his work; an instrument employed for performing or facilitating mechanical operations by means of percussion, penetration, separation, abrasion, friction, etc., of the substances operated upon, for all of which operations various motions are required to be given either to the tool or to the work. Such machines as the lathe, planer, slotting-machine, and others employed in the manufacture of machinery, are usually called *machine-tools*.

Of alkinnes craftes I contreued *toles*,
Of carpentrie, of kerueres, and compassed masouns,
And lerned hem leuel and lyne though I loke dymme.
Piers Plowman (B), x. 177.

Take thi spades, rake, knyf, and shovelle,
And evry *tole* in beres grees defoule.
Palladius, Husbondrie (E. E. T. S.), p. 31.

Of Angling and the Art thereof I sing,
What kind of *tools* it doth behove to have.
J. Dennys (Arber's Eng. Garner, I. 147).

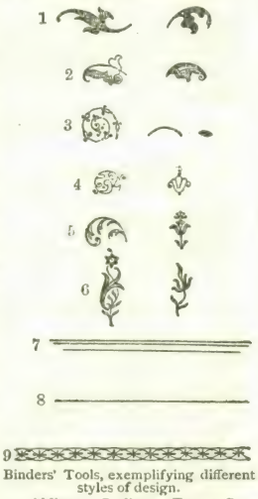
2. By extension, something used in any occupation or pursuit as tools are used by the mechanic: as, literary *tools* (books, etc.); soldiers' *tools* (weapons, etc.); specifically, a sword or other weapon.

Then the gome in the grene graythed hym swythe
Gedere vp hys grymme *tole*, Gawayn to smyte.
Sir Gawayne and the Green Knight (E. E. T. S.), l. 2261.

We alle desyren, if it mighte be,
To han housbondes hardy, wys, and free,
And secree, and no nigard, ne no fool,
Ne him that is agast of every *tool*.
Chaucer, Nun's Priest's Tale, l. 96.

Draw thy *tool*; here comes two of the house of the Montagues. *Shak.*, R. and J., i. 1. 37.



3. One who or that which is made a means to some end; especially, a person so used; a mere instrument to execute the purpose of another; a cat's-paw.

Oh, the easy blockhead! what a *tool* I have made of him!
Sheridan, The Duenna, ii. 4.

He had been a clerk, agent, *tool*, slave, of the great Densdeth. *T. Winthrop*, Cecil Dreeme, v.

4. A useless or shiftless fellow. [Prov. Eng.]

—5. [< *tool*[1], *v.*] A figure or ornament impressed upon the cover of a book by means of a binders' stamp or tool.

1, Aldine; 2, Grolier; 3, Eve; 4, Gascon; 5, Derôme; 6, Roger Payne; 7, fillet; 8, one-line; 9, roll.

Take a dentelle border; if accurately worked, the point of each *tool* will be directly in line with the corresponding one opposite.
W. Matthews, Modern Bookbinding (ed. Grolier Club), p. 87.

A poor tool, a bad hand at anything. *Hotten*, Slang Dict.—**Border tool,** in *ornamental metal-work*, a wheel with a notched or toothed edge, set in a handle, for producing rows of dots.—**Broad tool.** Same as *tooler*.—**Coloring tool.** See *color*.—**Cranked tool.** See *cranked*.—**Culling-tool,** an instrument of steel, about 10 inches long, having the heavy butt wound with cord to form a handle, used for knocking and prying apart a cluster of oysters. It is like a very heavy oyster-knife.—**Depthening tool.** See *depthen*.—**Edged tool,** a cutting instrument; figuratively, an instrument which is capable of cutting or otherwise hurting the person who uses it; hence, *to play with edged tools* is to act, or participate in action, in connection with something which may result disastrously because of insufficient knowledge or experience.—**Hooked tool.** See *hooked*.—**Modeling-tools.** See *modeling*.—**Obverse, quarter-hollow quarter-round, round, sugar-loaf tool.** See the qualifying words.—**Top and bottom tools.** See *top*[1].—**To play with edged tools.** See *edged tool*, above. (See also *balling-tool, scalloping-tool, side-tool, top-tool*.)=**Syn.** *Implement, Instrument, Tool, Utensil.* An *implement* is whatever may supply a want or a requisite to an end; it is always regarded in reference to its particular use: as, agricultural *implements; implements* of war. An *instrument* is anything which is employed in doing work or producing a certain result: as, surgical, mathematical, musical *instruments*. A *tool* is something less specific than an *implement*, and, when used physically, is one of the smaller *implements* of a mechanic art, such as can be worked by the hand: as, gardeners' *tools;* joiners' *tools*. A *utensil* is literally something to be used; the word has by usage become restricted to articles of domestic and farming use. In figurative use *instrument* is generally employed in a good sense, but *tool* in a dishonorable and contemptuous sense: we speak of a man as the *instrument* of Providence, or as a mere *tool* of cunning men. Formerly *implement* had a figurative sense.

tool[1] (töl), *v.* [< *tool*[1], *n.*] **I.** *trans.* In *bookbinding*, to ornament or give a final shape to by means of a special tool, especially when the mark of the tool is intentionally left visible.—**Tooled edges** (of a book), edges of book-covers having devices or patterns impressed upon them. Sometimes called *chased edges*. Such edges of leaves are known as *goffered edges*.

II. *intrans.* To work with a tool; specifically, in *bookbinding*, to execute tooling.

It is not an easy matter to *tool* accurately.
W. Matthews, Modern Bookbinding (ed. Grolier Club), p. 87.

tool[2] (töl), *v.* [Appar. a fanciful use, as if 'to manipulate, manage skilfully,' of *tool*[1], *v.*] **I.** *trans.* 1. To drive, as a four-in-hand, mail-coach, racing-wagon, or other wheeled vehicle.

He had already the honor of being plucked for "the little go": and, . . . on being asked for what profession he was fit, had replied with conscious pride, "That he could *tool* a coach." *Bulwer*, Caxtons, xiii. 4.

2. To draw in a vehicle. [Rare.]

If a rolling stone trips up the high-stepping mare that *tools* him along through the village street, the local newspaper soon hears of it. *A. Jessopp*, Arcady, i.

II. *intrans.* To drive; ride.

The lazy horse . . . was only kept from stopping altogether . . . by the occasional idle play of Emerson's whip. . . . So we *tooled* on. *Harper's Mag.*, LXV. 579.

tool-gage (töl'gāj), *n.* A gage employed to test the angle of the face of cutting-tools, as of those for turning iron.

tool-holder (töl'hōl″dėr), *n.* 1. A tool-handle designed to be used with different tools. Such holders are made with a variety of appliances for securing the tool temporarily in the handle. They are sometimes hollow, the small files, chisels, etc., used with them being kept inside the handle when not in use.

2. A device for holding the tool of a lathe or any metal-working machine in position for work.—3. A device for holding tools to be ground to the face of a stone, or for holding the stone itself while being faced or finished; ★a tool-stay.

tooling (tö'ling), *n.* [Verbal n. of *tool*[1], *v.*] Workmanship performed with a tool, as the chisel, graver, chasing-tool, etc. Specifically—(*a*) In *masonry*, stone-dressing in which the face shows the parallel marks of the tool in symmetrical order. (*b*) Decoration of leather-work by means of stamps and other metal tools, which are applied hot, and produce impressed patterns upon the surface: it is of two kinds, *gilt tooling*, in which leaf-gold is applied to the surface of the leather and fixed in the sunk pattern by the hot tool, the superfluous parts being brushed away afterward, and *blind tooling*, in which the decoration is made darker than the natural color of the leather. (*c*) The act of impressing separately incomplete designs upon the covers or backs of books by means of small tools, which in combination produce the complete design: applied only to hand-work. (*d*) In *carving*, elaborate ornament by means of chisels and gouges in stone or wood, in architecture, joinery, cabinet-work, etc.—**Blind tooling.** See (*b*), above.—**Gold, random,** etc., **tooling.** See the adjectives.

tool-mark (töl'märk), *n.* The characteristic form left on the surface of any article which has been shaped or worked by a tool, such as a saw, plane, lathe, etc.

Before a craftsman can recognise a *tool-mark*, he must be familiar with the tool; before a geologist knows river-marks, he must study the ways of rivers.
J. F. Campbell, Frost and Fire, I. 94.

tool-marking (töl'mär″king), *n.* A method of etching marks or names on steel tools, consisting in coating the part to be marked thinly with tallow or beeswax, making the desired marking with a sharp-pointed instrument through this coating, and applying nitric acid. After a few minutes, the acid and tallow are washed off, and the marks are found to show clearly on the steel.

tool-post (töl'pōst), *n.* In a lathe, a holder or support for the cutting-tool. It consists of an upright piece on the slide-rest, fitted with a slot through which the cutting-tool is passed, and a set-screw for holding the tool in position. Also *tool-stock*.

tool-rest (töl'rest), *n.* A device on the front of a lathe, used either as a support for a hand-tool or for holding a cutting-tool in position. It has sometimes various adjustments for moving the tool. See *slide-rest*, and cut under *lathe*.

toolsi (töl'si), *n.* [< late Skt. *tulasī*.] A species of basil, *Ocimum sanctum*, held sacred by the worshipers of Vishnu. Also *tulsi*.

tool-stack (töl'stak), *n.* A tool-post or tool-holder.

tool-stay (töl'stā), *n.* A slotted piece so fitted in a lathe-rest that a drill or internal cutting tool can be held in the slot.

tool-stock (töl'stok), *n.* Same as *tool-post*.

tool-stone (töl'stōn), *n.* See the quotation.

The oval *tool-stones*, . . . or "Tilhuggersteens" of the northern antiquaries, are oval or egg-shaped stones, more or less indented on one or both surfaces. Their use is not at present thoroughly understood. Some antiquaries suppose that they were held between the finger and thumb, and used as hammers or chippers. If, however, a large series is obtained, it will be found that the depression varies greatly in depth, and that sometimes the stone is completely perforated, which favours the view of those who regard these implements as ringstones for nets, or small hammer-heads. *Lubbock*, Pre-historic Times, p. 102.

toolye, toolzie (töl'yi), *v. i.* [< OF. *touiller*, mix, mingle, confound: see *toil*[1].] To quarrel. Also written *tuilyie, tuilzie*. [Scotch.]

toolye, toolzie (töl'yi), *n.* [< *toolye, v.*; cf. *toil*[1], *n.*] A broil; a quarrel. Also written *tuilyie, tuilzie*. [Scotch.]

toom (töm or tüm), *a.* and *n.*[1] [< ME. *toom, tom,* < AS. *tōm* = OS. *tōmi* (also *tōmīg*) = OHG. *zuomi, zōmi,* in *widar-zōmi* (also *zuomīg*), = Icel. *tōmr* = Sw. Dan. *tom*, empty, vacant.] **I.** *a.* Empty. [Obsolete or prov. Eng. and Scotch.]

Saddled and bridled

2. A blow-out; a spree: as, to go on a *toot*. [Slang, U. S.]

toot[3] (töt), *n.* [Origin uncertain; cf. *tout*[1], *n.*] 1. A lazy, worthless person. [Slang.]

Marsh Yates, the "shif'less *toot*," and his beautiful, energetic wife. *Harper's Mag.*, LXXVII. 801.

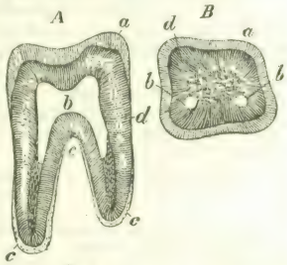
2. The devil. *Halliwell.* [Prov. Eng.]

tooter[1]† (tö′tėr), *n.* [Early mod. E. *toter*; < ME. **totere*, *tootere*; < *toot*[1] + *-er*[1].] 1. That which projects or stands out.

Hor. The world will take her for an unicorn. . . .
Val. Examine but this nose.
Sco. I have a *toter*.
Val. Which placed with symmetry is like a fountain I' the middle of her face. . . .
Aur. A nose of wax! *Shirley*, Duke's Mistress, iv. 1.

2. One who looks or peers; a watchman.

These thingus forsothe seide the Lord to me, Go, and put a *tootere*; and what euere thing he shal see, telle he.
Wyclif, Isa. xxi. 6.



tooter[2] (tö′tėr), *n.* [Early mod. E. also *toter*; < *toot*[2] + *-er*[1].] 1. One who toots; one who plays upon a pipe, horn, or other wind-instrument.

Hark, hark! these *toters* tell us the king's coming.
Fletcher and Rowley, Maid in the Mill, iii. 1.

2. That on which one toots, or on which a sound is produced by blowing.

Here is a boy that loves to . . . coast, skate, fire crackers, blow squash *tooters*. *O. W. Holmes*, Professor, viii.

tooth (töth), *n.*; pl. *teeth* (tēth). [< ME. *toth* (pl. *teth*), < AS. *tōth* (pl. *tēth*, rarely *tōthas*) = OS. *tand* = OFries. *tōth* = MD. A hard (horny, dentinal, osseous, chitinous, calcareous, or silicious) body or substance, in the mouth, pharynx, gullet, or stomach of an animal, serving primarily for the apprehension, mastication, or trituration of food, and secondarily as a weapon of attack or defense, and for a variety of other purposes, as digging in the ground, climbing, articulation of vocal sounds, etc. In man and mammals generally teeth are confined to the mucous membrane of the premaxillary, supramaxillary, and inframaxillary bones, and true teeth are present throughout the class, with a few exceptions. (See *Edentata*, *Monotremata*.) True teeth existed in Cretaceous birds, as the *Archæopteryx*, *Hesperornis*, and *Ichthyornis*; no recent birds have teeth. (See cut under *Ichthyornis*.) In reptiles, batrachians, and fishes teeth are the rule; in these classes they may be not only on the maxillary bones of either or both jaws, but also on the palate-bones, pharyngeal bones, vomer, etc. Chelonians are devoid of teeth, their horny beaks answering for biting, as is also the case with birds.

Human Tooth, enlarged: *A*, vertical section; *B*, horizontal section.
a, enamel of crown; *b*, pulp-cavity; *c*, cement of roots or fangs; *d*, dentin. (In *A* the letter *d* is opposite the cingulum.)

True teeth are usually attached to the bones of the jaws by being socketed in pits or grooves called *alveoli*, this mode of articulation being termed *gomphosis*. In reptiles, etc., the attachment to bone may be more intimate, and may occur in several ways, whence the terms *acrodont*, *holcodont*, *pleurodont*, *thecodont*, etc. True teeth in vertebrates are *enderonic* structures which develop from odontoblasts, and consist chiefly of a substance called *dentin*, to which may be added *cement* and *enamel*; which hard structures, as a rule, are disposed about a *pulp-cavity*, filled with soft *tooth-pulp*, or the nutrient and nervous structures of the tooth. This cavity may close up or remain wide open; in the latter case, teeth grow perennially or for an indefinite period. (See *Glires*, *Rodentia*.) Dentin resembles bone in most respects, and differs especially in the fineness and parallelism of the tubules which radiate from the central cavity. Ivory is a variety of dentin. The hard tissues of teeth are sometimes intricately folded (see *labyrinthodont*, with cut); but individual teeth are seldom compounded (see, however, *Orycteropodidæ*). Teeth of monotremes, when present, are horny and not dentinal. There may be one or several rows of maxillary teeth, which successively come into position, as the molars of the elephant, or are simultaneously in position, as is the rule. In all mammals true teeth are confined to a single row, upon the bones above mentioned; and in none are there more than two sets of teeth. Mammals with only one set of teeth are termed *monophyodont*; those with two sets, *diphyodont*. In diphyodont mammals the first or temporary set of teeth are termed *milk-teeth*; these are sometimes shed in the womb; the second set are the permanent teeth. According to their special shapes, or their special seats, teeth of diphyodonts are divided into three sets—*incisors*, *canines*, and *molars*. An incisor of the upper jaw is any tooth situated upon the premaxillary bone; an incisor of the under jaw is any tooth of the mandible which opposes a superior incisor. An upper canine is the single first or most anterior tooth of the supramaxillary bone; an under canine is the tooth which opposes this one, and on closure of the mouth passes in front of it. A molar tooth is one of the back teeth, or grinders. Molars are divided into false molars, premolars, or bicuspids, and true molars; the premolars being those which are preceded by milk-molars, the molars proper being those which have no predecessors. Thus, the permanent dentition of a diphyodont mammal differs from the milk-dentition by the addition of true molars. This classification of the teeth enables us to construct convenient dental formulæ. (See *dental formula*, under *dental*.) The incisors are generally simple, single-rooted, nipping or cutting teeth, whence the name (but see *soricident*, with cut). The canine is likewise a simple tooth, but one which in the *Carnivora*, as a dog or cat, is lengthened and even saber-like (the name is taken from its condition in the dog, and retained whether this tooth be actually caniniform or not). The molar, grinding, or crushing teeth usually have more than one root or fang, and more than one cusp or prominence upon the crown; they are hence called *bicuspid*, *tricuspid*, *multicuspid*, etc., as the premolars (bicuspids) and molars (multicuspids) of man; their crowns are variously tuberculous, giving rise to special descriptive terms, as *bunodont*, *symborodont*, *bathmodont*, *selenodont*, *mastodont*, etc., and also *bi-*, *tri-*, *quadri-*, *quinque-tuberculate*, etc. One molar or premolar above and below, in carnivorous quadrupeds, is specially modified with a sharp crest which cuts against its fellow of the other jaw like a scissor-blade; such a tooth is termed *sectorial* or *carnassial*. A tooth (incisor or canine) which projects from the mouth is termed a *tusk* or *tush*, as in the elephant, walrus, narwhal, wild boar and others of the pig family, and the fossil saber-toothed cats (*Machærodontinæ*). (See cuts under *Monodon*, *saber-toothed*, and *tusk*.) A tooth may be peculiarly folded upon itself to serve as a channel for the conveyance of a poisonous fluid, as in the rattlesnake: such a tooth is termed a *fang*. (See *poison-fang*, and cut under *Crotalus*.) A tooth is commonly divided into a *crown*, a neck or *cingulum*, embraced by the gum, and a *fang* or *root*—the latter, which may be multiple, being socketed in the alveolar process of the jaw. Any animal's set of teeth, or the character of that set, constitutes its *dentition*. Decay of the teeth is *caries*, and a decaying tooth is said to be *carious*. The scientific study and description of teeth is *odontology* or *odontography*. In pursuing this subject, see the various words above italicized, and many of the cuts cited under *skull*, as well as those under *Desmodontes*, *maxillary*, *palate*, *Pythonidæ*, *scalpriform*, and *supramaxillary*. See the supplement.

As blak as cole icheon thei were in dede,
Save only ther *tethe* ther was noo white to see.
Generydes (E. E. T. S.), l. 1943.

Nothur at thy mete thy *toth* thou pyke.
Babees Book (E. E. T. S.), p. 14.

No vertebrate animal has *teeth* in any part of the alimentary canal save the mouth and pharynx—except a snake (Rachiodon), which has a series of what must be termed *teeth*, formed by the projection of the inferior spinous processes of numerous anterior vertebræ into the œsophagus. *Huxley*, Anat. Vert., p. 81.

2. In *Invertebrata*, one of various hard bodies, presenting great variety of position and structure, which may occur in the alimentary canal from the mouth to the stomach. Such teeth are always ecderonic, cuticular, or epithelial structures, as the numerous teeth upon the lingual ribbon of gastropods, as the snail. These are true teeth, of chitinous structure, very numerous, and very regularly arranged in cross-rows each of which usually consists of differently shaped teeth distinguished by name (as *median*, *lateral*, *uncinal*, etc.), and the whole character of which is important in classification. (See *odontophore*, cuts under *radula* and *ribbon*, and various classificatory terms cited under *radula*.) Various hard tooth-like or jaw-like projections receive the name of *teeth*, as certain chitinous protuberances, called *cardiac* or *gastric teeth*, in the stomach of the lobster, crab, etc.

3. In *zoöl.*, a projection resembling or likened to a tooth. Specifically—(*a*) A horny process of the cutting edge of the beak of many birds, as the falcon and shrike. See cut under *dentirostral*. (*b*) A process of the shell in many bivalves, at or near the hinge. Thus, a genus *Anodonta* is so named from the absence of these teeth, conspicuous in related genera. See *cardinal teeth* (under *cardinal*), and cuts under *bivalve*, *Caprotinidæ*, and *Plicatula*. (*c*) A tooth-like or jaw-like part (sometimes a jaw itself) of various invertebrates. See cuts under *Clypeastridæ* and *lantern of Aristotle* (under *lantern*).

4. In *bot.*, any small pointed marginal lobe, especially of a leaf: in mosses applied to the delicate fringe of processes about the mouth of the capsule, collectively known as the *peristome*. See *peristome*, *Musci*, and cuts under *cilium* and *Dicranum*.—5. Any projection corresponding to or resembling the tooth of an animal in shape, position, or office; a small, narrow, projecting piece, usually one of a set. (*a*) One of the projections of a comb, a saw, a file, a harrow, or a rake.

Cheese that would break the *teeth* of a new hand-saw
I could endue now like an estrich.
Fletcher (*and another*), Love's Pilgrimage, ii. 2.

(*b*) One of the tines or prongs of a fork. (*c*) One of the sharp wires of a carding-instrument. (*d*) One of a series of projections on the edge of a wheel which catch on corresponding parts of a wheel or other body; a cog. See cut under *pinion*.

6. *pl.* In a rose-cut diamond, the lower zone of facets. They form a truncated cone-shaped base for the crown.—7. In *veneering*, the roughness made by the toothing-plane on the surfaces to be glued together to afford a good hold for the glue.—8. Figuratively, a fang; the sharp or distressing part of anything.

Blow, blow, thou winter wind; . . .
Thy *tooth* is not so keen,
Because thou art not seen.
Shak., As you Like it, ii. 7. 177

9. Palate; relish; taste, literally or figuratively. Compare *a sweet tooth*, below.

Chart. He 's an excellent musician himself, you must note that.
May. And having met one fit for his own *tooth*, you see, he skips from us.
Dekker and Webster, Northward Ho, iv. 4.

These are not dishes for thy dainty *tooth*.
Dryden, tr. of Persius's Satires, iii. 229.

It was much the same everywhere—affable greetings, pressing invitations, great courtesy, but nothing, absolutely nothing, for the impatient *tooth* of a correspondent.
Harper's Mag., LXXVIII. 867.

10. Keep; maintenance. *Halliwell.* [Prov. Eng.]—**Addendum of a tooth.** See *addendum*.—**Admedian teeth,** in *conch.* See *admedian*.—**Armed to the teeth.** See *armed*.—**Artificial teeth,** pieces of ivory or porcelain fashioned in the shape of natural teeth, used to replace the latter which have been lost or extracted. When made of porcelain they are further known as *incorruptible*, *mineral*, or *vitrescent teeth*.—**A sweet tooth,** a fondness for sweet food.

I am glad that my Adonis hath *a sweete tooth* in his head.
Lyly, Euphues (ed. Arber), p. 308.

Basioccipital tooth. See *basioccipital*.—**Bicuspid teeth.** See *bicuspid*.—**Bulb of a tooth.** See *bulb*.—**By or with the skin of one's teeth.** See *skin*.—**Canine teeth.** See def. 1, and *canine*.—**Caniniform tooth,** any tooth, whether a canine or other, that resembles the specialized canine of a carnivore in size and shape: as, lateral incisors *caniniform*; canines not *caniniform*.—**Capsule of teeth,** the membrane of Nasmyth. See *Nasmyth's membrane*, under *membrane*.—**Cardinal teeth,** in *conch.*, the hinge-teeth of a bivalve. See def. 3 (*b*), *hinge-tooth*, and

cut under *bivalve*.—**Clean as a hound's tooth**, perfectly clean; like polished ivory.—**Deciduous teeth**. See *milk-tooth* and *dentition*.—**Dog teeth**. See *dog-tooth*.—**Elephant's-tooth**, a kind of tooth-shell, *Dentalium elephantinum*.—**Epicycloidal teeth**. See *epicycloidal* (with cut).—**Eruption of teeth**, the cutting or appearance of the teeth of any kind; dentition.—**Esophageal teeth**. See *esophageal*, and third quotation under def. 1.—**Eye teeth**. See *eye-tooth*.—**Formula of teeth**. See *dental formula* (under *dental*), and def. 1.—**From one's teeth**, not from the heart; reluctantly or as a matter of form.

When the best hint was given him, he not took 't,
Or did it *from his teeth*. *Shak.*, A. and C., iii. 4. 10.

Gliriform teeth, any teeth that resemble the perennial incisors of the rodents or *Glires*.—**Hen's teeth**, that which does not exist, or which is extremely rare or unlikely. Compare the like use of *black swan* (under *swan*[1]). [Colloq.]—**Hunting tooth**, in *toothed gearing*, a single tooth, either of the wheel or of the pinion, more than what is required to make the numbers of teeth in the wheel and in the pinion commensurable. The purpose of a hunting tooth is to prevent the same teeth from coming into contact at each revolution, and thus to distribute more uniformly the wearing effect of friction.—**Incisive tooth**. See *incisive edge* (under *incisive*), and *incisor*.—**In spite or despite of one's teeth**, despite all resistance or opposition. *Shak.*, M. W. of W., v. 5. 133.—**In the teeth**. (*a*) In direct opposition or conflict.

Four brigades, under the conduct of Sebast, . . . had no sooner reached the top of the hill but they met Picrochole *in the teeth*, and those that were with him scattered.
Urquhart, tr. of Rabelais, i. 49.

(*b*) To one's face; openly.

Dost thou jeer and flout me *in the teeth?*
Shak., C. of E., ii. 2. 22.

In the teeth of. (*a*) Despite; in defiance of; in opposition to.

As the oath taken by the clergy was *in the teeth of* their principles, so was their conduct *in the teeth of* their oath.
Macaulay, Hallam's Const. Hist.

(*b*) Straight against: noting direction: as, to walk *in the teeth of* the wind.

Their vessels go only before the wind, and they had a strong steady gale almost directly *in* their *teeth*.
Bruce, Source of the Nile, I. 62.

(*c*) In the face or presence of; before.

The carrier scarcely knew what to do *in the teeth of* so urgent a message. *R. D. Blackmore*, Cripps the Carrier, i.

Lateral teeth, in *conch*. See *lateral*, *a.*, 3, and *n.*, 1 (*a*) (*b*).—**Lingual teeth**. See *lingual*.—**Mandibular teeth**. (*a*) The teeth of the mandible or lower jaw of any vertebrate. (*b*) The processes or serration of the mandibles of any insect, as a stag-beetle.—**Maugre one's teeth**†. See *maugre*.—**Maxillary teeth**. See *maxillary*.—**Median teeth**, in *conch.*, the single middle teeth of the several cross-rows of radular teeth, as distinguished from the paired admedian, lateral, or uncinal teeth of each cross-row.—**Milk-teeth**. See def. 1 and *milk-tooth*.—**Molariform teeth**, any teeth, whether molars or others, which serve for crushing, or resemble true grinders in shape or office.—**Molar teeth**. See def. 1, *molar*, *n.*, and cut under *supramaxillary*.—**Old woman's tooth**. Same as *router-plane* (which see, under *router*).—**Permanent, pharyngeal, pitted, stomachal teeth**. See the adjectives.—**Premolar teeth**. See def. 1, *premolar*, and cuts under *palate* and *supramaxillary*.—**Radular teeth**, in *conch*. See *radula* (with cut), and cuts under *ribbon* and *toxoglossate*.—**Stomach teeth**. See *stomach-tooth*.—**Superadded teeth**, the six posterior permanent teeth of either jaw of man—that is, the true molars.—**Teeth of succession**, the ten anterior permanent teeth of each jaw of man, which succeed the milk-teeth—that is, the incisors, canines, and premolars, as taken together, and distinguished from *superadded teeth*.—**Temporary teeth**, the milk-teeth.—**To cast one's colt's tooth, to have a colt's tooth**. See *colt*.—**To cast or throw in one's teeth**, to give boldly, as a challenge, taunt, reproach, etc. Mat. xxvii. 44.—**To cut one's eye-teeth**, to acquire worldly wisdom by experience; have one's wits sharpened. Compare like implication of *wisdom-tooth*.—**To cut the teeth**. See *cut*.—**To have (carry) a bone in the teeth**. Same as *to carry a bone in the mouth*. See *bone*[1].—**To hide one's teeth**†, to dissimulate one's hostility; feign friendship.

The jailer . . . *hid his teeth*, and, putting on a show of kindness, seemed much troubled that we should sit there abroad. *T. Ellwood*, Life (ed. Howells), p. 323.

To hit in the teeth with, to taunt or twit with; throw in the teeth of.

If you be my friend, keep you so; if you have done me a good turn, do not *hit* me *i' the teeth with* 't; that's not the part of a friend.
Beau. and Fl., Wit at Several Weapons, v. 1.

To lie in one's teeth. See *lie*[2].—**To love the tooth**, to be an epicure or gourmet.

Very delicate dainties, . . . greatly sought by them that *love the tooth* so well.
Holland, tr. of Camden, p. 543. (*Davies.*)

To one's (the) teeth, to one's face; openly; boldly; defiantly: sometimes intensified as *to the hard teeth*.

Mowbray in fight him matchless honour won; . . .
Gifford seemed danger *to her teeth* to dare.
Drayton, Barons' Wars, ii. 43.

Tooth and nail, with biting and scratching; hence, with all strength and means; with one's utmost efforts.

And physic will favour ale (as it is bound),
And stand against beer both *tooth and nail*.
Randolph, Commendation of a Pot of Good Ale.

Tooth of the mentum. Same as *mentum-tooth*.—**To set the teeth on edge**. See *edge*.—**To show one's teeth**, to threaten.

When the Law *shows her teeth*, but dares not bite.
Young, Love of Fame, i. 17.

To take the bit in the teeth. See *bit*[1].—**Uncinal teeth**, in *conch*. See *uncinal*.—**Villiform teeth**. See *villiform*.—**Wisdom teeth**. See *wisdom-tooth*.—**With teeth and all**, tooth and nail.

Hooker, Eccles. Polity, viii. 6.

tooth (töth), *v.* [< ME. *toothen*, *tothen*; < *tooth*, *n.*] **I.** *trans.* 1. To bite; taste.

They were many times in doubt which they should *touth* first, or taste last. *Gosson*, Schoole of Abuse.

2. To furnish with teeth: as, to *tooth* a rake.

That towe is *toothed* thicke as the mesure
Of erees wol not passe hem, upwarde bende . . .
And every corne wol start into this chare.
Palladius, Husbondrie (E. E. T. S.), p. 159.

The twin cards *toothed* with glittering wire.
Wordsworth.

3. To indent; cut into teeth; jag.

Then saws were *toothed*, and sounding axes made.
Dryden, tr. of Virgil's Georgics, i. 215.

4. To lock one in another.

II. *intrans.* 1†. To teethe.

When thaire crestes springe
As seke are thay as children in *tothinge*.
Palladius, Husbondrie (E. E. T. S.), p. 25.

2. To interlock, as cog-wheels.

toothache (töth'āk), *n.* [Formerly also *toothach*, *toothake*; < ME. *tothache*, < AS. *tōthece*, < *tōth*, tooth, + *ece*, ache: see *tooth* and *ache*[1].] Pain in the teeth; odontalgia. Toothache was once supposed to be caused by a worm in the tooth. Compare *worm*.

Coughes and cardiacles, crampes and *tothaches*.
Piers Plowman (B), xx. 81.

I am troubled
With the *toothache*, or with love, I know not whether;
There is a worm in both.
Massinger, Parliament of Love, i. 5.

toothache-grass (töth'āk-gras), *n.* A grass, *Campulosus aromaticus*, of the southern United States. The culm is 3 or 4 feet high, and bears a curious dense and much-awned one-sided spike with a flat rachis, which is strongly curved backward. This grass has a very pungent taste.

toothache-tree (töth'āk-trē), *n.* 1. The prickly-ash.—2. The somewhat similar *Aralia spinosa*, or angelica-tree, sometimes called *wild orange*.

toothback (töth'bak), *n.* A tooth-backed or prominent notodontid moth; a pebble. See *Notodonta*.

tooth-backed (töth'bakt), *a.* Having a tooth or prominence on the back, as a caterpillar of the family *Notodontidæ*.

tooth-bearer (töth'bār″ėr), *n.* The odontophore of a mollusk.

toothbill (töth'bil), *n.* The tooth-billed pigeon (manu-mea) of the Samoan Islands. See cut under *Didunculus*.

tooth-billed (töth'bild), *a.* In *ornith.*, having one or more tooth-like processes of the horny integument on the cutting edges of the bill. (*a*) Dentirostral, as a falcon or a shrike. See cut under *dentirostral*. (*b*) Serratirostral, as a sawbill or a humming-bird. See cut under *serratirostral*.—**Tooth-billed bower-bird**, a rare and remarkable bower-bird, *Scenopœus dentirostris*, lately discovered (1875) in the Rockingham Bay district of Australia.—**Tooth-billed pigeon**, *Didunculus strigirostris*. See cut under *Didunculus*.

Tooth-billed Bower-bird (*Scenopœus dentirostris*).

tooth-blanch† (töth'blänch), *n.* Something to whiten the teeth; a dentifrice.

Dentifricium, tooth-powder, tooth sope, or *tooth-blanch*.
Nomenclator, 1585. (*Nares.*)

tooth-brush (töth'brush), *n.* A small brush, with a long straight or curved handle, used for cleaning the teeth.

toothbrush-tree (töth'brush-trē), *n.* See *Salvadora*[1].

tooth-carpenter (töth'kär″pen-tėr), *n.* A dentist. [Humorous slang.]

tooth-cress (töth'kres), *n.* Same as *coralwort*.

tooth-drawer† (töth'drâ″ėr), *n.* [< ME. *tothdrawer*, *tothdraware*; < *tooth* + *drawer*.] One who draws teeth, especially as a profession; a dentist.

Of portours and of pykeporses, and pyled [bald] *toth-drawers*.
Piers Plowman (C), vii. 370.

His face so ill favouredly made that he looks at all times as if a *toothdrawer* were fumbling about his gums.
Dekker, Gull's Hornbook.

tooth-drawing (töth'drâ″ing), *n.* The act of extracting a tooth; the practice of extracting teeth.

toothed (tötht), *a.* [< ME. *tothed*, *tothyd*; < *tooth* + *-ed*[2].] 1. Having teeth; furnished with teeth.

Four maned lions hale
The sluggish wheels; solemn their *toothed* maws,
Their surly eyes brow-hidden. *Keats*, Endymion, ii.

2. Jagged; notched; dentate; serrate.

The crushing is effected by means of two grooved cylinders consisting of *toothed* discs.
Spons' Encyc. Manuf., I. 454.

Specifically—(*a*) Thorny.

Tooth'd briers, sharp furzes, pricking goss and thorns.
Shak., Tempest, iv. 1. 180.

(*b*) In *bot.*, having a series of regular or irregular projecting points about the margin; dentate: as, a *toothed* leaf, calyx, etc.; having tooth-like projections, as the roots of *Dentaria*. (*c*) In *ornith.*, having a tooth-like projection of the cutting edge of the bill, as a falcon's beak; dentirostral. See cuts under *dentirostral* and *Thamnophilinæ*. (*d*) In *conch.*, having a tooth-like projection, or such projections, about the margin of a bivalve, or the aperture of a univalve, as a unio or a helix. See *tooth*, *n.*, 3 (*b*), and cuts under *bivalve*, *Monoceros*, and *Monodonta*. (*e*) In *anat.*, odontoid or dentate: noting the axis, or second cervical vertebra. See *axis*[1], 3 (*a*). (*f*) In *entom.*, having one or more sharp tooth-like processes: as, a *toothed* margin or mandible.—**Toothed herring**. See *herring*.—**Toothed shell**. Same as *tooth-shell*.—**Toothed snails**. See *snail*.—**Toothed whale**. See *whale*.—**Toothed wheels**, wheels made to act upon or drive one another by having the surface of each indented with teeth, which fit into those of the other; cog-wheels. See *tooth*, 5 (*d*), *wheel*, and cut under *pinion*.

toothedge (töth'ej), *n.* [< *tooth* + *edge*.] The sensation of having one's teeth set on edge; a sensation excited by grating sounds and by the touch of certain substances; tingling uneasiness, arising from stridulous sounds, vellication, or acid or acrid substances.

tooth-flower (töth'flou″ėr), *n.* A rubiaceous plant, *Dentella repens*, the only species of its genus, a prostrate herb forming dense patches, found in Asia, Australia, and Polynesia.

toothful (töth'fûl), *a.* [< *tooth* + *-ful*, 1.] 1†. Full of teeth.

Our mealy grain
Our skilfull Seed-man scatter[s] not in vain;
But, being covered by the *tooth-full* Harrow, . . .
Rots to revive.
Sylvester, tr. of Du Bartas's Weeks, i. 3.

2. Toothsome; palatable.

What dainty relish on my tongue
This fruit hath left! some angel hath me fed;
If so *toothfull*, I will be banqueted.
Massinger, Virgin-Martyr, v. 1.

toothful (töth'fûl), *n.* [< *tooth* + *-ful*, 2.] A small draught of any liquor. [Colloq.]

Step round and take a *toothful* of something short to our better acquaintance. *Whyte Melville*, White Rose, II. i.

Skt. *tapas*, heat. According to Pliny (bk. xxxvii. c. 8), the name is derived from that of *Topazas*, an island in the Red Sea, the position of which is 'conjectural,' < Gr. τοπάζειν, conjecture. Others place this conjectural island in the Arabian Sea.] **1.** A mineral of a vitreous luster, transparent or translucent, sometimes colorless, often of a yellow, white, green, or pale-blue color. It is a silicate of aluminium in which the oxygen is partly replaced by fluorin. The fracture is subconchoidal and uneven; the hardness is somewhat greater than that of quartz. It usually occurs in prismatic crystals with perfect basal cleavage, also massive, sometimes columnar (the variety pycnite). Topaz occurs generally in granitic rocks, less often in cavities in volcanic rocks as rhyolite. It is found in many parts of the world, as Cornwall, Scotland, Saxony, Siberia, Brazil, Mexico, and the United States. The finest varieties are obtained from the mountains of Brazil and the Ural Mountains. Those from Brazil have deep-yellow tints; those from Siberia have a bluish tinge; the Saxon topaz has a pale wine-yellow. The purest topazes from Brazil, when cut in facets, closely resemble the diamond in luster and brilliance.

See *oriental*, 2.—**Pink topaz**, pink or rose-colored topaz, produced from the yellow Brazilian topaz by strong heating. If the heat is continued too long, the color is entirely expelled, and the topaz becomes colorless. Also *rose topaz*.—**Scottish topaz.** Same as *smoky topaz*.—**Siberian topaz**, the white or bluish-white topaz found in Siberia.—**Smoky topaz.** See *smoky*.—**Spanish topaz**, a variety of smoky quartz the color of which has been changed by heat from smoky- to dark-brown, golden-brown, or golden-yellow.—**Star-topaz**, a yellow star-sapphire. See *asteriated sapphire*, under *sapphire*.

Topaza (tō-pā′zä), *n.* [NL. (G. R. Gray, 1840), < Gr. τόπαζος, topaz: see *topaz*.] A genus of humming-birds, the topaz hummers. The curved bill is longer than the head, and the tail is forcipate with a long slender pair of feathers next to the middle pair.

Topaz Humming-bird (*Topaza pella*).

Two species are known, *T. pella* and *T. pyra*, both of Cayenne, Trinidad, and the Amazon region. The long tail and beak give these hummers a length of 5½ inches, though the body is small. The coloration is gorgeous; in *T. pella* the back is shining dark-red, changing to orange-red on the rump, the head is black, the throat metallic greenish-yellow with a central topaz sheen and black border; the other under parts are glittering crimson, with golden-green vent.

topazine (tō′paz-in), *a.* [< *topaz* + *-ine*[1].] In *entom.*, yellow and semi-transparent with a glassy luster, as the ocelli of certain insects and the eyes of some spiders.

topazolite (tō-paz′ō-līt), *n.* [< Gr. τόπαζος, topaz, + λίθος, stone.] A variety of garnet, of a topaz-yellow color, or an olive-green, found in Piedmont. See *garnet*[1].

topaz-rock (tō′paz-rok), *n.* [Tr. G. *topasfels* or *topasbrockenfels*.] A rock which is a peculiar result of contact metamorphism. It is made up of fragments of an aggregate of quartz and tourmalin, which fragments (brocken) are cemented by a mixture of quartz and topaz. The locality of this peculiar rock is the vicinity of the Schreckenstein in the Erzgebirge.

top-beam (top′bēm), *n.* Same as *collar-beam*.

top-block (top′blok), *n.* **1.** *Naut.*, a large iron-bound block hung to an eye-bolt in the cap, used in swaying and lowering the topmast.—**2.** In a vehicle, a projection upon which the bows of the top rest when it is down. *E. H. Knight.*

top-boot (top′bōt), *n.* A boot having a high top; specifically, one having the upper part of the leg of a different material from the rest and separate from it, as if turned over, or designed to be turned over. The jack-boots of the seventeenth century and later had the top somewhat projecting from the leg, as if to allow more freedom to the knee, and this upper part was of thinner leather than the leg, and sometimes, though rarely, of a colored leather, not requiring blacking. The modern top-boot, worn

top-heavy (top'hev″i), *a.* 1. Having the top disproportionately heavy; over-weighted at the top.

Like trees that broadest sprout,
Their own *top-heavy* state grubs up their root.
Chapman, Byron's Conspiracy, iii. 1.

2. Figuratively, lacking fitness of proportions; liable to fall or fail.

The scheme has become more *top-heavy*, in that the pensions for the aged or disabled workmen are graded, varying according to the wages they have been earning.
The Nation, XLVIII. 377.

3. Drunk; tipsy. *Leland.* [Slang.]

Tophet (tō'fet), *n.* [< Heb. *tōpheth*, lit. a place to be spit on, < *tūph*, spit.] A place situated at the southeastern extremity of Gehinom, or Valley of Hinnom, to the south of Jerusalem. It was there that the idolatrous Jews worshiped the fire-gods and sacrificed their children. In consequence of these abominations the whole valley became the common laystall of the city, and symbolical of the place of torment in a future life.

The pleasant valley of Hinnom, *Tophet* thence
And black Gehenna call'd, the type of hell.
Milton, P. L., i. 404.

tophi, *n.* Plural of *tophus.*

top-honors† (top'on″ėrz), *n.* Topsails. [Rare.]

As our high Vessels pass their wat'ry Way,
Let all the naval World due Homage pay;

It. *topica*, < L. *topica*, neut. pl., the title of a work of Aristotle, < Gr. τοπικά (τὰ τοπικά, the books concerning τόποι, or common places), neut. pl. of τοπικός, pertaining to a place: see I.] **I.** *a.* Local: same as *topical.*

O all ye *Topick* Gods, that do inhabit here.
Drayton, Polyolbion, xxx. 221.

The places ought, before the application of those *topicke* medicines, to be well prepared with the razour.
Holland, tr. of Pliny, xxix. 6.

II. *n.* 1. In *logic* and *rhet.*, a common place (which see, under *common*); a class of considerations from which probable arguments can be drawn. According to the opinion of some writers, the statements of Aristotle are only consistent with making a topic, or common place, a maxim of reasoning. The traditional definition coming through Cicero is "the seat of an argument." This is not very explicit, and the word has not commonly been used with a very rigid accuracy in logic or rhetoric. The chief topics concern the arguments from notation, conjugates, definition, genus, species, whole, part, cause, effect, subject, adjunct, disparates, contraries, relates, privatives, contradictories, greater, less, equals, similars, dissimilars, and testimony; but different logicians enumerate the topics differently.

The great arguments of Christianity against the practice of sin are not drawn from any uncertain *Topicks*, or nice and curious speculations.
Stillingfleet, Sermons, II. iii.

2. The subject of a discourse, argument, or literary composition, or the subject of any distinct part of a discourse, etc.; any matter treated of: now the usual meaning of the word.

It often happens . . . that the poet and the senate of Rome have both chosen the same *topic* to flatter their emperor upon, and have sometimes fallen upon the same thought. *Addison*, Ancient Medals, i.

Deem'st thou not our later time
Yields *topic* meet for classic rhyme?
Scott, Marmion, iii., Int.

3. In *med.*, a remedy locally applied.

Amongst *topics* or outward medicines, none are more precious than baths. *Burton*, Anat. of Mel., p. 418.

Transcendental topic. See *transcendental.*—**Syn. 2.** ★*Theme*, *Point*, etc. See *subject.*

topical (top'i-kal), *a.* [< *topic* + *-al.*] 1. Of or pertaining to a place or locality; especially, limited to a particular spot; local.

The men of Archenfeld in Herefordshire claimed by custom to lead the van-guard; but surely this priviledge was *topical*, and confined to the Welsh wars.
Fuller, Worthies, II. 145.

He was now intending to visite Staffordshire, and, as he had of Oxfordshire, to give us the natural, *topical*, political, and mechanical history. *Evelyn*, Diary, July 8, 1675.

The *topical* application of the artificial alizarine colours.
Workshop Receipts, 2d ser., p. 215.

2. Specifically, in *med.*, pertaining or applied to a particular part of the body; local.

He is robust and healthy, and his change of colour was not accompanied with any sensible disease, either general or *topical*. *Jefferson*, Notes on Virginia (1787), p. 120.

For the most part, however, in this country, physicians have abandoned severe *topical* measures, limiting themselves to antiseptic and soothing applications.
Austin Flint, Diphtheria (Amer. Cyc.).

3. Pertaining to or proceeding from a topic, or category of arguments; hence, merely probable, as an argument.

Evidences of fact can be no more than *topical* and probable. *Sir M. Hale.*

4. Pertaining to a subject of discourse, composition, or the like; concerned with a particular topic; specifically, dealing with topics of current or local interest.

Conversation . . . was . . . ever taking new turns, branching into *topical* surprises, and at all turns and on every topic was luminous, high, edifying, full.

topically (top'i-kal-i), *adv.* With reference to topics; also, with regard or application to a particular place, spot, subject, etc.

The various collections have been scientifically and *topically* classified and arranged.
Pop. Sci. Mo., XXVIII. 717.

topic-folio† (top'ik-fō″liō), *n.* A commonplace-book.

An English concordance and a *topic folio*, the gatherings and savings of a sober graduatship, a Harmony and a Catena, treading the constant round of certain common doctrinall heads. *Milton*, Areopagitica.

topinch† (tō-pinch'), *v. t.* [A sham word, invented by editors of Shakspere as a compound of *to-*, intensive, + *pinch*, and defined "to pinch severely." The proper reading is simply *to pinch.* Instances of *to* with an infinitive after *let* occur in Shakspere elsewhere (Hamlet, iv. 6. 11), and instances of *to* with an infinitive after other verbs with which *to* does not now usually appear abound in Shakspere and his contemporaries. The prefix *to-*, on the other hand, was obsolete in Shakspere's time, and it was never used "intensively" in such a sense as 'severely.'] An erroneous form of *to pinch.* See the etymology.

Then let them all encircle him about,
And, fairy-like, *topinch* the unclean knight.
Shak., M. W. of W., iv. 4. 57.

topknot (top'not), *n.* 1. Any knot, tuft, or crest worn or growing on the head: applied to any egret, crest, or tuft of feathers on the head of a bird, the hair on the top of the human head, any projecting or conspicuous ornament for the head, etc.; specifically, a bow, as of ribbon, forming a part of the head-dress of women in the seventeenth century.

We had that, among other laudable fashions, from London. I think it came over with your mode of wearing high *topknots*. *Farquhar*, Love and a Bottle, i. 1.

It is undoubtedly from hence [the Danish language] that the Bride-Favours, or the *Top-Knots* at Marriages, which were considered as Emblems of the Ties of Duty and Affection between the Bride and her Spouse, have been derived. *Bourne's Pop. Antiq.* (1777), p. 349.

The tall lady . . . arrayed in her rich black and fur, with that fine gentleman behind her whose thick *topknot* of wavy hair, sparkling ring, dark complexion, and general air of worldly exaltation unconnected with chapel, were painfully suggestive to Lyddy of Herod, Pontius Pilate, or the much-quoted Gallio.
George Eliot, Felix Holt, xxxviii.

2. A flatfish of Europe, *Phrynorhombus unimaculatus*: so called from the elevated crest formed by the dorsal fin on the head.

3. One of any of the breeds of domestic hens which have a crest.—**Miller's topknot.** Same as *smear-dab.*

topography (tō-pog′ra-fi), *n.* [< F. *topographie* = Sp. *topografía* = Pg. *topographia* = It. *topografia*, < LL. *topographia*, < Gr. τοπογραφία, a description of a place, < τοπογράφος, describing a place, as a noun a topographer, < τόπος, place, + γράφειν, write.] 1. The detailed description of a particular locality, as a city, town, estate, parish, or tract of land; the detailed description of any region, including its cities, towns, villages, castles, etc.

In our *topographie* we haue at large set foorth and described the site of the land of Ireland.
Geraldus Cambrensis, Conquest of Ireland, First Pref. (Holinshed's Chron., I.).

2. The features of a region or locality collectively: as, the *topography* of a place.—3. In *surv.*, the delineation of the features, natural and artificial, of a country or a locality.—4. In *anat.*, regional anatomy; the mapping of the surface of the body with reference to the parts and organs lying beneath such divisions of the surface, or the bounding of any part of the body by anatomical landmarks. The best examples of the former case of topography are the divisions of the abdominal and thoracic surfaces by arbitrary lines (see cuts under *abdominal* and *thoracic*); of the latter case, the natural bounds of the axilla, the inguen, the poples, Scarpa's triangle, the several surgical triangles of the neck, etc. See *triangle*.

5. In *zoöl.*, the determination of those different parts of the surface of an animal which may be conveniently recognized by name, for the purpose of ordinary description of specimens: as, the *topography* of a bird, a crab, an insect. Good examples are those figured under *bird*[1] and *Brachyura*. Ordinary descriptive zoölogy proceeds very largely upon such topography.—**Military topography**, the minute description and delineation of a country or a locality, with special reference to its adaptability to military purposes.

topolatry (tō-pol′a-tri), *n.* [< Gr. τόπος, place, + λατρεία, worship.] Worship of or excessive reverence for a place or places; adoration of a place or places. [Recent.]

This little land [Palestine] became the object of a special adoration, a kind of *topolatry*, when the Church mounted with Constantine the throne of the Cæsars.
Macmillan's Mag.

★**topology** (tō-pol′ō-ji), *n.* [< Gr. τόπος, place, + *-λογια*, < λέγειν, speak: see *-ology*.] 1. The art or method of assisting the memory by associating the objects to be remembered with some place which is well known.—2. A branch of geometry having reference to the modes of connection of lines and surfaces, but not to their shapes.

Toponeura (top-ō-nū′ra), *n. pl.* [NL., < Gr. τόπος, place, + νεῦρον, nerve.] A division of *Hydrozoa*, containing those which are toponeural: distinguished from *Cycloneura*. The division corresponds to *Scyphomedusæ*. *Eimer*.

toponymical (top-ō-nim′i-kal), *a.* [< *toponymic* + *-al.*] Same as *toponymic*. *Wilder and Gage.*

toponymy (tō-pon′i-mi), *n.* [< Gr. τόπος, a place, + ὄνομα, ὄνυμα, name.] In *anat.*, the designation of the position and direction of parts and organs, as distinguished from the names of the parts and organs themselves, which is the province of organonymy; regional or topographical nomenclature; topical terminology.—**Extrinsic toponymy**, the use of descriptive terms based upon the attitude of an animal in relation to the earth, as anterior, posterior, vertical, horizontal, etc. See the quotation under *superior*, *a.*, 2.—**Intrinsic toponymy**, the use of terms referring to regions of the animal itself, regardless of its habitual posture, as dorsal, ventral, ental, ectal, etc.

topophone (top′ō-fōn), *n.* [< Gr. τόπος, a place, + φωνή, a sound, tone.] An instrument, invented by A. M. Mayer, for ascertaining the direction from which any sound proceeds, as the sound of a bell, whistle, or fog-horn at sea in thick weather. It consists essentially of a horizontal bar pivoted at the center so as to turn freely in any direction. At each end of the bar is a resonator opening in the same direction, each connected with a sound-tube for the corresponding ear of the observer. On moving the bar about, a position will be found in which both resonators face the source of the sound, when the sounds heard through the two tubes will be increased or reinforced. In any other position the sounds will be weakened. The direction of the sound when loudest will be at a right angle with the bar.

top-pendant (top′pen″dant), *n. Naut.*, a large ★rope used in sending topmasts up or down.

topper (top′ėr), *n.* [< *top*[1] + *-er*[1].] 1. One who or that which tops. (*a*) The upper part, layer, or covering of anything. [Colloq.]

There was a boy beaten by a woman not long since for selling a big pottle of strawberries that was rubbish all under the *toppers*. It was all strawberry leaves, and crushed strawberries, and such like.
Mayhew, London Labour and London Poor, II. 137.

(*b*) One who or that which excels; anything surpassing or extraordinary. [Colloq.]

topsail (top′sāl or -sl), *n.* [< ME. *topsayle*, *topseyle*, *toppesaile* (= D. *topzeil*); < *top*[1] + *sail*[1].] *Naut.*, a square sail next above the lowest or chief sail of a mast. It is carried on a topsail-yard.

They bente on a bonet, and bare a *topte* [read *toppe*?] *saile*
Affor the wynde ffresshely to make a good ffare.
Richard the Redeless, iv. 72.

Yer we farther pass, our slender Bark
Must heer strike *top-sails* to a Princely Ark
Which keeps these Straights.
Sylvester, tr. of Du Bartas's Weeks, ii., The Furies.

Double topsails, a rig in which the topsail, as formerly carried on square-rigged vessels, is divided horizontally into two sails for ease and convenience of handling. In this rig an additional yard is carried, called the *lower topsail-yard*, which is slung on the cap of the lower mast instead of being hoisted and lowered, while the upper topsail-yard is hoisted and lowered as are single topsails. The lower topsail is the size of the whole topsail when close-reefed, so that letting go the topsail-halyards at once reduces the sail to a close reef, the clues of the upper topsail being lashed to the lower topsail-yardarms. In large merchant ships the topgallantsails are sometimes divided in the same way.—**Rolling topsail.** See *rolling*.—**To furl a topsail in a body.** See *furl*.—**Topsail schooner.** See *schooner*.—**Topsails over†**, heels over head; topsyturvy: sometimes shortened to *topsail*.

Sci. Amer. Supp., p. 8777.

Topside the other way†, topside tother way†, topside turfway†. Same as *topsyturvy*, of which these phrases are sophisticated amplifications, suggesting a false derivation.

The estate of that flourishing towne was turned . . . *topside the otherwaie*, and from abundance of prosperitie quite exchanged to extreame penurie.
Stanihurst, Descrip. of Ireland, iii. (Holinshed's Chron., I.)

Thus were all things strangely turned in a trice *topside t'other way:* they who lately were confined as prisoners are now not only free, but petty Lords and Masters, yea and petty Kings.
H. L'Estrange, Reign of K. Charles (ed. 1655), p. 75.

In Bodleian MS. Rawl. Poet. 25 (which is dated 1694–5, and is a copy of a MS. written not later than 1586), on the reverse of sign. E 7, eleventh line, I find the phrase *topside-turfway*, which, I suppose, was the original of topsy-turvy.
F. W. Foster, in N. and Q., 5th ser., II. 478.

topside-turned†, *a.* [An accom. of *topsy-turvy*, as if < *topside* + *turned*. Cf. *topsyturny*, *topsyturn*.] Same as *topsyturvy*. *Heywood*, Dialogues (Works, ed. Pearson, 1874, VI. 214).

topside-turvy†, *adv.* [Also *topside-turvey*, *topsyd turvie;* an accom. form of *topsyturvy*.] Same as *topsyturvy*. *Stanihurst*, Æneid, ii.

At last they have all overthrowne to ground
Quite *topside turvey*. *Spenser*, F. Q., V. viii. 42.

I found nature turned *top-side turvy;* women changed into men, and men into women.

topsyturvy (top-si-tėr′vi), *adv.* [A word which, owing to its popular nature, its alliterative type, and to ignorance of its origin, leading to various perversions made to suggest some plausible origin, has undergone, besides the usual variations of spelling, extraordinary modifications of form. The typical forms, with their variations and earliest known dates, are as follows: (1) *Topsy-tervy* (1528), *topsy-tyrvy* (1530), *topsie-turvie* (1575), *topse torve* (1579), *topsy turvye* (1582), *topsie turry* (1599), *topsy turvy* (1622), *tupsie-turvie* (1640), *topsi-turvy* (1670), *topsy-turvey* (1705). (2) Also, in Sc. forms, with the terminal element capriciously altered, *topsoltiria* (1623), *tapsalteerie* (before 1796), *tapsie-teerie* (1808). (3) Also, with the first element reduced, *top-turvye* (1582). (4) With the second element omitted, *topsey* (1664). (5) With the elements transposed, *turvy-topsy* (before 1687); also, in various other forms simulating for the element following *top-* or *topsy-* some apparently plausible etymology—namely, (6) simulating *side*1 (see *topside*), *topsyd-turvie* (1582), *topside-turvey* (1594), *topside-turvy* (1713). (7) Simulating *turn*, *topsyturny*, spelled *topsiturnie* (1617), whence the verb *topsyturn* (1562), *topsieturn* (1606), *topsiturn* (1613). (8) Simulating both *side*1 and *turn*, *topside-turned*, adj. (1637). (9) Simulating *set*1, *topset-torvie* (1558), *topset-turvie* (1569), *topset tirvi* (1573). (10) Deliberately expanded into a form impossible as an independent original, *topside the other waie* (1586), *topside tother way* (1656), *topside turfway* (see under *topside*). The earlier etymologies, indicated in the above forms, are a part of the history of the word, and are accordingly here formally stated, with the later explanations attempted, nearly in a chronological order: (*a*) As if < *top*1 + *side*1 (see *topside*) + *-turvy* (left unexplained). (*b*) As if orig. "the *top side turned*" (Minsheu, 1617), < *top*1 + *side*1 + *turn* + *-ed*2. (*c*) As if < *top*1 + *-sy* (left unexplained) + *turn* + *-y*1. (*d*) As if < *top*1 + *set*1 + *-turvy* (left unexplained). (*e*) As if orig. *top side the other way*, *topside tother way* (so Grose, 1785; Trench, 1855; Wedgwood, 1872). Various other explanations, all absurd, are given by (*f*) Skinner (1671) and Bailey (1727), (*g*) Coles (1677), (*h*) Miege (1687), (*i*) Grose (1785), (*j*) Brewer ("Dict. of Phrase and Fable"). (*k*) According to Skeat's first supposition ("Etym. Dict.," ed. 1882; "Concise Etym. Dict.," ed. 1882), prob. orig. **top side turvy* (as reflected in the form *topside-turvy*, above mentioned), i. e. 'with the upper side (put) turfy,' i. e. laid on the earth's surface, **turvy* standing for *turfy*. *Turfy*, however, could not mean 'put on the turf' or 'turned toward the turf.' (*l*) According to Dr. F. Hall (in the "Nation," March 28, 1889, from which article, and from Dr. Hall's book "On Adjectives in -able," some of the above forms are taken), prob. orig. **top so turvy*, **top so* being parallel to *up so* in *up so down* (and **top so turvy* being altered to *topside-turvey*, as *up so down* to *upside down*), and **turvy*, **tervy*, being connected with the obs. verb *terve*, in comp. *overterve*, fall, tr. throw down, cast, as used in the "strange compound" *toppe over terve:* see *terve*. (*m*) A similar view is taken by Skeat ("Etym. Dict.," Supp., 1884, p. 831; "Principles of Eng. Etym.," 1st ser., 1889, p. 428). That is to say, *topsyturvy*, starting from the earliest recorded form *topsy-tervy* (1528), is < *top*1 + *so*1, *adv.*, + **tervy*, overturned, < ME. *terven*, throw, *torvien*, throw, < AS. *torfian*, throw: see *terve*, *torve*1, and cf. *turf*2. This view, assuming that *-turvy*, *-tervy*, is an accom. form, made to agree terminally with *topsy-*, for **turved*, **terved*, pp. of ME. *terven*, upset, is prob. correct. The eleven other explanations are certainly wrong. The phrase evidently originated in ME., and was prob. confused not only with the verb *terve*, *toppe-overterve*, but also with similar phrases, like *topsails over*, and, elliptically, *topsail*, upset (to which the peculiar forms *topsoltiria*, *tapsalteerie* are prob. in part due: see *topsail*), and *top over tail* (see under *top*1).] Upside down; in reverse of the natural order; hence, in a state of confusion or chaos: formerly sometimes followed by *down*.

He tourneth all thynge *topsy tervy*.
Roy and Barlow, Rede Me and Be Nott Wrothe (1528, [ed. Arber), p. 51.

torch-pine (tôrch'pīn), *n.* See *pine*[1].

torch-race (tôrch'rās), *n.* In *Gr. antiq.*, a race at certain festivals, in which the runners carried lighted torches, the prize being awarded to the contestant who first reached the goal with his torch still burning. In some forms of this race relays of runners were posted at intervals, and the burning torch was passed on from one to the next. Very frequently it was associated with the worship of Helios (Apollo) or Selene (Artemis), or of some fire-god, as Hephæstus (Vulcan) or Prometheus. See *lampadephoria*.

torch-staff (tôrch'staf), *n.* The staff of a torch, by which it is carried. Compare *torch*[1], 2.

The horsemen sit like fixed candlesticks,
With *torch-staves* in their hand.
Shak., Hen. V., Iv. 2. 46.

torch-thistle (tôrch'this″l), *n.* A columnar cactus of the genus *Cereus*, the stems of some species of which have been used by the Indians for torches. Sometimes the name is extended to the whole genus.

torch-wood (tôrch'wůd), *n.* 1. Wood suitable for making torches. *Holland*, tr. of Plutarch, p. 562.—2. A tree of the rutaceous genus *Amyris*, either *A. maritima* of Florida and the West Indies, or *A. balsamifera* of Florida, the West Indies, and South America. *A. maritima* is a slender tree reaching 50 feet high; the wood is very hard and durable, suitable for use in the arts, could it be had in large quantities, very resinous, and much used for fuel on the Florida keys. *A. balsamifera* is smaller, very fragrant in burning, used to scent dwellings. In the West Indies the shrub *Casearia serrulata* is also so called.

torchwort (tôrch'wėrt), *n.* The mullen. Compare *hag-taper*.

torcular (tôr'kū-lär), *n.* [< L. *torcular*, a press used in making wine, < *torquere*, twist: see *tort*[1].] 1. A surgical instrument, the tourniquet.—2. In *anat.*, the confluence of the venous sinuses in the brain: more fully called *torcular Herophili*.—**Torcular Herophili**, in *anat.*, the wine-press of Herophilus, the place in the meninges of the brain, at the internal occipital protuberance, where the sinus of the falx cerebri joins the lateral sinus of the tentorium cerebelli, and other sinuses meet. This confluence of venous currents was supposed to exert some pressure upon the circulation (whence the name). See *straight sinus*, under *sinus*.

Tordylium (tôr-dil'i-um), *n.* [NL. (Morison, 1672), < L. *tordylion*, *tordylon*, < Gr. *τορδύλιον*, *τόρδυλον*, an umbelliferous plant, hartwort.] A genus of umbelliferous plants, of the tribe *Peucedaneæ*. It is characterized by conspicuous calyx-teeth, marginal petals frequently enlarged and two-lobed, a hirsute ovary, and a fruit with thick and often rugose margin, inconspicuous ridges, and oil-tubes solitary in their channels, or in a few species numerous. There are about 16 species, natives of Europe, northern Africa, and temperate and central parts of Asia. They are hairy annuals, usually bearing pinnate leaves with broad leaflets, or sometimes somewhat cordate undivided leaves. The flowers are white or purplish, and form compound umbels. The species are known as *hartwort* (which see).

torf†, *n.* A Middle English form of *turf*.

torfaceous (tôr-fā'shius), *a.* [< ML. **torfa*, *turfa* (< E. *turf*), + *-aceous*.] Growing in bogs or mosses: said of plants.

torfel (tôr'fl), *v. i.* [Cf. *terfle*.] To fall; decline; die. *Halliwell; Jamieson.* [Prov. Eng. and Scotch.]

torferet, **torfert**, *n.* [ME., also *torfoyr*; < Icel. *torfæra*, a difficult passage or road, *torfærr*, hard to pass, < *tor-*, hard, + *fara*, go, pass: see *tor*[4] and *fare*[1].] Difficulty; trouble.

> Suche *torfoyr* and torment of-telle herde I neuere.
> *York Plays*, p. 432.
>
> Thow arte be-trayede of thi mene, that moste thow on traystede.
> That schalle turne the to tene and *torfere* for ever.
> *Morte Arthure* (E. E. T. S.), l. 1956.

torgant, *a.* See *targant*.

torgoch (tor'goch), *n.* [< W. *torgoch*, lit. 'red-belly,' < *tor*, belly, + *coch*, red.] The red-bellied char, a variety of the common char, *Salvelinus alpinus*, found in mountain lakes in Great Britain; the saibling, as there found. See *char*[4].

tori, *n.* Plural of *torus*.

Torify (tō'ri-fī), *v. t.*; pret. and pp. *Torified*, ppr. *Torifying*. [< *Tory* + *-fy*.] To make a Tory of. [Humorous.]

> He is Liberalizing them instead of their *Torifying* him.
> *Sir G. C. Lewis*, Letters, p. 262. (*Davies.*)

Torilis (tor'i-lis), *n.* [NL. (Adanson, 1763), perhaps from the thick stylopodia, representing the disk, < L. *torus*, a cushion.] A genus of umbelliferous plants, of the tribe *Scandicineæ*, and by some authors formerly classed as a section of *Caucalis*. It includes about twenty-three species, and is distinguished from *Caucalis* in its sulcate rather than involute seed face. The species are natives of Europe, Asia, and northern Africa. They are usually rough annuals, with pinnately decompound leaves, and white or purplish flowers in compound umbels either terminal or opposite the leaves, commonly with few rays and few involucral bracts or none, but with many-leaved involucels and the marginal flowers commonly radiate, the other petals obcordate and these enlarged and bifid. They are chiefly known as *hedge-parsley* (which see) and also *burparsley*.

torillo (tō-rēl'yō), *n.* [Sp. *torillo*, a little bull, dim. of *toro*, a bull: see *steer*[2].] One of the hemipods, *Turnix sylvatica*, found in Spain: apparently so called from its pugnacity. See *Turnix*.

Torins (tō-raṅ'), *n.* A red wine grown in the department of Saône-et-Loire, France, resembling Burgundy of the second class, and keeping well.

torit†, *v. t.* [ME. *toritten*, *torytten*; < *to*-[2] + *rit*[1].] To cleave or tear in pieces.

> Hyre ryche robys sche all *to-rytte*,
> And was ravysed out of hyr wytte.
> *MS. Ashmole* 61, XV. Cent. (*Halliwell*, under *ritte*.)

torive†, *v. t.* [ME. *toriven*; < *to*-[2] + *rive*[1].] To rive in pieces; rend.

> The king share thrugh his shild with the sharpe ende,
> And the rod all *to roofe* right to his honde.
> *Destruction of Troy* (E. E. T. S.), l. 1234.

torment (tôr'ment), *n.* [< ME. *torment*, *tourment*, *turment*, < OF. *torment*, *tourment*, *turment*, F. *tourment* = Pr. *torment*, *turment* = Sp. Pg. It. *tormento*, torment (cf. Sp. Pg. *tormenta*, a tempest), < L. *tormentum*, an engine for hurling stones, a missile so hurled, also an instrument of torture, a rack, hence torture, anguish, torment, also a mangle, clothes-press, also a cord, rope, < *torquere*, twist, hurl, throw, rack, torture, torment: see *tort*[1]. Cf. *torture*.] 1†. An engine of war for casting stones, darts, or other missiles; a tormentum.

> Vitruuius . . . sayth, All *turmentes* of warre, whiche we cal ordinance, were first inuented by kinges or gouernours of hostes. *Sir T. Elyot*, The Governour, i. 8.

2. An instrument of torture, as the rack, the thumbscrew, or the wheel; also, the application of such an instrument, or the torture caused by it.

> Zaynte Agase, thet mid greate blisse . . . yede to *torment* alsuo ase hi yede to feste other to a bredale.
> *Ayenbite of Inwyt* (E. E. T. S.), p. 166.

> This *torment* of the wheele I find in Aristotle to have been used amongst the ancient Grecians.
> *Coryat*, Crudities, I. 11.

3. Hence, anything which causes great pain or suffering; a source of trouble, sorrow, or anguish.

> A! lorde, we were worthy
> Mo *turmentis* for to taste,
> But mende vs with mercye
> Als thou of myght is moste.
> *York Plays*, p. 393.
>
> Why, death 's the end of evils, and a rest
> Rather than *torment*: it dissolves all griefs.
> *B. Jonson*, Catiline, v. 6.

4. A state of suffering, bodily or mental; misery; agony.

> Sixteene dayes he travelled in this feare and *torment*.
> *Capt. John Smith*, True Travels, I. 42.
>
> How can I tell
> In any words the *torment* of that hell
> That she for her own soul had fashioned?
> *William Morris*, Earthly Paradise, III. 151.

5. An object of torture; a victim. [Rare.]

> That instant he becomes the sergeant's care,
> His pupil, and his *torment* and his jest.
> *Cowper*, Task, iv. 632.

6†. A tempest; a tornado.

> In to the se of Spayn wer dryuen in a *torment*
> Among the Sarazins. *Rob. of Brunne*, p. 148.

=**Syn. 4.** *Anguish*, *Torture*, etc. See *agony*.

torment (tôr-ment'), *v. t.* [< ME. *tormenten*, *tourmenten*, *turmenten*, < OF. *tormenter*, *turmenter*, *tourmenter*, F. *tourmenter* = Pr. *tormentar*, *turmentar* = Sp. *tormentar* (also *atormentar* = Pg. *atormentar*) = It. *tormentare*, < ML. *tormentare*, torment, twist, < L. *tormentum*, torment: see *torment*, *n.*] 1. To put to torment, as with the rack or the wheel; torture.

> He shall be *tormented* with fire and brimstone in the presence of the holy angels. Rev. xiv. 10.

2. To bring suffering or misery upon; pain; plague; distress; afflict.

> Thow dosse bot tynnez thi tyme, and *turmenttez* thi pople.
> *Morte Arthure* (E. E. T. S.), l. 1954.
>

> A provoking gipsy! to run away, and *torment* her poor father, that doats on her! *Colman*, Jealous Wife, ii.

3. To twist; distort.

> The fix'd and rooted earth,
> *Tormented* into billows, heaves and swells.
> *Cowper*, Task, ii. 101.
>
> The monument of Margaret [of Bourbon] herself is . . . in white marble, *tormented* into a multitude of exquisite patterns. *H. James, Jr.*, Little Tour, p. 246.

4. To throw into agitation; disturb greatly. [Rare.]

> Then, soaring on main wing,
> *Tormented* all the air. *Milton*, P. L., vi. 244.

=**Syn. 1.** To agonize, rack, excruciate.—2. *Plague*, *Worry*, etc. (See *tease*.) *Trouble*, *Distress*, etc. See *afflict*.

tormenta, *n.* Plural of *tormentum*.

tormented (tôr-men'ted), *p. a.* Tortured; agonized; distorted: occasionally used in the United States as a euphemism for *damned*: as, not a *tormented* cent. *Lowell*, Int. to Biglow Papers.

tormenter (tôr-men'tėr), *n.* [< *torment* + *-er*[1].] See *tormentor*.

tormentful (tôr'ment-fûl), *a.* [< *torment* + *-ful*.] Causing great suffering or torment. [Rare.]

> Malice, and envy, and revenge are unjust passions, and in what nature soever they are, they are as vexatious and *tormentful* to itself as they are troublesome and mischievous to others.
> *Tillotson*, Sermons, III. 192. (*Richardson, Supp.*)

tormentil (tôr'men-til), *n.* [Formerly *tormentile*; < F. *tormentille* = Pr. *tormentilla* = Sp. *tormentila* = Pg. It. *tormentilla*, < ML. *tormentilla*, *tormentella*, also *tornilla*, *tornella*, tormentil; so called, it is said, because supposed to allay the pain of the toothache, < L. *tormentum*, torment: see *torment*.] A plant, *Potentilla erecta*, occurring in Europe and temperate Asia. It is a low herb with slender forking stems, the lower leaves with five leaflets, the upper with three, the flowers small, bright-yellow, and having

Common Tormentil (*Potentilla erecta*).

usually but four petals. The plant has a thick and woody perennial rootstock, which is highly astringent; it is used in medicine, and also sometimes in tanning. It contains besides an available red coloring matter, used by the Laplanders to dye the skins worn by them as clothing. Also called *bloodroot*, *septfoil*, and *shepherd's-knot*.

This *tormentil*, whose virtue is to part
All deadly killing poison from the heart.
Fletcher, Faithful Shepherdess, ii. 2.

★**Tormentilla** (tôr-men-til'ạ̈), *n.* [NL. (Tournefort, 1700; earlier in Brunfels, 1530), ⟨ ML. *tormentilla*: see *tormentil*.] 1. A proposed genus of plants, the species of which are now referred to *Potentilla*, including those species which have the parts of the flowers in fours. The tormentil belongs to this section.—2. [*l. c.*] A plant of this group; tormentil.

This single yellow flower . . . is a *tormentilla*, which is good against the plague.
J. H. Shorthouse, John Inglesant, iii.

tormentingly (tôr-men'ting-li), *adv.* In a tormenting manner; in a manner productive of suffering.

He bounst and bet his head *tormentingly*.
Gascoigne, Dan Bartholomew of Bath.

tormentingness (tôr-men'ting-nes), *n.* The quality of being tormenting. *Bailey*, 1727.

tormentise†, *n.* [ME., ⟨ *torment*, *v.*] Torment; torture.

This Seneca the wyse
Chees in a bath to deye in this manere
Rather than han another *tormentyse*.
Chaucer, Monk's Tale, l. 527.

tormentor (tôr-men'tor), *n.* [⟨ ME. *tormentour*, *turmentour*, ⟨ OF. **tormentour* = Sp. *tormentador*, ⟨ ML. **tormentator* (cf. *tormentarius*), a torturer, ⟨ *tormentare*, torment: see *torment*, *v.*] 1. One who or that which torments. Especially—(*a*) One whose office it is to inflict torture; an executioner.

Then the lorde wonder loude laled & cryed,
& talkez to his *tormentourez*: "takez hym," he biddez,
"Byndez byhynde, at his bak, bothe two his handez, . . .
Stik hym stifly in stokez."
Alliterative Poems (ed. Morris), ii. 154.

Thre strokes in the nekke he smoot hir tho,
The *tormentour*.
Chaucer, Second Nun's Tale, l. 527.

(*b*) One who or that which causes pain or anguish; a cause of suffering or great distress.

These words hereafter thy *tormentors* be!
Shak., Rich. II., ii. 1. 136.

Louis XI., whose closeness was indeed his *tormentor*.
Bacon, Friendship (ed. 1887).

2. In *agri.*, an instrument for reducing a stiff soil. It is somewhat like a harrow, but runs on wheels, and each tine is furnished with a hoe or share that cuts up the ground.

3. A long fork used by a ship's cook to take meat out of the coppers.—4. In *theatrical use*, one of the elaborately painted wings which stand in the first grooves.—5. Same as *back-scratcher*. Also *tormenter*.

tormentress (tôr-men'tres), *n.* [⟨ *tormentor* + *-ess*.] A woman who torments.

Fortune ordinarily commeth after to whip and punish them, as the scourge and *tormentresse* of glorie and honour.
Holland, tr. of Pliny, xxviii. 4.

tormentry†, *n.* [ME. *tormentrie*; ⟨ *torment* + *-ry*.] Affliction; distress.

If she be riche and of heigh parage,
Than seistow it is a *tormentrie*
To soffren hire pride and hire malencolie.
Chaucer, Prol. to Wife of Bath's Tale, l. 251.

tormentum (tôr-men'tum), *n.*; pl. *tormenta* (-tạ). [L.: see *torment*.] 1. Anciently, a kind of catapult having many forms.—2. A light piece of ordnance.—3. A whirligig.

Restless as a whirling *tormentum*.
Carlyle, in Froude, Life in London, v.

4. In *med.*, a name formerly applied to obstructive intestinal disorders, probably specifically to intussusception.

tormina (tôr'mi-nạ̈), *n. pl.* [NL., ⟨ L. *tormina*, griping pains, ⟨ *torquere*, twist, wrench: see *tort*[1]. Cf. *torment*.] Severe griping pains in the bowels; gripes; colic.

torminal (tôr'mi-nạl), *a.* Same as *torminous*.

torminous (tôr'mi-nus), *a.* [⟨ *tormina* + *-ous*.] Affected with tormina; characterized by griping pains.

tormodont (tôr'mō-dont), *a.* [⟨ Gr. *τόρμος*, a hole or socket, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] Socketed, as teeth; having socketed teeth, as a bird. See *Odontotormæ*.

They differ from recent Carinate birds in degree only, viz., by their *tormodont* teeth and amphicœlous vertebræ.
Nature, XXXIX. 178.

torn[1] (tôrn), *p. a.* [Pp. of *tear*[1].] In *bot.*, having deep and irregular marginal incisions, as if produced by tearing; lacerate.

torn[2] (tôrn), *n.* 1†. A Middle English form of *turn*.—2. In *her.*, a bearing representing an ancient spinning-wheel.

tornade† (tôr-nād'), *n.* [See *tornado*.] A tornado. *Bailey*, 1727.

Inured to danger's direst form,
Tornade and earthquake, flood and storm.
Scott, Rokeby, i. 8.

tornadic (tôr-nad'ik), *a.* [⟨ *tornado* + *-ic*.] Pertaining to, characteristic of, or of the nature of a tornado.

Four series of storms of *tornadic* character have passed over the States east of the Mississippi River since the beginning of the year. *Amer. Meteor. Jour.*, I. 7.

tornado (tôr-nā'dō), *n.*; pl. *tornadoes* (-dōz). [With the common change of terminal *-a* to *-o*, to give the word a more Spanish look (also sometimes *tornade*), ⟨ Sp. (and Pg.) *tornada*, a return, or turning about (applied appar. at one time by Spanish and Portuguese sailors to a whirling wind at sea), ⟨ *tornar*, turn, ⟨ L. *tornare*, turn: see *turn*. The Pg. name is *travado*; the Sp. name is *turbonada*.] A violent squall or whirlwind of small extent.

They were all together in a plumpe on Christmasse-eve was two yere, when the great floud was, and there stird up such *ternados* and furicanos of tempests.
Nashe, Lenten Stuffe (Harl. Misc., VI. 164).

We had fine weather while we lay here, only some *tornadoes*, or thunder-showers. *Dampier*, Voyages, an. 1681.

Specifically—(*a*) On the west coast of Africa, from Cape Verd to the equator, a squall of great intensity and of short duration, occurring during the summer months, but most frequently and with greatest violence at the beginning and end of the rainy season. On the western part of the coast, near Sierra Leone, these squalls come from easterly points, and blow off shore; while on the eastern part of the coast, near the mouth of the Niger, they occasionally blow on shore, partly because of a variation in the direction of the squall, and partly because of a different trend of the coast. The squall is marked by peculiar, dense, arched masses of dark cloud, furious gusts of wind, vivid lightning, deafening thunder, and torrents of rain; it produces a slight rise in the barometer and a fall of temperature amounting on the average to 9° Fahr. Similar squalls in other tropical regions are usually known by the name of *arched squalls*, but are sometimes also called *tornadoes*. The principal period when these squalls occur (namely, at the change of the seasons or of the monsoons) is that in which great quantities of vapor-laden air are stopped by a land-wind, and accumulate near the coast, producing a hot, sultry, unstable state of the atmosphere. The tornado is the overturning process by which the atmosphere regains its stability. The wind ordinarily turns through two or three points during its progress, but in general a complete cyclonic motion is not established. (*b*) In the United States, east of the 100th meridian, a whirlwind of small radius and of highly destructive violence, usually seen as a whirling funnel pendent from a mass of black cloud, occurring most frequently in the southeast quadrant of an area of low pressure several hundred miles from its center, and having a rapid progressive movement, generally toward the northeast. The principal condition precedent to the formation of a tornado, just as for a thunder-storm, is an unstable state of the atmosphere. In the tornado a whirling motion from right to left, of tremendous energy, is generated in a mass of clouds, and is often maintained for several hours, while in the ordinary thunder-storm a complete cyclonic motion probably seldom becomes established. Tornadoes generally arise just after the hottest part of the day, when the atmosphere has its maximum instability; the months of greatest frequency are April, May, June, and July. The destruction in a tornado may be caused either by the surface wind which is forced in on all sides to feed the ascending current of the tornado-funnel, or by the gyrating winds of the funnel itself when sufficiently low to come within the reach of buildings; in the latter case no structure, however strongly built, is apparently able to withstand the wind's enormous force.

tornaria (tôr-nā'ri-ạ̈), *n.* [NL., ⟨ *tornus*, a lathe (see *turn*), + *-aria*.] The echinopædic-like larva of *Balanoglossus*, bearing a great resemblance to the larvæ of some of the echinoderms, as starfishes; originally the name of a pseudogenus, retained to designate the objects defined. See *Balanoglossus* (with cut).

tornarian (tôr-nā'ri-ạn), *a.* [⟨ *tornaria* + *-an*.] Of or pertaining to a tornaria; resembling the larva of *Balanoglossus*.

Tornatella (tôr-nạ-tel'ạ̈), *n.* [NL. (Lamarck, 1812), ⟨ L. *tornatus*, turned in a lathe, ⟨ *tornare*, turn (see *turn*), + dim. term. *-ella*.] The typical genus of the family *Tornatellidæ*: same as *Actæon*.

Tornatella tornatilis.

Tornatellidæ (tôr-nạ-tel'i-dē), *n. pl.* [NL., ⟨ *Tornatella* + *-idæ*.] That family of opisthobranchiate gastropods whose type genus is *Tornatella*, having a developed spiral shell: same as *Actæonidæ*.

torn-crenate (tôrn'krē″nāt), *a.* In *bot.*, crenate in having the margin torn, as certain lichens.

torn-down (tôrn'doun), *a.* and *n.* I. *a.* Rough; riotous; turbulent; rebellious; ungovernable; hence, overpowering of its kind. [Prov. Eng. and U. S.]

You know I was a girl onst; led the General a dance of it, I tell you. Yes, a real *torn-down* piece I was!
W. M. Baker, New Timothy, xxxii.

II. *n.* An unruly or unmanageable person. [Prov. Eng. and U. S.]

torneament†, *n.* An obsolete form of *tournament*.

tornilla, tornillo (tôr-nēl'yä, -yō), *n.* [Mexican name, ⟨ Sp. *tornillo*, a screw, dim. of *torno*, turn, turning-wheel: see *turn*.] The screw-pod mesquite. See *mesquite*[2].

torniquet, *n.* See *tourniquet*.

tornography (tôr-nog'rạ-fi), *n.* [Irreg. ⟨ *torn*(*ado*) + Gr. *-γραφία*, ⟨ *γράφειν*, write.] The description and theory of tornadoes. [Rare.]

torob†, *v. t.* [ME. *torobben*; ⟨ *to*-[2] + *rob*[1].] To steal wholly; take entirely away.

My yoye, myn herte ye all *to-robbydd*,
The chylde ys dedd that soke my breste!
MS. Cantab. Ff. ii. 38, f. 47. (*Halliwell.*)

★**toroidal** (tō-roi'dal), *a.* [⟨ *torc*[5], *torus*, + *-oid* + *-al*.] Having a shape like an anchor-ring, or a surface generated by the revolution of a circle about a line in its plane; pertaining to such a surface, or to a family of such surfaces.—**Toroidal function.** See *function*.

torose (tō'rōs), *a.* Same as *torous*.

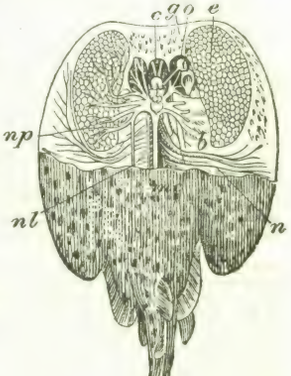
torosity (tō-ros'i-ti), *n.* [⟨ *torose* + *-ity*.] The state of being torous; muscular strength; muscularity. *Bailey*, 1727.

torotoro (tō'rō-tō'rō), *n.* [Native name.] A Papuan kingfisher, *Syma torotoro*.

torous (tō'rus), *a.* [⟨ L. *torosus*, full of muscle or flesh, ⟨ *torus*, a bulging, a protuberance, muscle: see *torus*.] Bulging; swelling; muscular. Specifically—(*a*) In *bot.*, cylindrical, with bulges or constrictions at intervals; swelling in knobs at intervals. (*b*) In *zoöl.*, protuberant; knobbed; tuberculated. Also *torose*.

tor-ouzel (tôr'ö″zl), *n.* The ring-ouzel. [Devonshire, Eng.]

Torpedinidæ (tôr-pē-din'i-dē), *n. pl.* [NL., ⟨ *Torpedo* (*-din-*) + *-idæ*.] A family of batoid fishes, typified by the genus *Torpedo*; the electric rays, noted for their power of giving shocks by means of a sort of galvanic battery with which they are provided. In this respect the electric rays are peculiar among elasmobranchs, though some fishes of a different class are provided with similar organs (the electric eels and electric catfishes). The torpedoes are large rays, of 6 genera and about 15 species, found in most seas. The trunk is broad and smooth; the tail comparatively short, with a rayed caudal fin and commonly two rayed dorsals, the first of which is over or behind the ventrals. The electric organs are a pair, one on each side of the trunk anteriorly, between the pectoral fins and the head. See cuts under *torpedo*.



torpedinoid (tôr-ped'i-noid), *a.* [⟨ NL. *Torpedinoidea*, q. v.] Of the nature of the electric ray; related or belonging to the *Torpedinoidea*.

Torpedinoidea (tôr-ped-i-noi'dē-ạ̈), *n. pl.* [NL., ⟨ *Torpedo* (*-din-*) + Gr. *εἶδος*, form, resemblance.] The electric rays, rated as a superfamily contrasted with *Raioidea* and *Pristoidea*.

torpedinous (tôr-ped'i-nus), *a.* [⟨ L. *torpedo* (*-din-*), torpedo, + *-ous*.] Shocking or benumbing like a torpedo. [Rare.]

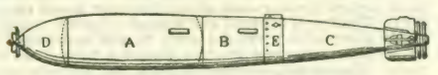
Fishy were his eyes, *torpedinous* was his manner.
De Quincey. [(*Imp. Dict.*)

★**torpedo** (tôr-pē'dō), *n.*; pl. *torpedoes* (-dōz). [Formerly also *torpædo*, *torpido*; = Sp. Pg. *torpedo* = It. *torpedine* (cf. F. *torpille* = It. *torpiglia*), a torpedo, cramp-fish, ⟨ L. *torpedo*, numbness, also a torpedo, cramp-fish, ⟨ *torpere*, benumb: see *torpent*, *torpid*.] 1. A fish of the genus *Torpedo* or family *Torpedinidæ*; an electric ray; a cramp-fish or numb-fish.

Torpedo, its electric apparatus displayed.
b, branchiæ; *c*, brain; *e*, electric organ; *g*, cranium; *me*, spinal cord; *n*, nerves to pectoral fins; *nl*, lateral nerves; *np*, branches of pneumogastric to the electric organ; *o*, eye.

Torpido is a fisshe, but who so handeleth hym shalbe lame & defe of lymmes, that he shall fele no thyng.
Babees Book (E. E. T. S.), p. 239.

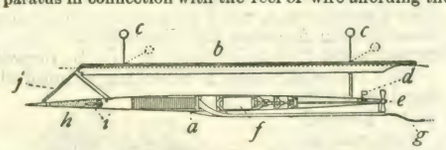
The *Torpædo* or Cramp-fish came also to our hands, but we were amazed (not knowing that fish but by its quality).
Sir T. Herbert, Travels (ed. 1638), p. 349.



2. [*cap.*] [NL. (Duméril, 1806).] In *zoöl.*: (*a*) The type genus of the family *Torpedinidæ*: properly *Narcobatis*. It is restricted to electric rays whose trunk is very broad and disk-like, evenly rounded in front and on the sides, and abruptly contracted at the tail, whose caudal fin is well developed, and which have two dorsals, large separate ventrals, and the skin perfectly smooth. They are large rays, chiefly of Atlantic waters. *N. occidentalis*, which is found along the Atlantic coast of North America, though not very common there, attains a length of about 5 feet; it is nearly uniform blackish above, and white below. *N. californica*, of the Pacific coast, is a spotted species.

Torpedo (*Narcobatis occidentalis*).

(*b*) The generic name of the electric eel (to which use it should be restricted).



3. An explosive device belonging to either of two distinct classes of submarine destructive agents used in war—namely, *torpedoes proper*, which are propelled against an enemy's ship, and more or less stationary *submarine mines*, placed where a hostile vessel would be likely to come within range of their destructive effect. Of the first class, called also *offensive torpedoes*, there are three principal types: (*a*) the *locomotive torpedo*, which class includes the Whitehead and many other patterns generally designated by the name of the inventor; (*b*) the *towing* or *otter torpedo*; and (*c*) the *spar-* or *outrigger-torpedo*. The Whitehead torpedo, or fish-torpedo, may be described as a cigar-shaped vessel from 14 to 19 feet in length, and from 14 to 19 inches in diameter. It is made of steel or phosphor-bronze, and divided into compartments. The forward compartment carries the explosive charge with the fuse, to be fired on impact; the next, compressed air; the third (the balance-chamber), the mechanism by which its course is adjusted; and the next, the engine which is driven by the compressed air. Back of the engine-room is an air-chamber designed to give buoyancy. The torpedo is driven by two propellers, revolving in opposite directions, and obtains a speed of from 20 to over 30 miles an hour for about 500 to 1,000 yards. The torpedo is fitted with four rudders, two vertical and two horizontal. The torpedo is launched from the vessel by means of a launching-tube or torpedo-tube.

Whitehead Torpedo.

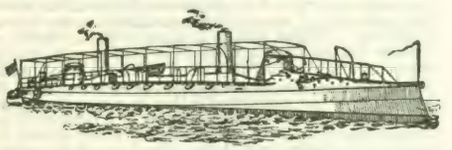
A, air-chamber; *B*, balance-chamber; *C*, buoyancy-chamber; *D*, explosive head; *E*, engine-room.

In other patterns the motive power is supplied by compressed gas. In several inventions a reel of insulated wire in the stern is paid out as the vessel proceeds, keeping up communication with the shore, and a small flag or staff above water indicates its whereabouts—an electrical apparatus in connection with the reel of wire affording the means of starting, stopping, directing, or firing it. Various forms of towing torpedoes have been devised, of which the best-known is that of Commander Harvey, R. N. This torpedo is towed on the quarter of the attacking vessel, and is so attached to the tow-line as to pull the line out at an angle with the course of the attacking vessel, which endeavors to manœuver so as to draw the torpedo under the hull of an enemy and explode its charge on contact by a trigger-bolt; but in practice it has not been successful, and in the navies of Great Britain and the United States has been withdrawn from use. The spar- or outrigger-torpedo consists of a metal case containing the explosive (guncotton, gunpowder, dynamite, etc.) and fitted with a fuse so arranged as to explode by means of an electric current or by contact with the hull of an enemy's ship. It is fastened on the end of a spar or outrigger, which may be attached to the bows of a small steamer built on purpose, may be protruded under water from a properly fitted vessel, or may be carried on a spar projecting from the stem or the side of an ordinary man-of-war. The general leaning seems now to be in favor of automobile torpedoes projected from the bows or side of specially constructed vessels of great speed. Stationary torpedoes, or submarine mines, placed in channels or harbors to prevent the approach of an enemy's vessels, usually consist of a strong water-tight metal case containing an efficient explosive, and having fuses to explode the charge on contact, or being connected by electric wires with the shore and fired at the pleasure of the operator. A vast deal of study and expense has been devoted to the perfection of torpedoes, and almost all governments now have schools for the instruction of naval and army officers in torpedo-warfare. See *torpedo-school*.

Sims-Edison Torpedo.

In this the torpedo *a* is carried by a float *b*, with indicators *c* which, when elevated as indicated in full outline, show its position. The propeller *e* and rudder *d* are each operated by an electric current sent through the cable *g*, the steering being performed from the torpedo-station and guided by observation of the indicators; *f* is the motor; *h*, explosive charge; *i*, firing mechanism; *j*, sharp steel blade for severing cables, ropes, or other obstructions. The torpedo may be used by war-vessels, as well as from land-stations, traveling by its own power about 100 feet ahead of the ship, to which it is attached by electric snap-cables. When released it may proceed, at full speed, guided by the pilot, in the direction desired. When passing under an obstruction, such as floating timber, etc., the indicators are pressed backward, as shown in dotted outline, and automatically resume their position after the obstruction is passed.

4. Hence, some other explosive agent. Specifically—(*a*) *Milit.*, a shell buried in the path of a storming party, having a percussion or friction device, or an electrical arrangement which explodes the charge when the ground over the torpedo is trod on. (*b*) A danger-signal consisting of a detonating cartridge laid on a rail of a railway and exploded by the wheels of a passing locomotive. (*c*) A small quantity of an explosive wrapped up with a number of small pebbles in a piece of tissue-paper, and exploded by being thrown on the ground or against some hard surface, for the amusement of children. (*d*) A cartridge of gunpowder, dynamite, nitroglycerin, etc., exploded in an oil-well to start the flow of oil, or in the vicinity of a school of fish to destroy great numbers of them, and for other purposes.



5. In *med.*, narcosis; stupor. [Rare.]—**Brennan torpedo**, a locomotive torpedo designed chiefly for the defense of harbors and rivers. It is propelled by the rapid unwinding (by means of an engine external to the torpedo) of two fine steel wires wound about drums within the torpedo, which are connected with two propeller-shafts. It can be steered by the operator, and is under his control until it strikes the enemy.—**Howell torpedo**, an automobile torpedo used in the United States navy. It is propelled by a fly-wheel weighing about 100 pounds, which is made to revolve at a high rate of speed just before the torpedo is discharged.

★**torpedo** (tôr-pē′dō), *v.* [< *torpedo*, *n.*] **I.** *trans.* To attack with torpedoes; explode a torpedo under or in.

II. *intrans.* To use or explode torpedoes.

torpedo-anchor (tôr-pē′dō-ang″kor), *n.* An anchor of any form for securing a submarine tor-
★pedo in position.

torpedo-boat (tôr-pē′dō-bōt), *n.* *Naut.*, a boat specially designed (or used) for carrying or

United States Torpedo-boat "Cushing."

discharging torpedoes; specifically, a steamer of small size and high speed designed for this use exclusively.—**Torpedo-boat catcher**, or **torpedo-gunboat**, a war-vessel of considerable size, but smaller than a cruiser, designed to overtake and destroy torpedo-boats. Vessels of this type have generally failed to attain the necessary speed.—**Torpedo-boat destroyer**, a war-vessel somewhat larger than the typical torpedo-boat but smaller than the torpedo-boat catcher, having such speed and armament as to be able to overtake and destroy torpedo-boats. These vessels have attained a very high rate of speed. They are practically "magnified torpedo-boats," capable of acting either as sea-going torpedo-boats or as destroyers.

torpedo-boom (tôr-pē′dō-böm), *n.* A spar for carrying a torpedo, either projected from a boat or vessel, or anchored to the bed of a channel.

torpedo-catcher (tôr-pē′dō-kach″ėr), *n.* Same as *torpedo-boat catcher*. See *torpedo-boat*.

torpedo-director (tôr-pē′dō-di-rek″tọr), *n.* An instrument for aiming a torpedo-tube. It is placed at some distance from the tube, and consists essentially of a graduated arc with devices which, when properly adjusted for the direction of the tube, the speed of the torpedo, and the speed of both the vessel and the enemy, give the proper line of sight for discharge.

torpedoist (tôr-pē′dọ-ist), *n.* [< *torpedo* + *-ist.*] One who uses or who advocates the use of torpedoes. [Recent.]

torpedo-net (tôr-pē′dō-net), *n.* A network of steel or iron wire hung around a ship and boomed off by spars to intercept torpedoes or torpedo-boats. When not in use it is stopped up alongside the ship.

torpedo-netting (tôr-pē′dō-net″ing), *n.* Same as *torpedo-net*.

torpedo-officer (tôr-pē′dō-of″i-sėr), *n.* One of the line officers of a man-of-war whose special duty it is to supervise and care for the torpedoes and their fittings.

torpedo-school (tôr-pē′dō-skōl), *n.* A government school for teaching officers and enlisted men of the army and navy the construction and use of torpedoes. In the United States a torpedo-school for the navy has been established at Newport, Rhode Island, and for the army at Willett's Point, New York.

torpedo-spar (tôr-pē′dō-spär), *n.* A wooden or iron spar projecting from the bows or side of a steamer, and on the end of which a torpedo is carried.

torpedo-tube (tôr-pē′dō-tūb), *n.* Same as *launching-tube*.

torpelnesst, *n.* [ME.; as *torple* + *-ness.*] Instability.

torpent (tôr′pent), *a.* and *n.* [< L. *torpen(t-)s*, ppr. of *torpere*, benumb. Cf. *torpid.*] **I.** *a.* Benumbed; numb; incapable of activity or sensibility; torpid; dull; dim. [Rare.]

II. *n.* A medicine that diminishes the exertion of the irritative motions. *Imp. Dict.* [Rare.]

torpescence (tôr-pes′ens), *n.* [< *torpescen(t)* + *-ce.*] The state of being torpescent; the quality of becoming torpent; torpidity; numbness; insensibility. [Rare.]

torpescent (tôr-pes′ent), *a.* [< L. *torpescen(t-)s*, ppr. of *torpescere*, grow numb or stiff, inceptive of *torpere*, be numb: see *torpent.*] Becoming torpent; growing torpid or benumbed. [Rare.]

> Of gold tenacious, their *torpescent* soul
> Clenches their coin, and what electral fire
> Shall solve the frosty gripe, and bid it flow?
> *Shenstone*, Economy, i.

torpid (tôr′pid), *a.* and *n.* [< L. *torpidus*, benumbed, torpid, < *torpere*, be numb, stiff, or torpid.] **I.** *a.* **1.** Benumbed; insensible; inactive.

> November dark
> Checks vegetation in the *torpid* plant
> Expos'd to his cold breath.
> *Cowper*, Task, iii. 468.

2. Specifically, dormant, as an animal in hibernation or estivation, when it passes its time in sleep: as, a *torpid* snake.—**3.** Figuratively, dull; sluggish; apathetic.

> Now to the church behold the mourners come,
> Sedately *torpid* and devoutly dumb.
> *Crabbe*, Works, I. 16.

> The love of children had never been quickened in Hepzibah's heart, and was now *torpid*, if not extinct.
> *Hawthorne*, Seven Gables, ii.

4. Pertaining to the torpids, or Lent boat-races at Oxford. See II. [Oxford slang.]

> The *Torpid* Races last six days.
> *Dickens's Dict. Oxford*, p. 18.

II. *n.* **1.** A second-class racing-boat at Oxford, corresponding to the *slogger* of Cambridge; also, one of the crew of such a boat. [Oxford slang.]

> The *torpids* being filled with the refuse of the rowing-men—generally awkward or very young oarsmen.
> *T. Hughes*, Tom Brown at Oxford, II. iv.

2. *pl.* The Lent boat-races at Oxford. [Oxford slang.]

torpidity (tôr-pid′i-ti), *n.* [< *torpid* + *-ity.*] **1.** Insensibility numbness; torpor; apathy.—**2.** In *zoöl.*, a dormant state in which no food is taken; the condition of an animal in hibernation or estivation, when it passes its time in the winter or summer sleep; dormancy.—**3.** Dullness; sluggishness; stupidity.

> Genius, likely to be lost in obscurity, or chilled to *torpidity* in the cold atmosphere of extreme indigence.
> *V. Knox*, Grammar Schools.

torpidly (tôr′pid-li), *adv.* In a torpid manner; in consequence of numbness, insensibility, or apathy; sluggishly; slowly; stupidly.

torpidness (tôr′pid-nes), *n.* Torpidity; torpor.

> The exercise of this faculty . . . keeps it from rust and *torpidness*. *Sir M. Hale*, Orig. of Mankind, p. 3.

torpify (tôr′pi-fī), *v. t.*; pret. and pp. *torpified*, ppr. *torpifying*. [< L. *torpefacere*, make numb, < *torpere*, be numb, + *facere*, make (see *-fy*).] To make torpid; stupefy; numb; blunt.

> They [sermons] are not harmless if they *torpify* the understanding. *Southey*, Doctor, xxvii.

torpitude (tôr′pi-tūd), *n.* [Irreg., < *torpi(d)* + *-tude.*] Torpor; torpidity; dormancy, as of animals. See *torpidity*, 2.

> Able to exist in a kind of *torpitude* or sleeping state without any food. *Derham*, Physico-Theol., viii. 5.

torplet, *v. i.* [ME. *torplen*; origin obscure. Cf. *torfel.* Cf. *topple.* Hence *torpelness.*] To fall headlong; topple.

> The thet nappeth upon helle brerde, he *torpleth* ofte al in er he lest wene. *Ancren Riwle*, p. 324.

torpor (tôr′pọr), *n.* [= F. *torpeur* = Sp. Pg. *torpor* = It. *torpore*, < L. *torpor*, numbness, < *torpere*, be numb or torpid: see *torpent*, *torpid.*] **1.** Loss of motion or sensibility; numbness or inactivity of mind or body; torpidity; torpidness; dormancy; apathy; stupor: as, the *torpor* of a hibernating animal; the *torpor* of intoxication or of grief.

> It was some time before he [Rip Van Winkle] could get into the regular track of gossip, or could be made to comprehend the strange events that had taken place during his *torpor*. *Irving*, Sketch-Book, p. 64.

2. Dullness; sluggishness; apathy; stupidity.

The same *torpor*, as regarded the capacity for intellectual effort, accompanied me home.
Hawthorne, Scarlet Letter, Int., p. 39.

torporific (tôr-pō-rif′ik), *a.* [< L. *torpor*, numbness, + *facere*, make (see *-fic*).] Producing torpor; torpifying; stupefying.

torquate (tôr′kwāt), *a.* [< L. *torquatus*, wearing a neck-chain, < *torques*, a neck-chain: see *torque*.] In *zoöl.*, ringed about the neck; collared, as with a color, or by the peculiar texture, etc., of hair or feathers about the neck.

torquated (tôr′kwā-ted), *a.* [< *torquate* + *-ed*[2].] 1. Having or wearing a torque.—2. In *zoöl.*, same as *torquate*.

Torquatella (tôr-kwą-tel′ą̈), *n.* [NL., dim. of *torquatus*, adorned with a neck-chain: see *torquate*.] The typical genus of *Torquatellidæ*, having a plicate and extensile membranous collar, and the mouth with a tongue-like valve or velum. *T. typica* inhabits salt water.

Torquatellidæ (tôr-kwą-tel′i-dē), *n. pl.* [NL., < *Torquatella* + *-idæ*.] A family of peritrichous ciliate infusorians, typified by the genus *Torquatella*. These animalcules are free-swimming, illoricate, and more or less ovate; the anterior ciliary wreath is replaced by a membranous extensile and contractile collar, ★which is perforated centrally by the oral aperture.

torque (tôrk), *n.* [Also *torc;* = It. *torque* = *torc*, < L. *torques*, *torquis*, a twisted metal neck-ring, a necklace, a collar, < *torquere*, twist: see *tort*.] 1. A twisted ornament forming a necklace or

Torque, with manner of wearing it, from sculptures on the sarcophagus of Vigna Amendola, Capitoline Museum.

collar for the neck, particularly one worn by uncivilized people, and of such a make as to retain its rigidity and circular form. Such a collar was considered a characteristic attribute of the ancient Gauls. Also *torques*.

They [the Gauls] wore collars and *torques* of gold, necklaces, and bracelets, and strings of brightly-coloured beads, made of glass or of a material like the Egyptian porcelain. *C. Elton*, Origins of Eng. Hist., p. 115.

The Anglo-Saxons habitually wore upon their arms twisted bracelets or *torques*, or, in their stead, a number of simple bracelets. *Encyc. Brit.*, VI. 465.

2. In *mech.*, the moment of a system-force applied so as to twist anything, as a shaft in machinery.

The *torque*, or turning moment, is, in a series dynamo, both when used as a generator and when used as a motor, very nearly proportional to the current.
S. P. Thompson, Dynamo-Electric Machinery, p. 45.

torqued (tôrkt), *a.* [< OF. *torquer*, twist, < L. *torquere*, twist (see *torque*), + *-ed*[2].] 1. Twisted; convoluted.

On this West shore we found a dead fish floating, which had in his nose a horne streight and *torquet*, of length two yards lacking two ynches. *Hakluyt's Voyages*, III. 35.

2. Twisted like a rope: said of metal-work.

A pair of ear-rings of base silver, the large *torqued* circles of which were closed by a sort of hook and eye.
Archæologia, XXXVII. 102.

3. In *her.*, same as *targant*.

torquened (tôr′kend), *a.* [Cf. *torqued, turken.*] In *her.*, same as *targant*.

A Dolphin haurient torqued.

torques (tôr′kwēz), *n.* [L.: see *torque*.] 1. Same as *torque*, 1.—2. In *zoöl.*, any collar or ring around the neck, produced by the color, texture, etc., of the pelage, plumage, or integument.

torquet†, *a.* An obsolete form of *torqued*.

torquis†, *n.* [L.: see *torque*.] A torque.

You have noe lesse surpris'd then oblig'd mee by your account of the *Torquis*, . . . the most ancient and most akin to it of all that I have seen being a chaine of the same metall of about six hundred yeare old, taken out of Edward the Confessors Monument at Westminster.
Samuel Pepys (Ellis's Lit. Letters, p. 211).

torreador, *n.* See *toreador*.

torrefaction (tor-ē-fak′shon), *n.* [< F. *torréfaction*, < L. *torrefacere*, dry by heat: see *torrefy*.] The act or operation of torrefying; the state of being torrefied.

Here was not scorching and blistering, but a vehement and full *torrefaction*. *Bp. Hall*, Sermons, xxxviii.

torrefy (tor′ē-fī), *v. t.*; pret. and pp. *torrefied*, ppr. *torrefying*. [Also *torrify;* = F. *torréfier* = It. **torrefare*, < L. *torrefacere*, dry by heat, < *torrere*, parch, roast, + *facere*, make.] To dry or parch with heat; roast.

Things become, by a sooty or fuliginous matter proceeding from the sulphur of bodies, *torrified*.
Sir T. Browne, Vulg. Err., vi. 12.

Bread . . . toasted hard or *torrefied*.
Quain, Med. Dict., p. 354.

Simply *torrified* and bruised, they [seeds of *Theobroma Cacao*] constitute the cocoa of the shops.
Ure, Dict., I. 569.

Specifically—(*a*) In *metal.*, to roast or scorch, as metallic ores. (*b*) In *phar.*, to dry or parch, as drugs, on a metallic plate till they become friable or are reduced to any state desired.

torrent (tor′ent), *a.* and *n.* [< F. *torrent* = Pr. *torrent* = Sp. Pg. It. *torrente*, a torrent; < L. *torren(t-)s*, burning, scorching, of a stream, boiling, roaring, rushing, and hence, as a noun, a rushing stream (not, as some explain it, lit. a stream of water that 'dries up' in the heat of summer), ppr. of *torrere*, dry by heat, parch, roast (cf. *terra* for **tersa*, 'dry land'), = Gr. *τέρσεσθαι*, become dry, = Goth. *thairsan*, be dry; cf. *thaursus*, dry, *thaurstei*, etc., thirst, = Skt. √ *tarsh*, thirst: see *thirst*.] **I.** *a.* Rushing in a stream. [Rare.]

Fierce Phlegethon,
Whose waves of *torrent* fire inflame with rage.
Milton, P. L., ii. 581.

II. *n.* 1. A rushing stream, as of water or lava; a stream flowing rapidly and with violence, as down a steep ravine.

And so firste we come to *Torrens* Cedron, which in somer tyme is drye. *Sir R. Guylforde*, Pylgrymage, p. 31.

The *torrent* roar'd, and we did buffet it
With lusty sinews. *Shak.*, J. C., i. 2. 107.

The ghastly *torrent* mingles its far roar
With the breeze. *Shelley*, Alastor.

2. Figuratively, a violent or overwhelming flow; a flood: as, a *torrent* of abusive words.

I know at this time a celebrated toast, whom I allow to be one of the most agreeable of her sex, that in the presence of her admirers will give a *torrent* of kisses to her cat. *Addison*, Tatler, No. 121.

Erasmus, that great injured name, . . .
Stemm'd the wild *torrent* of a barbarous age.
Pope, Essay on Criticism, l. 695.

torrent-bow (tor′ent-bō), *n.* A bow or arch of rainbow-like or prismatic colors formed by the refraction and reflection of rays of light from the spray of a torrent; an iris.

From those four jets four currents in one swell
Across the mountain stream'd below
In misty folds that, floating as they fell,
Lit up a *torrent-bow*. *Tennyson*, Palace of Art.

torrent-duck (tor′ent-duk), *n.* A duck-like merganser of the genus *Merganetta:* so called

Torrent-duck (*Merganetta armata*), adult male.

from the torrents of the streams which they ★inhabit in the Andes from Colombia to Chili.

torrential (to-ren′shal), *a.* [= F. *torrentiel* = Sp. *torrencial;* as *torrent* + *-i-al*.] 1. Pertaining to or resembling a torrent; of the nature of a torrent: as, *torrential* rains.

The greater magnitude and *torrential* character of the rivers of that [glacial] period were no doubt due to the melting during summer of great masses of snow and ice.
J. Croll, Climate and Cosmology, p. 116.

2. Produced by the agency of rapid streams, mountain torrents, and the like.

The äsar of Sweden are merely the denuded and partially re-arranged portions of old *torrential* gravel and sand, and morainic debris. *J. Geikie*, Great Ice Age, xxvii.

3. Figuratively, fluent and copious; voluble; overwhelming.

The poetasters [of the Russian literary world] poured forth their feelings with *torrential* recklessness.
D. M. Wallace, Russia, p. 396.

He could woo, he was a *torrential* wooer.
G. Meredith, The Egoist, xlvii.

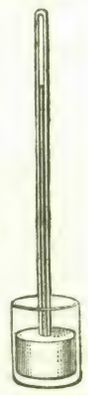
His *torrential* wealth of words. *The American*, VIII. 235.

torrentiality (to-ren-shi-al′i-ti), *n.* [< *torrential* + *-ity*.] The character of being torrential. [Rare.]

torrentially (to-ren′shal-i), *adv.* In a torrential manner; copiously; volubly.

torrentine (tor′en-tin), *a.* [= OF. *torrenten;* as *torrent* + *-ine*[1].] Same as *torrential*. *Imp. Dict.*

torret†, *n.* A variant of *toret*.



Torreya (tor′i-ą̈), *n.* [NL. (Arnott, 1838), named after Dr. John *Torrey*, 1796–1873, professor of botany at Columbia College, New York.] An untenable name for *Tumion*, a genus of conifers, of the family *Taxaceæ*, distinguished from the related genus *Taxus* by the complete or partial attachment of the seed to its surrounding capsule or berry, and by anther-cells being

Tumion taxifolium.
1, branch with male flowers; 2, branch with fruit; *a*, a male ament.

connate in a semicircle. It includes 4 species, 2 natives of China (see *kaya*) and Japan, the others American—*Tumion taxifolium* of Florida and *T. Californicum* (California nutmeg). They are evergreen trees, with flat, linear, two-ranked leaves resembling those of the yew, but longer, and with a larger ovoid drupaceous fruit, sometimes 1½ inches long. The Florida species, often called *Torrey-tree* or *savin*, is locally known as *stinking cedar*.

Torricellian (tor-i-sel′i-an or tor-i-chel′i-an), *a.* [< *Torricelli* (see def.) + *-an*.] Pertaining to Evangelista Torricelli, an Italian physicist and mathematician (1608–47), who, in 1643, discovered the principle on which the barometer is constructed, by means of an experiment called from him the *Torricellian experiment*. This experiment consisted in filling with mercury a glass tube closed at one end and then inverting it; the open end was then brought under the surface of mercury in a vessel, when the column of mercury in the tube was observed to descend till it stood at a height equal to about 30 inches above the level of the mercury in the vessel, leaving a vacuum at the top, between the upper extremity of the column and that of the tube. This experiment led to the discovery that the column of mercury in the tube is supported by the pressure of the atmosphere acting on the surface of the mercury in the vessel, and that this column is an exact counterbalance to the atmospheric pressure. See *barometer*.—**Torricellian tube**, a glass tube 30 or more inches in length, open at one end and hermetically sealed at the other, such as is used in the barometer.—**Torricellian vacuum**, a vacuum such as that produced by filling a barometer-tube with mercury, as in the Torricellian experiment; the vacuum above the mercurial column in the barometer.

Apparatus for Torricellian Experiment.

torrid (tor′id), *a.* [< F. *torride* = Pr. *torrid* = Sp. *tórrido* = Pg. It. *torrido*, < L. *torridus*, dry with heat, parched, torrid, < *torrere*, dry by heat, parch: see *torrent*.] 1. Parched and dry with heat, especially of the sun; arid; sultry; hot; specifically, noting a zone of the earth's surface.

My marrow melts, my fainting spirits fry,
In th' *torrid* zone of thy meridian eye.
Quarles, Emblems, v. 15.

Through *torrid* tracts with fainting steps they go.
Goldsmith, Des. Vil., l. 343.

2. Burning; scorching; parching.

The brandish'd sword of God before them blazed,
Fierce as a comet; which with *torrid* heat,
And vapour as the Libyan air adust,
Began to parch that temperate clime.
Milton, P. L., xii. 634.

Torrid zone, in *geog.*, that part of the earth's surface which lies between the tropics: so named from the character of its climate. Taking the annual quantity of heat received from the sun per unit surface at the equator as 1,000, the relative quantities received by the torrid, temperate, and frigid zones are respectively 975, 757, and 454.

torridity (to-rid'i-ti), *n.* [< *torrid* + *-ity*.] The state of being torrid.

torridness (tor'id-nes), *n.* The state of being torrid; the state of being very hot or parched.

torrify, *v. t.* See *torrefy*.

torrit†, *a.* [ME., for **torred*, < *tor*[1] + *-ed*[2].] Like a hill; mountainous.

A tempest hym toke o the *torrit* ythes [waves],
That myche laburt the lede er he lond caght.
Destruction of Troy (E. E. T. S.), l. 13489.

torrock, *n.* Same as *tarrock*.

torrontes (to-ron'tes), *n.* [Sp. *torrontés* (?).] A variety of white grape grown in Spain.

Torrubia (to-rö'bi-ä), *n.* [NL. (Léveillé, 1861).] A genus of pyrenomycetous fungi, the species of which are now referred to *Cordyceps*. They are parasitic on insects.

White-grub Fungus (*Cordyceps Ravenelii*).

torsade (tôr-sād'), *n.* [< F. *torsade*, a twisted fringe, < *tors*, twisted: see *torse*.] A twisted or spiral molding, a twisted cord, or other ornament.

Some of them hold by the hand little children, who follow loiteringly, with their heads shaven, and on the crown a tuft of hair bound up and lengthened out with *torsades* of red wool. *Harper's Mag.*, LXXVIII. 753.

torsal[1] (tôr'sal), *n.* See *torsel*.

torsal[2] (tôr'sal), *a.* [< *torse*[1] + *-al*.] Pertaining to a torse.—**Torsal line**, in *geom.*, the line along which a plane touches a surface so that the remaining intersection of the surface with the plane is of an order less by only two than the order of the surface.

torse[1] (tôrs), *n.* [Formerly also *torce;* < OF. *torse*, a wreath, twist, wrench, < *tors*, < L. *torquere*, pp. *tortus*, twist: see *torch*[1], *tort*[1].] 1. In *her.*, a heraldic wreath. See *wreath*.

A very early example of the wreath or *torse* which supports the crest, consisting of a twisted cord of silk of two colours.
Trans. Hist. Soc. of Lancashire and Cheshire, N. S., p. 43.

2. [Cayley, 1871.] In *math.*, a developable. It is the envelop of a singly infinite series of straight lines, each coplanar with and therefore cutting the next. The locus of the plane of consecutive lines is the developable, considered as a degraded surface; the locus of the point of intersection of consecutive lines is a skew curve, called the *edge of regression*. It is a cuspidal line.

If it [the system] be such that each line intersects the consecutive line, then it is a developable or *torse*.
Encyc. Brit., X. 417.

torse[2] (tôrs), *n.* [< F. *torse*, < It. *torso:* see *torso*.] A torso.

Though wanting the head and the other extremities, if dug from a ruin the *torse* becomes inestimable.
Goldsmith, Polite Learning, iii.

torsel (tôr'sel), *n.* [Appar. < OF. **torselle*, dim. of *torse*, a wreath: see *torse*[1].] 1. A small twisted scroll; anything presenting a twisted form.—2. A plate or block of wood introduced in a wall of brickwork for the end of a joist or beam to rest on. Also, corruptly, *torsal*, *tossel*, *tassal*, *tassel*.

When you lay any timber on brickwork, as *torsels* for mantle trees to lie on, or lintels over windows, lay them in loam. *J. Moxon*, Mech. Exercises.

torshent (tôr'shent), *n.* [Origin obscure.] The youngest child and pet of a family. Also abbreviated *torsh*. [Local, U. S.]

torsibility (tôr-si-bil'i-ti), *n.* [< L. *torsus*, pp. of *torquere*, twist, + *-ible* + *-ity* (see *-bility*).] Capability of being twisted.

Torsibility of a body is measured in the simplest case—that of a rod or wire—in terms of the angle through which a unit of force, applied at the distance of 1 cm. from the axis of the rod or wire, can twist it. The resistance to torsion is the reciprocal of this angle.
A. Daniell, Prin. of Physics, p. 234.

torsion (tôr'shon), *n.* [Formerly also *tortion;* < F. *torsion* = Pr. *torsio* = Sp. *torsion* = Pg. *torsão* = It. *torzione*, < LL. *tortio(n-)*, *torsio(n-)*, a twisting, wringing, griping, torture, torment, < L. *torquere*, pp. *tortus*, twist, wring: see *tort*[1].] 1. The act or effect of twisting; a forcible strain of a solid body by which parallel planes are turned relatively to one another round an axis perpendicular to them. The word is also used, with less propriety, in pure geometry, to signify a similar distortion without any reference to resistance.

The force of *torsion* is proportional to the angle of *torsion*. *S. P. Thompson*, Elect. and Mag., p. 16.

2. A wringing or wrenching, as of pain; a griping; tormina. [Obsolete or archaic.]

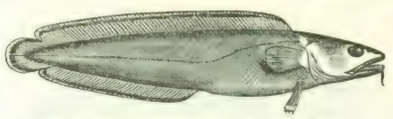
We find that [in effect] all purgers have in them a raw spirit, or wind; which is the principall cause of *tortion* in the stomach. *Bacon*, Nat. Hist., § 39.

Easeth the *torsion* of the small guts.
B. Jonson, Volpone, ii. 1.

3. In *surg.*, the twisting of the cut end of a small artery in a wound or after an operation, for the purpose of checking hemorrhage. The bleeding vessel is seized with a forceps, drawn out for about one fourth of an inch, and twisted round several times till it cannot untwist itself.—**Angle of torsion**, in *geom.*, the inclination to one another of two consecutive osculating planes to a non-plane curve.—**Coefficient of torsion**. See *coefficient*.—**Radius of torsion**. See *radius*.—**Torsion balance**, an instrument for measuring horizontal forces, consisting of an arm hung at its center of gravity from a wire, fiber of silk, or something of the kind. The horizontal force is so arranged that it shall tend to make the arm revolve and thus twist the wire, and is balanced by the elasticity of the wire and the force of gravity. Coulomb, the inventor of the balance (1736–1806), showed that the angle of torsion, or angle through which the arm is displaced from the position of equilibrium, is proportional to the force, or, in accurate mathematical language, to the twisting moment of the force.—**Torsion electrometer**, an electrometer containing a torsion balance as a part of it. So *torsion galvanometer*, etc.—**Torsion forceps**, a forceps for twisting the end of a divided artery to stop its bleeding.—**Torsion of the humerus**, a seeming twist of the shaft of the human humerus, which appears to have carried the line of the transverse axis of the condyles to an angle with the line of the transverse axis of the head of the bone. It is a deceptive appearance, due to the spiral course of the musculospiral nerve and superior profunda artery impressing a spiral groove upon the back of the bone. The idea was conceived to account for the relative position of the axes of the head and condyles.

torsional (tôr'shon-al), *a.* [< *torsion* + *-al*.] Pertaining to or consisting in torsion; of the nature of torsion; characterized by torsion.

Certain breakages of this class may . . . be accounted for by the action of a *torsional* ruptive force on rounding curves. *The Engineer*, LXIX. 492.



torsionally (tôr'shon-al-i), *adv.* With, by, or through torsion; with respect to torsion. *Nature*, XLI. 198.

torsionless (tôr'shon-les), *a.* [< *torsion* + *-less*.] Free from torsion; not subject to torsion.

The magnetometer *M* consists of a small circular mirror . . . with two short magnetic needles . . . attached to the back of it and suspended by a single approximately *torsionless* silk fibre. *Philos. Mag.*, 5th ser., XXVII. 274.

torsive (tôr'siv), *a.* [< L. *torsus*, pp. of *torquere*, twist (see *torsion*), + *-ive*.] In *bot.*, twisted spirally.

torsk (tôrsk), *n.* [Also, reduced, *tusk;* < Sw. Dan. *torsk* = Norw. *torsk*, *tosk* = Icel. *thorskr*, *thoskr* = LG. *dorsch*, > G. *dorsch*, a codfish, torsk, = LG. *dorsch*, > G. *dorsch*, haddock (cf. *dorsch*).] A gadoid fish, *Brosme brosme*, belonging to the subfamily *Brosminæ* of the cod family. It is found in great numbers about the Orkney and Shetland islands, where it constitutes an important article of trade. When salted and dried it is one of the most savory of stock-

Torsk (*Brosme brosme*), one ninth natural size.

fish. It varies from 18 to 30 inches in length, has a small head, a long tapering body, with long unbroken dorsal and anal fin, a rounded caudal fin, and a single barbule under the chin. The color is dingy-yellow above and white below. Also called *cusk* and *tusk*.

torso (tôr'sō), *n.* [Sometimes *torse* (< F.); = F. *torse*, a torso, < It. *torso*, a stalk, stump, hence bust, torso, = OF. *tros* = Pr. *tros* = Sp. *trozo*, stem, stump, prob. < OHG. *turso*, *torso*, stalk, stem, MHG. *torse*, *dorsche*, cabbage-stalk; cf. Gr. *θύρσος*, rod, staff: see *thyrsus*.] In *sculp.*, the trunk of a statue, without, or considered independently of, the head and limbs.—**Torso Belvedere**, a torso of a fine Greek statue of a seated Hercules, attributed to the school of Lysippus, and by some believed to be a copy of a work by that master. It is preserved in the Vatican Museum. See cut under *abdominal*.

tort[1] (tôrt), *n.* [= G. Dan. *tort*, < F. *tort* = Pr. *tort* = Sp. *tuerto* = It. *torto*, < ML. *tortum*, a wrong, neut. of L. *tortus*, wrung, twisted, pp. of *torquere*, turn, turn around, twist, wring, wrench, distort, rack, torment, torture. From the same L. verb are ult. E. *tort*[2] = *tart*[2], *tort*[3], *tort*[4], *torque*, *torsion*, *torture*, *torment*, etc. For the relation of *tort*, wrong, to *torquere*, twist, cf. E. *wrong* as related to *wring;* cf. also the Sc. *thrawn*.] 1†. Wrong; injustice; harm.

The Lyon there did with the Lambe consort,
And eke the Dove sate by the Faulcons side;
Ne each of other feared fraud or *tort*.
Spenser, F. Q., IV. viii. 31.

His own sins are guilty of this *tort* offered to the Son of God. *Bp. Hall*, Sermons, xxxviii.

2. In *law*, a wrong such as the law requires compensation for in damages; an infringement or privation of the private or civil rights of a person considered as a private person or an owner. The same act considered in its relation to the state may be a crime.

To constitute a *tort*, two things must concur—actual or legal damage to the plaintiff, and a wrongful act committed by the defendant. *Addison*.

Tort, as a word of art in the law of England and the United States, is the name of civil wrongs (not being merely breaches of contract) for which there is a remedy by action in courts of common law jurisdiction. It may be said to correspond approximately to the term "delict" in Roman law and the systems derived from it.
Encyc. Brit., XXIII. 454.

Action of tort, an action the cause or foundation of which is a wrong, as distinguished from an action on contract.—**Executor de son tort**. See *executor*.—**In tort**, by reason of tort; with reference to tort: as, suing *in tort*.—**Maritime tort**. See *maritime*.—**To count in tort**. See *count*[1].

tort[2]†, *n.* [< OF. *torte*, < ML. *torta*, a cake, tart: see *tart*[2].] A cake. Compare *tart*[2] and *torta*.

Tort of fyssh.

The *tortes* or cakes which they make of the grayne of Maizium wherof they make theyr breade.
R. Eden, tr. of Gonzalus Oviedus (First Books on America, [ed. Arber, p. 225).

tort[3]† (tôrt), *n.* [< L. *tortus*, a twisting, whirling, a wreath, < *torquere*, pp. *tortus*, twist: see *tort*[1]. Hence ult. *tortuous*, etc.] A twisting, wrenching, or racking; a griping. [Rare.]

The second sight are Wines, the best on earth; . . .
They 're Phisicall, and good t' expell all sorts
Of burning Feauers in their violent *torts*.
W. Lithgow, Travels, v.

tort[4]†, *n.* [< ME. *torte*, also *tortaye*, < OF. *torte*, < L. *tortus*, twisted: see *tort*[1]. Cf. *torch*[1].] A candle; a light.

That torches and *tortes* and preketes con make.
Babees Book (E. E. T. S.), p. 327.

Paris candles, torches, morters, *tortayes*, sizes, and smalle lightes are mentioned [in "Office of Chaundlerye," pp. 82, 83]. *Babees Book* (E. E. T. S.), p. 326, note.

tort[5]†, *a.* [A dial. var. of *tart*[1].] Tart; sharp.

The North Wilts horses and other stranger horses, when they come to drinke of the water of Chalke river, they will sniff and snort, it is so cold and *tort*.
MS. Aubrey's Wilts, p. 53. (*Halliwell.*)

tort[6] (tôrt), *a.* An erroneous form of *taut*, simulating *tort*[1].

To-morrow, and the sun shall brace anew
The slacken'd cord, that now sounds loose and damp;
To-morrow, and its livelier tone will sing
In *tort* vibration to the arrow's flight.
Southey, Thalaba, viii. 12.

Yet holds he them with *tortest* rein.
Emerson, The Initial Love.

tort[6]†, *prep.* A Middle English form of *toward*.

torta (tôr'tä), *n.* [Sp., lit. a cake: see *tort*[2], *tart*[2].] The flat circular heap of ore spread out on the floor of the patio in a cake about 50 feet in diameter and a few inches in thickness, ready for amalgamation in the so-called *patio process* (which see, under *process*).

torteau (tôr'tō), *n.*; pl. *torteaux* (-tōz). [Heraldic F., < OF. *torteau*, *tortel*, a round cake, a roundel, dim. of *torte*, a round cake: see *tort*[2].] In *her.*, a roundel gules.

tortey† (tôr'ti), *n.* [< OF. *torteau:* see *torteau*.] In *her.*, same as *torteau*.

tort-feasor (tôrt'fē'zor), *n.* In *law*, a wrongdoer; a trespasser; one who commits or has committed a tort.

torticollar (tôr-ti-kol'är), *a.* [< L. *tortus*, twisted, + *collum*, neck: see *collar*.] Having a twisted neck; wry-necked; affected with torticollis. *Coues*.

torticollis (tôr-ti-kol'is), *n.* [NL., < L. *tortus*, twisted, + *collum*, neck.] In *med.*, an affection in which the head is inclined toward one or the other shoulder while the neck is twisted so as to turn the chin in the opposite direction; stiff-neck; wry-neck. It may be temporary when resulting from muscular rheumatism, intermittent when due to spasm of the muscles of the neck, or permanent when caused by contraction of the sternoclidomastoid muscle of one side.

Sitting on the parapet, and twisting my neck round to see the object of my admiration, I generally left it with a *torticollis*. *Jefferson*, To Mme. De Tesse (Works, II. 102).

tortil (tôr'til), *n.* [Cf. *tortillé*.] A heraldic wreath: an inexact use. Also called *bourrelet*.

tortile (tôr'til), *a.* [< L. *tortilis*, twisted, twined or twining, < *torquere*, twist: see *tort*[1].] 1. Twisted; curved; bent.

A hundred torne y haffe schot with hem,
Under hes *tortyll* tree.
Robin Hood and the Potter (Child's Ballads, V. 28).

2. Specifically, in *bot.*, coiled like a rope: as, a *tortile* awn.

tortility (tôr-til'i-ti), *n.* [< *tortile* + *-ity.*] The state of being tortile or twisted.

tortilla (tōr-tē'lyä), *n.* [Sp., dim. of *torta*, a tart: see *tort*[2], *tart*[2].] A round cake; specifically, in Mexico, a large, round, thin cake prepared from maize. For this purpose it is first parboiled to cleanse and soften the grain, then crushed into a paste on a flat stone with a stone implement not unlike a rolling-pin, then worked with the hands into a kind of thin pancake, then baked, first on one side and then on the other, on a flat smooth plate of iron or earthenware, this baking being a sort of toasting carried just so far as not to brown the tortilla, which is then served up hot.

tortillé (tor-tē- yā'), *a.* [OF., pp. of *tortiller*, twist, < L. *torquere*, pp. *tortus*, twist: see *tort*[1], and cf. *tortil.*] In *her.*: (*a*) Same as *nowed.* (*b*) Same as *wreathed.*

tortillon (F. pron. tôr-tē- yôṅ'), *n.* In *charcoal-drawing*, a kind of paper stump, made of strips of paper rolled so as to form a point. *F. Fowler*, Charcoal Drawing, p. 12.

tortion† (tôr'shọn), *n.* An obsolete spelling of *torsion.*

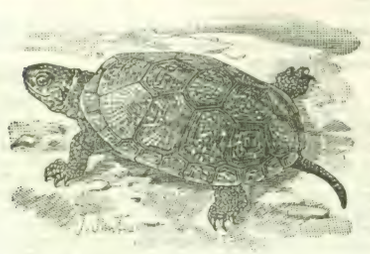
tortious (tôr'shus), *a.* [Formerly also *torteous;* a var. of *tortuous*[1].] 1†. Wicked; wrong; base.

Than the deuil . . . came vnto man in Paradise, & inticed him (oh, *torteouse* serpent!) to eat of the forbidden fruite. *Stubbes*, Anat. of Abuses (ed. Furnivall), I. 36.

2. In *law*, having the character of a tort.

It is as if a civil officer on land have process against one individual and through mistake arrest another; this arrest is wholly *tortious.*
Woolsey, Introd. to Inter. Law, § 200.

tortiously (tôr'shus-li), *adv.* In *law*, by tort or injury; injuriously.



tortive (tôr'tiv), *a.* [< L. *tortivus*, pressed or squeezed out, < *torquere*, pp. *tortus*, twist: see *tort*[1].] Twisted; wreathed.

As knots, by the conflux of meeting sap,
Infect the sound pine, and divert his grain
Tortive and errant from his course of growth.
Shak., T. and C., i. 3. 9.

tortlet†, *n.* An obsolete form of *turtle*[2].

tortness (tôrt'nes), *n.* The state of being tort or taut. See *tort*[4]. *Bailey*, 1727.

tortoise (tôr'tis or tôr'tus), *n.* [Early mod. E. also *tortoyse*, *tortesse;* < ME. *tortous*, *tortuce* (< AF. **tortuce* ?); ME. also *tortu*, < OF. *tortue*, *tortugue*, F. *tortue* = Pr. *tortuga*, *tartuga* = OSp. *tortuga*, *tartuga*, Sp. *tortuga* = Pg. *tartaruga* = OIt. *tartuga*, also *tartaruga*, *tarteruga*, *tarterucca*, It. *tartaruga* (ML. *tortuca*, *tartuga*), a tortoise, so named on account of its crooked feet, < L. *tortus*, twisted: see *tort*[1], and cf. *tortue*, *tortuous.* The termination seems to be conformed in E. to that of *porpoise*, and in Rom., vaguely, to that of L. *testudo*, tortoise (see *testudo*). The word has undergone extraordinary variations of form, the latest being that which appears in *tortle*, now *turtle:* see *turtle*[2].] 1. A turtle; any chelonian or testudinate; a member of the order *Chelonia* or *Testudinata* (see the technical terms). It is not known what species the name originally designated; probably a land-tortoise of southern Europe, as *Testudo græca.* There is a tendency to distinguish terrestrial chelonians from aquatic ones, the former as *tortoises*, the latter as *turtles;* yet *tortoise-shell* is fixed as the name of the commercial product of certain sea-turtles. (See *box-tortoise*, *land-tortoise*, *terrapin*, *turtle*[2], *mud-turtle*, *sea-turtle*[2].) Tortoises of some kind are found in most parts, and especially the warmer parts, of the world; the species are numerous—those of the land and of fresh waters much more so than the marine forms. See also cuts under *carapace*, *Chelonia*, *Chelonidæ*, *Chelydidæ*, *Cinixyinæ*, *Cinosternum*, *Cistudo*, *plastron*, *Pyxis*, *Testudo*, *Testudinata*, and *terrapin.*

Sandys, Travailes, p. 160.

2. A movable roof formerly used to protect the soldiers who worked a battering-ram. Sometimes it was formed by the soldiers holding their shields flat over their heads so as to overlap one another. See *testudo.*

Heroes tall
Dislodging pinnacle and parapet
Upon the *tortoise* creeping to the wall.
Tennyson, Fair Women.

Alligator-tortoise. Same as *alligator-terrapin.*—**Elephant tortoise**, the giant *Testudo elephantopus* of the Galapagos, the largest living representative of the *Testudinidæ:* sometimes also called *Indian tortoise* and *elephant terrapin.* See cut under *Testudinata.*—**Sculptured tortoise.** See *sculptured.*—**Soft-shelled** or **soft tortoises.** See *soft-shelled.*—**Spotted tortoise**, a common tortoise of the United States, *Chelopus guttatus.*—**Wood-tortoise**, ★ *Chelopus insculptus* of the United States.

tortoise-beetle (tôr'tis-bē″tl), *n.* A leaf-beetle of the family *Cassididæ:* so called from the projecting elytra and prothorax, which suggest the carapace of a tortoise. This resemblance is heightened in some cases by the coloration. Several species in the United States feed upon the sweet potato, as *Deloyala clavata.* See also cuts under *Cassida*, *Coptocycla*, *Deloyala*, and *Physonota.*—**Spiny tortoise-beetles**, the *Hispidæ* or *Hispinæ.* See cut under *Hispa.*

tortoise-flower (tôr'tis-flou″ėr), *n.* A plant of the genus *Chelone.*

tortoise-headed (tôr'tis-hed″ed), *a.* Having a head like or suggesting a tortoise's: specifically noting the ringed sea-serpent, *Emydocephalus annulatus.*

tortoise-plant (tôr'tis-plant), *n.* A South African plant, *Testudinaria Elephantipes*, having a bulky, woody rootstock above the ground, the exterior of which by cracking gains the appearance of a tortoise-shell. This body, from having been used as food, is also called *Hottentot's-bread*, and its appearance before it is full-grown suggests the name *elephant's-foot.* See *Testudinaria.*

tortoise-rotifer (tôr'tis-rō″ti-fėr), *n.* A wheel-★animalcule of the family *Brachionidæ.*

tortoise-shell (tôr'tis-shel), *n.* and *a.* **I.** *n.* 1. The outer shell, or one of the scutes or scales, of certain sea-turtles or marine chelonians, especially of *Eretmochelys imbricata*, the hawk's-bill turtle, or caret, a species which inhabits tropical seas. These horny scales or plates, which cover the carapace in regular and symmetrical pieces, are a specially thickened epidermis, of beautifully mottled and clouded coloration, and of quite different character from the underlying bones of the shell. Similar epidermal scutes cover most tortoises or turtles, but *tortoise-shell* is mainly restricted to such as have commercial value. These scales are extensively used in the manufacture of combs, snuff-boxes, etc., and in inlaying and other ornamental work. They become very plastic when heated, and when cold retain with sharpness any form they may be molded to in the heated state. Pieces can also be welded together under the pressure of hot irons. The quality of tortoise-shell depends mainly on the thickness and size of the scales, and in a smaller degree upon the clearness and brilliancy of the colors. The best tortoise-shell is that obtained in the Indian archipelago. It is now largely imitated in horn, and in artificial compounds of much less cost. See cuts under *carapace*, *Chelonia*, *Eretmochelys*, and *plastron.*

2. A tortoise-shell cat. See II., 2.—3. With a qualifying word, one of certain nymphalid butterflies: so called from the tortoise-shell-like maculation. *Aglais milberti* is the nettle tortoise-shell, and *Vanessa urticæ* is the small tortoise-shell.

II. *a.* 1. Made of tortoise-shell.

They only fished up the clerk's *tortoise-shell* spectacles.
Barham, Ingoldsby Legends, II. 44.

Pretty dears! they used to carry ivory or *tortoiseshell* combs, curiously ornamented, with them, and comb their precious wigs in public.
J. Ashton, Social Life in Reign of Queen Anne, I. 144.

2. Mottled with black and yellow: as, a *tortoise-shell* cat or butterfly. The cat of this name is a mere color-variety of the domestic animal; the insect is a vanessoid, as *Vanessa urticæ* or *V. polychlora.*—**Tortoise-shell goose.** See *goose.*—**Tortoise-shell tiger.** See *tiger.*—**Tortoise-shell ware**, a fine pottery mottled with oxid of copper and manganese so that the color penetrates the glaze, producing a certain resemblance to the marking of tortoise-shell.

tortoise-shelled (tôr'tis-sheld), *a.* Same as *tortoise-shell.*

A *tortoise-shelled* butterfly. *S. Judd*, Margaret, ii. 1.

tortoise-wood (tôr'tis-wụd), *n.* A variety of zebra-wood.

tortoust, *n.* A Middle English form of *tortoise.*

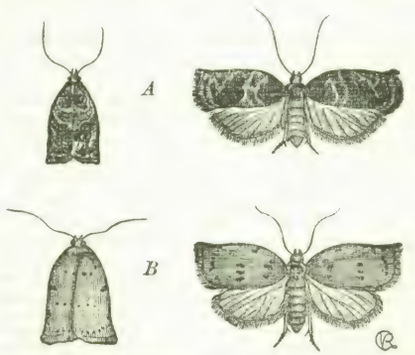
tortozon (tôr-tō-thōn'), *n.* [Sp.] A large Spanish grape.

Tortrices (tôr-trī'sēz), *n. pl.* [NL. (Linnæus, 1758), pl. of *Tortrix*, q. v.] The *Tortricidæ* as a superfamily of heterocerous lepidopterous ★insects, including those *Microlepidoptera* whose larvæ are known as *leaf-rollers.* The group has not been generally adopted, most lepidopterists preferring to consider these moths as forming simply a family.

tortricid (tôr'tri-sid), *a.* and *n.* **I.** *a.* 1. In *entom.*, of or belonging to the lepidopterous family *Tortricidæ*, or having their characters.—2. In *herpet.*, belonging to the ophidian family *Tortricidæ*, or having their characters.

II. *n.* 1. In *entom.*, a moth of the family *Tortricidæ.*—2. In *herpet.*, a serpent of the family *Tortricidæ;* a cylinder-snake.

Tortricidæ (tôr-tris'i-dē), *n. pl.* [NL. (Stephens, 1829), < *Tortrix* (*Tortric-*) + *-idæ.*] 1. In *entom.*, a large and wide-spread family of *Microlepidoptera;* the leaf-roller moths. They are stout-bodied, with wide oblong wings, the costal edge of the fore wings being often sinuate; the antennæ are simple, or finely ciliate and very rarely pectinate; the palpi are erect or porrect and sometimes two or three times as long as the head, which is rough with erect scales; there is a tuft of scales at the end of the abdomen; and the legs are of medium length. Most of the larvæ are leaf-rollers, folding or rolling over a part of a leaf and lining the interior with silk; others feed on buds, or live in seeds and fruits, or bore in the stems of plants. A common leaf-roller is *Archips rosaceana* of the United States. *Archips rileyana* is another leaf-roller on hickory and walnut. A seed-feeder is *Clydonopteron tecomæ*, really a pyralid, but formerly considered a tortricid; the cosmopolitan codling-moth, *Carpocapsa pomonella*, is an example of the fruit-borers; the spruce bud-worm, *Tortrix fumiferana*, represents the bud-feeders; and the pine-twig borers of the genus *Evetria* represent another habit. *Eucosma scudderiana* has been reared from galls in the stems of goldenrod. The principal subfamilies are *Tortricinæ*, *Conchylinæ*, and *Grapholithinæ.* Nearly 500 species are known in the United States, and 650 in Europe. See cuts under *Tortrix* and *leaf-roller.*



2. In *herpet.*, a family of cylinder-snakes, or tortricoid ophidians, typified by the genus *Tortrix*, having rudimentary hind limbs and a very short conic tail. The genera are *Tortrix* (or *Ilysia*) and *Cylindrophis.*

tortricine (tôr'tri-sin), *a.* and *n.* Same as *tortricid.*

tortricoid (tôr'tri-koid), *a.* In *herpet.*, having the characters of the *Tortricoidea.*

Tortricoidea (tôr-tri-koi'dē-ä), *n. pl.* [NL., < *Tortrix* (*Tortric-*) + *-oidea.*] The cylinder-snakes, or tortricoid ophidians, a suborder of *Ophidia* containing small angiostomatous snakes, with or without anal spurs, with an ectopterygoid bone, a coronoid, and a free horizontal maxillary. There are two families, *Tortricidæ* and *Uropeltidæ* (or *Rhinophidæ*).

Tortrix (tôr'triks), *n.* [NL. (Brongniart, 1800), fem. of L. *tortor*, a tormentor, a torturer, lit. 'twister,' < *torquere*, pp. *tortus*, twist: see *tort*[1].] 1. In *herpet.*: (*a*) The typical genus of *Tortricidæ:* same as *Ilysia.* *T. scytale* is the coral-snake of Demerara. (*b*) [*l. c.*] A snake of this genus.—2. In *entom.*: (*a*) A genus of moths, typical of the family *Tortricidæ.* *Treitschke*, 1829. (*b*) [*l. c.*] Any moth of the family *Tortricidæ:* as, the cherry-tree *tortrix*, *Archips cerasivorana.*

A, Tortrix (*Archips*) *infumatana*; *B, T.* (*Archips*) *rileyana.*

tortu†, **tortuce**†, *n.* Middle English forms of *tortoise.*

tortue†, *a.* [ME., < OF. *tortu*, twisted, crooked, < *tordre*, twist, bend: see *tort*[1], and cf. *tortuous*[1].] Twisted; tortuous.

He bar a dragon that was not right grete, and the taile was a fadome and an half of lengthe *tortue.*
Merlin (E. E. T. S.), ii. 206.

tortulous (tôr'tụ-lus), *a.* [< L. *tortula*, dim. of *torta*, a twist, something twisted.] Twisted; in *zoöl.*, moniliform; resembling a string of beads.

tortuose (tôr'tụ-ōs), *a.* [< L. *tortuosus*, winding: see *tortuous*[1].] In *bot.*, irregularly bending or turning in different directions.—**Tortuose stem**, a stem that is bent in the manner of a flexuose stem, ★but less angularly, as in *Cakile maritima.*

tortuosity (tôr-tụ-os'i-ti), *n.*; pl. *tortuosities* (-tiz). [< F. *tortuosité* = Pr. *tortuositat* = Sp. *tortuosidad* = Pg. *tortuosidade* = It. *tortuosità*, < L. *tortuosita(t-)s*, crookedness, < *tortuosus*, crooked: see *tortuous*[1].] 1. The state or attribute of being tortuous; tortuousness; crookedness.

As for the *tortuosity* of the body and branches, it maketh nothing to the purpose and point in hand.
Holland, tr. of Plutarch, p. 562.

2. A twisting or winding; a bend; a sinuosity.

Could it be expected . . . that a man so known for impenetrable reticence . . . would all at once frankly unlock his private citadel to an English Editor and a German Hofrath, and not rather deceptively inlock both Editor and Hofrath in the labyrinthic *tortuosities* and covered-ways of said citadel? *Carlyle*, Sartor Resartus, ii. 10.

tortuous[1] (tôr′tū-us), *a.* [< ME. *tortuous, tortuos*, < OF. *tortuos*, F. *tortueux* = Pr. *tortuos* = Sp. Pg. It. *tortuoso*, < L. *tortuosus*, full of twists or turns, winding, tortuous, < *tortus*, a twisting, winding, whirling, a wreath: see *tort*[3].] 1. Full of twists or turns; winding; hence, crooked; zigzag. Geometers apply the word specifically to curves of which no two successive portions lie in one plane.

The dragon had grete significacion in hymself, . . . the taile that was so *tortuouse* betokened the grete treson of the peple. *Merlin* (E. E. T. S.), iii. 393.

An antiquated Manor-house of Elizabethan architecture, with its . . . *tortuous* chimneys rising above the surrounding trees. *Barham*, Ingoldsby Legends, Pref., p. vi.

2. Oblique: applied in astrology to the six zodiacal signs which ascend most rapidly and obliquely.

Thise same signes fro the heved of Capricorne unto the ende of Geminis ben cleped *tortuos* signes or kroked signes, for they arisen embelif on oure orisonte.
Chaucer, Astrolabe, ii. 28.

3. Figuratively, circuitous; devious; irregular; crooked: especially in a moral sense.

Augustus Cæsar was so little able to enter into any artificial forms or *tortuous* obscurities of ambitious rhetoric that he could not so much as understand them.
De Quincey, Style, i.

He came prepared, not only to smite the Netherlanders in the open field, but to cope with them in *tortuous* policy.
Motley, Dutch Republic, III. 373.

Tortuous curve. See *curve*. =**Syn. 1.** Sinuous, serpentine, curvilinear, circuitous, indirect, roundabout.

tortuous[2]†, *a.* An obsolete variant of *tortious*.

tortuously (tôr′tū-us-li), *adv.* In a tortuous or winding manner.

tortuousness (tôr′tū-us-nes), *n.* The state of being tortuous. *Bailey*, 1727.

torturable (tôr′tūr-a-bl), *a.* [< *torture* + *-able*.] Capable of being tortured. *Bailey*, 1731.

torturableness (tôr′tūr-a-bl-nes), *n.* The capacity for being tortured. *Bailey*, 1727.

torture (tôr′tūr), *n.* [< F. *torture* = Pr. Sp. Pg. It. *tortura*, torture, < LL. *tortura*, a twisting, wreathing, of bodily pain, a griping colic, ML. pain inflicted by judicial or ecclesiastical authority as a means of persuasion, torture, < L. *torquere*, pp. *tortus*, twist: see *tort*[1]. Cf. *torment*.] 1. The act of inflicting severe pain as a punishment, as a means of persuasion, or in revenge; specifically, the act of inflicting such pain under the orders of a court of justice, royal commission, ecclesiastical organization, or other legal or self-constituted judge or authority, especially as a supposed means of extorting the truth from an accused person or as a commutative punishment (also called specifically *judicial torture*); the pain so inflicted. The theory was that a guilty person could be made to confess, but an innocent person not, by this means. The infliction of torture upon alleged heretics was practised by ecclesiastical powers, especially in southern Europe, in the later middle ages and down to the eighteenth century, and its infliction upon captured enemies is a common practice among savage peoples.

Torture, which had always been declared illegal, and which had recently been declared illegal even by the servile judges of that age, was inflicted for the last time in England in the month of May, 1640.
Macaulay, Hist. Eng., i.

Torture, as a part of the punishment, may be regarded as including every kind of bodily or mental pain beyond what is necessary for the safe custody of the offender (with or without enforced labour) or the destruction of his life, — in the language of Bentham, an afflictive as opposed to a simple punishment. *Encyc. Brit.*, XXIII. 460.

2. In general, the act, operation, or process of inflicting excruciating pain, physical or mental. —3. Excruciating pain; extreme anguish of body or mind; agony; anguish; torment.

And that deep *torture* may be call'd a hell
When more is felt than one hath power to tell.
Shak, Lucrece, l. 1287.

I roll from place to place
T' avoid my *tortures*, to obtain relief,
But still am dogg'd and haunted with my grief.
Quarles, Emblems, iii. 3.

If thou dost slander her and *torture* me,
Never pray more. *Shak.*, Othello, iii. 3. 363.

A secret unrest
Tortured thee, brilliant and bold!
M. Arnold, Heine's Grave.

2. To punish with torture; put to the torture.

Men taken by their enemies were *tortured* to the point of death, but revived to be *tortured* again, and killed at last with every refinement of savage cruelty.
C. E. Norton, Church-building in Middle Ages, p. 164.

3. To wrest from the natural position or state; especially, in a figurative sense, to distort; pervert; torment.

This place had been *tortured* by interpreters and pulled to pieces by disputation. *Jer. Taylor.*

4†. To pull out; stretch; strain.

The bow *tortureth* the string continually, and thereby holdeth it in a continual trepidation.
Bacon, Nat. Hist., § 137.

Sp., etc., *tory*.] **I.** *n.*; pl. *tories* (-riz). 1†. Originally, an Irish robber or outlaw, one of a class noted for their outrages and savage cruelty.

That Irish Papists who had been licensed to depart this nation, and of late years have been transplanted into Spain, Flanders, and other foreign parts, have nevertheless returned into Ireland, occasioning the increase of *tories* and other lawless persons. *Irish State Papers*, 1566.

The frequent robberies, murders, and other notorious felonies committed by robbers, rapparees, and *tories* upon their keeping hath greatly discouraged the replanting of this kingdom [Ireland].
Laws of William III. (1695), quoted in Ribton-Turner's [Vagrants and Vagrancy, p. 396.

2†. Hence, one who causes terror; a hector; a bully.

And now I must leave the orb of Jupiter, and drop down a little lower to the sphere of Mars, who is termed a *tory* amongst the stars.
Bishop, Marrow of Astrology, p. 43. (*Halliwell.*)

3. [*cap.*] A member of one of the two great British political parties, opposed to the Whigs and later to the Liberals. The precursors of the Tories were the Cavaliers in the civil war period; after the Restoration (1660) the old Cavalier party became the Court party, opposed to the Country party, and to these the terms *Tory* and *Whig* were respectively applied by their opponents about 1679: the word was used in reproach, through a desire to identify the members of the Court party with the supporters of alleged papistic measures, in allusion to the Irish outlaws (see def. 1). The Tories supported hereditary divine right and opposed toleration of Dissenters, and after the Revolution of 1688 their radical wing was Jacobite. Later they upheld the authority of the crown (especially in the reign of George III.), and in general in later years they stood out for maintaining the existing order of things in church and state. They opposed the Reform Bill, and about the same time (1832) the name *Tory* began to be superseded by *Conservative*. (See *conservative*, 3.) The word *Tory*, however, is still in common use.

He who draws his pen for one party must expect to make enemies of the other. For wit and fool are consequents of Whig and *Tory;* and every man is a knave or an ass to the contrary side.
Dryden, Abs. and Achit., To the Reader.

There is hardly a whig in Ireland who would allow a potato and butter-milk to a reputed *tory*.
Swift, Letter, Sept. 11, 1725.

The *Tory* was originally an Irish robber, and the term was applied by Oates to the disbelievers in the Popish plot, was afterwards extended to the Irish Catholic friends of the Duke of York at the time of the Exclusion Bill, and soon became the designation of the whole body of his supporters. *Lecky*, Eng. in 18th Cent., i.

4. [*cap.*] In *American hist.*, a member of the British party during the Revolutionary period; a loyalist. The Tories were very numerous, especially in the Middle and Southern colonies, and many of them took arms for the king. They were frequently severely persecuted, and after the war many of them emigrated to Canada and elsewhere.

Washington will not trust us with the keeping of a suspected *Tory*, if we let the rascal trifle in this manner with the corps. *J. F. Cooper*, The Spy, xxix.

5. [*cap.*] In general, a conservative; one who favors established authority and institutions, especially in a monarchy or an aristocracy; a person of aristocratic principles, as opposed to a democrat or a radical.

Purrus Ram and Khoom Dass are in attendance, and fear greatly that the party of the Viziers, to whom they are opposed, will hurl them from power, and that the *Tories* of Bussahir will triumph. *W. H. Russell*, Diary in India, II. 191.

High Tory, an upholder or advocate of an extreme type of Toryism.

II. *a.* Pertaining to or characteristic of tories, in any sense; specifically [*cap.*], belonging or relating to the Tories: as, a *Tory* government; *Tory* principles or measures. See I.

"Surrender! you servants of King George," shouted the leader, . . . "or I will let a little of your *tory* blood from your veins." *J. F. Cooper*, The Spy, xxii.

The party led by Sir Robert Peel no longer called itself "*Tory*," but "Conservative." *Contemporary Rev.*, LI. 4.

Tory Democracy, the principles or views of the Tory Democrats; also, the Tory Democrats collectively.—**Tory Democrats**, in *recent British politics*, those members of the Conservative party who are supposed to incline more or less to democratic ideas and methods.

toryism (tō′ri-izm), *n.* [< *tory* + *-ism.*] The principles, methods, and practices of tories, in any sense; specifically [*cap.*], those of the British Tories.

Nothing would illustrate the subject better . . . than an inquiry into the rise and progress of our late parties, or a short history of *toryism* and whiggism from their cradle to their grave, with an introductory account of their genealogy and descent. *Bolingbroke*, Parties, ii.

The times have been dreadful, and old families like to keep their old tenants. But I dare say that is *Toryism*. *George Eliot*, Felix Holt, viii.

Toryminæ (tor-i-mī′nē), *n. pl.* [NL., < *Torymus* + *-inæ.*] A notable subfamily of parasitic hymenopterous insects, of the family *Chalcididæ*, conspicuous from their brilliant metallic colors and their long ovipositor: originally named as a family *Torymidæ* by Walker in 1833. They are the commonest parasites of the cynipid and cecidomyidan gall-makers, although some have been reared from the cells of burrowing bees and a few from lepidopterous larvæ. Several hundred species are known.

Torymus (tor′i-mus), *n.* [NL. (Dalman, 1820).] A genus of hymenopterous parasites of gall-making insects, typical of the subfamily *Toryminæ*.

tory-rory† (tō′ri-rō′ri), *a.* [Appar. a varied redupl. of *tory.*] Wild; boisterous; harum-scarum.

Lift up your voices, and sing like nightingales, you *tory rory* jades. Courage, I say; as long as the merry pence hold out, you shall none of you die in Shoreditch. *Dryden*, Kind Keeper, iv. 1.

tosca (tos′kä), *n.* [< Sp. Pg. *tosco* (fem. *tosca*), rough, coarse.] A name given in parts of South America, especially near the mouth of the La Plata river, and in the region of the pampas generally, to a soft concretionary limestone, having about the consistence of slightly baked clay, and of a dark-brown color. It underlies the so-called Pampean formation. The name *tosca* is said also to be applied in parts of southern Italy, and especially in Sicily, to varieties of pumiceous tuffs. In the gold-mining regions of the United States of Colombia the word *tosca* is also in frequent use as designating a very peculiar rock lying near the surface, and said by some to be of volcanic origin, but not yet scientifically described. It differs very much from the tosca of the Pampean region.

toscatter†, *v. t.* [ME. *toscateren*; < *to-*[2] + *scatter.*] To scatter in pieces.

Lo, ech thyng that is oned in it selve

William Morris, Earthly Paradise, I. 300.

3. In *mining*, to separate (ore) from the gangue by stirring (tossing) the slimes with water in a keeve, and then allowing the heavier, valuable parts to settle, this operation being hastened by packing, or striking the sides of the keeve with an iron bar held vertically with one end resting on the ground, an operation which may be continued from a quarter of an hour to an hour. The packing facilitates the separation of the ore by the vibrating motion imparted to the particles. This process is generally done by hand, but sometimes by a mechanical arrangement. It was formerly somewhat extensively employed in the tin-mining districts of Cornwall, England, and has not entirely gone out of use.

4. To cast; pitch; fling; hurl; specifically, to throw with the palm of the hand upward; throw lightly or carelessly.

Totaninæ (tot-a-nī′nē), *n. pl.* [NL., < *Totanus* + *-inæ*.] A subfamily of *Scolopacidæ*, corresponding to the genus *Totanus* in a broad sense, but containing a number of other modern genera; the tattlers. They are found all over the world, in great abundance of individuals and numerous species. The chief distinction from the true snipes or *Scolopacinæ* lies in the bill, which is relatively shorter, harder, and less sensitive, and usually slenderer, with a more ample rictus. The legs are longer, and usually denuded above the suffrago, so that the lower end of the tibia is bare of feathers. The feet are more or less semipalmate. They are noisy, restless birds, inhabiting marshes, swamps, and wet woodland and meadows. The yellowshanks, willet, and solitary and spotted sandpipers of the United States are good examples. One of the most wide-spread and notable is the wandering tattler, *Heteroscelus incanus* or *brevipes*. Also called *Totanæ*, as a group ranking lower than a subfamily, and formally contrasted with *Tringeæ*. See *Totanus*, and cuts under *Bartramia*, *greenshank*, *redshank*, *Rhyacophilus*, *ruff*, *semipalmate*, *tattler*, *Terekia*, *Tringoides*, *Tryngites*, *willet*, and *yellowshank*.

Totanus (tot′a-nus), *n.* [NL., < ML. *totanus* (Olt. *totano*), a kind of moor-hen.] A genus of birds of the family *Scolopacidæ*, including some of the best-known sandpipers, tattlers, telltales, gambets, or horsemen, as the redshank, greenshank, yellowshank, and wood-sandpiper. Several are common British species: the greenshank, or green sandpiper, *T. ochropus*; the wood-sandpiper, *T. glareola*; the redshank, *T. calidris*; the spotted redshank, *T. fuscus*. In North America the best-known are the greater and lesser yellowshanks, *T. melanoleucus* and *T. flavipes*. The genus formerly contained all the *Totaninæ* (which see). See cuts under *greenshank*, *redshank*, and *yellowshank*.

totara (tō′tä-rä), *n.* [Maori.] A taxaceous tree, *Nageia Totara*, the most valuable timber-tree of New Zealand. It grows 60 or 70 feet high, with a diameter of from 4 to 6 feet. The wood is of a reddish color, close, straight, fine, and even in grain, moderately hard and strong. It is used both for veneers, furniture, and cabinet-work, and for building, and is invaluable for piles of marine wharves, bridges, etc., being durable in the ground or under water, and resisting a long time the attacks of the teredo. It was used by the natives to make their smaller canoes, and the bark served for roofing. Also *mahogany-pine*.

toteler†, *n.* A Middle English form of *tittler*.

tote-load (tōt′lōd), *n.* As much as one can tote or carry. *Bartlett*. [Southern U. S.]

totem (tō′tem), *n.* [From the inferred stem of Algonkian (Ojibwa) *kitotem*, 'thy family mark,' *nindotem*, 'my family mark,' from *ki-*, *kin-*, thy, *ni-*, *nin-*, my, + *t-* or *d-* from the stem, + *otem*, possessive stem of *ote*, a family mark, a totem. Compare Ottawa (?) *ododam*, of similar formation. The Massachusetts (Natick) forms sometimes cited do not mean 'totem' and are appar. distinct. The name came into Eng. use in the 19th century, from the Indians of the Great Lake region.] Among the Indians of North America, a natural object, usually an animal, assumed as the token or emblem of a clan or family, and a representation of which served as a cognizance for each member of it; hence, a more or less similar observance and usage among other uncivilized peoples. See *totemism*. The representation of the totem borne by an individual was often painted or figured in some way upon the skin itself, and upon his different garments, utensils, etc. The totem has also a religious significance. [The word is often used attributively, as in *totem clan*, *totem kin*, *totem post*, etc.]

Totem Posts, Canadian Pacific Coast.

It is not only the clans and the sexes that have *totems*; individuals also have their own special *totems*, i. e., classes of objects (generally species of animals) which they regard as related to themselves by those ties of mutual respect and protection which are characteristic of totemism. This relationship, however, in the case of the individual *totem*, begins and ends with the individual man, and is not, like the clan *totem*, transmitted by inheritance. . . . In Australia we hear of a medicine-man whose clan *totem* through his mother was kangaroo, but whose "secret" (i. e., individual) *totem* was the tiger-snake. Snakes of that species, therefore, would not hurt him.
J. G. Frazer, Encyc. Brit., XXIII. 471.

totemic (tō-tem′ik), *a.* [< *totem* + *-ic*.] Of or pertaining to a totem; characterized by a totem: as, a *totemic* relative or relationship.

totemism (tō′tem-izm), *n.* [< *totem* + *-ism*.] The system of tribal subdivision denoted by totems; the use of totems, with all the social and religious observances connected with them; the constitution of society as marked by these observances.

The theory of the wide distribution of *Totemism* among the nations of the ancient world (especially among the Greeks) is due to Mr. J. F. M'Lennan, who first explained it in the "Fortnightly Review," 1869, 1870.
C. Elton, Origins of Eng. Hist., p. 300.

In the interesting pages on Egyptian religion, Mr. Lang defends his view that the worship of animals was at any rate in part a survival of *totemism*, and that the custom of representing the elemental gods as animals was due to the same cause. *Classical Rev.*, II. 250.

totemist (tō′tem-ist), *n.* [< *totem* + *-ist*.] One designated by a totem; a member of a totem clan. *A. Lang*, Myth., Rit., and Religion, II. 71.

I . . . related unto you y[t] fearfull accidente, or rather judgmente, y[e] Lord pleased to lay on London Bridge, by fire and therin gave you a *touch* of my great loss.
Sherley, quoted in Bradford's Plymouth Plantation, p. 308.

9. A stroke or dash as with a pen, pencil, or brush, literally or figuratively: as, a *touch* of bright color; also, any slight added effort or action, such as that expended on some completed work in order to give it finish.

What strained *touches* rhetoric can lend.
Shak., Sonnets, lxxxii.

It tutors nature; artificial strife
Lives in these *touches*, livelier than life.
Shak., T. of A., i. 1. 38.

The old latticed windows, the stone porch, . . . the chimney stacks, were rich in crayon *touches*, and sepia lights and shades. *Charlotte Brontë*, Shirley, xi.

10. Figuratively, something resembling a light stroke or touch. (*a*) A tinge; a smack; a trace: as, a *touch* of irony.

No beast so fierce but knows some *touch* of pity.
Shak., Rich. III., i. 2. 71.

An insight into mechanics is desirable, with a *touch* of statistics. *Lamb*, Old and New Schoolmaster.

While the air has no *touch* of spring,
Bird of promise! we hear thee sing.
Bryant, Song Sparrow.

(*b*) A shade; a trifle; a slight quantity or degree.

Madam, I have a *touch* of your condition,
Which cannot brook the accent of reproof.
Shak., Rich. III., iv. 4. 157.

Marg. Fuller, Woman in 19th Century, p. 105.

11. A trait or feature; a prominent or outstanding quality or characteristic.

Neither ill *touches* should be left vnpunished, nor ientle[ne]sse in teaching anie wise omitted.
Ascham, The Scholemaster, p. 48.

But he had other *touches* of late Romans,
That more did speak him: Pompey's dignity,
The innocence of Cato, Cæsar's spirit.
B. Jonson, Sejanus, i. 1.

12†. Manner; style; bearing.

A certain *touch*, or air,
That sparkles a divinity beyond
An earthly beauty!
B. Jonson, Alchemist, iv. 1.

13. The skill or nicety with which a performer uses his instrument; the peculiar manner in which an author uses his pen, an artist his brush, or a workman his tools; characteristic skill or method of handling by which the artist or workman may be known; execution; manipulation; finish.

Be of some good consort;
You had a pleasant *touch* o' the cittern once,
If idleness have not bereft you of it.
Beau. and Fl., Captain, i. 3.

The literary *touch* which it is so difficult to describe but so easy to recognise. *Nineteenth Century*, XXVI. 838.

14. In *pianoforte-* and *organ-playing*, a method of depressing a digital or pedal so as to produce a tone of a particular quality. The varieties of tone producible on modern instruments by varying the method of manipulation are numerous and at first sight astonishing. Much of the variety and effectiveness of keyboard technique is due to the elaborate study of this subject. Touch is described by various qualifying words, like *staccato*, *legato*, *cantabile*, etc.

15†. Make; style; sort.

The capteyn sent certeyn of his meyny to my chamber . . . and toke awey . . . j. herneyse [harness] complete of the *touche* of Milleyn; and j. gowne of fyn perse blewe furryd with martens. *Paston Letters*, I. 134.

My sweet wife, my dearest mother, and
My friends of noble *touch*. *Shak.*, Cor., iv. 1. 49.

16. A thing, or a style of thing, involving the expenditure of a particular sum, or obtainable for such a sum: as, a penny *touch*. [Slang.]

Sept. 22. At night went to the ball at the Angel. a guinea *touch*. *Sir Erasmus Phillipps' Diary* (1720).

Print my preface in such form as, in the bookseller's phrase, will make a sixpenny *touch*. *Swift.*

17. A musical note or strain. [Rare.]

Soft stillness and the night
Become the *touches* of sweet harmony.
Shak., M. of V., v. 1. 57.

18†. Attack; animadversion; censure; blame.

I never bare any *touch* of conscience with greater regret. *Eikon Basilike.*

19†. Personal reference or allusion; personality.

Speech of *touch* towards others should be sparingly used; for discourse ought to be as a field, without coming home to any man. *Bacon*, Discourse (ed. 1887).

20. A touchstone; that by which anything is examined; a test, as of gold by a touchstone; a proof; a criterion; an assay; hence, the stamp applied by the Goldsmiths' Company to a piece of plate testifying to its fineness: as, a gilt piece of the old *touch* (that is, of the stamp formerly in use).

Fynd foure freres in a flok, that folweth that rewle
Thanne haue y tynt al my tast, *touche*, and assaie.
Piers Plowman's Crede, l. 537.

A day
Wherein the fortune of ten thousand men
Must bide the *touch*. *Shak.*, 1 Hen. IV., iv. 4. 10.

Your judgment, as it is the *touch* and trier
Of good from bad.
Middleton, Family of Love, Epil.

Be of happy cheer!
For 'tis the nicest *touch* of human honour
When some ethereal and high-favouring donor
Presents immortal bowers to mortal sense.
Keats, Endymion, ii.

21†. Some stone of a very durable character, suitable for preserving inscriptions or for fine monumental work. The confusion between *touchstone* and *touch*, of which former word the latter seems to be a variant, is due in part to the general inability of men (everywhere existing until very recent times) to distinguish one kind of stone from another, and in part to the confusion, dating back to a very early period, between *basanites* and *basal es*. See *touchstone*.

Those other glorious notes,
Inscribed in *touch* or marble, or the coats
Painted or carved upon our great men's tombs.
B. Jonson, The Forest, xii.

22. In *ship-building*, the broadest part of a plank worked top and butt, or the middle of a plank worked anchor-stock fashion; also, the angles of the stern-timbers at the counters.— **23.** In *magnetism*, the magnetization of a steel bar or needle by repeated contact with one or more magnets: *single*, *double*, and *separate touch* describe different methods.— **24.** In *bell-ringing*, a partial series of changes.— **25.** Same as *toccata*. [Rare.]— **A near touch**, an exceedingly narrow miss or escape; a close shave. [Colloq.]

The next instant the hind coach passed my engine by a shave. It was the *nearest touch* I ever saw.
Dickens. (*Imp. Dict.*)

Royal touch, the touch of the king, formerly applied as a remedy to persons suffering from scrofula. See *king's evil* (under *evil*[1]), and *touchpiece*.— **To keep touch.** (*a*) To be or remain in contact or sympathy. (*b*†) To keep faith or one's appointment or engagement; fulfil one's duty or functions.

They *keep* no *touch*, they will talk of many gay things, they will pretend this and that, but they keep no promise.
Latimer, 3d Sermon bef. Edw. VI., 1549.

If Florence now *keep touch*, we shortly shall
Conclude all fear with a glad nuptial.
Shirley, Lird in a Cage, iv. 1.

True as touch†, completely true. *Spenser*, F. Q., I. iii. 2.

touchableness (tuch'a-bl-nes), *n.* The quality of being touchable; tangibility.

touch-and-go (tuch'and-gō'), *a.* and *n.* **I.** *a.* **1.** Of uncertain action or outcome; that may explode, go off, or come to a head on the least touch or provocation; hence, ticklish; uncertain: applied to persons, circumstances, or actions.

It was, as Rochford felt, *touch and go*, very delicate work with Sir Edward. *Mrs. Oliphant*, Poor Gentleman, xli.

It was *touch and go* to that degree that they couldn't come near him, they couldn't feed him, they could scarcely look at him. *The Century*, XXXVI. 127.

2. Hasty and superficial; desultory.

The allusive, *touch-and-go* manner.
The Academy, March 3, 1888, p. 148.

II. *n.* An uncertain or precarious state of affairs as regards the happening or not happening of something.

touch-body (tuch'bod″i), *n.* A tactile corpuscle (which see, under *corpuscle*).

touch-box† (tuch'boks), *n.* A primer.

Cocke, thy father was a fresh-water soldier, thou art not; Thou hast beene powdred, witnesse thy flaxe & *touch-box*.
Heywood, Royal King (Works, ed. Pearson, 1874, VI. 13).

touch-corpuscle (tuch'kôr″pus-l), *n.* A touch-body. See *corpuscle*.

touch-down (tuch'doun), *n.* In *foot-ball*, the touching of the ball to the ground by a player on, over, or behind his opponent's goal-line; the play by which this is done. It counts five for the side which makes it.— **Safety touch-down**, a touch-down made by one of the players behind his own goal-line, when the ball was last touched by one of his own side, to ★prevent the making of a touch-down by the other side.

toucher (tuch'ėr), *n.* [< *touch* + *-er*[1].] One who or that which touches; specifically, a skilful archer; one who always hits the mark.

Mammon, well follow'd? Cupid, bravely led;
Both *touchers*; equal fortune makes a dead.
Quarles, Emblems, i. 10, Epig.

A near toucher, a close shave. [Slang.]

It was *a near toucher*, though.
Sala, Baddington Peerage, I. 188. (*Hoppe.*)

As near as a toucher, almost exactly; very nearly; touch-and-go. [Slang.]

And there we are in four minutes' time, *as near as a toucher*. *Dickens*, Our Mutual Friend, iii. 13.

touch-hole (tuch'hōl), *n.* A small tubular opening through the thickness of the barrel of a gun, cannon, or pistol, by means of which fire is communicated to the charge within.

Love's fire-arms here are since not worth a souse;
We've lost the only *touch-hole* of our house.
Farquhar, Love and a Bottle, Epil.

touchily (tuch'i-li), *adv.* [< *touchy* + *-ly*[2]. Cf. *techily*.] In a touchy manner; with irritation; peevishly.

touchiness (tuch'i-nes), *n.* [< *touchy* + *-ness*. Cf. *techiness*.] The character of being touchy; peevishness; irritability; irascibility.

touching (tuch'ing), *p. a.* [Ppr. of *touch*, *v.*] Affecting; moving; pathetic.

touching (tuch'ing), *n.* [Verbal n. of *touch*, *v.*] The act of one who touches, in any sense.— **Touching of St. Thomas.** Same as *Low Sunday* (which see, under *low*[2]).

touching (tuch'ing), *prep.* [< ME. *touchyng*, *towchyng*; prop. ppr. of *touch*, *v.*, used elliptically (after F. *touchant* similarly used) as a quasi-prep., like *concerning*, etc.] Concerning; relating to; with respect to: often preceded by *as*.

The Sowdon sayde "*as towchyng* this mater,
I wolle gladly be after your avise."
Generydes (E. E. T. S.), l. 1401.

touch-line† (tuch'līn), *n.* A tangent.

Our old word for tangent was *touch-line*.
F. Hall, False Philol., p. 64.

touch-me-not (tuch'mē-not), *n.* [Equiv. to the NL. specific name *Noli-tangere*.] **1.** A plant of the genus *Impatiens*, especially *I. Noli-tangere*, so called because the ripe seed-vessel explodes at the touch.

Presbytery seeming like the plant called *Touch me not*, which flies in the face and breaks in the fingers of those that presse it. *Lp. Gauden*, Tears of the Church, p. 19. ((*Davies.*)

2. In *med.*, a tubercular affection, occurring especially about the face; noli-me-tangere; lupus.

touch-needle (tuch'nē″dl), *n.* One of a series of strips or needles of various alloys of gold, silver, and copper of known composition, used in testing the quality of gold by the use of the touchstone. The color of the streak of the alloy to be tested and its behavior with acid are compared with that of one or more of the touch-needles. This method has been in use from very remote ages, and is not entirely obsolete. The Italian goldsmiths have a set, strung on a string, of twenty-four touch-needles, which are little bars of gold, each of a known and marked standard from one carat up to twenty-four. See *touchstone*.

touch-pan (tuch'pan), *n.* The pan of an old-fashioned gun, as one having a flint-and-steel lock, into which powder was poured, communicating with that in the touch-hole. See cut under *flint-lock*.

touch-paper (tuch'pā″pėr), *n.* Paper steeped in niter so that it catches fire from a spark and burns slowly, used for firing gunpowder and other explosives.

touchpiece (tuch'pēs), *n.* A coin or medal presented by the sovereigns of England to those whom they touched for the cure of the king's evil. Previous to the reign of Charles II. an English gold coin, the angel (see *angel*, 5, and *angel-gold*), was thus presented, but Charles II. substituted a medalet, struck in gold and also in silver, bearing a general resemblance to the angel. Similar medalets were given as touchpieces by James II., by Anne, and by the "Old Pretender" and his two sons. The piece figured is preserved by a New York family as commemorating the alleged cure of an ancestor by the royal touch in 1687.

Obverse. Reverse.
Gold Touchpiece, James II. (Size of the original.)

touchstone (tuch'stōn), *n.* [< *touch* + *stone*.] **1.** A very fine-grained dark-colored variety of schist or jasper, used for trying the quality of alloys of the precious metals. The alloy is rubbed on the stone, and the color of the streak is compared with that of various alloys of known composition prepared for that purpose and called *touch-needles*. It was formerly extensively used for ascertaining the fineness of gold, but the facility and rapidity with which exact assays are now made have rendered the touchstone a matter of much less importance. It was the "Lydian stone" of the ancients, under which name (Λυδία λίθος) it is mentioned and its use described by Bacchylides (about 450 B. C.), while Theophrastus calls it both the Lydian and the Heraclean stone (λίθος Ἡρακλεία). Βασανίτης, βασανίτης λίθος, and βάσανος were names given to it by various Greek authors. It was the *coticula* of Pliny, whose *basanites* was a dark-colored, very compact igneous rock, probably a variety of basalt. *basaltes* and *basanites* having at a very early period become inextricably confused with each other in meaning. By some these words are believed to have been originally different; by others it is thought that *basaltes* was a corruption of *basanites*.

All is not golde that hath a glistering hiew,
But what the *touchstone* tries & findeth true.
Times' Whistle (E. E. T. S.), p. 136.

The present *Touchstone* is a black Jasper of a somewhat coarse grain, and the best pieces come from India.
King, Nat. Hist. of Gems and Decorative Stones, p. 153.

2. Any test or criterion by which the qualities of a thing are tried: as, money, the *touchstone* of common honesty.

Al tongues bear with sum slippes that can not abyde the *tuich stone* of true orthographie.
A. Hume, Orthographie (E. E. T. S.), p. 19.

Compare my worth with others' base desert,
Let virtue be the *touchstone* of my love.
Drayton, Idea, lx.

touchwood (tuch'wůd), *n.* [Appar. < *touch* + *wood*[1]; cf. *touch-paper*. According to Skeat, an altered form, simulating *touch*, of *tache-wood*, < *tache*[2] + *wood*[1].] The soft white or yellowish substance into which wood is converted by the action of certain fungi: so called from its property of burning for many hours, when once ignited, like tinder. When the mycelium is in great abundance, it is sometimes observed to be luminous. The name *touchwood* is also applied to the fungus *Polyporus igniarius*. See *spunk*, 1, *amadou*, *Polyporus*.

touchy (tuch'i), *a.* [A later form of *tachy*, *techy*, *tetchy*, simulating *touch* + *-y*[1]. See *techy*. In def. 2 directly < *touch* + *-y*[1].] 1. Apt to take offense on slight provocation; irritable; irascible; peevish; testy; tetchy.

Cal. If I durst fight, your tongue would lie at quiet.
Mel. Y'are *touchie* without all cause.
Beau. and Fl., Maid's Tragedy, iii.

Take heed, my wit of the world! this is no age for wasps; 'tis a dangerous *touchy* age, and will not endure the stinging. *Randolph*, Hey for Honesty, Int.

You tell me that you apprehend
My verse may *touchy* folks offend.
Gay, Fables, iv.

For the noun use, cf. equiv. *rough*[2], associated with *rough*[1], *a.*, but prob. a sophisticated form of *ruff* for *ruffian*.] **I.** *a.* 1. Having the property of flexibility without brittleness; yielding to a bending force without breaking; also, hard to cut or sever, as with a cutting-instrument: as, *tough* meat.

Of bodies, some are fragile, and some are *tough* and not fragile. *Bacon*, Nat. Hist., § 841.

Get me a cudgel, sirrah, and a *tough* one.
Beau. and Fl., King and No King, v. 3.

And after this manner you may also keep gentles all winter, which is a good bait then, and much the better for being lively and *tuffe*.
I. Walton, Complete Angler (1653), xii.

A goose of most promising figure, but which, at table, proved so inveterately *tough* that the carving-knife would make no impression on its carcass.
Hawthorne, Scarlet Letter, Int., p. 20.

2. Firm; strong; able to endure hardship, hard work, or ill usage; hardy; not easily broken or impaired.

The hauberkes of *towgh* mayle that the speres splyndred in peces. *Merlin* (E. E. T. S.), iii. 485.

He 's well enough; he has a travell'd body,
And, though he be old, he 's *tough* and will endure well.
Fletcher, Pilgrim, v. 1.

3. Not easily separated; tenacious; stiff; ropy; viscous: as, a *tough* clay; *tough* phlegm.

A cart that is overladen, going up a hill, draweth the horses back, and in a *tough* mire maketh them stand still.
Tyndale, Ans. to Sir T. More, etc. (Parker Soc., 1850), p. 211.

4. Not easily influenced; unyielding; stubborn; hardened; incorrigible.

Callous and *tough*,
The reprobated race grows judgment-proof.
Cowper, Table-Talk, l. 458.

I found Mr. Macready . . . a *tough*, sagacious, long-headed Scotchman. *Scott*, Rob Roy, xiv.

5. Hard to manage or accomplish; difficult; trying; requiring great or continued effort. [Colloq.]

She [the town of Breda] has yielded up the Ghost to Spinola's Hands, after a *tough* Siege of thirteen Months, and a Circumvallation of near upon twenty Miles Compass.
Howell, Letters, I. iv. 15.

"My Lord," said the King, "here's a rather *tough* job."
Barham, Ingoldsby Legends, II. 69.

6. Severe; violent: as, a *tough* rebuke or tirade; a *tough* storm. [Colloq.]—**Mild and tough**, a phrase applied in some localities to fine brick-clay which has been mellowed or ripened by exposure. When fresh the clay is said to be *short and rough*.—**To make it tough**†, to take pains; also, to make a difficulty about a thing; treat it as of great importance.—**Tough pitch.** See *poling*, 2, and *toughening*.

II. *n.* A rough; a bully; an incorrigibly vicious fellow; a bad character. [Colloq., U. S.]

And then the whole appearance of the young *tough* changed, and the terror and horror that had showed on his face turned to one of low sharpness and evil cunning.
Scribner's Mag., VIII. 692.

Lord Strangford, Letters and Papers, p. 98. (*Davies.*)

★**tourmalin, tourmaline** (tör'ma-lin), *n.* [Also *turmalin*, *turmaline*; < F. *tourmaline* = Sp. *turmalina* = It. *turmalina*, *tormalina* (NL. *turmalina*, *turmalinus*); said to be < *tournamal*, a name given to this stone in Ceylon.] A mineral, crystallizing in the rhombohedral system, often in the form of a three-, six-, or nine-sided prism terminated by three faces of an obtuse rhombohedron. It often exhibits hemimorphism, the opposite extremities of a prismatic crystal showing an unlike development of planes. Its fracture is uneven or conchoidal; its hardness is a little greater than that of quartz. In composition tourmalin consists principally of a borosilicate of aluminium and magnesium, but contains frequently iron, lithium, and other elements. Some varieties are transparent, some translucent, some opaque. Some are colorless, and others green, brown, red, blue, and black, the last being the most common. Not infrequently the color varies in different parts of the crystal: thus, there may be a green exterior part about a red nucleus, or a crystal may be red at one end and green at the other, etc. Achroite is a colorless variety from Elba; rubellite is a pink or red variety containing lithium; indicolite is a blue or bluish-black variety; aphrizite is a black variety from Norway. Common black tourmalin is often called *schorl*. The transparent red, green, blue, and yellow varieties are used in jewelry: here belong the Brazilian sapphire, the Brazilian emerald, etc. Tourmalin occurs most commonly in granite, gneiss, and mica-schist. It is found in England, Scotland, Sweden, America, Spain, Siberia, and elsewhere. Sections cut from prisms of tourmalin are much used in polarizing apparatus. (See *polariscope*.) It exhibits marked pyro-electric phenomena, which are connected with its hemimorphic crystalline structure. See *pyro-electricity*.—**Tourmalin plates.** Same as *tourmalin tongs*. See *polariscope*.—**Tourmalin tongs.** See *polariscope*.

tourmalin-granite (tör'ma-lin-gran"it), *n.* A variety of granite containing, in addition to the other usual ingredients, tourmalin, and more

generally black tourmalin or schorl. Such granites are very common in various tin-producing districts, and especially in Cornwall. See *schorl* and *schorlaceous*.

Merlin (E. E. T. S.), ii. 133.

In Tilts and *Turnaments* the Valiant strove
By glorious Deeds to purchase Emma's Love.
Prior, Henry and Emma.

Tournaments and jousts differed from one another principally in the circumstance that in the first several combatants on each side were engaged at once, and in the second the contention was between two combatants only. The former consisted of the mutual charges of equal troops of cavalry, while the latter consisted of a duel on horseback.
Encyc. Brit., XXIII. 489.

2. In later times, a contest of skill in which men on horseback riding at full speed strove to carry off on their spears a certain number of rings hung just over their heads.—**3.** Encounter; shock of battle. [Rare.]

Tournefortia (tör-ne-fôr'ti-ą), *n.* [NL. (Linnæus, 1735), named after Joseph Pitton de *Tournefort* (1656–1708), a French botanist.] A genus of dicotyledonous sympetalous plants, of the family *Boraginaceæ* and tribe *Heliotropieæ*. It is distinguished from the related genus *Heliotropium* by its fruit, a small fleshy or rarely corky four-celled drupe containing either two or four nutlets. There are about 120 species, widely scattered through warm regions of the world. They are trees or shrubs, sometimes with sarmentose or twining stems, alternate entire leaves, and terminal cymes of very numerous small flowers. About 15 species occur in the West Indies, of which *T. laurifolia* is known as *black lancewood*, and *T. volubilis* as *basket-withe* or *white hoop-withe*. Three species with white flowers occur in Florida or Texas, those of Florida occurring also in the West Indies. *T. argentea* is sometimes cultivated under the name of *East Indian velvet-leaf*.

Tournefortian (tör-ne-fôr'ti-ąn), *a.* [< *Tournefort* + *-ian*.] Of or relating to Joseph Pitton de Tournefort (1656–1708), a French botanist, author of a system of botanical nomenclature and classification.

A building lofty in proportion to its lateral dimensions, of any form in plan, whether insulated or forming part of a church, castle, or other edifice. Towers have been erected from the earliest ages as memorials, and for purposes of religion and defense. Among towers are included the

minarets attached to Mohammedan mosques; the lofty bell-towers of Russia; the pillar or round towers of India, Ireland, and other places (see *round tower*); the square and octagonal towers at the west ends, crossings, etc., of

churches; the massive keeps and gate- and wall-towers of castles and mansions; the peels of Scottish fortresses; the pagodas of India and China; the pharos, the campanile, and a great variety of similar buildings. Compare *spire*[1] and *steeple*, and see cuts under *bridge-tower*, *campanile*, *castle*, *gabled*, *gate-tower*, *keep*, *lantern*, *pagoda*, *peel*, and *Rhenish*.

On the West syde is a fair *Tour* and an highe, for Belles, strongly made. *Mandeville*, Travels, p. 75.

In the early pointed architecture of England, western *towers* are less common and less imposing than those of early Gothic buildings in France. But the Norman feature of a vast *tower* at the crossing of nave and transept, seldom adopted by the French Gothic builders, was perpetuated in England.

C. H. Moore, Gothic Architecture, p. 165.

2. In early and medieval warfare, a tall, movable wooden structure used in storming a fortified place. The height of the tower was such as to overtop the walls and other fortifications of the besieged place. Such towers were frequently combined with a battering-ram, and thus served the double purpose of breaching the walls and giving protection to the besiegers.

3. A citadel; a fortress; a place of defense or protection.

Thou hast been a shelter for me, and a strong *tower* from the enemy. Ps. lxi. 3.

4†. In *astrol.*, a mansion.

Now fleeth Venus into Cylenius *tour*.
Chaucer, Complaint of Mars, l. 113.

5. In *her.*, a bearing representing a fortified tower with battlements and usually a gate with a portcullis.— **6.** A high commode or headdress worn by women in the reigns of William III. and Anne. It was built up of pasteboard, ribbons, and lace; the lace and ribbons were disposed in alternate tiers, or the latter were formed into high stiffened bows, draped or not, according to taste, with a lace scarf or veil that streamed down each side of the pinnacle. Compare *fontange* and *commode*.

Denitrating tower. Same as *denitrificator*.— **Gabled tower.** See *gabled*.— **Glover's tower.** Same as *denitrificator*.— **Martello tower,** a small circular fort with very thick walls, built chiefly on sea-coasts to prevent the landing of enemies. The name is variously said to be derived from the hammer (It. *martello*) used to strike the alarm-bell with which such towers built on the Italian coasts as a defense against pirates by Charles V. were furnished; from the name of a Corsican who invented the structure; and from Mortella in Corsica, where a tower of this kind strongly resisted an English naval force in 1794. The efficiency of this work induced the British authorities to build a large number of martello towers on their coasts, especially opposite France, in anticipation of Napoleon's threatened invasion. They are in two stages, the basement story containing store-rooms and magazine, the upper serving as a casemate for the defenders; the roof is shell-proof. The armament is a single heavy traversing gun. Similar towers afterward erected by Austria on the coast of the Adriatic and on the Danube are called *Maximilian towers* (*Larousse*).— **Mural tower.** See *mural*.— **Round tower,** a tall, slender tower tapering from the base upward, of circular section, and generally with a conical top. Round towers are often met with in Ireland, and occur, but much more rarely, in Scotland, rising from 30 to 130 feet in height, and having a diameter of from 20 to 30 feet. A variety of theories have been advanced in regard to the period of these towers and the purposes they were designed to serve, and antiquarian opinion has been greatly divided on these subjects; their construction has been assigned by some leading authorities to a period ranging from the ninth to the twelfth century, and they have been supposed to have served as strongholds into which, in times of danger, the ecclesiastics, and perhaps the inhabitants of the neighborhood, could retreat with their valuables.— **Tower bastion,** in *fort.*, a small tower in the form of a bastion, with rooms or cells underneath for men and guns.— **Tower of London** (often called simply *the Tower*), a tower or keep, now a large assemblage of buildings occupying an area of 12 or 13 acres, on an elevation just beyond the old walls of the city of London, southeastward, on the northern bank of the Thames. The tower proper, called the *White Tower*, is the keep of the castle built by William the Conqueror. The Tower was originally at once a fortress or citadel and a palace, where the kings of England sometimes resided; and it was afterward used as a state prison. To the northwest is Tower Hill, where stood the scaffold for the execution of traitors. The collection of buildings now included under the name of *the Tower* is used as an arsenal, a garrison, and a repository of various objects of public interest.— **Tower of silence.** See *silence*.— **Water-tower.** Same as *standpipe*, 7.

Round Tower at Ardmore, County Waterford, Ireland.

tower[1] (tou'ėr), *v.* [< *tower*[1], *n.*] **I.** *intrans.* **1.** To rise or extend far upward like a tower; rise high or aloft.

An enormous tulip-tree, which *towered* like a giant above all the other trees of the neighborhood.
Irving, Sketch-Book, p. 447.

2. To soar aloft, as a bird; specifically—(*a*) to soar as a lark in the act of singing; (*b*) to rise straight up in the air, as a wounded bird (see *towering*, *n.*); (*c*) to mount up, as a hawk to be able to swoop down on the quarry.

No marvel, an it like your majesty,
My lord protector's hawks do *tower* so well.
Shak., 2 Hen. VI., ii. 1. 10.

I have *tower'd*
For victory like a falcon in the clouds.
Fletcher (*and another*), False One, v. 3.

tower-clock (tou'ėr-klok), *n.* A large form of clock, adapted for use on public buildings, church-towers, etc. The works are supported by a strong framework of metal, and the pendulum-rod is usually passed through an opening in the floor beneath the clock.

tower-cress (tou'ėr-kres), *n.* A European cruciferous plant, *Arabis Turrita*, a tall, stiff, erect biennial with pods 3 inches long, all curved downward, and turned to one side in a long raceme.

towered (tou'ėrd), *a.* [< *tower* + *-ed*[2].] **1.** Having or bearing towers; adorned or defended by towers. *Shak.*, A. and C., iv. 14. 4.— **2.** In *her.*, having towers or turrets: noting a castle or a city wall used as a bearing. A *tower towered* is a bearing representing a fortified tower, generally round, with turrets rising from its top, the number of which is usually expressed in the blazon.

towerett, *n.* [< *tower* + *-et*; cf. *turret*.] A small tower. *Joye*, Expos. of Daniel, i.

towering (tou'ėr-ing), *p. a.* [Ppr. of *tower*, *v.*] **1.** Very tall or lofty: as, *towering* heights.

Singly, methinks, yon *tow'ring* chief I meet,
And stretch the dreadful Hector at my feet.
Pope, Iliad, xiii. 118.

2. Exceedingly or increasingly violent; rising to an extreme height or intense degree: as, a *towering* rage.

All else is *towering* phrensy and distraction.
Addison, Cato, ii. 1.

3. In *her.*, same as *soarant*.

towering (tou'ėr-ing), *n.* [Verbal n. of *tower*, *v.*] The act of one who towers; specifically, the convulsive action of a bird which, when wounded in a certain way, flies straight up in the air as long as life lasts, and then drops dead; also, the flight thus made. See the quotation.

The "fixing of the wing" of a mortally wounded bird . . . is simply a muscular rigidity, due to nervous shock, and of a part with the convulsive muscular action which, under similar circumstances, results in the well-known *towering* of hard-hit birds. *Coues*, Science, X. 322.

towerlet (tou'ėr-let), *n.* [< *tower*[1] + *-let*.] A little tower. *J. Baillie*. [Rare.]

tower-mill (tou'ėr-mil), *n.* Same as *smock-mill*.

tower-mustard (tou'ėr-mus″tärd), *n.* A cruciferous plant, *Arabis glabra*, found in Europe, Asia, North America, and Australia. It is an erect plant 2 feet high, with clasping leaves and long and very narrow erect pods. The name is applied also to the tower-cress.

tower-owl (tou'ėr-oul), *n.* The belfry-owl or church-owl: so called from its frequent or habitual nesting-place in populous districts. See cut under *barn-owl*.

A special variety of owl, the *tower-owl*, which preferably nests in bell-towers of churches. *Pop. Sci. Mo.*, XXX. 401.

tower-shell (tou'ėr-shel), *n.* A gastropod of the family *Turritellidæ*.

towerwort (tou'ėr-wėrt), *n.* The tower-mustard and some allied species of *Arabis*, formerly classed as *Turritis*.

towery (tou'ėr-i), *a.* [< *tower* + *-y*[1].] **1.** Having towers; adorned or defended by towers; towered. [Rare.]

Rise, crown'd with light, imperial Salem, rise!
Exalt thy *towery* head, and lift thy eyes!
Pope, Messiah, l. 86.

2. Lofty; elevated; towering.

★ A vulture from his *towery* perching. *Keats*, Endymion, i.

towhead (tō'hed), *n.* [< *tow*[3] + *head*.] **1.** A flaxen-haired person.— **2.** One whose hair is tousled or rumpled up like a bunch of tow.— **3.** The hooded merganser, *Lophodytes cucullatus*; the mosshead. *G. Trumbull*, 1888. See cut under *merganser*. [Southern U. S.]

tow-headed (tō'hed″ed), *a.* Having hair resembling tow.

towhee (tou'hē), *n.* [So called from its note.] The chewink, ground-robin, or marsh-robin of the United States, *Pipilo erythrophthalmus*, or any other species of the genus *Pipilo*: more fully called *towhee bunting*. Some of the western pipilos to which the name extends have, however, a cry more like the mewing of the catbird. See cut under *Pipilo*, and compare *tuwhit* and *tuwhoo*.— **Oregon towhee,** a black, white, and chestnut towhee bunting, *Pipilo maculatus oregonus*, with spotted scapulars.

to-whilest, *conj.* [ME., < *to*-[1] + *while*.] While. *York Plays*, p. 3.

tow-hook (tō'hůk), *n.* A tool used by artillerymen in unpacking ammunition-chests.

towind†, *v. i.* [ME., < *to*-[2] + *wind*[1].] **1.** To whirl about; revolve.

His myghty spere, as he was wont to fighte,
He shaketh so that almost it *to-wonde*.
Chaucer, Complaint of Mars, l. 102.

2. To go to pieces.

Al to peces he *towond*. *Sir Ferumbras*, l. 2568.

towing[1] (tō'ing), *n.* [Verbal n. of *tow*[1], *v.*] **1.** The act or work of drawing anything in tow; also, a charge made or an expense incurred for towing a vessel to or from her wharf, etc.; towage.— **2.** A sort of dredging done with a towing-net dragged over the surface of the water for the purpose of procuring specimens of natural history; also, the net results of such dredging, or the specimens thus procured.

A collection received from him in June indicates that the many rare opportunities afforded him for obtaining specimens [in dredging] were not neglected, and the surface *towings* he obtained are very rich in interesting forms. *Smithsonian Report*, 1887, ii. 135.

towing[2] (tō'ing), *n.* [< *tow*[3] + *-ing*[1].] In *curled-hair manuf.*, the operation of picking to pieces the ropes of hair after they have been steeped in water and then subjected to slow heat.

towing-bitts (tō'ing-bits), *n. pl.* Upright timbers projecting above the deck in the after part of a towboat, used for securing a tow-line.

towing-bridle (tō'ing-brī″dl), *n.* An iron rod or piece of stout chain secured at each end to a towboat's deck, and having a large hook in the middle fitted for making fast a tow-rope.

towing-hook (tō'ing-hůk), *n.* The hook on a towing-bridle.

towing-net (tō'ing-net), *n.* A sort of drag-net or dredge of various sizes, made of strong can-

vas, and used in the collection of specimens of natural history; a tow-net. See *towing*[1], 2.

tow-line (tō′līn), *n.* **1.** A hawser used for towing vessels. Also *towing-rope*.—**2.** In *whaling*, the long line which is attached to the toggle-iron or harpoon, and by means of which the whale is made fast to the boat, and may tow it.

★ Also *tow-rope*.

town (toun), *n.* and *a.* [< ME. *town*, *toun*, *tun*, < AS. *tūn*, hedge, fence, inclosure, farm-house, = OS. *tūn* = D. *tuin*, hedge, garden, = MLG. *tūn* = OHG. MHG. *tūn*, G. *zaun*, an inclosure, hedge, = Icel. *tūn*, the inclosed infield, homestead, dwelling-house; cf. Old Celtic **dūn*, appearing as *-dūnum* in Latinized names of places, like *Augusto-dunum*, *Lug-dunum*, and in Olr. *dūn*, castle, city, W. *din*, a hill-fort, *dinas*, town. Hence *tine*[1], *v.*]

I. *n.* **1.** An inclosure; a collection of houses inclosed by a hedge, palisade, or wall for safety; a walled or fortified place.

> And the kynge Rion com with all his peple, and beseged *town* all a-boute. *Merlin* (E. E. T. S.), iii. 616.

> When necessity, by reason of warres and troubles, caused whole thorpes to bee with such tunes [hedges] enuironed about, those enclosed places did thereby take the name of *tunes*, afterward pronounced *townes*. *Verstegan*, Rest. of Decayed Intelligence (ed. 1628), p. 295.

2. Any collection of houses larger than a village; in a general sense, a city or borough: as, London *town;* within a mile of Edinburgh *town:* often opposed to *country*, in which use it is usually preceded by the definite article. It is frequently applied absolutely, and without the proper name of the place, to a metropolis or county town, or to the particular city in which or in the vicinity of which the speaker or writer is: as, to go to *town;* to be in *town*—London being in many cases implied by English writers.

> Byt not on thy brede and lay hit doun—
> That is no curteyse to vse in *town*.
> *Babees Book* (E. E. T. S.), p. 300.

> *Ten.* I know not when he will come to *town*.
> *Moll.* He's in *town;* this nyght he sups at the Lion in Shoreditch. *Dekker and Webster*, Westward Ho, iii. 1.

> The first of our society is a gentleman of Worcestershire, of ancient descent, a Baronet, his name Sir Roger de Coverley. . . . When he is in *town*, he lives in Soho Square. *Addison*, Spectator, No. 2.

> As some fond virgin whom her mother's care
> Drags from *the town* to wholesome country air.
> *Pope*, To Miss Blount, ii.

> God made the country, and man made *the town*.
> *Cowper*, Task, i. 749.

3. A large assemblage of adjoining or nearly adjoining houses, to which a market is usually incident, and which is not a city or bishop's see. [Eng.]—**4.** A tithing; a vill; a subdivision of a county, as a parish is a subdivision of a diocese. [Eng.]

> From the returns of the reign of Edward II. it is clear that the sheriff communicated the royal writ to the *towns* of his county. *Stubbs*, Const. Hist., § 422.

5. The body of persons resident in a town or city; the townspeople: with *the*.

> *Mrs. Candour. The town* talks of nothing else.
> *Maria.* I am very sorry, ma'am, *the town* has so little to do. *Sheridan*, School for Scandal, i. 1.

6. In legal usage in the United States: (*a*) In many of the States, one of the several subdivisions into which each county is divided, more accurately called, in the New England States and some others, *township*. (*b*) In most of the States, the corporation, or quasi corporation, composed of the inhabitants of one of such subdivisions, in some States designated by law as a *township* or *incorporated township* or *township organization*. (*c*) In a few of the States, a municipal corporation (not formed of one of the subdivisions of a county, but having its own boundaries like a city) with less elaborate organization and powers than a city. The word *town* is popularly used both in those senses, and also in the sense of 'a collection of dwellings,' which is characteristic of most towns. Thus, the name of a town, such as Farmington, serves to indicate, according to the context, either the geographical area, as in the phrase "the boundaries of the town" (indicated on maps by a light or dotted line), or the body politic, as in speaking of the town and county highways respectively, or the central settlement from which distances are usually measured, as on the sign-boards. When used in the general sense of a densely populated community, the boundaries are usually not identical with those of any primary division of the county, but include only the space occupied by agglomerated houses.

7. A farm or farmstead; a farm-house with its connected buildings. [Scotland, Ireland, and the North of England.]—**Cautionary town.** See *cautionary*.—**County town.** See *county*[1].—**Free town.** See *free city*, under *city*.—**Laws of the Hanse towns.** See *Hanse*[1].—**Man about town.** See *man*.—**Prairie-dog towns.** See *prairie-dog*.—**To come upon the town,** See *come*.—**To paint the town red.** See *paint*.—**Town and gown.** See *gown*.—**Town-bonding acts or laws.** See *bond*[1].—**Town's husband.** (*a*) One who holds the office of a steward in looking after the affairs of a town. Compare *ship's husband*, under *husband*.

> The following advertisement appears in the Hull Advertiser, Aug. 8, 1795. "Guild-hall, Kingston upon Hull, August 7, 1795. Wanted by the Corporation of this Town, a proper person for the office of *Town's Husband*, or Common Officer. He must be well acquainted with Accompts, capable of drawing Plans and Estimates for Buildings, and accustomed to inspect the workmanship of Mechanics." *N. and Q.*, 7th ser., VIII. 496.

(*b*) An officer of a parish who collects moneys from the parents of illegitimate children for the maintenance of the latter. *Halliwell.* [Prov. Eng.]=Syn. 2 and 3. *Hamlet*, *Village*, *Town*, *City*. A *hamlet* is a group of houses smaller than a *village*. The use of the other words in the United Kingdom is generally more precise than it is in the United States, but all are used more or less loosely. A *village* may have a church, but has generally no market; a *town* has both, and is frequently incorporated; a *city* is a corporate town, and is or has formerly been the see of a bishop, with a cathedral. In the United States a *village* is smaller than a *town*, and a *town* usually smaller than a *city;* there are incorporated *villages* as well as *cities*. Some places incorporated as *cities* are smaller than many that have only a *town* organization.

II. *a.* Of, pertaining to, or characteristic of a town; urban: as, *town* life; *town* manners.—**Town cards,** a size of cards 2 by 3 inches. [Eng.]—**Town cause.** See *cause*.—**Town clerk.** See *clerk*.—**Town council,** the governing body in a municipality, elected by the ratepayers. [Great Britain.]—**Town crier,** a public crier; one who makes proclamation.

> I had as lief the *town-crier* spoke my lines.
> *Shak.*, Hamlet, iii. 2. 4.

Town gate, the highroad through a town or village. *Halliwell.* [Eng.]—**Town hall,** a large hall or building belonging to a town or borough, in which the town's business is transacted, and which is frequently used as a place of public assembly; a town house.—**Town house.** (*a*) A building containing offices, halls, etc., for the transaction of municipal business, the holding of public meetings, etc.; a town hall. (*b*) The town prison; a bridewell. (*c*) A poorhouse. (*d*) A house or mansion in town, as distinguished from a country residence.—**Town rake,** a man living loosely about town; a roving, dissipated fellow.

> Lewdness and intemperance are not of so bad consequences in a *town-rake* as in a divine.
> *Swift*, Examiner, No. 29.

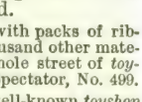
All the place about me was covered with packs of ribbon, brocades, embroidery, and ten thousand other materials, sufficient to have furnished a whole street of *toy-shops*. *Addison*, Spectator, No. 499.

We stopped again at Wirman's, the well-known *toyshop* in St. James's Place. . . . He sent for me to come out of the coach, and help him to choose a pair of silver buckles.
Boswell, Johnson, an. 1778.

2. A shop where toys or playthings are sold.

toysome (toi'sum), *a.* [< *toy* + *-some*.] Playful; playfully affectionate; amorous.



Two or three *toysome* things were said by my lord (no ape was ever so fond!), and I could hardly forbear him.
Richardson, Sir Charles Grandison, III. lxxi.

toywort (toi'wėrt), *n.* The shepherd's-purse, *Bursa Bursa-pastoris*. [Prov. Eng.]

toze, tozer, etc. See *tose*, etc.

T-panel (tē'pan″el), *n.* See *panel*.

T-plate (tē'plāt), *n.* **1.** An iron plate in cross-section like the letter T. Also called *T-iron*.—**2.** In vehicles and other structures, a wrought-iron stay or strengthening piece for reinforcing woodwork where one piece is joined to another by a mortise and tenon. It is shaped like the letter T, and has one or more screw- or bolt-holes on each arm.

T-plate, 2.

tr. An abbreviation: (*a*) of *transitive*; (*b*) of *translation, translated, translator*; (*c*) of *transpose*; (*d*) of *transfer*; (*e*) of *trill*.

Tr. In *chem.*, the symbol for *terbium*.

tra-. See *trans-*.

traast, *n.* A Middle English form of *trace*[1].

trabal (trab'al), *a.* [< L. *trabalis*, belonging to beams, < *trabs*, a beam: see *trave*.] Of or pertaining to a trabs; specifically, of or pertaining to the trabs cerebri, or corpus callosum; callosal. *Buck's Handbook of Med. Sciences*, VIII. 517.

trabea (trā'bē-ą), *n.*; pl. *trabeæ* (-ē). [L.] A robe of state worn by kings, consuls, augurs, etc., in ancient Rome. It was a toga ornamented with horizontal purple stripes. See *toga*.

Plucking purples in Goito's moss,
Like edges of a *trabea* (not to cross
Your consul-humor), or dry aloe-shafts,
For fasces, at Ferrara. *Browning*, Sordello, v.

trabeate (trā'bē-āt), *a.* [Irreg. < L. *trabs*, a beam, a timber, + *-ate*[1].] Same as *trabeated*. *C. H. Moore*, Gothic Architecture, p. 6.

trabeated (trā'bē-ā-ted), *a.* [< *trabeate* + *-ed*[2].] In *arch.*, furnished with an entablature; of or pertaining to a construction of beams, or lintel-construction.

trabeation (trā-bē-ā'shọn), *n.* [< *trabeate* + *-ion*.] In *arch.*, an entablature; a combination of beams in a structure; lintel-construction in principle or execution.

trabecula (trā-bek'ū-lą), *n.*; pl. *trabeculæ* (-lē). [NL., < L. *trabecula*, dim. of *trabs*, a beam: see *trave*.] **1.** In *bot.*, one of the projections from the cell-wall which extend like a cross-beam or cross-bar nearly or quite across the cell-cavity of the ducts of certain plants, or the plate of cells across the cavity of the sporangium of a moss.—**2.** *pl.* In *anat.*, the fibrous cords, layers, or processes of connective tissue which ramify in the substance of various soft organs, as the spleen, kidney, or testicle, conferring upon them greater strength, stability, or consistency.—**3.** In *embryol.*, one of a pair of longitudinal cartilaginous bars, at the base of the skull, in advance of the end of the notochord and of the parachordal cartilage, inclosing the pituitary space which afterward becomes the sella turcica; in the human embryo, one of the lateral trabeculæ of Rathke. They are constant in embryos of a large series of vertebrates, and persistent in adults of some. More fully called *trabeculæ cranii*. See cuts under *chondrocranium* and *Crotalus*.

4. One of the calcareous plates or pieces which connect the dorsal and ventral walls of the corona in echinoderms.—**5.** One of the fleshy columns, or columnæ carneæ, in the ventricle of the heart, to which the chordæ tendineæ are attached: more fully called *trabecula carnea*.—**6.** In *entom.*, one of the pair of movable appendages on the head, just in front of the antennæ, of some mallophagous insects, or bird-lice, as those of the genus *Docophorus*. They have been supposed to represent the rudiments of a second pair of antennæ. Also *trabeculus*.—**Rathke's trabeculæ.** See def. 3.—**Trabecula carnea.** See def. 5.—**Trabecula cerebri,** the corpus callosum, or trabs cerebri.—**Trabecula cinerea,** the middle, soft, or gray commissure of the cerebrum.—**Trabeculæ cranii.** See def. 3.—**Trabeculæ of the spleen,** connective-tissue laminæ passing inward from the tunica propria, traversing in all directions the splenic pulp, and supporting it.—**Trabecula tenuis,** a name provisionally applied to a slender and apparently fibrous filament which, in the heart of the cat, spans the right ventricle near its apex, with its septal end springing from an independent little elevation, and its lateral end attached to the base of a columna carnea. *Wilder and Gage*, Anat. Tech., p. 330.

trabecular (trą-bek'ū-lär), *a.* [< *trabecule* + *-ar*[3].] Of or pertaining to a trabecula; forming or formed by trabeculæ; trabeculate.

trabecularism (trą-bek'ū-lär-izm), *n.* [< *trabecular* + *-ism*.] In *anat.*, a coarse reticulation, or cross-barred condition, of any tissue.

trabeculate (trą-bek'ū-lāt), *a.* [< *trabecula* + *-ate*[1].] **1.** Having a trabecula or trabeculæ.—**2.** In *civil engin.*, having a structure of cross-bars or struts strengthening a shell or tube by connecting opposite sides of its interior; also, noting such a structure.

trabeculated (trą-bek'ū-lā-ted), *a.* [< *trabeculate* + *-ed*[2].] Same as *trabeculate*.

trabecule (trab'e-kūl), *n.* [< L. *trabecula*, dim. of *trabs*, a beam: see *trabecula*.] Same as *trabecula*.

trabeculus (trą-bek'ū-lus), *n.*; pl. ***trabeculi*** (-lī). [NL., dim. of L. *trabs*, a beam: see *trave*.] In *entom.*, same as *trabecula*.

trabs cerebri (trabz ser'ē-brī). [NL.: L. *trabs*, a beam; *cerebri*, gen. of *cerebrum*, the brain.] The corpus callosum. Also *trabecula cerebri*.

trace[1] (trās), *v.*; pret. and pp. *traced*, ppr. *tracing*. [<ME. *tracen*, <OF. *tracer, trasser*, delineate, score, trace, also follow, pursue, F. *tracer*, trace, = Sp. *trazar* = Pg. *traçar*, plan, sketch, = It. *tracciare*, trace, devise, < ML. **tractiare*, delineate, score, trace, freq. of L. *trahere*, pp. *tractus*, draw: see *tract*[1].] **I.** *trans.* **1.** To draw; delineate; mark out, as on a map, chart, or plan; map out; design; sketch.

The Sea-works and Booms were *traced* out by Marquis Spinola. *Howell*, Letters, I. v. 6.

We firmly believe that no British government has ever deviated from that line of internal policy which he [Lord Holland] has *traced*, without detriment to the public.
Macaulay, Lord Holland.

2. To write, especially by a careful or laborious formation of the letters; form in writing.

Every letter I *trace* tells me with what rapidity Life follows my pen. *Sterne*, Tristram Shandy, ix. 8.

The signature of another plainly appeared to have been *traced* by a hand shaking with emotion.
Macaulay, Hist. Eng., xiv.

Specifically—**3.** To copy, as a drawing or engraving, by following the lines and marking them on a superimposed sheet, through which they appear.

There is an inscription round the inside of the [bronze] vase, which was *traced* of, as it is engraved on it, and shews exactly the circumference of the vase.
Pococke, Description of the East, II. ii. 207.

4. To cover with traced lines, as with writing or tracery. [Rare.]

The deep-set windows, stain'd and *traced*,
Would seem slow-flaming crimson fires
From shadow'd grots of arches interlaced.
Tennyson, Palace of Art.

And he holds a palm-leaf scroll in his hands,
Traced with the Prophet's wise commands.
Whittier, The Palm-Tree.

5. To follow the track, trail, or path of; pursue: a general term, the verbs *track* and *trail* being more specific, as in hunting.

The Monster, swifte as word that from her went,
Went forth in haste, and did her footing *trace*.
Spenser, F. Q., III. vii. 23.

6. To follow the course of by observation of the remains or vestiges; ascertain the position, course, contour, etc., of by noting and following the traces that exist.

You may *trace* out the Aqueduct all along by the remaining fragments of it.
Maundrell, Aleppo to Jerusalem, p. 52.

On the seventeenth we took another view of the vale of Jehosaphat. And on the twentieth *traced* the old walls to the north, and reviewed the places that way.
Pococke, Description of the East, II. i. 19.

The sepulchres of Rome have as yet been far too carelessly examined to enable us to *trace* all the steps by which the transformation took place.
J. Fergusson, Hist. Arch., I. 345.

7. To observe traces or vestiges of; discover visible evidences or proofs of.

You may *trace* the deluge quite round the globe.
T. Burnet, Theory of the Earth, iii.

In his frank eyes she did not fail to *trace*
A trouble like unto a growing hate,
That, yet unknown to him, her love did wait.
William Morris, Earthly Paradise, III. 106.

8. To follow step by step: as, to *trace* the development of a plot: often with *up*, *back*, *out*.

He *traced up* his descent on both sides for several generations. *Steele*, Tatler, No. 132.

There is no prosperity, trade, art, city, or great material wealth of any kind, but if you *trace* it home you will find it rooted in a thought of some individual man.
Emerson, Success.

9. To make one's way through or along; traverse; thread; perambulate.

To *trace* the brakes and bushes all about,
The stag, the fox, or badger to betray.
J. Dennys (Arber's Eng. Garner, I. 164).

We do *trace* this alley up and down.
Shak., Much Ado, iii. 1. 16.

Trauersing and *tracing* the seas, by reason of sundry and manifolde contrary windes, vntill the 14 day of July.
Hakluyt's Voyages, I. 235.

II. *intrans.* **1.** To move; go; march; make one's way; travel.

Our present worldes lyves space
Nis but a maner deth, what weye we *trace*.
Chaucer, Parliament of Fowls, l. 54.

Not wont on foot with heavy armes to *trace*.
Spenser, F. Q., VI. iii. 29.

He would now be up every morning by break of day, *tracing* and walking to and fro in the valley.
Bunyan, Pilgrim's Progress, ii.

2†. To step; pace; dance.

For Coridon could daunce, and trimly *trace*.
Spenser, F. Q., VI. ix. 42.

★**trace**[1] (trās), *n.* [< ME. *trace*, *traas*, < OF. *trace*, F. *trace* = Pr. *trassa*, *tras* = Sp. *traza* = Pg. *traço* = It. *traccia*, an outline, track, trace; from the verb.] **1.** The track left by a person or an animal walking or running over the ground or other surface, as snow or the like; footprints; the track, trail, or rut left by something which is drawn along, as a cart; the marks which indicate the course pursued by any moving thing.

These as a line their long dimension drew,
Streaking the ground with sinuous *trace*.
Milton, P. L., vii. 481.

Hans Van Ripper now began to feel some uneasiness about the fate of poor Ichabod and his saddle. An inquiry was set on foot, and after diligent investigation they came upon his *traces*. *Irving*, Sketch-Book, p. 452.

2†. Hence, a track or path; a way.

As traytoures on-trewe the sall teche them a *trace*.
York Plays, p. 125.

Let reason thee rule, and not will thee leade
To folowe thy fansie, A wronge *trace* to treade.
Babees Book (E. E. T. S.), p. 346.

Alexis, let us rest here, if the place
Be private, and out of the common *trace*
Of every shepherd.
Fletcher, Faithful Shepherdess, iii. 1.

3. A token, indication, or sign of something that has passed over or away; a mark, impression, or visible evidence of something that has occurred or existed; a vestige.

The shady empire shall retain no *trace*
Of war or blood but in the sylvan chase.
Pope, Windsor Forest, l. 371.

Such dreams of baseless good
Oft come and go, in crowds or solitude,
And leave no *trace*. *Shelley*, Julian and Maddalo.

On the worn features of the weariest face
Some youthful memory leaves its hidden *trace*.
O. W. Holmes, The Old Player.

4. A small quantity; an insignificant proportion: as, tetradymite or telluride of bismuth usually contains *traces* of selenium.

At one time our thoughts are distorted by the passion running through them; and at another time it is difficult to detect in them a *trace* of liking or disliking.
H. Spencer, Prin. of Sociol., § 434.

5†. Train; procession.

After hem comen of women swich a *traas*
That, sin that God Adam had mad of erthe,
The thridde part of mankynd or the ferthe,
Ne wende I nat by possibilitee,
Had ever in this wyde worlde ybe.
Chaucer, Good Women, l. 285.

6†. A step or series of steps; a measure in dancing.

To his lady he come ful curteisly
whanne he thoght tyme to dance with hir a *trace*.
Political Poems, etc. (ed. Furnivall), p. 58.

7. In *fort.*, the ground-plan of a work.—**8.** In *geom.*, the intersection of a plane with one of the planes of projection.—**9.** The record made by a self-registering instrument.—**Foliar trace**, in *vegetable anat.*, a fascicle of fibrovascular bundles, arising in the fibrovascular syster of a stem, and sooner or later passing out into a leaf.—**Primitive trace**, in *embryol.*, same as *primitive groove* (which see, under *primitive*).=**Syn. 1, 3, and 4.** *Trace*, *Vestige*. *Trace* is much broader than *vestige*. A *vestige* is something of the nature of signs or remains, very small in amount, showing that a thing has been in a certain place: as, not a *vestige* of the banquet remained. *Trace* may have this sense of a last faint mark or sign of previous existence or action; or it may stand for a very small amount of any sort: as, a *trace* of earthy matter in water; or it may stand for the sign, clue, or track by which pursuit may be made: as, to get upon the *trace* of game or of a fugitive.

trace[2] (trās), *n.* [Early mod. E. *trays*; < ME. *trayce*, *trayse*, prop. **trays*, < OF. *trays*, *trais*, traces of a carriage, F. *traits*, pl. of *trait*, *traict*, a cord, chain, or strap by which a carriage is drawn: see *trait*. The word is thus ult. pl. of *trait*; cf. *truce*, also orig. pl.; and for the form, cf. also *dice*.] One of the two straps, ropes, or chains by which a carriage, wagon, or other vehicle is drawn by a harnessed horse or other draft-animal. See cut under *harness*.

Than thinketh he, "Thogh I praunce al byforn,
First in the *trayse*, ful fat and newe shorne,
Yet am I but an hors, and horses law
I mote endure, and with my feeres drawe."
Chaucer, Troilus, l. 222.

Twelve young mules,
New to the plough, unpractised in the *trace*.
Pope, Odyssey.

In the traces, of persons, in harness; at regular and steady employment, especially such as one has become well versed in.—**Ladies' traces**, a form (probably a preferable one) of *lady's-tresses*.—**To kick over the traces.** See *kick*.

trace[2] (trās), *v. t.*; pret. and pp. *traced*, ppr. *tracing*. [< *trace*[2], *n.*] To hitch up; put in the traces.

My fur ahin' [off wheel-horse] 's a wordy [worthy] beast
As e'er in tug or tow was *trac'd*. *Burns*, The Inventory.

trace[3] (trās), *v. t.* *Naut.*, a form of *trice*[1].

traceability (trā-sa-bil'i-ti), *n.* [< *traceable* + *-ity* (see *-bility*).] The state of being traceable; traceableness.

traceable (trā'sa-bl), *a.* [< *trace*[1] + *-able*.] Capable of being traced.

A boundless continent, having no outline *traceable* by man. *De Quincey*, Herodotus.

Scarcely *traceable* tracts, paths, rude roads, finished roads, successively arise.
H. Spencer, Prin. of Sociol., § 270.

traceableness (trā'sa-bl-nes), *n.* The state of being traceable; traceability. *Imp. Dict.*

traceably (trā'sa-bli), *adv.* In a traceable manner; so as to be traced. *Encyc. Brit.*, XVIII. 768.

trace-buckle (trās'buk'l), *n.* A long heavy buckle by which a harness-trace is attached to a tug. *E. H. Knight*. See cut under *harness*.

trace-chain (trās'chān), *n.* A chain used as a harness-trace.

trace-fastener (trās'fâs'nėr), *n.* A hook or catch to attach the hind end of a trace to a swingletree. *E. H. Knight*.

trace-hook (trās'hůk), *n.* A hook on the end of a swingletree for engaging a harness-trace. *E. H. Knight*.

trace-horse (trās'hôrs), *n.* One of the two outside horses where three or four are driven abreast.

traceless (trās'les), *a.* [< *trace*[1] + *-less*.] That may not be traced; showing no mark or trace.

On *traceless* copper sees imperial heads.
Wolcot (Peter Pindar), Subjects for Painters.

tracelessly (trās'les-li), *adv.* Without leaving a trace.

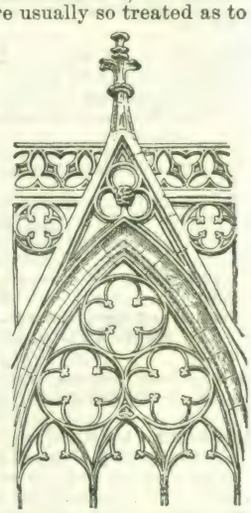
trace-loop (trās'löp), *n.* A square loop of metal serving to attach a harness-trace to the trace-post or the end of a swingletree. *E. H. Knight*.

trace-mate (trās'māt), *n.* Same as *trace-horse*.

They termed the two next the pole yoke-steeds, and those on the right and left outside *trace-mates* [in ancient chariots]. *L. Wallace*, Ben-Hur, p. 208.

★**tracer** (trā'sėr), *n.* [< *trace*[1] + *-er*[1].] One who or that which traces, in any sense.

Pliny, the onely man among the Latines who is a diligent and curious *tracer* of the prints of Nature's footsteps. *Hakewill*, Apology, III. i. 5.



(*a*) A small slender steel instrument, having a handle in the middle and its ends pointed more or less, and one of them usually also curved and edged, used in dissection as a compromise between scalpel and probe for tracing out the course of nerves, vessels, etc. It is usually held like a pen, and may be pushed into or drawn through tissue, as desired. Also called *seeker*. (*b*) One whose duty it is to trace or search out missing articles, as railway-cars, milk-cans, or letters.

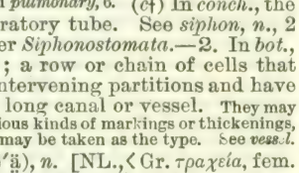
Nearly all the great roads employ a corps of what are known as "lost car searchers" or *tracers*.
Sci. Amer., N. S., LIX. 217.

(*c*) An inquiry sent out from a post-office, express-office, railway-station, or other establishment after some missing letter, package, car, etc. (*d*) One who copies or makes tracings of drawings, etc. (*e*) An instrument, like a stylus, for tracing drawings, etc., on superimposed paper. (*f*) A simple kind of pantograph. (*g*) A form of outline- or copying-machine. It consists essentially of a long bar balanced by means of a universal joint near one end. The longer arm is directed toward the drawing, design, or other work to be copied on a reduced scale, and the shorter arm carries a pencil. On moving the point of the long arm over the work, the pencil on the short arm reproduces a reduced copy of the work on paper held before it. By reversing the relative positions of the pointer and pencil, an enlarged copy may be made. Also called *tracing-machine*. (*h*) A tool, sometimes a small smooth-edged wheel set in a handle, by means of which a continuous line is impressed, as in ornamental metal-work.

traceried (trā'sėr-id), *a.* [< *tracery* + *-ed*[2].] Ornamented with tracery of any kind. *Quarterly Rev.*, CXLV. 427.

★**tracery** (trā'sėr-i), *n.* [< *trace*[1] + *-ery*.] **1.** In *arch.*, permanent openwork built in a window, or an opening of similar character, in the form of mullions, which are usually so treated as to be ornamental, and, especially in mediæval architecture, form in the head of the window arches and foliated curves, and later flowing lines, intersecting and enriched in various ways. The origin of tracery is due to the increase in the size of windows, which about the middle of the twelfth century became too large to be glazed safely without division by means of supports or mullions. At first the simple supports needed were provided, but the new feature began almost at once to be treated as an ornament, and was developed as such with the style, so that the tracery forms one of the surest criterions for determining the age and the place in art of a medieval building. Pure, delicate, and simple in outline until toward the close of the thirteenth century, tracery becomes less graceful and more elaborate in the fourteenth, and in the fifteenth flames out into the tongues and waves and spirals of the Flamboyant in France, and in England takes on the formal and mechanical repetitions of the Perpendicular style. With the Renaissance its forms are simplified to plain curves and rectangles. The most admirable medieval tracery is the French; the Italians excelled in pierced tracery or plate-tracery. The subdivisions of groined vaul'ts, or any ornamental designs of the same nature for doors, paneling, ceilings, etc., are often termed *tracery*. See also cuts under *lancet-window*, *geometric*, *decorated*, *plate-tracery*, *rose-window*, *flamboyant*, *perpendicular*, *mullion*, *fan-tracery*, and *foliation*.

Tracery: type of complete development, at the close of the 13th century.—Window-head of the Church of St. Urbain, Troyes, France.



2. In *decorative art*, scrollwork or foliated ornament having no strong resemblance to nature: a term used loosely, and applied to work of many materials.—**3.** In *lace-making*, a pattern or added decoration, in general produced by raised ridges or bars: it is peculiar to pillow-lace or bobbin-lace.—**4.** Any sculpture or ornamentation suggesting architectural tracery: as, the delicate *tracery* of an insect's wings. See *sculpture*, 4.—**Bar-tracery**, tracery formed of comparatively slender and long bars of stone, as distinguished from *pierced tracery* (see *plate-tracery*), and from tracery entirely built up of courses of small blocks.

There is a fine one [wheel window], of *bar tracery*, in the south transept of York.
C. H. Moore, Gothic Architecture, p. 160.

★**trachea**[1] (trā-kē'ä, commonly trā'kē-ä), *n.*; pl. *tracheæ* (-ē). [NL., < LL. **trachēa*, *trachīa*, < Gr. τραχεῖα, the windpipe; prop. τραχεῖα ἀρτηρία (L. *arteria aspera*), lit. 'rough artery,' so called with ref. to the rings of gristle; fem. of τραχύς, rough, rugged, harsh.] **1.** In *anat.* and *zool.*: (*a*) The principal air-passage of the body; the windpipe, beginning at the larynx and ending at the bronchial tubes. It is a musculomembranous

tube, stiffened and held open by a series of many cartilaginous or osseous rings, the first of which is usually specialized (see *cricoid*), and the last one or more of which are variously modified to provide for the forking of the single tracheal tube into a pair of right and left bronchial tubes (see *pessulus*). Through the larynx the trachea communicates with the mouth and nose and so with the exterior, and through the bronchial tubes with the lungs; and air passes through it at each inspiration and expiration. The trachea exists in all vertebrates which breathe air with lungs, and is subject to comparatively little variation in character. In man the trachea is a cylindrical membranocartilaginous tube about as thick as one's finger, and 4½ inches long, extending from the sixth cervical to the fourth dorsal vertebra, where it branches into the bronchi, lying along the front of the spinal column, the esophagus interposing between it and the vertebræ. The thyroid body is saddled upon it. Its structure includes many cartilaginous rings, some white fibrous tissue, yellow elastic tissue, muscular fibers, mucous membrane, and glands, besides nerves and blood-vessels. The tracheal rings (see *ring*[1]) are from sixteen to twenty in number, incomplete in a part of their circumference, being about one third filled in by fibrous tissue. The highly modified first ring, or cricoid, is usually excluded from this association and described as a part of the larynx. Tracheal mucous glands are found in abundance as small flattened oval bodies, with excretory ducts which pierce the fibrous, muscular, and mucous coats to open on the surface of the mucous membrane. The arteries of the trachea are derived from the inferior thyroid; the tracheal veins empty in the thyroid vein; the nerves are from the pneumogastric and recurrent and the sympathetic. The trachea in other mammals resembles that of man. In birds the trachea presents several peculiarities; especially in long-necked birds this organ does not always follow the S-shaped curve of the cervical vertebræ, and requires special contrivance for shortening and lengthening when the neck is bent and straightened. The whole structure is highly elastic, and the rings are peculiarly beveled on opposite sides alternately, so that each one may slip half over another to right and left. In some long-necked birds, as cranes and swans, the windpipe makes large folds or coils in the interior of the breast-bone or under the skin of the breast. The rings are prone to ossify in birds, and some of them are often greatly enlarged in caliber and soldered together into a large gristly or bony capsule, the *tracheal tympanum*, also called *labyrinth*. Besides its intrinsic muscles, the trachea is provided with others which pass to the furculum or sternum, or both. The lower end of the trachea is peculiarly modified in nearly all birds to form the lower larynx, or syrinx. See *syrinx*, 4 (with cut), also cuts under *larynx*, *lung*, and *pessulus*. (*b*) In *Arthropoda*, as insects, one of the tubes which traverse the body and generally open by stigmata upon the exterior, thus bringing air to the blood and tissues generally, and constituting special respiratory organs. Other forms of respiratory organs in arthropods are branchiæ, tracheobranchiæ, and pulmonary sacs. See *branchiæ*, 2, *tracheobranchia*, and *pulmonary*, 6. (*c*†) In *conch.*, the siphon, or respiratory tube. See *siphon*, *n.*, 2 (*a*), and cut under *Siphonostomata*.—2. In *bot.*, a duct or vessel; a row or chain of cells that have lost their intervening partitions and have become a single long canal or vessel. They may be covered with various kinds of markings or thickenings, of which the spiral may be taken as the type. See *vessel*.

Trachea[2] (trā-kē′ạ), *n.* [NL., < Gr. τραχεία, fem. of τραχύς, rough: see *trachea*[1].] A notable genus of noctuid moths, containing one species, *T. piniperda*, known to English collectors as the *pine-beauty*. It is a common pest to pine and fir forests in Scotland and through northern and central Europe. The larva is slender, naked, and green, with three white lines on the back and a yellow or red line on the sides, and feeds on the older pine-needles. It passes the winter as pupa on or under the ground. This genus was named by Hübner in 1816. *T. piniperda* is now placed in *Pinolis*.

Trachea (Pinolis) piniperda.

tracheal (trā′kē-ạl), *a.* [< NL. *trachealis*, < *trachea*, windpipe: see *trachea*[1].] 1. Of or pertaining to the trachea or windpipe: as, *tracheal* rings or cartilages; *tracheal* vessels; *tracheal* respiration.—2. In *bot.*, of or pertaining to tracheæ.—**Tracheal arteries**, branches of the inferior thyroid ramifying upon the trachea.—**Tracheal gill**. See *gill*[1].—**Tracheal glands**. See *gland*.—**Tracheal opercula**. See *operculum* (*b*) (9).—**Tracheal râles**, bubbling sounds caused by the presence of liquid in the trachea, such as may be heard just before death, from the inability of the patient to expectorate; the death-rattle.—**Tracheal rings**. See *trachea*[1], 1 (*a*), and *ring*[1].—**Tracheal tube**. See *trachea*[1], 1 (*a*).—**Tracheal tympanum**. See *trachea*[1], 1 (*a*), and *tympanum*.

trachealis (trā-kē-ā′lis), *n.*; pl. *tracheales* (-lēz). [NL. (sc. *musculus*): see *tracheal*.] An intrinsic muscle of the windpipe. In man the name is applied to the set of circular or transverse muscular fibers.

trachean (trā′kē-ạn), *a.* [< *trachea*[1] + *-an*.] Having tracheæ or trachea-like organs: as, a *trachean* arachnid; characterized by breathing through tracheæ: as, *trachean* respiration; having the form or functions of tracheæ: as, *trachean* branchiæ. Also *tracheate* and *tracheary*.

Trachearia (trā-kē-ā′ri-ạ), *n. pl.* [NL., neut. pl. of **trachearius*: see *tracheary*.] The tracheate arachnidans, an order of *Arachnida* comprising those which breathe by tracheæ alone. It comprises the mites or acarids, the harvestmen or opilionines, the solpugids, and the false scorpions. See *Pulmotrachearia*. Also *Trachearieæ* and *Tracheata*.

trachearian (trā-kē-ā′ri-ạn), *a.* and *n.* [< *Trachearia* + *-an*.] I. *a.* Of or pertaining to the *Trachearia*; tracheate; trachean; tracheary.

II. *n.* A tracheate arachnidan; a tracheary.

tracheary (trā′kē-ạ-ri), *a.* and *n.* [< NL. **trachearius*, < *trachea*, windpipe: see *trachea*[1].] I. *a.* Of or pertaining to the trachea or tracheæ; breathing by means of tracheæ, not by pulmonary sacs, as an arachnidan.—**Tracheary tissue**, in *bot.*, tissue composed of both tracheæ and tracheïds. Also called *trachenchyma*.

II. *n.* A member of the *Trachearia*.

Tracheata (trā-kē-ā′tạ), *n. pl.* [NL., neut. pl. of **tracheatus*, tracheate: see *tracheate*.] Same as *Trachearia*.

tracheate (trā′kē-āt), *a.* and *n.* [< NL. **tracheatus*, < *trachea*, windpipe: see *trachea*[1].] I. *a.* Having a trachea or tracheæ; pertaining to the *Tracheata* or *Trachearia*; tracheary.

II. *n.* Any tracheate arthropod; a tracheary.

tracheated (trā′kē-ā-ted), *a.* [< *tracheate* + *-ed*[2].] Same as *tracheate*. [Rare.]

> The terrestrial *tracheated* air-breathing Scorpionidæ. *Encyc. Brit.*, VI. 654.

tracheïd (trā-kē′id), *n.* [< *trachea* + *-id*[2].] In *bot.*, a single elongated taper-pointed and more or less lignified cell, usually having upon its surface peculiar markings known as discoid markings or bordered pits, and especially characteristic of the wood of gymnosperms. In a longitudinal radial section of pine wood, for example, the surface of the cells or tracheïds presents a dotted appearance, due to the presence of one or more longitudinal series of bordered pits. These bordered pits have the appearance of concentric circles, and are really thin places in the wall of the cell; and in transverse section it may be seen that they are pits with an arched dome, and that the thin spot is common to two contiguous cells.

tracheïdal (trā-kē′i-dạl), *a.* [< *tracheïd* + *-al*.] In *bot.*, pertaining to tracheïds, or having their nature.

tracheitis (trā-kē-ī′tis), *n.* [NL.] Same as *trachitis*.

trachelalis (trak-ē-lā′lis), *n.*; pl. *trachelales* (-lēz). [NL., < Gr. τράχηλος, neck, + L. term. *-alis* (see *-al*).] A muscle of the back of the neck, commonly called *trachelomastoideus*. *Coues*, 1887.

trachelate (trak′ē-lāt), *a.* [< NL. **trachelatus*, < Gr. τράχηλος, neck, throat.] In *entom.*, having the form of a neck: said of the prosternum when it is produced anteriorly in a slender neck, as in certain *Hymenoptera*.

Trachelia[1] (trā-kē′li-ạ), *n. pl.* [NL., < Gr. τράχηλος, neck, throat.] In Latreille's classification of insects, a division of heteromerous *Coleoptera*, including such genera as *Meloë*, *Lytta*, and *Rhipiphorus*: distinguished from *Atrachelia*. Also *Trachelida*, *Trachelides*.

trachelia[2] (trā-kē′li-ạ), *n.* Plural of *trachelium*.

tracheliate (trā-kē′li-āt), *a.* [< *Trachelia* + *-ate*[1].] Of or pertaining to the *Trachelia*: as, a *tracheliate* beetle.

Trachelida (trā-kel′i-dạ), *n. pl.* [NL., as *Trachelia* + *-ida*.] Same as *Trachelia*.

trachelidan (trā-kel′i-dạn), *a.* and *n.* [< *Trachelida* + *-an*.] I. *a.* In *entom.*, having the head narrowed behind into a neck; of or pertaining to the *Trachelia*.

II. *n.* A trachelidan beetle.

Tracheliidæ (trak-ē-lī′i-dē), *n. pl.* [NL., < *Trachelius* + *-idæ*.] A family of holotrichous infusorians, whose type-genus is *Trachelius*. These animalcules are free-swimming, ovate or elongate, highly elastic, and ciliate throughout. The oral cilia are slightly larger than those of the general cuticular surface, and the oral aperture is situated at the base of a more attenuate and often trunk-like anterior prolongation (whence the name). Genera besides *Trachelius* are *Amphileptus* and *Loxophyllum*.

trachelipod (trā-kel′i-pod), *a.* and *n.* [< *Trachelipoda*.] I. *a.* Pertaining to the *Trachelipoda*, or having their characters.

II. *n.* A member of the *Trachelipoda*.

Trachelipoda (trak-ē-lip′ọ-dạ), *n. pl.* [NL., irreg. < Gr. τράχηλος, neck, + πούς (ποδ-) = E. *foot*.] In Lamarck's classification, the third order of mollusks, containing those univalves whose foot is attached to the neck (whence the name), and whose shell is spiral. They were contrasted with his gastropods (see *Gasteropoda* (*b*)). The trachelipods were primarily divided into two series or sections, phytophagous and zoöphagous, with many families in each. [Not in use.]

trachelipodan (trak-ē-lip′ọ-dạn), *a.* [< *trachelipod* + *-an*.] Same as *trachelipod*.

trachelipodous (trak-ē-lip′ọ-dus), *a.* [< *trachelipod* + *-ous*.] Same as *trachelipod*.

trachelium (trā-kē′li-um), *n.*; pl. *trachelia* (-ạ). [NL., < Gr. τράχηλος, the neck, throat, the middle part of a column.] 1. In *arch.*, the neck of a column (which see, under *neck*). See cut under *hypotrachelium*.—2. [*cap.*] [Tournefort, 1700; earlier used by Lobel, 1576.] A genus of dicotyledonous plants, of the family *Campanulaceæ*. It is distinguished from the type genus *Campanula* by densely corymbose flowers with narrowly tubular corollas slightly three-cleft at the apex. The 2 species are both natives of the Mediterranean region. They are perennial herbs or undershrubs, with tall stems bearing panicled corymbs of very numerous blue flowers, or in one species producing numerous short stems with the flower-clusters somewhat umbellate. *T. cæruleum* is cultivated for its flowers, under the name of *throatwort*.

Trachelius (trā-kē′li-us), *n.* [NL. (Schrank, 1803; Ehrenberg), < Gr. τράχηλος, neck.] The typical genus of *Tracheliidæ*, having highly vacuolar or reticulate protoplasm. *T. ovum*, which inhabits bogs, is the only well-established species.

trachelo-acromial (trā-kē′lō-a-krō″mi-ạl), *a.* and *n.* [< Gr. τράχηλος, neck, + ἀκρώμιον, ἀκρωμία, the point of the shoulder-blade: see *acromial*.] I. *a.* Connecting the shoulder-blade with cervical vertebræ, as a muscle; common to the neck and to the acromion.

II. *n.* The trachelo-acromial muscle.

trachelo-acromialis (trā-kē′lō-a-krō-mi-ā′lis), *n.*; pl. *trachelo-acromiales* (-lēz). [NL.: see *trachelo-acromial*.] The trachelo-acromial muscle. Also called *levator claviculæ* (which see, under *levator*).

Trachelobranchia (trā-kē-lō-brang′ki-ạ), *n. pl.* [< Gr. τράχηλος, neck, + βράγχια, gills.] A section of docoglossate gastropods having a cervical gill, consisting only of the *Tecturidæ* (or *Acmæidæ*).

trachelobranchiate (trā-kē-lō-brang′ki-āt), *a.* Having gills on the neck, as certain mollusks; cervicobranchiate; specifically, of or pertaining to the *Trachelobranchia*.

Trachelocerca (trā-kē-lō-sėr′kạ), *n.* [NL. (Ehrenberg), < Gr. τράχηλος, neck, + κέρκος, tail.] The typical genus of *Trachelocercidæ*, with a conspicuous apical annular groove, terminal mouth, and elastic extensile neck. *T. olor* is the swan-animalcule, so called from the long swan-like neck, and is found in ponds. It was formerly considered a vibrio and called *Vibrio proteus*, *V. olor*, or *V cygnus*. It is one of the infusorians longest known, having been described as a "proteus" by Baker in 1752. The aspect of the animalcule as it swims, alternately contracting and extending the long neck, and swaying it from side to side in search of food, is not unlike that of the bird named, and has also been likened to the supposed action of a plesiosaur.

Trachelocercidæ (trā-kē-lō-sėr′si-dē), *n. pl.* [NL., < *Trachelocerca* + *-idæ*.] A family of holotrichous ciliate infusorians, typified by the genus *Trachelocerca*. They are free-swimming animalcules, flask-shaped or elongate, with neck-like prolongation and annular apical groove, a soft flexible cuticular surface, specialized oral cilia, and mouth terminal or nearly so.

tracheloclavicular (trā-kē″lō-kla-vik′ū-lạr), *a.* [< Gr. τράχηλος, neck, + NL. *clavicula*, clavicle: see *clavicular*.] Pertaining or common to the neck and to the collar-bone, as a muscle between them.

tracheloclavicularis (trā-kē″lō-kla-vik-ū-lā′ris), *n.*; pl. *tracheloclaviculares* (-rēz). [NL.: see *tracheloclavicular*.] A small anomalous muscle of man, which sometimes extends from a low cervical vertebra, as the sixth, to some part of the clavicle.

trachelomastoid (trā-kē-lō-mas′toid), *a.* and *n.* [< Gr. τράχηλος, neck, + E. *mastoid*.] I. *a.* Connecting the neck with the mastoid process of the temporal bone, as a muscle of the back of the neck.

II. *n.* The trachelomastoideus or trachelalis.

trachelomastoideus (trā-kē″lō-mas-toi′dē-us), *n.*; pl. *trachelomastoidei* (-ī). [NL.: see *trachelomastoid*.] The trachelomastoid muscle of the nape of the neck. It lies on the inner side of the transversalis colli, between this and the complexus, arises by several tendons from the transverse processes of cervical and some upper dorsal vertebræ, and is inserted into the mastoid beneath the insertions of the splenius and the sternomastoid.

trachelo-occipital (trā-kē″lō-ok-sip′i-tạl), *a.* [< Gr. τράχηλος, neck, + L. *occiput* (*occipit-*), occiput: see *occipital*.] Pertaining or common to the nape of the neck and to the hindhead: specifying a muscle of this region, now commonly called *complexus*.

trachelo-occipitalis (trā-kē″lō-ok-sip-i-tā′lis), *n.*; pl. *trachelo-occipitales* (-lēz). [NL.: see *trachelo-occipital*.] The trachelo-occipital muscle, or complexus. See *complexus*[2].

trachelorraphy (trak-ē-lor′a-fi), *n.* [< Gr. *τράχηλος*, neck, + *ῥαφή*, sewing, < *ῥάπτειν*, sew.] In *surg.*, the plastic operation for restoring a fissured cervix uteri.

tracheloscapular (trā-kē-lō-skap′ū-lär), *a.* [< Gr. *τράχηλος*, neck, + LL. *scapula*, shoulder: see *scapular*.] Coming from or common to the side of the neck and the scapular region, or shoulder: specifying certain veins which contribute to form the external jugular.

Trachelospermum (trā-kē-lō-spėr′mum), *n.* [NL. (Lemaire, 1851), so named when supposed to produce seeds with a distinct neck or beak; < Gr. *τράχηλος*, a neck, + *σπέρμα*, seed.] A genus of dicotyledonous sympetalous plants, of the family *Apocynaceæ*, tribe *Echitideæ*. It is characterized by seeds without a beak and by loosely corymbose cymes of regular flowers having a glandular or scaly calyx, and a salver-shaped corolla with oblong lobes and a constricted throat. There are 6 Asiatic species, and a seventh in the southern United States. They are shrubby climbers, with opposite leaves and white flowers. *T. difforme*, a native of river-banks from Delaware to Florida, Texas, and Mexico, is a climber reaching about 10 feet high, and bearing numerous creamy flowers in spring and summer. *T. divaricatum* is the Shanghai jasmine of greenhouses, formerly cultivated under the names *Parechites* and *Rhynchospermum*.

trachenchyma (trā-keng′ki-mą), *n.* [NL., < Gr. *τραχεῖα*, windpipe, + *ἔγχυμα*, that which is poured in (cf. *parenchyma*): see *enchymatous*.] In *bot.*, same as *tracheary tissue*. See *tracheary*.

tracheobranchia (trā-kē-ō-brang′ki-ą), *n.*; pl. *tracheobranchiæ* (-ē). [NL., < Gr. *τραχεῖα*, windpipe, + *βράγχια*, gills.] A breathing-organ of certain aquatic insect-larvæ, combining the character of a gill with that of an ordinary trachea.

> The so-called *Tracheo-branchiæ* . . . are in no sense branchiæ, but simply take the place of stigmata.
> *Huxley*, Anat. Invert., p. 221.

tracheobronchial (trā-kē-ō-brong′ki-al), *a.* [< Gr. *τραχεῖα*, windpipe, + *βρόγχια*, the bronchial tubes: see *bronchial*.] Pertaining to the trachea and the bronchi: same as *bronchotracheal*.

tracheocele (trā-kē′ō-sēl), *n.* [< Gr. *τραχεῖα*, windpipe, + *κήλη*, tumor.] An enlargement of the thyroid gland; bronchocele or goiter.

tracheophone (trā-kē′ō-fōn), *a.* and *n.* [As *Tracheophones*.] **I.** *a.* Of or pertaining to the *Tracheophones*.

II. *n.* A bird of the group *Tracheophones*.

Tracheophones (trā-kē-ō-fō′nēz), *n. pl.* [NL., < Gr. *τραχεῖα*, windpipe, + *φωνή*, voice.] In *ornith.*, in Johannes Müller's classification (1847), one of three tribes of an order *Insessores*, containing certain South American families, distinguished by the construction of the syrinx both from the *Polymyodi* and from the *Picarii* of the same author. These birds are a part of the formicarioid *Passeres* of Wallace; and the name (also and preferably in the form *Tracheophonæ*) has of late more definitely attached to certain South American mesomyodian *Passeres*, represented by the very large families *Formicariidæ* and *Dendrocolaptidæ* and their immediate allies.

tracheophonine (trā-kē-ō-fō′nin), *a.* [< *tracheophone* + *-ine*[1].] Same as *tracheophone*. *Encyc. Brit.*, XXIV. 689, note.

tracheophonous (trā-kē′ō-fō-nus), *a.* [< *tracheophone* + *-ous*.] Same as *tracheophone*.

tracheoscopic (trā-kē-ō-skop′ik), *a.* [< *tracheoscop-y* + *-ic*.] Pertaining to or of the nature of tracheoscopy.

tracheoscopist (trā-kē′ō-skō-pist), *n.* [< *tracheoscop-y* + *-ist*.] One who practises tracheoscopy.

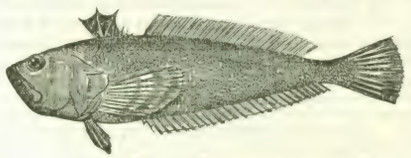
tracheoscopy (trā-kē′ō-skō-pi), *n.* [< Gr. *τραχεῖα*, windpipe, + *-σκοπία*, < *σκοπεῖν*, view.] The inspection of the trachea, as with a laryngoscope.

tracheostenosis (trā-kē″ō-ste-nō′sis), *n.* [NL., < Gr. *τραχεῖα*, windpipe, + *στένωσις*, narrowing: see *stenosis*.] Stenosis of the trachea.

tracheotome (trā-kē′ō-tōm), *n.* [< Gr. *τραχεῖα*, windpipe, + *-τομος*, < *τέμνειν*, *ταμεῖν*, cut.] A surgical knife used in tracheotomy.

tracheotomist (trā-kē-ot′ō-mist), *n.* [< *tracheotom-y* + *-ist*.] One who performs tracheotomy.

tracheotomize (trā-kē-ot′ō-mīz), *v. t.*; pret. and pp. *tracheotomized*, ppr. *tracheotomizing*. [< *tracheotom-y* + *-ize*.] To perform tracheotomy upon. Also spelled *tracheotomise*. *Science*, V. 173.



tracheotomy (trā-kē-ot′ō-mi), *n.* [< Gr. *τραχεῖα*, windpipe, + *-τομία*, < *τέμνειν*, *ταμεῖν*, cut.] In *surg.*, the operation of making an opening into the trachea or windpipe.—**Tracheotomy-tube**, the tube used after tracheotomy for insertion into the opening made in the trachea, to facilitate breathing. Compare *intubation*.

Trachinidæ (trą-kin′i-dē), *n. pl.* [NL., < *Trachinus* + *-idæ*.] A family of acanthopterygian fishes, of which the genus *Trachinus* is the type; the weevers. They are related to the cottoids or mailcheeks, and also to the star-gazers, and are noted for the pungency of their opercular and dorsal spines, which, though not connected with special poison-glands, may inflict serious wounds. There are two dorsal fins, the first of which is short and is composed of about six strong pungent spines; the second dorsal and the anal are both long; and the ventrals are in advance of the pectorals, and have a spine and five rays; the body is highest at the nape; the head is compressed, cuboid, with lateral and protrusive eyes, and very oblique cleft of the mouth; and the preorbitals as well as the preoperculars are armed with spines. The family was formerly taken in a more comprehensive sense, then including the members of several other families, as *Uranoscopidæ*, *Sillaginidæ*, *Notothenüidæ*, etc. As now limited it has but few species, mostly confined to the Mediterranean and Atlantic waters, though one occurs along the coast of Chili. The two British species are justly dreaded, and have many local names alluding to their means of defense, as *adder-fish*, *sea-adder*, *sting-fish*, *sting-bull*, *stangster*, etc. None are found on North American shores. See cut under *Trachinus*.

trachinoid (trak′i-noid), *a.* and *n.* [< *Trachinus* + *-oid*.] **I.** *a.* Resembling or related to the weevers; having the characters of the *Trachinidæ*; of or pertaining to the *Trachinidæ*.

II. *n.* A trachinoid fish.

Trachinus (trą-kī′nus), *n.* [NL. (Linnæus, 1758), < Gr. *τραχίς*, rough, rugged.] The typical genus of *Trachinidæ*. *T. draco* is the dragon-

Lesser Weever (*Trachinus vipera*).

weever; the lesser weever is *T. vipera*. The former is about 12 inches long, the latter 6.

trachitis (trą-kī′tis), *n.* [NL., more prop. *tracheitis*, < *trachea*, the windpipe, + *-itis*.] Inflammation of the trachea or windpipe.—**Pseudomembranous trachitis**. See *pseudomembranous*.

trachle, trauchle (träch′l, trâch′l), *v. t.* [By some regarded as a perverted form of *draggle*; cf. Gael. *trachladh*, fatigue.] 1. To draggle or bedraggle.—2. To overburden or fatigue; exhaust or wear out with prolonged exertion. [Scotch in both uses.]

trachle, trauchle (träch′l, trâch′l), *n.* [See *trachle*, *v.*] A prolonged wearing or exhausting effort, as in walking a long distance or over heavy roads; a heavy pull. [Scotch.]

trachly (träch′li), *a.* [< *trachle* + *-y*[1].] Bedraggled; slovenly; dirty. [Scotch.]

trachoma (trą-kō′mą), *n.* [NL., < Gr. *τράχωμα*, roughness, < *τραχίς*, rough, + *-oma*.] In *surg.*, a contagious granular inflammation of the conjunctiva of the eyelids, often accompanied with haziness and vascularity of the cornea; granular lids; also, krausosis of the vaginal mucous membrane.—**Trachoma glands**. See *gland*.

trachomatous (trą-kom′a-tus), *a.* [< *trachoma*(*t-*) + *-ous*.] Pertaining to, of the nature of, or affected with trachoma.

Trachomedusæ (trak″ō-mē-dū′sē), *n. pl.* An incorrect form of *Trachymedusæ*. *Haeckel; E. R. Lankester*.

Trachurops (trą-kū′rops), *n.* [NL. (Gill, 1862), < *Trachurus* + Gr. *ὤψ*, face, aspect, appearance, eye.] A genus of carangoid fishes, of fusiform shape, with the hinder part of the lateral line plated, the shoulder-girdle with a deep cross furrow at its junction with the isthmus, and the eye very large. *T. crumenophthalma* is the big-eyed scad, also called *goggler* and *goggle-eyed jack* (which see, under *goggle-eyed*): in Hawaii, *akule*.

Trachurus (trą-kū′rus), *n.* [NL. (Rafinesque, 1810), < L. *trachurus*, < Gr. *τράχουρος*, *τραχοῦρος*, the horse-mackerel, < *τραχίς*, rough, + *οὐρά*, tail.] A genus of carangoid fishes, the saurels, having the lateral line armed with bony carinate plates for its whole length. *T. trachurus*, also called *scad*, *horse-mackerel*, and *skipjack*, is greenish with silvery sides and a dusky opercular spot, and is a foot long. It inhabits Atlantic waters both of Europe and of the United States. See cut under *scad*.

trachybasalt (trak-i-bą-sâlt′), *n.* [< Gr. *τραχύς*, rough, + E. *basalt*.] The name given by Bořicky to a variety of basalt. It is dark-gray, very fine-grained, with more or less calcitic and zeolitic matter dispersed through it, and is the latest member of the basaltic formation of Bohemia.

trachycarpous (trak-i-kär′pus), *a.* [< Gr. *τραχύς*, rough, + *καρπός*, fruit.] In *bot.*, having rough fruit.

Trachycarpus (trak-i-kär′pus), *n.* [NL. (Wendland, 1861), so called with ref. to the woolly fruit of one species; < Gr. *τραχύς*, rough, + *καρπός*, fruit.] A genus of palms, of the tribe *Sabaleæ*. It is characterized by polygamously monœcious flowers with valvate segments, and an ovary of three distinct acute carpels connate at the base, each with a sessile stigma terminal in fruit. There are 4 species, 2 natives of the mountains of northern India and Burma, one in China, and another in Japan. They are thornless palms, densely clothed above with a fibrous netting remaining from the leaf-sheaths. They bear terminal roundish leaves deeply cut into narrow two-cleft segments, with a biconvex petiole, and entire densely fibrous sheath. The short or elongated numerous robust spadices are densely or loosely flowered, and covered at first by numerous large, compressed, obliquely cut woolly spathes. The flowers are small and yellowish, followed by a roundish fruit with thin fleshy pericarp, and a single erect free seed with equable corneous albumen. They vary very much in habit. *T. Martiana*, of the Himalayas, produces tall solitary trunks; in others the stems are low and tufted. The fruit is either blue or saffron-colored. The species have been often described under the genus *Chamærops*. *T. excelsa* is known as *hemp-palm*. *T. Fortunei*, the Chinese fan-palm, considered the only palm which is at all hardy in England, is the source in China of a fibrous matting used for cordage, and made into clothing, which is said to be water-proof.

Trachycephalus (trak-i-sef′a-lus), *n.* [NL., < Gr. *τραχύς*, rough, + *κεφαλή*, head.] A genus of *Hylidæ*, characterized by the extensive cranial ossifications, which cause the head to seem bare and rough on the upper side. *T. lichenatus* is a species known as the *lichened tree-toad*.

Trachycomus (trą-kik′ō-mus), *n.* [NL. (Cabanis, 1850), < Gr. *τραχύς*, rough, + *κόμη*, hair: see *coma*[2].] A genus of timeliine birds of the Oriental region. *T. ochrocephalus* is the yellow-crowned thrush or bulbul, formerly also called *Ceylonese stare*, ranging through the Malay peninsula to Java, Sumatra, and Borneo.

Trachyglossa (trak-i-glos′ą), *n. pl.* [NL., < Gr. *τραχύς*, rough, + *γλῶσσα*, tongue.] A primary group of octopods, including all those which have radular teeth: contrasted with *Lioglossa*. It embraces all octopods except the *Cirroteuthidæ*.

trachyglossate (trak-i-glos′āt), *a.* and *n.* **I.** *a.* Having the tongue rough with radular teeth, as an octopod; of or relating to the *Trachyglossa*.

II. *n.* Any member of the *Trachyglossa*.

Trachylobium (trak-i-lō′bi-um), *n.* [NL. (Hayne, 1827), so called with ref. to the rough pods; < Gr. *τραχύς*, rough, + *λοβός*, pod: see *lobe*.] A genus of leguminous plants, of the suborder *Cæsalpinieæ* and tribe *Amherstieæ*. It is characterized by leaves composed of two coriaceous leaflets, and by flowers with caducous bractlets, each with five petals, all stalked, and somewhat equal, or with the two lower ones minute. There are 2 or 3 species, natives of the tropics in eastern Africa and the Mascarene Islands, with one in Asia, there commonly cultivated. They are trees with white flowers panicled at the ends of the branches. See *copal* and *anime*, 2.

Trachymedusæ (trak″i-mē-dū′sē), *n. pl.* [NL., < Gr. *τραχύς*, rough, + NL. *Medusæ*.] In Haeckel's system of classification, an order of acalephs whose marginal bodies or sense-organs are tentaculicysts, and whose genitals are situated in the course of the radial canals. No hydriform trophosome is known to occur. It is composed of such forms as *Pelagia*, *Trachynema*, *Aglaura*, *Liriope*, and *Geryonia* (or *Carmarina*), and corresponds to a part of the *Haplomorpha* of Carus or of the *Monopsea* of Allman.

trachymedusan (trak″i-mē-dū′san), *a.* and *n.* [< *Trachymedusæ* + *-an*.] **I.** *a.* Pertaining to the *Trachymedusæ*, or having their characters.

II. *n.* A member of the *Trachymedusæ*.

Trachymene (trak-i-mē′nē), *n.* [NL. (Rudge, 1811), so called with ref. to the woolly and somewhat moon-shaped fruit; < Gr. *τραχύς*, rough, + *μήνη*, moon.] A genus of umbelliferous plants, of the tribe *Hydrocotyleæ*. It is distinguished from the related genus *Hydrocotyle* by the absence of stipules. It includes about 14 species, one a native of New Caledonia, and one of Borneo, the others all Australian. They are usually hirsute herbs, with ternately dissected and toothed leaves, and white or blue flowers in simple umbels with linear involucral bracts. The fruit is usually roughened with bristles or tubercles, one of the carpels often smoother or abortive. *T. australis* is known as *Victorian parsnip*.

Trachynematidæ (trak″i-nē-mat′i-dē), *n. pl.* [NL., < *Trachynema*(*t-*), the typical genus (< Gr. *τραχύς*, rough, + *νῆμα*, a thread), + *-idæ*.] A family of hydromedusans, of the order *Trachymedusæ*, typified by the genus *Trachynema* (or *Circe*), having rigid marginal tentacles, and the genitals developed in vesicles in the eight radial canals. Also *Trachynemidæ*.

Trachynotus (trak-i-nō′tus), *n.* [NL. (Lacépède, 1800), < Gr. *τραχύς*, rough, + *νῶτος*, back.] A notable genus of carangoid fishes, with short

free spines on the back (whence the name); the pompanos. There are several species, highly valued as food-fishes. See *pompano*, 1.

trachyphonia (trak-i-fō′ni-ạ), *n.* [NL., < Gr. *τραχύφωνία*, roughness of voice, < *τραχύφωνος*, rough-voiced, < *τραχύς*, rough, + *φωνή*, voice.] Roughness of the voice.

Trachypteridæ (trak-ip-ter′i-dē), *n. pl.* [NL., < *Trachypterus* + *-idæ*.] A family of deep-sea acanthopterygian fishes, typified by the genus *Trachypterus*, of few species, some of which are noted for their fragility. *T. arcticus* is the dealfish (see cut under *deal-fish*), occasionally stranded on the British coasts. The family has been used with varying limits. In Günther's classification it included the *Regalecidæ*, or oar-fishes (see cut under *Regalecus*), and the *Stylophoridæ*. In Gill's it is restricted to tæniosomes with the body moderately long and much compressed; the head and opercular apparatus short (the operculum extended downward, the suboperculum below it, the interoperculum contracted backward and bounded behind by the operculum and suboperculum); the ventral fins with few rays in the young and atrophied or lost in the adult; the cranium with a myodome and basisphenoid; the supraoccipital prominent behind; the epiotics confined to the sides and back of the cranium; and no ribs.

trachypteroid (trā-kip′te-roid), *a.* and *n.* [< *Trachypterus* + *-oid*.] **I.** *a.* Belonging to the *Trachypteridæ*, or having their characters; resembling or related to the king of the salmon.

II. *n.* A fish of the family *Trachypteridæ*.

Trachypterus (trā-kip′te-rus), *n.* [NL. (Gouan, 1770), < Gr. *τραχύς*, rough, + *πτερόν*, wing (fin).] The leading genus of trachypteroid fishes, characterized by the well-developed ventral fins of from four to six branched rays, and the long fan-shaped caudal fin. (See cut under *deal-fish*.) *T. rex-salmonorum* is known as *king of the salmon* (which see, under *king*[1]).

trachyspermous (trak-i-spėr′mus), *a.* [< Gr. *τραχύς*, rough, + *σπέρμα*, seed.] In *bot.*, having rough seeds; rough-seeded.

Trachystomata (trak-i-stō′ma-tạ), *n. pl.* [NL., < Gr. *τραχύς*, rough, + *στόμα*, mouth.] A group of urodele amphibians, of eel-like form and without hind legs, as the *Sirenidæ*. The basioccipital, supra-occipital, and supratemporal bones are suppressed; there is no vomer, intercalare, or maxillary arch; and the ★propodials are distinct. See *Sirenidæ*, 1.

trachyte (trak′it), *n.* [= F. *trachyte* = G. *trachyt*, < Gr. *τραχύτης*, roughness, < *τραχύς*, rough, rugged.] In *petrog.*, the name applied to igneous rocks, mainly effusive, of microlitic porphyritic (trachytic) texture, and composed essentially of alkali feldspar, soda-lime feldspar in small amount, and one or more subordinate minerals of the amphibole, pyroxene, or mica groups. It may be in part vitreous. Trachyte differs from syenite only in texture.—**Greenstone-trachyte**, propylite.—**Quartz-trachyte**, a rock distinguished from trachyte by the presence of quartz.

trachyte-tuff (trak′it-tuf), *n.* A fragmentary eruptive rock made up of trachytic material. See *tuff*[3] and *trachyte*.

Like the other fragmentary volcanic rocks, the tuffs may be subdivided according to the lava from the disintegration of which they have been formed. Thus we have felsite-tuffs, *trachyte-tuffs*, basalt-tuffs, pumice-tuffs, porphyrite-tuffs, etc. ★ *Geikie*, Text Book of Geol., 2d ed., p. 166.

trachytic (trā-kit′ik), *a.* [< *trachyte* + *-ic*.] Pertaining to or consisting of trachyte.

trachytoid (trak′i-toid), *a.* [< *trachyte* + *-oid*.] Belonging to or having the characters of trachyte.—**Trachytoid structure** (as used by Fouqué and Michel-Lévy, in describing the eruptive rocks), a type of structure in which a microlitic matrix is present, with the usual evidences of fluxion, while at the same time there is a more distinct indication of two epochs or stages of crystallization than there is in the granitoid structure as this latter term is limited by these authors.

tracing (trā′sing), *n.* [Verbal n. of *trace*[1], *v.*] 1. The act of one who traces.—2. A track or path; a course.

Not all those precious gems in Heav'n above
Shall yield a sight more pleasing to behold,
With all their turns and *tracings* manifold.
Sir J. Davies, Dancing, st. 13.

3. A mechanical copy of a design or drawing, made by reproducing its lines as seen through a transparent medium, as tracing-paper.

tracing-cloth (trā′sing-klôth), *n.* A smooth thin linen fabric, coated with size, used for making tracings of drawings, plans, etc., as less destructible than tracing-paper. Also called *tracing-linen*.

tracing-instrument (trā′sing-in″strụ-ment), *n.* An instrument of any kind used to facilitate tracing, or to make by tracing an enlarged or a reduced copy. See *tracer* (*g*), and cut under *pantograph*.

tracing-linen (trā′sing-lin″en), *n.* Same as *tracing-cloth*.

tracing-lines (trā′sing-līnz), *n. pl.* *Naut.*, lines in a ship passing through a block or thimble, and used to hoist a thing higher.

tracing-machine (trā′sing-ma-shēn″), *n.* Same as *tracer* (*g*).

tracing-paper (trā′sing-pā″pėr), *n.* 1. See *paper*.—2. Same as *transfer-paper*, 1.

tracing-thread (trā′sing-thred), *n.* In *lace-making:* (*a*) A bordering thread thicker than most of the threads of the fabric, usually indicating the pattern. (*b*) A group or cluster of threads used for such bordering. Compare *trolley-thread* (under *trolley*), and *Mechlin lace* (under *lace*).

tracing-wheel (trā′sing-hwēl), *n.* A wheel used as a tracer; especially, a small toothed wheel attached to a handle by which it is run over a surface to mark a pattern in dotted lines.

track[1] (trak), *v. t.* [A var., prob. due to association with the noun *track*, of *treck* (as in *treck-pot*), or *trick* (see *trick*[3], draw), < MD. *trecken*, D. *trekken*, draw, pull, tow, delineate, sketch, also intr., travel, march, = OFries. *trekka*, *tregga* = MLG. *trecken*, LG. *trekken* = MHG. G. *trecken*, draw, a secondary form of a strong verb seen in OHG. *trehhan*, MHG. *trechen*, draw, shove, scrape, rake. The L. *trahere*, draw (whence ult. E. *tract*[1], *trace*[1]), is a different word. Cf. *track*[2], *n.* and *v.*] 1. To draw; specifically, to draw or tow (a boat) by a line reaching from the vessel to the bank or shore.—2†. To draw out; protract; delay.

Yet by delaies the matier was alwaies *tracked*, and put over without any fruteful determination.
Strype, Eccles. Mem., Hen. VIII., Originals No. 13.

track[1] (trak), *n.* [< MD. *treck*, *treke*, D. *trek*, a drawing, train, delineation, feature; from the verb: see *track*[1], *v.* Cf. *track*[2], *n.*, and *tract*[1], *n.*, 6, with which *track*[1] is confused, and to which it may be in part or wholly due (so *track*[3] for *tract*[1]). Cf. *trick*[2], *n.*] A feature; lineament. ★[Scotch.]

track[2] (trak), *n.* [Formerly also *tract* (by confusion with *tract*[1]); < OF. *trac*, a track, trace, a beaten way or path, a course, F. *trac*, track, < MD. *treck*, *treke*, a drawing, draft, delineation, feature, train, procession, a line or flourish with a pen, a sketch, D. *trek*, a draft, feature, expedition, = MLG. *trek*, draft, expedition: see *track*[1], *n.* (the same word derived directly from the D.), and *track*[1], *v.* See also *trek*. For the relation of *track*[2] to *track*[1], draw, cf. that of *trace*[1], 'track,' to *trace*[1], 'draw.'] 1. A mark left by something that has passed along: as, the *track* of a ship (a wake); the *track* of a wagon (a rut).

The weary sun, . . .
. . . by the bright *track* of his fiery car,
Gives signal of a goodly day to-morrow.
Shak., Rich. III., v. 3. 20.

Thou do'st cleaue, with thy keen Fauchins force,
The Bards and Breast-plate of a furious Horse,
No sooner hurt, but he recoyleth back,
Writing his Fortune in a bloody *track*.
Sylvester, tr. of Du Bartas's Weeks, ii., The Vocation.

2. A mark or an impression left by the foot, whether of man or beast; a footprint; specifically, in *paleon.*, an ichnite or ichnolite; a fossil footprint, or cast of an extinct animal's foot. Compare *trace*[1], 1, and *trail*[1], 2.

Consider the atmosphere, and the exteriour frame and face of the globe, if we may find any *tracks* and footsteps of wisdom in the constitution of them.
Bentley, Works, I. viii. § 8.

3. A road; a path; a trail.

Behold Torquatus the same *track* pursue.
Dryden, Æneid, vi. 1130.

Up through that wood behind the church
There leads from Edward's door
A mossy *track*, all over-boughed
For half a mile or more. *Coleridge*, Three Graves.

We all shrink, like cowards, from new duties, new responsibilities. We do not venture to go out of the beaten *track* of our daily life. *J. F. Clarke*, Self-Culture, p. 340.

4. A course followed; a way of going or proceeding: as, the *track* of a comet.

Thy Fancy like a Flame its way does make,
And leaves bright *Tracks* for following Pens to take.
Cowley, To Sir W. Davenant.

If straight thy *track*, or if oblique,
Thou know'st not. *Tennyson*, Two Voices.

5. The course or path laid out for horse-, foot-, bicycle-, or other races: as, a cinder *track;* a *track* of six laps to the mile.—6. The two continuous lines of rails on which railway-cars run, forming, together with the ties, ballast, switches, etc., an essential part of the permanent way: as, a single *track;* a double *track;* to cross the *track*. See cut under *switch*.—7. In *anat.*, the course of a vessel, nerve, duct, etc.—8. In *zoöl.*, the sole of the foot.—**Double-track road**, a railroad having two tracks, so that trains may run in both directions at the same time.—**In one's tracks**, where one stands; as one goes; hence, then and there; on the spot.

He was in for stealing horses, but I think the real thief swore it off on him. If he did, God forgive him; he had better have shot the boy *in his tracks*.
The Century, XL. 224.

Off the track, thrown from the track; derailed, as a railway-carriage; colloquially, having wandered away from the subject under discussion: as, the speaker was a long way *off the track*.—**Side track**. See *side-track*.—**Single-track road**, a railroad having only one track, but provided with turnouts at intervals, so that trains may run both ways.—**To have the inside track**. See *inside*.—**To make tracks**, to go away; quit; leave; depart. [Slang.]

You will be pleased to *make tracks*, and vanish out of these parts forever! *Kingsley*, Two Years Ago, xiv.

To make tracks for, to go for; go after. [Slang.]

"I *made tracks for* that lad," said Robert, . . . "I found him in the fields one morning."
Mrs. Humphry Ward, Robert Elsmere, xiii.

Track-laying machine, a machine for laying rails in position on a railroad-track, the machine moving forward over each part of the track so laid.—**Syn. 3–6.** *Road*, *Path*, etc. (see *way*), trail, pathway.

track[2] (trak), *v. t.* [< *track*[2], *n.* Cf. OF. *tracquer*, surround in hunting, hunt down. In def. 3, cf. *track*[1], *v.*, draw, from which, or its source, *track*[2], *n.* and *v.*, is derived.] 1. To follow up the tracks of; follow by the tracks or traces left by that which is followed; trace; trail.

It was often found impossible to *track* the robbers to their retreats. *Macaulay*, Hist. Eng., iii.

Through camp and town and wilderness
He *tracked* his victim. *Whittier*, Mogg Megone, ii.

I will *track* this vermin to their earths.
Tennyson, Geraint.

2. To ascertain by means of existing traces or remains; trace.

The whole line of their retreat might be *tracked* by the corpses of thousands who had died of cold, fatigue, and hunger. *Macaulay*, Frederic the Great.

3. To trace, follow, or mark out plainly.

The straight course to her desire was *tracked*.
Drayton, Barons' Wars, i. 32.

A thirst to spend our fire and restless force
In *tracking* out our true, original course.
M. Arnold, The Buried Life.

4. To make tracks over; traverse: as, to *track* the desert.—5. To make marks upon, as with wet or muddy feet.

"Stand still there!" she called to me as I approached the door, "and don't come in to *track* my floor."
H. B. Stowe, Oldtown, p. 21.

track[3]†, *n.* An erroneous form of *tract*[1].

trackage[1] (trak′āj), *n.* [< *track*[1] + *-age*.] A drawing or towing, as of a boat on a river or canal; haulage; towage. ★

Marston and Barksted, Insatiate Countess, i.

★**tract**[1] (trakt), *n.* [Early mod. E. *tracte*; < L. *tractus*, a drawing, train, extent, a district, extent of time, in gen. extension, length, ML. a treating, handling, doing, business, commerce, a song, etc., in a great variety of uses; < *trahere*, pp. *tractus*, draw: see *tract*[1], *v.* From the same L. noun are also ult. E. *trait* and *trace*[2].] 1. Extent; a continued passage or duration; process; lapse: used chiefly in the phrase *tract of time*.

This in *tracte of tyme* made hym welthy.
Fabyan, Chron., lvi.

Silly Wormes in *tracte of time* ouerthrowe . . . statelye Townes. *Lyly*, Euphues, Anat. of Wit, p. 110.

A lifelong *tract of time* reveal'd.
Tennyson, In Memoriam, xlvi.

2†. Course or route; track; way.

Vnderstandyng, by reason of the sphere, that if I shulde sayle by the way of the northwest wynde I shulde by a shorter *tracte* coome to India, I thereuppon caused the kynge to bee aduertised of my diuise.
R. Eden, tr. of Sebastian Cabot (First Books on America, [ed. Arber, p. 288).

3†. Course or movement; action.

The whole *tract* of a Comedy shoulde be full of delight, as the Tragedy shoulde be still maintained in a well raised admiration. *Sir P. Sidney*, Apol. for Poetrie.

4†. Attractive influence; attraction; charm.

Hell never own me,
But I am taken! the fine *tract* of it
Pulls me along! to hear men such professors
Grown in our subtlest sciences!
B. Jonson, Devil is an Ass, ii. 1.

5. Extent; expanse; hence, a region of indefinite extent; a more or less extended area or stretch of land or water: as, a *tract* of woodland.

All this *tract* of the Alpes . . . was heretofore called Alpes Coctiæ. *Coryat*, Crudities, I. 90.

For heaven hides nothing from thy view,
Nor the deep *tract* of hell. *Milton*, P. L., i. 28.

Where Apollo's Fane refulgent stands
Was heretofore a *Tract* of Pasture-Lands.
Congreve, tr. of Ovid's Art of Love.

6†. Trait; lineament; feature.

The discovery of a man's self by the *tracts* of his countenance is a great weakness and betraying.
Bacon, Simulation and Dissimulation (ed. 1887).

7. In *anat.*, an area or expanse; the extension of an organ or a system: as, the digestive or alimentary *tract;* the optic *tract*. Also called *tractus* (which see).—8. In *ornith.*, a pteryla, or feathered place: distinguished from *space*.

The former places are called *tracts* or pterylæ.
Coues, Key to N. A. Birds, p. 87.

9. In *her.*, same as *tressure*.—**Anterolateral ascending tract**, a somewhat comma-shaped tract occupying the periphery of the anterolateral column of the spinal cord, extending from the anterior extremity of the cerebellar tract nearly or quite to the anterior roots. The fibers are of medium size, and degenerate upward. Also called *tract of Gowers*.—**Anterolateral descending tract**, a tract of white fibers in the anterolateral column of the spinal cord, bordering the anterolateral ascending tract on its inner side, and extending from the crossed pyramidal tract nearly or quite to the anterior fissure. It is marked by many fibers which degenerate downward, but these are so mingled with other fibers that it is far from being a pure tract. See cut under *spinal*.—**Cerebellar tract**, a tract in the lateral column of the spinal cord and medulla, extending from the lumbar enlargement of the cord to the superior vermiform process of the cerebellum.—**Ciliated tracts**. See *ciliate*.—**Descending comma tract**, a somewhat comma-shaped group of fibers in the central section of the external posterior column of the spinal cord, which degenerates downward for a short distance. It has been made out only in the cervical and upper thoracic regions.—**Direct cerebellar tract**. Same as *cerebellar tract*.—**Intermediolateral tract**, the so-called lateral gray cornu of the spinal cord, most conspicuous in the thoracic region. See cut under *spinal*.—**Lissauer's tract**, a small tract of fine nerve-fibers lying at the tip of the posterior gray cornu of the spinal cord, formed by the ascending fibers of the lateral sections of the lateral bundles of the posterior roots of the spinal nerves, which appear thus to pass upward for some distance before they terminate in the posterior gray cornu. Also called *posterior marginal tract* or *zone*, or *Lissauer's zone*. See cut under *spinal*.—**Olfactory tract**, the rhinencephalon, or olfactory process of the prosencephalon, especially when, as in man and the higher vertebrates generally, it is comparatively small and of simple band-like character, whence it is also erroneously called *olfactory nerve*.—**Optic tract**. See *optic* and *tractus*.—**Peduncular tract**. Same as *pyramidal tract*.—**Posterior marginal tract**. Same as *Lissauer's tract*.—**Powder-down tracts**. See *powder-down*.—**Pyramidal tract**. See *pyramidal*.—**Respiratory tract**. (*a*) The middle column of the spinal marrow, whence, according to Sir Charles Bell, the respiratory nerves originate. (*b*) The air-passages collectively.—**Semilunar tract**, a tract of white fibers, in the lateral part of the cerebellar hemisphere, of undetermined connections.—**Tract of Gowers**, the anterolateral ascending tract (which see, above).

tract[2]† (trakt), *v. t.* [< L. *tractare*, handle, treat, freq. of *trahere*, draw: see *treat*, and cf. *tract*[1].] 1. To handle; treat.

The erle . . . grauously perswaded the magestrates of the citees and tounes, and so gently and familiarly vsed and *tracted* the vulgare people. *Hall*, Hen. IV., an. 1.

Hence—2. To discourse or treat of; describe: delineate.

The man [Ulysses] . . .
Saw many towns and men, and could their manners *tract*.
B. Jonson, tr. of Horace's Art of Poetry.

tract[3] (trakt), *n.* [< ML. *tractus*, a treating, handling, etc., an anthem, particular uses of L. *tractus*, a drawing: see *tract*[2], and cf. *tractate*.] 1. A short treatise, discourse, or dissertation; especially, a brief printed treatise or discourse on some topic of practical religion.

The church clergy at that time are allowed to have written the best collection of *tracts* against popery.
Swift, The Presbyterians' Plea of Merit.

Men . . . who live a recluse and studious life, . . . and pore over black-letter *tracts*. *Irving*, Sketch-Book, p. 284.

2. In the Roman and some other Western liturgies, an anthem consisting of verses from Scripture (generally from the Psalms), sung instead of the Alleluia after the gradual, or instead of the gradual, from Septuagesima till Easter eve: so called from being sung 'continuously' (*tractim*) by the cantor without interruption of other voices. Also *tractus*.—**Albertine tracts**. See *Albertine*.—**Brehon Tracts**. See *brehon*.—**Oxford tracts**, a series of ninety pamphlets, entitled *Tracts for the Times*, published at Oxford from 1833 to 1841, the doctrines of which formed the basis of the Tractarian movement. See *Tractarianism*.—**Tract No. 90**. See *Tractarianism*.—**Tract society**, a society for the printing and distribution of religious tracts.

tract[4]† (trakt), *n.* [An erroneous form of *track*[2], simulating *tract*[1].] Track; footprint.

They lookt about, but nowhere could espye
Tract of his foot. *Spenser*, F. Q., II. iii. 19.

They [the English] could not come near them [Indians], but followed them by ye *tracte* of their feet sundrie miles.
Bradford, Plymouth Plantation, p. 81.

tractability (trak-ta-bil'i-ti), *n.*; pl. *tractabilities* (-tiz). [< L. *tractabilita(t-)s*, < *tractabilis*, tractable: see *tractable*.] The state or process of being tractable; especially, docility; submissiveness.

I trace lines of force in her face which make me sceptical of her *tractability*. *Charlotte Brontë*, Jane Eyre, xxix.

A wild man, not of the woods, but the cloisters, nor yet civilized into the *tractabilities* of home.
Bulwer, Caxtons, i. 1. (*Latham.*)

tractable (trak'ta-bl), *a.* [In other use *treatable* (q. v.); OF. *traitable*, *traictable*, F. *traitable* = Pr. *tractable* = Sp. *tratable* = Pg. *tratavel* = It. *trattabile*, < L. *tractabilis*, that may be touched, handled, or managed, < *tractare*, take in hand, handle, manage, freq. of *trahere*, draw: see *tract*[1], *tract*[2], and *treat*.] 1†. Capable of being touched, handled, or felt; palpable.

But they [the angels] had palpable and *tractable* bodies for the time, as appears plainly, ver. 4, by washing their feet. *Rev. T. Adams*, Works, II. 512.

2. Easily handled or wrought.

This metall [gold] is a body *tractable* and bryght, of coloure lyke vnto the soonne. And, . . . beinge seene, it greatly disposeth the myndes of men to desyre it and esteme it as a thyng most precious.
R. Eden, tr. of Vannuccio Biringuccio (First Books on [America, ed. Arber, p. 362).

Hence—3. Manageable; governable; easily led; docile; pliant.

It is seldome sene that frendship is betwene these parsones: a man sturdie, of oppinion inflexible, . . . with him that is *tractable*, and with reason persuaded.
Sir T. Elyot, The Governour, ii. 11.

The reason of these holy maids will win her;
You'l find her *tractable* to any thing
For your content or his.
Massinger and Dekker, Virgin-Martyr, iii.

When England . . . shall meet with Princes *tractable* to the Prelacy, then much mischiefe is like to ensue.
Milton, Reformation in Eng., ii.

tractableness (trak'ta-bl-nes), *n.* Tractability.

It will be objected, that whatsoever I fancy of the *tractableness* of children, . . . there are many who will never apply themselves to their books. *Locke*, Education, § 86.

tractably (trak'ta-bli), *adv.* In a tractable manner; with compliance or docility.

Tractarian (trak-tā'ri-an), *a.* and *n.* [< *tract*[3] + *-arian*.] I. *a.* Pertaining to the Tractarians or their doctrines.

II. *n.* One of the promoters or adherents of Tractarianism.

His religious opinions, . . . said the clergyman, were those of a sound Churchman; by which he meant, I rather suspect, that he was a pretty smart *tractarian*.
H. Kingsley, Geoffry Hamlyn, xlviii.

A reaction begins in England with Wesley. It is seen in the Evangelical movement, still more in the *Tractarians*, who strive after the re-creation of the Church as a living organism and the absorption of the individual in it.
Westminster Rev., CXXV. 225.

Tractarianism (trak-tā′ri-an-izm), *n.* [< *Tractarian* + *-ism.*] A system of religious opinion and practice promulgated within the Church of England in a series of papers entitled "Tracts for the Times," published at Oxford between 1833 and 1841. The movement began as a countermovement to the liberalizing tendency in ecclesiasticism and the rationalizing tendency in theology, and was in its inception an endeavor to bring the church back to the principles of primitive and patristic Christianity. Its fundamental principles were that the Christian religion involves certain well-defined theological dogmas, and a visible church with sacraments and rites and definite religious teaching on the foundation of dogma, and that this visible church is based upon and involves an unbroken line of episcopal succession from the apostles, and includes the Anglican Church. The tracts consisted of extracts from the high-church divines of the seventeenth century and the church fathers, with contributions by Newman, Froude, Pusey, and Isaac Williams. In the last of the series, Tract No. 90, Dr. (afterward Cardinal) Newman took the ground that the Thirty-nine Articles of the Church of England are in large part susceptible of an interpretation not inconsistent with the doctrines of the Council of Trent. This tract was condemned by a number of bishops and heads of colleges, and a part of the Tractarians (among them Newman in 1845) entered the Church of Rome, others remaining with Dr. Pusey and John Keble in the Church of England, and maintaining the principles of sacramental efficacy and apostolic authority within that communion.

tractate (trak′tāt), *n.* [Formerly also *tractat*; = D. *traktaat* = G. *tractat* = Sw. Dan. *traktat*, < L. *tractatus*, a treatise, eccl. a homily, a handling, treatment, < *tractare*, handle, treat: see *tract*[2], *treat*, and cf. *tract*[3].] A treatise; a tract.

I presumed to allege this excellent writing of your majesty as a prime or excellent example of *tractates* concerning special and respective duties.
Bacon, Advancement of Learning, ii.

Needlesse *tractats* stuff't with specious names.
Milton, Prelatical Episcopacy.

tractation† (trak-tā′shon), *n.* [< L. *tractatio*(*n*-), management, treatment, < *tractare*, manage, treat: see *tract*[2], *treat*.] Treatment or handling of a subject; discussion.

The journey they make us take through fire and water requires a more punctual *tractation* than your patience will now admit. *Rev. T. Adams*, Works, I. 88.

tractator (trak-tā′tor), *n.* [< L. *tractator*, a handler, a treater, < *tractare*, handle, treat: see *tract*[2], *treat*.] A writer of tracts; specifically [*cap.*], one of the writers of the "Tracts for the Times"; a Tractarian. [Rare.]

Talking of the *Tractators*—so you still like their tone!
And so do I. *Kingsley*, Life, I. 58.

tractatrix (trak-tā′triks), *n.* [Fem. of *tractator*.] In *geom.*, same as *tractrix*.

tractellate (trak′te-lāt), *a.* [< *tractellum* + *-ate*[1].] Having a tractellum, as a protozoan.

tractellum (trak-tel′um), *n.*; pl. *tractella* (-ä). [NL., dim. < L. *tractus*, a tract: see *tract*[1].] The anterior vibratile flagellum of a biflagellate protozoan, used for locomotion: correlated with *gubernaculum*.

tractile (trak′til), *a.* [< L. **tractilis*, < *trahere*, pp. *tractus*, draw, drag: see *tract*[1].] Capable of being drawn out in length; ductile.

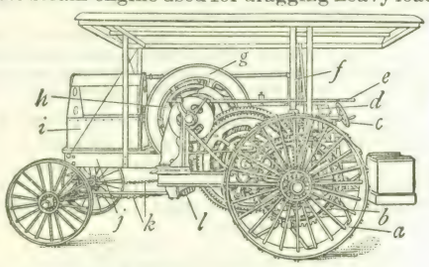
The consistencies of bodies are very divers; . . . *tractile* or to be drawn forth in length, intractile.
Bacon, Nat. Hist., § 839.

tractility (trak-til′i-ti), *n.* [< *tractile* + *-ity.*] The property of being tractile.

Silver, whose ductility and *tractility* are much inferiour to those of gold. *Derham.*

traction (trak′shon), *n.* [= F. *traction* = Sp. *tracción* = Pg. *tracção* = It. *trazione*, < ML. **tractio*(*n*-), a drawing, < L. *trahere*, pp. *tractus*, draw, drag: see *tract*[1].] 1. The act of drawing, or the state of being drawn; specifically, in *physiol.*, contraction, as of a muscle.—2. The act of drawing a body along a surface, as over water or on a railway. The power exerted in order to produce the effect is called the *force of traction*. The line in which the force of traction acts is called the *line of traction*, and the angle which this line makes with the plane along which a body is drawn by the force of traction is called the *angle of traction*.

3. Attraction; attractive power or influence.



He [Macbeth] feels the resistless *traction* of fate, sees himself on the verge of an abyss, and his brain is filled with phantoms. *Welsh*, Eng. Lit., I. 384.

4. The adhesive friction of a body or object, as of a wheel on a rail or a rope on a pulley. *E. H. Knight.*—5. An action the negative of pressure.—**Line of traction.** (*a*) See def. 2. (*b*) In *physiol.*, the axis or direction of the tractive action of a muscle; the line in which a muscle contracts.

tractional (trak′shon-al), *a.* [< *traction* + *-al.*] Of or pertaining to traction.

traction-aneurism (trak′shon-an″ū-rizm), *n.* An aneurism produced by traction on the wall of the vessel, as by the ductus Botalli on the wall of the aorta.

traction-engine (trak′shon-en″jin), *n.* A movable steam-engine used for dragging heavy loads

Gasolene Traction-engine.

a, driving-wheel with diagonal cleats projecting from their rims to prevent slipping; *b*, spur-gear, bolted to the driving-wheel which receives motion through intermediate gearing from the engine mounted upon frame *f*, the cylinder of which is designated at *d*. This driving-gear may be made to reverse its motion by the control of lever *e*, which operates the forward and reverse clutches *h*. When it is desired to use the power for driving other machinery, the clutches operating the driving mechanism may be thrown out of engagement and the power then transmitted by means of a belt from a pulley on the fly-wheel *g*, located on the reverse side of the engine. The operator stands upon the platform at the rear and by means of the hand-wheel *c* steers the machine when it is moved from place to place, the steering mechanism consisting of a worm-gearing which turns a winding-shaft *i*, to which are attached the steering-chains *k*. The chains are connected to the winding-shaft *i*, so that the turning of the shaft lengthens the chain on one side while it shortens it on the other side, thus turning the front axle which pivots under the frame *j* in the center; *l*, exhaust, which carries off through the roof the burnt gases; *s*, water-tank; which forms part of the cooling-system.

on common roads, as distinguished from *locomotive engine*, used on a railway.

traction-gearing (trak′shon-gēr″ing), *n.* A mechanical arrangement for utilizing the force of friction or adhesion by causing it to turn a wheel and its shaft.

traction-wheel (trak′shon-hwēl), *n.* A wheel which draws or impels a vehicle, as the driving-wheel of a locomotive. Power is applied to the wheel, and its frictional adhesion to the surface on which it bears is the direct agent of progression. *E. H. Knight.*

Tractite (trak′tīt), *n.* [< *tract*[3] + *-ite*[2].] Same as *Tractarian*. *Imp. Dict.*

tractitious (trak-tish′us), *a.* [< L. *trahere*, pp. *tractus*, draw (see *tract*[2]), + *-itious*.] Treating; handling. [Rare.] *Imp. Dict.*

tractive (trak′tiv), *a.* [= F. *tractif*, < L. *tractus*, pp. of *trahere*, draw: see *tract*[1].] Tractional; drawing; needed or used in drawing.

In any plexus of forces whatever, the resultant of all the *tractive* forces involved will be the line of greatest traction. *J. Fiske*, Cosmic Philos., I. 293.

tractlet (trakt′let), *n.* [< *tract*[3] + *-let.*] A small tract.

tractor (trak′tor), *n.* [< NL. *tractor*, < L. *trahere*, pp. *tractus*, draw, drag: see *tract*[1].] That which draws or is used for drawing; specifically, in the plural, metallic tractors. See the phrase.

What varied wonders tempt us as they pass!
The cowpox, *tractors*, galvanism, and gas.
Byron, Eng. Bards and Scotch Reviewers.

Metallic tractors, a pair of small pointed bars, one of brass and the other of steel, which, by being drawn over diseased parts of the body, were supposed to give relief through the agency of electricity or magnetism. They were devised by Dr. Perkins, and were much in vogue about the beginning of the nineteenth century, but have long been disused. Also called *Perkins's tractors*.

tractoration (trak-tō-rā′shon), *n.* [< *tractor* + *-ation.*] The employment of metallic tractors for the cure of diseases. See *tractor*.

Homœopathy has not died out so rapidly as *Tractoration*. *O. W. Holmes*, Med. Essays, Pref.

tractory (trak′tō-ri), *n.*; pl. *tractories* (-riz). [NL. **tractorius*, < L. *trahere*, pp. *tractus*, draw: see *tract*[1].] A tractrix.

tractrix (trak′triks), *n.* [NL., fem. of *tractor*.] A transcendental curve invented by Christian Huygens (1629–95), the property of which is that the distances along the different tangents from the points of contact to the intersections of a certain line are all equal. It is the evolute of the catenary. The definition above given is that now usual, and implies four branches, as shown in the figure. But the original definition is that it is the locus of the center of gyration of a rod of which the end is drawn along a straight line, without any effect of momentum. So defined, the curve is confined to one side of the asymptote, and so it is usually drawn. Also *tractatrix*. Compare cut under *syntractrix*.

Tractrix.

tractus (trak′tus), *n.*; pl. *tractus*. [NL., < L. *tractus*, a tract: see *tract*[2], *tract*[3].] 1. Same as *tract*[1], 7.—2. Same as *tract*[3], 2.—**Tractus intermediolateralis**, the lateral cornu of the spinal cord with the cells contained in it. See cut under *spinal cord*.—**Tractus intestinalis**, the intestinal tract, or alimentary canal; the whole intestine from mouth to anus. See cuts under *alimentary* and *intestine*.—**Tractus opticus**, the optic tract, the band of white nerve-tissue which arises from the diencephalon, and forms a chiasm with its fellow in front of the tuber cinereum. See *optic*.—**Tractus spiralis foraminulentus**, a shallow spiral furrow in the center of the base of the bony cochlea, exhibiting groups of foramina through which the filaments of the cochlear nerves pass.

trad†. A Middle English preterit of *tread*.

trade[1] (trād), *n.* and *a.* [A later form, due partly to association with the related noun *tread* and the orig. verb *tread*, of early mod. E. *trode*, *trod*, < ME. *trod*, footstep, track, < AS. *trod*, footstep, < *tredan* (pret. *træd*, pp. *treden*), step, tread: see *tread*, *v.*, and cf. *tread*, *n.*, *trod*, *trode*. The appar. irregularity of the form (the reg. form is *trode* or *trod*, as still in dial. use) and the deflection of sense (from the obs. senses 'track, path,' etc., to the present usual senses, 'business, commerce, exchange') have obscured the etymology, suggesting an origin from or a confusion with F. *traite*, trade, Sp. *trato*, treatment, intercourse, communication, traffic, trade, etc.: see *trait*, *tract*[2].] **I.** *n.* **1**†. A footstep; track; trace; trail.

Streight gan he him revyle, and bitter rate,
As Shepheardes curre, that in darke eveninges shade
Hath tracted forth some salvage beastes *trade*.
Spenser, F. Q., II. vi. 39.

2†. Path; way; course.

A postern with a blind wicket there was,
A common *trade* to passe through Priam's house.
Surrey, Æneid, ii. 587.

By reason of their knowledge of the law, and of the autoritee of being in the right *trade* of religion
J. Udall, On Luke xix.

You were advised . . . that his forward spirit
Would lift him where most *trade* of danger ranged.
Shak., 2 Hen. IV., i. 1. 174.

3†. The bearing part of the felly of a wheel; the tread of a wheel.

The utter part of the wheele, called the *trade*.
Withals' Dict. (ed. 1608), p. 79. (*Nares.*)

4†. Course of action or effort.

Long did I love this lady;
Long my travail, long my *trade* to win her.
Fletcher and Massinger, A Very Woman, iv. 3.

5†. Way of life; customary mode or course of action; habit or manner of life; habit; custom; practice.

In whose behauiors lyeth in effect the whole course and *trade* of mans life, and therefore tended altogither to the good amendment of man by discipline and example.
Puttenham, Arte of Eng. Poesie, p. 25.

The ancient *trade* of this realm in education of youth . . . was to yoke the same with the fear of God, in teaching the same to use prayer morning and evening, . . . to make beysaunce to the magistrates.
Huggard, Displaying of the Protestants, p. 85. (*Davies*, [under *beysaunce*.)

Thy sin's not accidental, but a *trade*.
Shak., M. for M., iii. 1. 149.

6. Business pursued; occupation.

The Spaniards dwell with their families, and exercise divers manuary *trades*. *Coryat*, Crudities, I. 122.

Thy *trade* to me tell, and where thou dost dwell.
Robin Hood and the Butcher (Child's Ballads, V. 33).

Begging is a *trade* unknown in this empire.
Swift, Gulliver's Travels, i. 6.

7. Specifically, the craft or business which a person has learned and which he carries on as a means of livelihood or for profit; occupation; particularly, mechanical or mercantile employment; a handicraft, as distinguished from one of the liberal arts or of the learned professions, and from agriculture. Thus, we speak of the *trade* of a smith, of a carpenter, or of a mason; but not of the *trade* of a farmer or of a lawyer or physician.

We abound in quacks of every *trade*.
Crabbe. (*Imp. Dict.*)

8. The exchange of commodities for other commodities or for money; the business of buying and selling; dealing by way of sale or exchange; commerce; traffic. Trade comprehends every species of exchange or dealing, either in the produce of land, in manufactures, or in bills or money. It is, however, chiefly used to denote the barter or purchase and sale of goods, wares, and merchandise, either by wholesale or by retail. Trade is either *foreign* or *domestic*. *Foreign trade* consists in the exportation and importation of goods, or the exchange of the commodities of different countries. *Domestic* or *home trade* is the exchange or buying and selling of goods within a country. Trade is also *wholesale* (that is, by the package or in large quantities) or it is by *retail*, or in small parcels. The *carrying-trade* is that of transporting commodities from one country to another by water.

Let this therefore assure you of our loues, and every yeare our friendly *trade* shall furnish you with Corne.
Quoted in *Capt. John Smith's* Works, I. 209.

But I have been informed that the *trade* to England is sunk, and that the greatest export now is to France.
Pococke, Description of the East, II. ii. 90.

9. The persons engaged in the same occupation or line of business: as, the book-*trade*.

All this authorship, you perceive, is anonymous; it gives me no reputation except among the *trade*.
Irving. (*Imp. Dict.*)

10. A purchase or sale; a bargain; specifically, in *U. S. politics*, a deal.

But it is not every man's talent to force a *trade;* for a customer may choose whether he will buy or not.
Dryden, Duchess of York's Paper Defended.

Give us something like the Australian system of voting, so that the resulting legislature will represent the state's business interests, and not a series of deals, dickers, *trades*, and bargains. *The Century*, XXXVII. 633.

11†. The implements, collectively, of any occupation.

The shepherd . . . with him all his patrimony bears,
His house and household gods, his *trade* of war.
Dryden, tr. of Virgil's Georgics, iii. 535.

12. Stuff: often used contemptuously in the sense of 'rubbish.' [Prov. Eng. and New Eng.]

Ale, sir, and aqua vitæ, and such low-bred *trade*, is all I draw now-a-days. *Kingsley*, Westward Ho! xiv.

Balance of trade. See *balance.*—**Board of trade.** (*a*) In the United States, an association of business men established in most large cities for the furtherance of commercial interests, the enactment of rules for the regulation of trade, and the consideration of legislation affecting banking, insurance, railroads, customs, etc.; a chamber of commerce. (*b*) [*caps.*] In Great Britain, a committee of the Privy Council which has, to a large extent, the supervision of British commerce and industry. At its head are the President of the Board of Trade, who is usually a member of the Cabinet, the parliamentary secretary (formerly vice-president), the permanent secretary, and six assistant secretaries at the head of six departments—the *commercial, harbor, finance, railway, marine*, and *fisheries*. Attached to the Board of Trade are also the bankruptcy and emigration departments, the Patent Office, etc. A committee for trade and the plantations existed for a short time in the reign of Charles II. The council of trade was again constituted in the reign of William III., but discontinued in 1782. In 1786 the Board of Trade was organized, and its functions were subsequently greatly extended.—**Coasting-trade.** See *coasting.*—**Course of trade.** See *course*[1].—**Fair trade,** a proposed system of trade between Great Britain or British possessions and other countries, as advocated by the British fair-traders and the Fair-Trade League since about 1886. The fair-traders disclaim the intention of returning to protection, and aim at establishing reciprocity, and at the imposition of retaliatory duties on imports from countries which tax British products.—**Free trade.** See *free.*—**Jack of all trades.** See *Jack*[1].—**Round trade,** on the Gaboon river, a kind of barter in which the things exchanged comprise a large assortment of miscellaneous articles. Also called *bundle-trade.*—**To blow trade,** to blow (in) one course; blow constantly in the same direction. See *trade-wind.*

The wind *blowing trade*, without an inch of sayle we spooned before the sea. *Hakluyt's Voyages*, III. 849.

Tricks of the trade. See *trick*[1].—**Syn. 6** and **7.** *Pursuit, Vocation*, etc. See *occupation.*

II. *a.* Pertaining to or characteristic of trade, or of a particular trade: as, a *trade* practice; a *trade* ball or dinner; *trade* organizations.—**Trade dollar.** See *dollar.*—**Trade price,** the price charged by the manufacturer or publisher to dealers in the same trade for articles that are to be sold again at an advance.—**Trade sale,** an auction sale by manufacturers, publishers, or others of goods to the trade.

trade[1] (trād), *v.*; pret. and pp. *traded*, ppr. *trading*. [< *trade*[1], *n.*] **I.** *intrans.* **1†.** To take or keep one's course; pass; move; proceed.

His grizly Beard a sing'd confession made
What fiery breath through his black lips did *trade*.
J. Beaumont, Psyche, i. 17.

2. To engage in trade; engage in the exchange, purchase, or sale of goods, wares, and merchandise, or anything else; barter; buy and sell; traffic; carry on commerce as a business: with *in* before the thing bought and sold.

This element of air which I profess to *trade in*.
I. Walton, Complete Angler, p. 25.

3. To buy and sell or to exchange property in a specific instance: as, A *traded* with B for a horse or a number of sheep.—**4.** To engage in affairs generally; have dealings or transactions.

How did you dare
To *trade* and traffic with Macbeth
In riddles and affairs of death?
Shak., Macbeth, iii. 5. 4.

5. To carry merchandise; voyage or ply as a merchant or merchantman.

They shall be my East and West Indies, and I will *trade* to them both. *Shak.*, M. W. of W., i. 3. 79.

To trade on, to take advantage of or make profit out of: as, to *trade on* another's fears.—**Touch and trade papers.** See *paper.*

II. *trans.* **1†.** To pass; spend.

Of this thyng we all beare witnesse, whom here ye see standinge, whiche haue *traded* our liues familiarly with him. *J. Udall*, On Acts ii.

2†. To frequent for purposes of trade.

The English merchants *trading* those countreys.
Hakluyt's Voyages, I. 458.

3. To sell or exchange in commerce; barter; buy and sell.

They *traded* the persons of men. Ezek. xxvii. 13.

Ready to "dicker" and to "swap," and to "*trade*" rifles and watches. *J. F. Cooper*, Oak Openings, ii.

4†. To educate; bring up; train: with *up*.

A Wild Rogue is he that is born a Rogue; he is more subtle and more given by nature to all kind of knavery than the other, as beastly begotten in barn or bushes, and from his infancy *traded up* in treachery.
Harman, Caveat for Cursetors, p. 38.

Euerie one of these colleges haue in like maner their professors or readers of the toongs and seuerall sciences, as they call them, which dailie *trade vp* the youth there abiding priuatlie in their halles.
Harrison, Descrip. of Eng., ii. 3 (Holinshed's Chron., I.).

trade[2] (trād), *n.* [Abbr. of *trade-wind.*] A trade-wind: used commonly in the plural.

trade[3]**†.** An obsolete preterit of *tread.*

traded† (trā'ded), *a.* [< *trade*[1] + *-ed*[2].] Versed; practised; experienced.

Eyes and ears,
Two *traded* pilots 'twixt the dangerous shores
Of will and judgment. *Shak.*, T. and C., ii. 2. 64.

Nay, you are better *traded* with these things than I, and therefore I'll subscribe to your judgment.
B. Jonson, Every Man out of his Humour, ii. 1.

trade-fallen† (trād'fâ″ln), *a.* Unsuccessful in business; bankrupt. [Rare.]

Younger sons to younger brothers, revolted tapsters, and ostlers *trade-fallen*. *Shak.*, 1 Hen. IV., iv. 2. 32.

tradeful (trād'fûl), *a.* [< *trade*[1] + *-ful.*] Busy in traffic; trafficking.

Ye *tradefull* Merchants, that with weary toyle
Do seeke most pretious things to make your gain.
Spenser, Sonnets, xv.

Musing maid, to thee I come,
Hating the *tradeful* city's hum.
J. Warton, Ode to Solitude.

trade-hall (trād'hâl), *n.* A large hall in a city or town for meetings of manufacturers, traders, etc.; also, a hall devoted to meetings of the incorporated trades of a town, city, or district.

Its small size causes it [the town-hall at Bruges] to suffer considerably from its immediate proximity to the cloth-hall and other *trade-halls* of the city.
J. Fergusson, Hist. Arch., I. 603.

trade-mark (trād'märk), *n.* A distinguishing mark or device adopted by a manufacturer and impressed on his goods, labels, etc., to indicate the origin or manufacturer; in *law*, a particular mark or symbol which is used by a person for the purpose of denoting that the article to which or to packages of which it is affixed is sold or manufactured by him or by his authority, or used as a name or sign for his place of business to indicate that he carries on his business at that particular place, and which by priority of adoption and more or less exclusive use, or by government sanction and registration, is recognized and protectable as his property. In Great Britain, the United States, and other countries the registration and protection of trade-marks are provided for by statute. The earliest trade-marks appear to have been those which were used in the manufacture of paper, and which are known as *water-marks*. Of these the most ancient known appears on a document bearing the date 1351—that is, shortly after the invention of the art of making paper from linen rags. The foundation of the protection afforded by the law to the owners of trade-marks is in the injustice done to one whose trade has acquired favor with the public if competitors are allowed, by colorable imitation of methods first adopted and continuously used by him for making his products recognizable, to induce intending purchasers to take their goods instead of his. The same kind of protection is therefore given, within just limits, to style and color of package and label as to specific symbols.—**Music trade-mark,** the official mark of the United States Board of Music Trade. It consists of a star inclosing a numeral which indicates the retail price of the piece in dimes.—**Trade-Marks Act,** a British statute of 1862 (25 and 26 Vict., c. 88) to prevent the fraudulent marking of merchandise, the forging or altering of trade-marks, etc.

trademaster (trād'mȧs″tėr), *n.* One who teaches others in some trade or mechanical art; a man who instructs boys in some kind of handicraft.

In our prisons the schoolmaster and the *trademaster* take the place of the executioner.
Nineteenth Century, XXIV. 759.

trade-name (trād'nām), *n.* A name invented or adopted as the specific name or designation of some article of commerce.

trader (trā'dėr), *n.* [< *trade*[1] + *-er*[1].] **1.** One who is engaged in trade or commerce; one whose business is buying and selling, or barter; one whose vocation it is to buy and sell again personal property for gain. In the law of bankruptcy and insolvency much discussion as to the meaning of the term has resulted from the fact that several systems of such laws have applied different rules to traders, or merchants and traders, from those applicable to other persons. See *merchant.*

Traders riding to London with fat purses.
Shak., 1 Hen. IV., i. 2. 141.

A butcher who kills only such cattle as he has reared himself is not a *trader;* but if he buy them and kill them and sell them with a view to profit, he is a *trader.* . . . Any general definition of the word *trader* would fail to suit all cases. Each case has its peculiarities. We are to look to the object to be attained by the requirement that the *trader* shall keep a cash book.
Peters, C. J., 76 Maine, 499.

2. A vessel employed regularly in any particular trade, whether foreign or coasting: as, an East Indian *trader;* a coasting *trader.*—**Post trader.** See *post-trader.*—**Room trader,** a member of the (New York) stock-exchange who buys and sells stocks on the floor of the exchange for his own account and not for a client, and without the intervention of another broker; a broker who is his own client.

Tradescantia (trad-es-kan'shiȧ), *n.* [NL. (Ruppius, 1718), named after John *Tradescant* (died about 1638), gardener to Charles I. of England.] A genus of monocotyledonous plants, type of the tribe *Tradescantieæ* in the family *Commelinaceæ*. It is characterized by flowers in sessile or panicled fascicles within the base of complicate floral leaves, by anther-cells commonly on the margins of a broadish connective, and by a three-celled ovary with two ovules in each cell. There are about 35 species, all American, both northern and tropical. They are perennial herbs with simple or somewhat branched stems of much variety in leaf and habit. The fascicles of the inflorescence resemble compact umbels, but are centrifugal; they are either loosely or densely panicled, or, as in *T. Virginiana*, are reduced to a single fascicle. The species are known as *spiderwort* (which see); sixteen occur within the United States, of which *T. Virginiana* is widely distributed and is often cultivated in gardens; two others are southern. Several species are cultivated under glass, as *T. floribunda* and *T. fluminensis*, the latter being sometimes known as *wandering-jew.* See *wandering-jew* (*b*), 2, under *wandering.*

tradesfolk (trādz'fōk), *n. pl.* [< *trade's*, poss. of *trade*[1], + *folk.*] People employed in trade; tradespeople.

By his advice victuallers and *tradesfolk* would soon get all the money of the kingdom into their hands. *Swift.*

tradesman (trādz'mąn), *n.*; pl. *tradesmen* (-men). [< *trade's*, poss. of *trade*[1], + *man.*] **1.** A person engaged in trade; a shopkeeper.

There's one of Lentulus' bawds
Runs up and down the shops, through every street,
With money to corrupt the poor artificers
And needy *tradesmen* to their aid.
B. Jonson, Catiline, v. 6.

2. A man having a trade or handicraft; a mechanic.

tradespeople (trādz'pē″pl), *n. pl.* [< *trade's*, poss. of *trade*[1], + *people.*] People employed in the various trades.

trades-union (trādz'ū″nyon), *n.* [< *trades*, pl. of *trade*[1], + *union.* Cf. *trade-union.*] Same as *trade-union.* See etymology of *trade-union.*

Their notion of Reform was a confused combination of rick-burners, *trades-unions*, Nottingham riots, and in general whatever required the calling out of the yeomanry.
George Eliot, Felix Holt, Introd.

trades-unionism (trādz'ū″nyon-izm), *n.* [< *trades-union* + *-ism.*] Same as *trade-unionism.*

trades-unionist (trādz'ū″nyon-ist), *n.* [< *trades-union* + *-ist.*] Same as *trade-unionist.*

tradeswoman (trādz'wūm″an), *n.*; pl. *tradeswomen* (-wim″en). [< *trade's*, poss. of *trade*[1], + *woman.*] A woman who trades or is skilled in trade.

trade-union (trād'ū″nyon), *n.* [< *trade*[1] + *union.* Though the words are used synonymously, *trade-union* differs both in extent of meaning and etymologically from *trades-union* (< *trades*, pl. of *trade*[1], + *union*), which prop. means a union of men of several trades; a *trade-union* may be a union of men of a single trade or of several trades.] A permanent organization of workmen of the same trade or of several allied trades formed for the purpose of securing, by united action, favorable conditions as regards wages, hours of labor, etc. Its members seek to bargain with their employers collectively rather than individually and, if necessary, to enforce their demands by striking; and they contribute stated sums to be used in assisting strikers and often, also, as a benefit fund.

Trade-Unions are the successors of the old Gilds.
English Gilds (E. E. T. S.), Int., p. clxv.

Trade Unions are combinations for regulating the relations between workmen and masters, workmen and workmen, or masters and masters, or for imposing restrictive conditions on the conduct of any industry or business.
Encyc. Brit., XXIII. 499.

Trade-union Act, an English statute of 1871 (34 and 35 Vict., c. 31), afterward amended, which recognizes trade-unions as lawful, and prescribes regulations for them.

trade-unionism (trād'ū″nyon-izm), *n.* [< *trade-union* + *-ism.*] The practice of combining, as workers in the same trade or in allied trades, for mutual support and protection, especially for the regulation of wages, hours of labor, etc.; also, trade-unions collectively. Also *trades-unionism.*

trade-unionist (trād'ū″nyon-ist), *n.* [< *trade-union* + *-ist.*] A member of a trade-union; one who favors the system of trade-unions. Also *trades-unionist.*

Misapprehension on the part of Socialists, as well as of *Trade Unionists* and other partisans of Labour against Capital, relates to the proportions in which the produce of the country is really shared.
J. S. Mill, Socialism.

trade-wind (trād'wind), *n.* [< *trade*[1], 2, + *wind*[2]. Cf. *to blow trade*, under *trade*[1].] A wind that blows in a regular trade or course—that is, continually in the same direction. Trade-winds, or specifically *the trade-winds*, prevail over the oceans in the equatorial regions, from about 30° N. latitude to 30° S. latitude, blowing in each hemisphere respectively as northeast and southeast winds steadily throughout the whole year. Over the land the greater friction, irregular temperature-gradients, and local disturbances of all kinds combine to interrupt their uniformity. The trade-winds form a part of the general system of atmospheric circulation arising from the permanent difference in temperature between equatorial and polar regions. The greater heat and moisture of the lower half of the atmosphere in the warm zone gives it an average density less than that of the air of the temperate or polar regions, therefore for the same absolute pressure at sea-level there is a higher pressure at the upper levels in the warmer region and a tendency for this air to flow over to the upper levels of the colder region while the latter air sinks; this produces a higher pressure at the ground within the cold region and a lower pressure at the ground within the warm region, so that the circulation just described is kept up as long as the difference of density is maintained. But opposing winds must deflect when they meet, and Ferrel's law shows that they deflect toward the right in the northern hemisphere and toward the left in the southern hemisphere under the influence of the earth's rotation. This slight influence, therefore, causes the northerly wind to become the northeast *trade* and the southerly wind to become the southeast *trade*. The upper level overflows become the *anti-trades*. These constitute permanent currents in each hemisphere—a lower one, the *trade-wind*, flowing from near the tropics to the thermal equator, and an upper one, the *anti-trade*, flowing from the equator to about the thirtieth parallel of latitude, where it descends, producing there the calms of Cancer and Capricorn. In the northern hemisphere these anti-trades are much interrupted by irregular temperature-gradients over the great continents and by cyclonic storms; but in the southern hemisphere these disturbances are less. On their equatorial side the trade-winds die out in a belt of calms, which varies in breadth, in different seasons and different longitudes, from 150 to 600 miles. In March the center of the calm-belt is approximately at the equator, while in summer it rises in some longitudes to 8° or 9° N. latitude. The trade-wind zones in all oceans change their position with the season, moving to the northward from March to midsummer, and southward from September to March, the range of oscillation being from 200 to 600 miles. During the first nine months of the year the equatorial limit of the northeast trade in the Atlantic lies in a higher latitude near the west coast of Africa than it does further to the westward until the fortieth meridian is passed, where the limit again recedes from the equator. From October to December, however, the North Atlantic trade-wind extends to its lowest latitude on the African coast. On the eastern side of each ocean the polar limit of the trade-wind extends furthest from the equator, and blows most directly toward it: thus, on the coast of Portugal and on the coast of California, the trade-wind reaches far north of the tropics, the extension of it being often felt as far north as latitude 40°, and it is frequently felt as a north wind. Toward the western part of each ocean the trade-wind becomes more easterly, often prevailing due east for many days. The trade-wind attains its greatest strength in the South Indian ocean, which is called the "heart of the trades"; in the Pacific it does not blow with either the strength or the constancy that it has in the Atlantic; and in parts of the South Pacific it is frequently interrupted by westerly winds, which prevail through the summer, and sometimes through the greater part of the year. The region of high pressure at the tropics is in the form of great anticyclones extending in an east and west direction, and having shifting boundaries and variable gradients. As a consequence, the strength, and in some regions the direction, of the trades are subject to considerable variations. In general, the regions of the trade-winds have a scanty rainfall, for cyclones do not occur except in limited areas and at definite seasons; and convection-currents, although frequently covering the sky with a small detached cloud known as *trade cumulus*, are generally insufficient to produce rain.

Thus to the Eastern wealth through storms we go,
But now, the Cape once doubled, fear no more;
A constant *trade-wind* will securely blow,
And gently lay us on the spicy shore.
Dryden, Annus Mirabilis, st. 304.

trading (trā'ding), *a.* [Ppr. of *trade*[1], *v.*] 1†. Moving in a steady course or current. [Rare.]

They on the *trading* flood . . .
Ply, stemming nightly toward the pole.
Milton, P. L., ii. 640.

2. Carrying on commerce; engaged in trade: as, a *trading* company.—3. Given to corrupt bargains; venal.

What in him was only a sophistical self-deception, or a mere illusion of dangerous self-love, might have been, by the common herd of *trading* politicians, used as the cover for every low, and despicable, and unprincipled artifice.
Brougham, Hist. Sketches, Canning.

tradiometer (trā-di-om'e-tėr), *n.* A species of dynamometer for determining the draft of vehicles, plows, mowing-machines, etc. In one form the draft is applied to a kind of spring scale interposed between the draft-animal or propelling machine and the vehicle, plow, etc., the extension of the spring denoting the draft. Other more refined forms have been invented. One of these, by a tracing-point moved according to the pull, marks a curve on a disk, by which a variable draft is indicated.

tradition (trā-dish'on), *n.* [< ME. *tradicion*, < OF. *tradicion*, F. *tradition* = Pr. *tradition* = Sp. *tradición* = Pg. *tradição* = It. *tradizione*, < L. *traditio*(*n*-), a giving up, a surrender, delivery, tradition, < *tradere*, pp. *traditus*, deliver, < *trans*, over, + *dare*, give: see *date*[1]. Cf. *treason*, a doublet of *tradition*.] 1. The act of handing over something in a formal legal manner; the act of delivering into the hands of another; delivery.

The covenant is God's justifying instrument, as signifying his donative consent; and baptism is the instrument of it, by solemn investiture or *tradition*.
Baxter, Life of Faith, iii. 8.

As a private conveyance, Mancipation was extremely clumsy, and I have no doubt it was a great advantage to Roman society when this ancient conveyance was first subordinated to *Tradition* or simple delivery, and finally superseded by it. *Maine*, Early Law and Custom, p. 352.

2. The handing down of opinions, doctrines, practices, rites, and customs from ancestors to posterity; the transmission of any opinion or practice from forefathers to descendants or from one generation to another, by oral communication, without written memorials.

Say what you will against *Tradition;* we know the Signification of Words by nothing but *Tradition*.
Selden, Table-Talk, p. 111.

It is not true that written history is a mere *tradition* of falsehoods, assumptions, and illogical deductions, of what the writers believed rather than of what they knew, and of what they wished to have believed rather than what was true. *Stubbs*, Medieval and Modern Hist., p. 75.

3. A statement, opinion, or belief, or a body of statements or opinions or beliefs, that has been handed down from age to age by oral communication; knowledge or belief transmitted without the aid of written memorials.

Roselayn is a place where are the Cisterns called Solomon's, supposed, according to the common *tradition* hereabouts, to have been made by that great King, as a part of his recompence to King Hiram.
Maundrell, Aleppo to Jerusalem, p. 50.

Nobody can make a *tradition;* it takes a century to make it. *Hawthorne*, Septimius Felton, p. 111.

4. (*a*) In *theol.*, that body of doctrine and discipline supposed to have been revealed or commanded by God, but not committed to writing, and therefore not incorporated in the Scriptures. According to the Pharisees, when Moses was on Mount Sinai two sets of laws were delivered to him by God, one of which was recorded, while the other was handed down from father to son, and miraculously kept uncorrupted to their day. These are the traditions referred to in Mat. xv. 2 and other parallel passages. Roman Catholic theologians maintain that whatever of Christ's teaching was not committed to writing by the immediate disciples has been preserved in the church, and that this instruction, together with that subsequently afforded to the church by the direct teaching of the Holy Spirit—all of which is to be found in the writings of the fathers, the decrees of councils, and the decretals of the Popes—constitutes a body of tradition as truly divine, and therefore as truly authoritative, as the Scriptures themselves (*L. Abbott*, Dict. Rel. Knowledge). Anglican theologians, on the other hand, while acknowledging tradition recorded in ancient writers as of more or less authority in interpretation of Scripture and in questions of church polity and ceremonies, do not coördinate it with Scripture.

Why do thy disciples transgress the *tradition* of the elders? for they wash not their hands when they eat bread.
Mat. xv. 2.

The authority for this endless, mechanical religionism was the commands or *traditions* of the Fathers, handed down from the days of the Great Synagogue, but ascribed with pious exaggeration to the Almighty, who, it was said, had delivered them orally to Moses on Mount Sinai.
C. Geikie, Life of Christ, II. 205.

By apostolical *traditions* are understood such points of Catholic belief and practice as, not committed to writing in the Holy Scriptures, have come down in an unbroken series of oral delivery, and varied testimony, from the apostolic ages. *Faith of Catholics*, II. 387.

(*b*) In *Mohammedanism*, the words and deeds of Mohammed (and to some extent of his companions), not contained in the Koran, but handed down for a time orally, and then recorded. They are called *hadish*, 'sayings,' or oftener *sunna*, 'customs,' and they constitute a very large body, and have given rise to an immense literature. By their acceptance or non-acceptance of the traditions as authoritative, the Mohammedans are divided into *Sunnites* and *Shiites*. See *Sunna, Sunnite*.

5. A custom handed down from one age or generation to another and having acquired almost the force of law.

The *tradition* is that a President [in the United States] may be re-elected once, and once only.
E. A. Freeman, Amer. Lects., p. 381.

6. In the *fine arts*, *literature*, etc., the accumulated experience, advance, or achievement of the past, as handed down by predecessors or derived immediately from them by artists, schools, or writers.—**Tradition Sunday**, Palm Sunday: so called from the fact that on that day the Creed was formerly taught to candidates for baptism on Holy Saturday. *Encyc. Dict.*

tradition (trā-dish'on), *v. t.* [< *tradition*, *n.*] To transmit as a tradition. [Rare.]

The following story is . . . *traditioned* with very much credit amongst our English Catholics.
Fuller. (*Imp. Dict.*)

traditional (trā-dish'on-al), *a.* [= F. *traditionnel* = Sp. Pg. *tradicional*, < ML. *traditionalis*, of tradition, < L. *traditio*(*n*-), tradition: see *tradition*.] 1. Of, pertaining to, or derived from tradition; communicated from ancestors to descendants by word of mouth only; transmitted from age to age without writing; founded on reports not having the authenticity or value of historical evidence; consisting of traditions.

Mr. Tulliver was, on the whole, a man of safe *traditional* opinions. *George Eliot*, Mill on the Floss, i. 3.

While in the course of civilization written law tends to replace *traditional* usage, the replacement never becomes complete. *H. Spencer*, Prin. of Sociol., § 529.

2. Observant of tradition, in any sense; regulated by accepted models or traditions, irrespective of independently deduced principles; conventional.

Card. God in heaven forbid
We should infringe the holy privilege
Of blessed sanctuary! . . .
Buck. You are too senseless-obstinate, my lord,
Too ceremonious and *traditional*.
Shak., Rich. III., iii. 1. 45.

traditionalism (trā-dish'on-al-izm), *n.* [= Sp. *tradicionalismo;* as *traditional* + *-ism.*] Strictly, a system of philosophy in which all religious knowledge is reduced to belief in truth communicated by revelation from God, and received by traditional instruction; popularly, the habit of basing religious convictions on ecclesiastical authority and the traditional belief of the church, not on an independent study of the Scripture, or an independent exercise of the reason; adherence to tradition as an authority.

traditionalist (trā-dish'on-al-ist), *n.* [= Sp. *tradicionalista;* as *traditional* + *-ist.*] One who holds to the authority of tradition.

traditionalistic (trā-dish″on-a-lis'tik), *a.* [< *traditional* + *-ist* + *-ic.*] Of, pertaining to, or characterized by traditionalism.

De Bonald . . . was the chief of the so-called *traditionalistic* school, the leading dogma of which was the divine creation of language.
Ueberweg, Hist. Philos. (trans.), II. 339.

traditionality (trā-dish-o-nal'i-ti), *n.* [< *traditional* + *-ity.*] Traditional principle or opinion. [Rare.]

Many a man doing loud work in the world stands only on some thin *traditionality*, conventionality.
Carlyle. (*Imp. Dict.*)

traditionally (trā-dish'on-al-i), *adv.* In a traditional manner; by transmission from father to son or from age to age; according to tradition; as a tradition; in or by tradition.

Time-worn rules, that them suffice,
Learned from their sires, *traditionally* wise.
Lowell, Agassiz, ii. 1.

traditionarily (trā-dish'on-ā-ri-li), *adv.* In a traditionary manner; by tradition.

traditionary (trā-dish'on-ā-ri), *a.* and *n.* [= F. *traditionnaire;* as *tradition* + *-ary.*] I. *a.* Same as *traditional*.

Decayed our old *traditionary* lore.
Scott, Vision of Don Roderick, Int., st. 8.

II. *n.*; pl. *traditionaries* (-riz). One who acknowledges the authority of traditions.

traditioner (trā-dish'on-ėr), *n.* [< *tradition* + *-er*[1].] A traditionist.

traditionist (trā-dish'on-ist), *n.* [< *tradition* + *-ist.*] One who makes or adheres to tradition; a passer-on of old habits, opinions, etc.

As the people are faithful *traditionists*, repeating the words of their forefathers, . . . they are the most certain antiquaries; and their oral knowledge and their ancient observances often elucidate many an archæological obscurity. *I. D'Israeli*, Amen. of Lit., I. 172.

traditive (trad'i-tiv), *a.* [< OF. *traditif;* as L. *traditus*, pp. of *tradere*, deliver (see *tradition*), + *-ive.*] Of or pertaining to or based on tradition; traditional.

We cannot disbelieve *traditive* doctrine, . . . if it be infallibly proved to us that tradition is an infallible guide.
Jer. Taylor, Works (ed. 1835), II. 334.

Traditive systems grow up in a course of generations.
Gladstone.

traditor (trad'i-tor), *n.*; L. pl. *traditores* (trad-i-tō'rēz). [< L. *traditor*, one who gives up or over, a traitor, < *tradere*, give up, surrender: see *tra-*

dition. Cf. *traitor*, a doublet of *traditor*.] One of those early Christians who, in time of persecution, gave up to the officers of the law the Scriptures, or any of the holy vessels, or the names of their brethren.

There were in the Church itself *Traditors* content to deliver up the books of God by composition, to the end their own lives might be spared. *Hooker*, Eccles. Polity, v. 62.

tradotto (trä-dot'tō), *a.* [It., pp. of *tradurre*, transpose: see *traduce*.] In *music*, transposed; arranged.

tradrille†, *n.* Same as *tredille*. *Lamb*, Mrs. Battle on Whist.

traduce (trä-dūs'), *v. t.*; pret. and pp. *traduced*, ppr. *traducing*. [=F. *traduire* = Sp. *traducir* = Pg. *traduzir* = It. *tradurre*, transfer, translate, < L. *traducere*, bring or carry over, lead along, exhibit as a spectacle, display, disgrace, dishonor, transfer, derive, also train, propagate, < *trans*, across, + *ducere*, lead: see *duct*. Cf. *transduction*.] **1**†. To pass along; transmit.

It is not in the power of parents to *traduce* holiness to their children. *Bp. Hall*, The Angel and Zachary.

From these only the race of perfect animals were propagated, and *traduced* over the earth. *Sir M. Hale.*

To this it is offered that the Soul *traduced* is from the woman only. *Evelyn*, True Religion, I. 167.

2†. To transfer; translate; arrange under another form.

Oftentimes the auctours and writers are dispraised, not of them that can *traduce* and compose workes, but of theim that cannot vnderstande theim, and yet lesse reade theim. *Golden Boke*, Prol. (*Richardson.*)

3†. To hold up; exhibit; expose; represent.

For means of employment, that which is most *traduced* to contempt is that the government of youth is commonly allotted to them. *Bacon*, Advancement of Learning, i.

The removing of Liturgie he *traduces* to be don onely as a thing plausible to the People. *Milton*, Eikonoklastes, xvi.

4. To misrepresent; hold up or expose to ridicule or calumny; defame; calumniate; vilify.

If I am
Traduced by ignorant tongues, . . . let me say
'Tis but the fate of place, and the rough brake
That virtue must go through. *Shak.*, Hen. VIII., i. 2. 72.

5†. To draw aside from duty; lead astray; seduce.

I can never forget the weakness of the *traduced* soldiers. *Beau. and Fl.* (*Imp. Dict.*)

=**Syn. 4.** *Defame, Calumniate*, etc. See *asperse*.

traducement (trä-dūs'ment), *n.* [< *traduce* + *-ment*.] The act of traducing; misrepresentation; defamation; calumny; obloquy.

Rome must know
The value of her own; 'twere a concealment
Worse than a theft, no less than a *traducement*,
To hide your doings. *Shak.*, Cor., i. 9. 22.

traducent (trä-dū'sent), *a.* [< L. *traducen(t-)s*, ppr. of *traducere*, traduce: see *traduce*.] Slandering; slanderous. [Rare.]

traducer (trä-dū'sėr), *n.* One who traduces, in any sense; especially, a slanderer; a calumniator.

He found both spears and arrows in the mouths of his *traducers*. *Bp. Hall*, Balm of Gilead, v. 2.

traducian (trä-dū'shian), *n.* [< LL. *traducianus*, < L. *tradux*, a branch or layer of a vine trained for propagation, < *traducere*, lead along, train, propagate: see *traduce*.] In *theol.*, a believer in traducianism.

traducianism (trä-dū'shian-izm), *n.* [< *traducian* + *-ism*.] In *theol.*, the doctrine that both the body and the soul of man are propagated, as opposed to *creationism*, which regards every soul as a new creation out of nothing. Also called *generationism*.

The theory of *Traducianism* maintains that both the soul and body of the individual man are propagated. It refers the creative act mentioned in Gen. i. 27 to the human nature, or race, and not to a single individual merely. It considers the work of creating mankind de nihilo as entirely completed upon the sixth day; and that since that sixth day the Creator has, in this world, exerted no strictly creative energy. *Shedd*, Hist. Christian Doctrine, II. 13.

traducianist (trä-dū'shian-ist), *n.* [< *traducian* + *-ist*.] A traducian. *Imp. Dict.*

traducible (trä-dū'si-bl), *a.* [< *traduce* + *-ible*.] **1**†. Capable of being derived, transmitted, or propagated.

Though oral tradition might be a competent discoverer of the original of a kingdom, yet such a tradition were incompetent without written monuments to derive to us the original laws, because they are of a complex nature, and therefore not orally *traducible* to so great a distance of ages. *Sir M. Hale.*

2. Capable of being traduced or maligned. *Imp. Dict.*

traducingly (trä-dū'sing-li), *adv.* In a traducing or defamatory manner; slanderously; by way of defamation. *Imp. Dict.*

traduct† (trä-dukt'), *v. t.* [< L. *traductus*, pp. of *traducere*, lead along, derive: see *traduce*.] To derive or deduce; also, to transmit; propagate.

No soul of man from seed *traducted* is.
Dr. H. More, Præ-existency of the Soul, st. 91.

traduct† (trä-dukt'), *n.* [< L. *traductus*, pp. of *traducere*, transfer: see *traduce*.] That which is transferred or translated; a translation.

The *Traduct* may exceed the Original.
Howell, Letters, ii. 47.

traduction (trä-duk'shon), *n.* [< F. *traduction* = Pr. *traductio* = Sp. *traducción* = Pg. *traducção* = It. *traduzione*, translation, < L. *traductio(n-)*, < *traducere*, pp. *traductus*, lead across, transfer, propagate. see *traduce*.] **1**†. Derivation from one of the same kind; propagation; reproduction; transmission; inheritance.

If by *traduction* came thy mind,
Our wonder is the less to find
A soul so charming from a stock so good;
Thy father was transfus'd into thy blood.
Dryden, To Mrs. Anne Killigrew, l. 23.

2†. Tradition; transmission from one to another.

Traditional communication and *traduction* of truths.
Sir M. Hale.

3. The act of giving origin to a soul by procreation. Compare *traducianism*.

A third sort would have the soul of man (as of other living creatures) to be propagated by the seminal *traduction* of the natural parents successively, from the first person and womb that ever conceived. *Evelyn*, True Religion, I. 149.

4†. Translation from one language into another; a translation.

Those translators . . . that effect
Their word-for-word *traductions*, where they lose
The free grace of their natural dialect,
And shame their authors with a forcéd gloss.
Chapman, Homer, To the Reader, l. 104.

The verbal *traduction* of him into Latin prose, than which nothing seems more raving. *Cowley*, Pindaric Odes, Pref.

5. Conveyance; transportation; act of transferring: as, "the *traduction* of animals from Europe to America by shipping," *Sir M. Hale*. [Rare.]—**6.** Transition. [Rare.]

The reports and fugues have an agreement with the figures in rhetorick of repetition and *traduction*. *Bacon.*

traductive (trä-duk'tiv), *a.* [< L. *traductus*, pp. of *traducere*, derive (see *traduce*), + *-ive*.] Deduced or deducible; derivable. [Rare.]

I speak not here concerning extrinsical means of determination, as *traductive* interpretations, councils, fathers, popes, and the like. *Jer. Taylor*, Works (ed. 1835), II. 328.

Trafalgar (tra-fal'gär), *n.* [So called with ref. to *Trafalgar* (either to the battle or to the square in London named from it).] An English body of type, smaller than canon, equal to the American 44-point or meridian, or four lines of small pica.

traffic (traf'ik), *n.* [Early mod. E. *traffick*, *traffike*, *traffique*; < OF. *trafique*, F. *trafic* = Pr. *trafec*, *trafey* = Sp. *tráfico*, *tráfago* = Pg. *trafico*, *trafego* = It. *traffico* (ML. refl. *traficum*, *trafica*), traffic; origin unknown.] **1.** An interchange of goods, merchandise, or property of any kind between countries, communities, or individuals; trade; commerce.

It hath in solemn synods been decreed . . .
To admit no *traffic* to our adverse towns.
Shak., C. of E., i. 1. 15.

2. The coming and going of persons or the transportation of goods along a line of travel, as on a road, railway, canal, or steamship route.

Traffic during that thirty-six hours was entirely suspended. *T. C. Crawford*, English Life, p. 13.

Hence—**3.** The persons or goods, collectively, passing or carried along a route or routes.—**4.** Dealings; intercourse.—**5**†. A piece of business; a transaction.

The fearful passage of their death-mark'd love . . .
Is now the two hours' *traffic* of our stage.
Shak., R. and J., Prol.

I referre you then to the Ambassages, Letters, *Traffiques*, and prohibition of *Traffiques* . . . which happened in the time of king Richard the 2. *Hakluyt's Voyages*, To the Reader.

6. The subject of traffic; commodities marketed. [Rare.]

You'll see a draggled damsel, here and there,
From Billingsgate her fishy *traffic* bear.
Gay, Trivia, ii. 10.

Through traffic. See *through*[1].

traffic (traf'ik), *v.*; pret. and pp. *trafficked*, ppr. *trafficking*. [Early mod. Despair to gain doth *traffic* oft for gaining.
Shak., Lucrece, l. 131.

At twentie yeares they may *traffike*, buy, sell, and circumuent all they can. *Purchas*, Pilgrimage, p. 193.

2. To deal; have business or dealings.

It is a greate trauell to *traffike* or deale with furious, impatient, and men of euill suffering, for that they are importable to serue, and of conuersation verie perillous. *Guevara*, Letters (tr. by Hellowes, 1577), p. 116.

How did you dare
To trade and *traffic* with Macbeth
In riddles and affairs of death?
Shak., Macbeth, iii. 5. 4.

II. *trans.* **1.** To exchange in traffic; barter, or buy and sell.

In affairs
Of princes, subjects cannot *traffic* rights
Inherent to the crown. *Ford*, Perkin Warbeck, iv. 1.

2. To bargain; negotiate; arrange. [Rare.]

He *trafficked* the return of King James.
Drummond, Hist. James I., p. 14. (*Latham.*)

traffickable† (traf'ik-a-bl), *a.* [Early mod. E. *traffiqueable*; < *traffic*(*k*) + *-able*.] Capable of being disposed of in traffic; marketable.

Money itself is not onely the price of all commodities in all civil nations, but it is also, in some cases, a *traffiqueable* commodity. *Bp. Hall*, Cases of Conscience, i. 1.

trafficker (traf'ik-ėr), *n.* [Early mod. E. *trafficker*; < *traffic*(*k*) + *-er*[1].] One who traffics; one who carries on commerce; a merchant; a trader: often used in a derogatory sense.

Who hath taken this counsel against Tyre, the crowning city, whose merchants are princes, whose *traffickers* are the honourable of the earth? Isa. xxiii. 8.

His Grace of Norfolk, a bon vivant surrounded by men who kept the table in a roar, and a famous *trafficker* in boroughs. *E. Dowden*, Shelley, I. 133.

trafficless (traf'ik-les), *a.* [< *traffic* + *-less*.] Destitute of traffic or trade. *Imp. Dict.*

traffic-manager (traf'ik-man″āj-ėr), *n.* The manager of the traffic on a railway, canal, or the like.

traffic-return (traf'ik-rē-tėrn″), *n.* A periodical statement of the receipts for goods and passengers carried, as on a railway or canal.

tragacanth (trag'a-kanth), *n.* [Formerly also *dragagant*, also *dragant*, *draganth* = D. Sw. Dan. *dragant*, < OF. *dragagant*, *dragacanthe*, *dragant*, F. *tragacanthe* = Sp. *tragacanto*, *tragacanta* = Pg. *tragacanto* = It. *tragacanta*, *dragante*, gum, OIt. also *tragacante*, the shrub, < L. *tragacanthum*, also corruptly *dragantum*, ML. also *tragagantum*, *tragantum*, gum tragacanth, < *tragacantha*, < Gr. τραγάκανθα, τραγάκανθος, a shrub (*Astragalus gummifer*) producing gum tragacanth; lit. 'goat-thorn,' < τράγος, a goat, + ἄκανθα, thorn.] A mucilaginous substance, the product of several low, spiny shrubs of the genus *Astragalus*, among them *A. gummifer*, *A. eriostylus*, *A. adscendens*, *A. brachycalyx*, and *A. microcephalus*, plants found in the mountains of Asia Minor and neighboring lands. The gum is not a secretion of the sap, but a transformation of the cells of the pith and medullary rays. It exudes through natural fissures and through incisions, forming respectively vermicelli and leaf or flake tragacanth. It is without smell, and nearly tasteless. Its characteristic, though not largest, element is bassorin. In water it swells and disintegrates into an adhesive paste, but, except a small portion, does not dissolve. Tragacanth is emollient and demulcent, little given internally, however, on account of its insolubility. Its chief use in pharmacy is to impart firmness to pills, lozenges, etc. It is also made into a mucilage, particularly for marbling books, and is used as a stiffening for crapes, calicoes, etc. Also called *gum dragon*, *dracanth*, and (frequently) *gum tragacanth*.—**African tragacanth.** Same as *Senegal tragacanth*.—**Compound powder of tragacanth.** See *powder*.—**Hog-tragacanth,** various mixtures of inferior gums, used occasionally in marbling books.—**Indian tragacanth.** Same as *Kuteera gum* (see *gum*[2]), which includes, besides the product of *Maximilianea Gossypium*, that of *Sterculia urens* and probably other sterculias.—**Senegal tragacanth**, a substance nearly identical with the Indian tragacanth, produced abundantly by *Sterculia Tragacantha*.

Astragalus gummifer, a plant yielding tragacanth.

tragacantha (trag-ạ-kan′thä), *n.* [NL.: see *tragacanth.*] The officinal name of tragacanth.

tragacanthin (trag-ạ-kan′thin), *n.* [< *tragacanth* + *-in*2.] Same as *bassorin.* Also *traganthin.*

tragal (trā′gạl), *a.* [< *tragus* + *-al.*] Of or pertaining to the tragus of the ear.

tragalism (trag′ạ-lizm), *n.* [< Gr. τράγος, a goat, + *-al* + *-ism.*] Goatishness from high living; salaciousness; sensuality. *Quarterly Rev.* [Rare.]

traganthin (trạ-gan′thin), *n.* Same as *bassorin.*

tragedian (trạ-jē′di-ạn), *n.* [< ME. *tragedyen*, < OF. *tragedien*, F. *tragédien* (cf. It. *tragediante*); as *tragedy* + *-an.*] 1. A writer of tragedies.

A *tragedyen*—that is to seyn, a makere of ditees that hyhten tragedies. *Chaucer*, Boethius, iii. prose 6.

Thence what the lofty grave *tragedians* taught
In chorus or iambic, teachers best
Of moral prudence. *Milton*, P. R., iv. 261.

Admiration may or may not properly be excited by tragedy, and until this important question is settled the name of *tragedian* may be at pleasure given to or withheld from the author of "Rodogune" [Corneille].
G. Saintsbury, Encyc. Brit., VI. 420.

2. An actor of tragedy; by extension, an actor or player in general.

Those you were wont to take delight in, the *tragedians* of the city. *Shak.*, Hamlet, ii. 2. 342.

tragedienne (trā-jē′di-en; F. pron. tra-zhā-dien′), *n.* [< F. *tragédienne*, fem. of *tragédien*, tragedian: see *tragedian.*] A female actor of tragedy; a tragic actress.

tragediousꝑ (trā-jē′di-us), *a.* [< ME. *tragedyous*, < OF. **tragedios* (= Sp. *tragedioso*), < *tragedie*, tragedy: see *tragedy.*] Tragic; tragical.

Of whom tedyous it is to me to wryte the *tragedyous* hystory, except that I remembre that good it is to wryte and put in remembraunce the punysshment of synners.
Fabyan, Chron.

tragedy (traj′e-di), *n.*; pl. *tragedies* (-diz). [< ME. *tragedie*, *tragedye*, < OF. *tragedie*, F. *tragédie* = Sp. Pg. It. *tragedia*, < L. *tragœdia*, ML. also *tragedia*, tragedy, a tragedy, lofty style, a great commotion or disturbance, < Gr. τραγῳδία, a tragedy (see def.), serious poetry, an exaggerated speech, a melancholy event, < τραγῳδός (> L. *tragœdus*), a tragic actor or singer, lit. 'a goat-singer,' < τράγος, a goat, he-goat (lit. 'nibbler,' < τρώγειν, τραγεῖν, nibble), + ᾠδός, contr. of ἀοιδός, a singer (cf. ᾠδή, ἀοιδή, a song), < ἀείδειν, ἄδειν, sing (see *ode*1), and same termination appears in *comedy.* The orig. reason of the name τραγῳδός, 'goat-singer,' is uncertain. (*a*) In one view, so called because a goat was the prize for the best performance. This would require τραγῳδός to mean 'singer for a goat,' and would make the name for a distinctive character or act depend on a subsequent fact, namely, the goat given at the end of the performance to only one of the performers. (*b*) In another view, so called because a goat was sacrificed at the singing of the song—a goat as the spoiler of vines, if not on other accounts, being a fitting sacrifice at the feasts of Bacchus. But this again makes the name depend on a subsequent act, or an act not immediately concerned with the 'goat-singer'—unless indeed the 'goat-singer' himself killed the goat. (*c*) It is much more probable that the τραγῳδός was lit. 'a goat-singer' in the most literal sense, a singer or actor dressed in a goatskin, to personate a satyr, hence later 'an actor in the satyric drama,' from which tragedy in the later sense was developed. Whatever the exact origin of the term, the ult. reference was no doubt to the satyrs, the companions of Bacchus, the clowns of the original drama. Cf. τρυγῳδός, a comic actor, similarly named from his disguise, namely, from the lees with which his face was smeared (< τρύξ (τρυγ-), lees, + ᾠδός, singer).] 1. A dramatic poem or composition representing an important event or series of events in the life of some person or persons, in which the diction is grave and dignified, the movement impressive and stately, and the catastrophe unhappy; that form of the drama which represents a somber or a pathetic character involved in a situation of extremity or desperation by the force of an unhappy passion. Types of these characters are found in Shakspere's Lady Macbeth and Ophelia, Rowe's Jane Shore, and Scott's Master of Ravenswood. Tragedy originated among the Greeks in the worship of the god Dionysus or Bacchus. A Greek tragedy consisted of two parts—the dialogue, which corresponded in its general features to the dramatic compositions of modern times; and the chorus, the tone of which was lyrical rather than dramatical, and which was meant to be sung, while the dialogue was to be recited.

Tragedie is for to seyn a certeyn storie . . .
Of him that stood in greet prosperitee,
And is yfallen out of heigh degree
Into miserie, and endeth wrecchedly.
And they ben versifyed comounly
Of six feet, which men clepe exametrown.
In prose eek ben endyted many oon,
And eek in metre, in many a sondry wyse.
Chaucer, Prol. to Monk's Tale, l. 85.

Life is a *tragedy*, wherein we sit as spectators a while, and then act our own part in it.
Swift, To Mrs. Moore, Dec. 27, 1727.

Over what *tragedy* could Lady Jane Grey have wept, over what comedy could she have smiled?
Macaulay, Lord Bacon.

"The Bride of Lammermoor," which almost goes back to Æschylus for a counterpart as a painting of Fate, leaving on every reader the impression of the highest and purest *tragedy*. *Emerson*, Walter Scott.

2. [*cap.*] Tragedy personified, or the Muse of tragedy. See cut under *Melpomene.*

Sometime let gorgeous *Tragedy*
In sceptred pall come sweeping by.
Milton, Il Penseroso, l. 97.

3. A fatal event; a dreadful calamity.

But I shall laugh at this a twelve-month hence,
That they who brought me in my master's hate,
I live to look upon their *tragedy*.
Shak., Rich. III., iii. 2. 59.

The day came on that was to do
That dreadful *tragedy*.
Sir Hugh le Blond (Child's Ballads, III. 258).

Tragelaphinæ (trā-jel-ạ-fī′nē), *n. pl.* [NL., < *Tragelaphus* + *-inæ.*] A former division of antelopes, represented by the genus *Tragelaphus.*

tragelaphine (trā-jel′ạ-fin), *a.* Pertaining to the *Tragelaphinæ*, or having their characters.

tragelaphus (trā-jel′ạ-fus), *n.* [< Gr. τραγέλαφος, 'goat-stag,' < τράγος, a goat, + ἔλαφος, a deer.] 1. In *myth.*, a fabulous animal, a symbol or attribute of Diana. See the quotation.

Among the principal of these symbols [of Diana] is the deer, . . . which is sometimes blended into one figure with the goat so as to form a composite fictitious animal called a *Trag-elaphus*.
R. P. Knight, Anc. Art and Myth. (1876), p. 81.

2. [*cap.*] [NL. (De Blainville).] In *zoöl.*, a genus of antelopes, including such as the harnessed antelope of Africa, *T. scriptus*, and the boschbok of the same continent, *T. sylvaticus.*

tragi, *n.* Plural of *tragus.*

Tragia (trā′ji-ạ), *n.* [NL. (Plumier, 1703), named after Hieronymus Bock (Latinized *Tragus*) (1498–1554), a celebrated German botanist.] A genus of plants, of the family *Euphorbiaceæ*, tribe *Crotoneæ*, and subtribe *Plukenetieæ.* They are usually climbers with stinging hairs, having monœcious flowers in racemes, the staminate commonly above, the pistillate below, the former with three stamens, the latter with imbricated sepals and the styles connate into a column but free at the apex. There are about 100 species, widely scattered through warm countries, extending beyond the tropics to South Africa and to the southern and central United States. They are herbaceous or shrubby perennials, usually either climbing or twining, and with alternate dentate leaves with a cordate and three- to five-nerved base. The fruit, composed of three two-valved carpels, is hispid or echinate, and covered with conspicuous stinging hairs. Two species of the southern United States are usually erect; *T. macrocarpa* is a twining vine. See *cowhage.* 2.

tragic (traj′ik), *a.* and *n.* [= F. *tragique* = Sp. *trágico* = Pg. It. *tragico*, < L. *tragicus*, < Gr. τραγικός, < τράγος, pertaining to tragedy, etc., lit. 'pertaining to a goat,' a sense found first in later authors, the orig. use being prob. 'pertaining to a goat' or satyr as personated by a 'goat-singer,' or satyric actor: see *tragedy.* *Tragic* is thus used as the adj. of *tragedy*, as *comic* is the adj. of *comedy*, though etymologically these adjectives belong only to the first elements of the nouns respectively.] **I.** *a.* 1. Pertaining or relating to tragedy; of the nature of tragedy: as, a *tragic* poem; the *tragic* drama.

This man's brow, like to a title-leaf,
Foretells the nature of a *tragic* volume.
Shak., 2. Hen. IV., i. 1. 60.

2. Characteristic of tragedy.

And so it is that we discover the true majesty of human nature itself, in the *tragic* grandeur of its disorders, nowhere else. *Bushnell*, Sermons for New Life, p. 64.

3. Connected with or characterized by great calamity, cruelty, or bloodshed; mournful; dreadful; heart-rending.

Woe than Byron's woe more *tragic* far.
M. Arnold, A Picture at Newstead.

All things grew more *tragic* and more strange.
Tennyson, Princess, vi.

4. Expressive of tragedy, death, or sorrow.

I now must change
Those notes to *tragic*. *Milton*, P. L., ix. 6.

II. *n.* 1. A writer of tragedy; a tragedian.

The Comicks are called διδασκαλοι, of the Greeks, no less than the *tragicks*. *B. Jonson*, Discoveries.

2. A tragedy; a tragic drama. *Prior.* (*Imp. Dict.*)

tragical (traj′i-kạl), *a.* [< *tragic* + *-al.*] Same as *tragic.*

Hoping the consequence
Will prove as bitter, black, and *tragical*.
Shak., Rich. III., iv. 4. 7.

tragically (traj′i-kạl-i), *adv.* 1. In a tragic manner; in a manner befitting tragedy.

His [Juvenal's] own genius . . . was sharp and eager; . . . and as his provocations were great, he has revenged them *tragically*. *Dryden*, Essay on Satire.

2. Mournfully; sorrowfully.

Many complain and cry out very *tragically* of the wretchedness of their hearts. *South*, Sermons, VI. xii.

tragicalness (traj′i-kạl-nes), *n.* Tragic character or quality; mournfulness; sadness; fatality.

We moralize the fable . . . in the *tragicalness* of the event. *Decay of Christ. Piety.*

tragici, *n.* Plural of *tragicus.*

tragiclyꝑ (traj′ik-li), *adv.* [< *tragic* + *-ly*2.] Tragically; sadly; mournfully.

I shall sadly sing, too *tragickly* inclin'd.
Stirling, Aurora, Elegy, iii.

tragicomedy (traj-i-kom′e-di), *n.* [Early mod. E. *tragycomedie*; < F. *tragicomédie* = Sp. Pg. *tragicomedia* = It. *tragicomedia*, < ML. **tragicomœdia*, a contraction of L. *tragicocomœdia*, < Gr. **τραγικοκωμῳδία*, < τραγικός, tragic, + κωμῳδία, comedy: see *tragic* and *comedy.*] A dramatic composition in which serious and comic scenes are blended; a composition partaking of the nature of both tragedy and comedy, and of which the event is not unhappy, as Shakspere's "Measure for Measure."

Neither the admiration and commiseration, nor the right sportfulnes, is by their mungrell *Tragy-comedie* obtained. *Sir P. Sidney*, Apol. for Poetrie.

Such acts and scenes hath this *tragi-comedy* of love.
Burton, Anat. of Mel., p. 525.

tragicomic (traj-i-kom′ik), *a.* [< F. *tragicomique* = Sp. *tragicómico* = Pg. It. *tragicomico*, < L. as if **tragicomicus*, contr. of **tragicocomicus*; as *tragic* + *comic.* Cf. *tragicomedy.*] Pertaining to tragicomedy; characterized by both serious and comic scenes.

In viewing this monstrous *tragicomic* scene, the most opposite passions necessarily succeed.
Burke, Rev. in France.

Julian felt towards him that *tragi-comic* sensation which makes us pity the object which excites it, not the less that we are somewhat inclined to laugh amid our sympathy.
Scott, Peveril of the Peak, xxxvi.

They [Shelley and his wife] wandered vaguely about after this, in Scotland one time, in Wales the next, meeting with all kinds of *tragi-comic* adventures.
Mrs. Oliphant, Lit. Hist. Eng., III. 39.

tragicomical (traj-i-kom′i-kạl), *a.* [< *tragicomic* + *-al.*] Same as *tragicomic.* *Sir P. Sidney*, Apol. for Poetry.

tragicomically (traj-i-kom′i-kạl-i), *adv.* In a tragicomic manner.

tragicomipastoral (traj-i-kom-i-pȧs′tọr-ạl), *a.* [Irreg. < *tragicomi*(*c*) + *pastoral.*] Partaking of the nature of tragedy, comedy, and pastoral poetry. [Rare.]

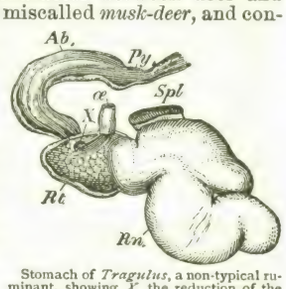
The whole art of *tragicomipastoral* farce lies in interweaving of the several kinds of the drama with each other, so that they can not be distinguished or separated.
Gay, What d'ye Call it (ed. 1715), Pref.

tragicus (traj′i-kus), *n.*; pl. *tragici* (-sī). [NL. (sc. *musculus*, muscle), < *tragus*, q. v.] A muscle of the pinna of the ear which actuates the tragus. In man it is rudimentary, practically functionless, and confined to the part named; but its character in other mammals varies and may be very different.

tragopan (trag′ō-pan), *n.* [NL., < Gr. τράγος, a goat, + Πάν, Pan. Cf. *Ægipan.*] 1. A pheas-

ant of the genus *Ceriornis*, so called from the erectile fleshy horns on the head, suggestive of

Crimson Tragopan (*Ceriornis satyra*).



a faun or satyr; a horned pheasant. They are also called *satyrs*. One of the best-known is the crimson tragopan, *C. satyra*.—2. [*cap.*] Same as *Ceriornis*. *Cuvier*, 1829.

Tragopogon (trag-ō-pō′gon), *n.* [NL. (Tournefort, 1700), so called with ref. to the long pappus; < Gr. τράγος, goat, + πώγων, beard.] A genus of composite plants, of the family *Cichoriaceæ* and tribe *Scorzonereæ*. It is characterized by entire leaves and flower-heads with uniseriate acuminate involucral bracts, the achenes tapering into a long and slender or a very short beak, with plumose pappus. About 35 species are recognized by recent authors. They are natives of Europe, northern Africa, and temperate and subtropical Asia. They are biennial or perennial herbs, often covered in places with floccose wool. They bear linear alternate clasping leaves which are commonly grass-like, and terminal yellow or bluish flower-heads on long peduncles. For *T. porrifolius* see *salsify*, and for *T. pratensis* see *goat's-beard*, *buck's-beard*, and *noon-flower*. Both species are locally naturalized in the United States.

Tragops (trā′gops), *n.* [NL., < Gr. τράγος, a goat, + ὄψ, face.] 1. A genus of reptiles. *Wagler*, 1830.—2†. In *mammal.*, a genus of goat-antelopes with four horns, as *Tragops bennetti*: synonymous with *Tetraceras*. See cut under *ravine-deer*.

tragule (trag′ūl), *n.* [< NL. *Tragulus*.] An animal of the genus *Tragulus*; one of the *Tragulidæ*.

Tragulidæ (trā-gū′li-dē), *n. pl.* [NL., < *Tragulus* + *-idæ*.] A family of small ruminants intermediate in character between deer and swine, sometimes miscalled *musk-deer*, and confounded with the true musk-deer (of the genus *Moschus*), in consequence of their small size and the similar development of the canine teeth; the chevrotains. The placenta is diffuse, not cotyledonary; the stomach has but three compartments, the psalterium being rudimentary; there are no antlers; there are four complete toes on each foot, the second and fifth metapodials being complete; the scaphoid, cuboid, and outer cuneiform tarsal bones are united; the odontoid process of the axis is conical; there are no upper incisors; the upper canines are long, pointed, and projecting like tusks in the male; the lower canines are like incisors; and the molariform teeth are in continuous series, being three premolars and three molars above and below on each side.

Stomach of *Tragulus*, a non-typical ruminant, showing *X*, the reduction of the psalterium to a mere passage between *Rt*, the reticulum, and *Ab*, the abomasus. *Rn*, rumen; *œ*, esophagus; *Py*, pylorus; *Spl*, spleen.

Tragulina (trag-ū-lī′nä), *n. pl.* [NL., < *Tragulus* + *-ina*².] Same as *Traguloidea*.

traguline (trag′ū-lin), *a.* [< *Tragulus* + *-ine*¹.] 1. Goat-like: noting a group of antelopes represented by the steenbok, *Nanotragus tragulus*, and related forms. *Hamilton Smith*. See cut under *steenbok*.—2. Related to or belonging to the *Tragulina*, or chevrotains; traguloid.

traguloid (trag′ū-loid), *a.* [< *Tragulus* + *-oid*.] Pertaining to the *Traguloidea*, or having their characters.

Traguloidea (trag-ū-loi′dē-ä), *n. pl.* [NL., < *Tragulus* + *-oidea*.] One of the prime divisions of existent selenodont artiodactyls, or ruminants; the chevrotains, a superfamily consisting of the family *Tragulidæ* alone. Its characters are the same as those of the family. See *chevrotain*, *kanchil*, and cut under *Tragulidæ*. Also *Tragulina*.

Tragulus (trag′ū-lus), *n.* [NL., dim. of *tragus*, < Gr. τράγος, a goat: see *tragedy*.] A genus of small Asiatic deer, typical of the family *Tragulidæ*, including *T. javanicus*, the napu of Java, and the kanchil, or pygmy chevrotain, *T. pygmæus*. The latter is very small, and is renowned for its

Pygmy Chevrotain (*Tragulus pygmæus*), male.

cunning in the Asiatic isles as the fox is with us, being said to feign death when snared, and then to leap up and run off when disentangled from the snare.

tragus (trā′gus), *n.*; pl. *tragi* (-jī). [NL., < Gr. τράγος, part of the inner ear, a particular use, in allusion to the bunch of hairs upon it, of τράγος, a goat, lit. 'nibbler,' < τρώγειν, τραγεῖν, nibble, gnaw.] 1. In *anat.*, a small gristly and fleshy prominence at the entrance of the external ear, projecting backward from the anterior edge of the orifice, and partly closing it: the projection opposite is the *antitragus*. See second cut under *ear*¹.—2. In *zoöl.*, a corresponding process guarding the external meatus, sometimes capable of closing the orifice like a valve: in some animals, as bats, developing to enormous size and extraordinary shape, and believed to serve as a delicate tactile organ.—3. [*cap.*] A name given by Haller in 1768 to *Nazia*, a genus of grasses. It is characterized by flowers in a spike composed of fascicles which are each formed of from three to five spikelets, the terminal spikelet sterile, the others usually fertile; and by the two or three glumes, the second larger, rigid, and echinate. The only species, *Nazia racemosa*, is widely diffused through tropical and temperate regions. It is a branching annual grass with soft flat leaves and flowers in a rather loose terminal bur-like spike, whence it is known as *burdock-grass*.

traictise†, *n.* An old form of *treatise*.

A booke, conteinyng a *traictise* of justice.
Udall, tr. of Apophthegms of Erasmus, p. 248. (*Davies.*)

traiet†, *v.* An old spelling of *tray*².

traik (trāk), *v. i.* [Origin obscure; cf. *track*¹, etc.; cf. also Sw. *tråka*, tug, trudge.] 1. To wander idly from place to place.—2. To wander so as to lose one's self or itself: chiefly applied to the young of poultry. *Jamieson.*—3. To be in a declining state of health; become very ill; give out. [Scotch in all uses.]

But for the kindness and helpfulness shown me on all hands I must have *traiked*.
Carlyle, in Froude (First Forty Years, xl., note 2).

To traik after, to follow in a lounging or dangling way; dangle after.

Coming *traiking after* them for their destruction.
Scott, Heart of Mid-Lothian, xxiv.

traik (trāk), *n.* [Cf. *traik*, *v.*] 1. A plague; a mischief; a disaster: applied both to things and to persons. *Jamieson.*—2. The flesh of sheep that have died of disease or by accident. *Jamieson.* [Scotch in both uses.]

traiket (trā′ket), *p. a.* [Pp. of *traik*, *v.*] Very ★much exhausted; worn out. [Scotch.]

trail¹ (trāl), *n.* [Early mod. E. also *traile*, *trayle*; < ME. *trail*, *traile*, *trayle*, the train of a dress, a sled, < OF. *traail*, a reel, prob. also the train of a dress, and a drag or sled; cf. Sp. *traílla*, a drag for leveling ground, a leash (< F. ?), = Pg. *tralha*, a drag-net (cf. Pr. *tralh*, traces, track); ML. *trahale*, a reel, prob. also the train of a dress, and a drag or sled; cf. L. *tragula*, a sled, *traha*, a sled, ML. *traga*, a sled, a harrow; < L. *trahere*, draw, drag: see *tract*¹. Cf. *train*¹, *v.* Hence *trail*¹, *v.* Cf. *trail*².] In some senses the noun is from the verb.] 1. A part dragged behind; something drawn after; a train; a rear appendage. Specifically—(*a*) The train of a skirt or robe.

Trayle or trayne of a clothe. *Prompt. Parv.*, p. 499.

(*b*) A trailing part or organ; a train: as, the *trail* of the peacock: often used figuratively.

A sudden star, it shot through liquid air,
And drew behind a radiant *trail* of hair.
Pope, R. of the L., v. 128.

It is no easy matter to picture to ourselves the blazing *trail* of splendour which in such a pageant [the coronation of Anne Boleyn] must have drawn along the London streets. *Froude*, Sketches, p. 175.

(*c*) In *artillery*, the lower end of the carriage; in field-artillery, that part of the carriage which rests on the ground when unlimbered. See cut under *gun-carriage*. (*d*) Any long appendage, real or apparent, as a line or streak marking the path just passed over by a moving body: as, the *trail* of a meteor; a *trail* of smoke.

When lightning shoots in glitt'ring *trails* along.
Rowe, Royal Convert.

(*e*) In *astron.*, the elongated image of a star produced upon a photographic plate, which is not made to follow the star's diurnal motion. The intensity of this trail is used as a measure of the star's brightness.

2. The track or mark left by something dragged or drawn along the ground or over a surface: as, the *trail* of a snail. Specifically—(*a*) The mark or scent left on the ground by anything pursued, as in hunting; the track followed by a hunter: especially in the phrase *on the trail*.

How cheerfully *on the* false *trail* they cry!
Shak., Hamlet, iv. 5. 109.

These varlets pretend to be bent chiefly on their sundown meal, but the moment it is dark they will be *on our trail*, as true as hounds on the scent.
J. F. Cooper, Last of Mohicans, xxi.

We were really *on the trail* of volcanic productions, and devoted most of our time to the hunt after them.
A. Geikie, Geol. Sketches, x.

Pop. Sci. Mo., XXVIII. 722.

3. Figuratively, a clue; a trace.—4†. A vehicle dragged along; a drag; a sled; a sledge. *Hakluyt's Voyages*, III. 37.—5. The act of playing upon, or of taking advantage of, a person's ignorance. See *trail*¹, *v.*, 6.—**Built-up trail**, in *artillery*, a wrought-iron or steel trail of a gun-carriage composed of several pieces. It consists of two side-plates connected by three or more transoms, one or more assembling-bolts, and a lunette plate. In some forms the cheeks are separate plates of metal riveted to the trail-plates and the structure is stiffened by assembling-bolts; in others the trail-plate and cheek on each side are formed in a single piece. The latter is the more modern. The trail-plates are strengthened by angle-irons riveted to each edge, by flanging, or by T-rails. In some carriages the side- or trail-plates are metallic girders or brackets connected by transoms. This built-up system has superseded the solid wooden stock of the old forms of gun-carriage.—**To trash a trail.** See *trash*³. (See also *block-trail*, *bracket-trail*.)

★=Syn. 2. *Path*, *Track*, etc. See *way*.

trail¹ (trāl), *v.* [Early mod. E. also *traile*, *trayle*; < ME. *trailen*, *traylen*, < OF. *trailler*, wind or reel (yarn), also trail game. The uses of the verb are mostly developed in E. from the noun.]

(AF.) *trailebaston*, *traylebaston*, prob. so called from the staves or clubs they carried, < *trailler*, trail, + *baston*, staff, club: see *trail*[1], *v.*, and *baston*, *baton*. Roquefort gives the OF. as *tray-le-baston*, as if < *traire*, draw, < L. *trahere* (or *traer*, < L. *tradere*, give up) + *le*, the, + *baston*, staff. This view is not tenable.] In *Eng. hist.*, one of a class of disorderly persons, banded robbers, murderers, and incendiaries, who gave great trouble in the reign of Edward I., and were so numerous that judges were appointed expressly for the purpose of trying them. See the phrases below.

People of good will have made reply to the king
How throughout the land is made a great grievance
By common quarrellers, who are by oath
Bound together to a compact;
Those of that company are named *Trailbastons*.
In fairs and markets they offer themselves to make an engagement,
For three shillings or four, or for the worth,
To beat a freeman who never did injury
To Christian body, by any evidence.
If a man offends any one of the confederacy,
Or a merchant refuses to give him credit with his wares,
In his own house, without other dealing,
He should be well beaten, or to make it up
He shall give of his money, and take acquittance.
If there be not some stop put to this turbulence,
A war of the commons will arise by chance.
Langtoft, Chronicle (ed. Wright), II. 361.

Court of Trailbaston. See *court*.—**Justices of Trailbaston,** "justices whose office was to make inquisition through the realm by the verdict of substantial Juries, upon all officers, as Mayors, Sheriffs, Bailiffs, Escheators, and others, touching Extortion, Bribery, and other such grievances, as intrusions into other men's lands, Barretors, and breakers of the peace, with divers other offenders; by means of which inquisitions many were punished by death, many by ransom, and the rest flying the realm; the land was quieted, and the King gained great riches towards the support of his wars." *Cowel.*

It is impossible not to be struck with his [William IV.'s] extreme good-nature and simplicity, which he cannot or will not exchange for the dignity of his new situation and the *trammels* of etiquette.
Greville, Memoirs, July 24, 1830.

5. An implement hung in a fireplace to support pots and other culinary vessels. Trammels are hung from the back-bar or from a crane; they are often so constructed in two parts that they can be lengthened and shortened.

Our own warm hearth seemed blazing free,
The crane and pendent *trammels* showed,
The Turks' heads on the andirons glowed.
Whittier, Snow-Bound.

6. An instrument for drawing ellipses, used by joiners and other artificers; an ellipsograph. One part consists of a cross with two grooves at right angles; the other is a beam-compass which carries the describing pencil, and is guided by two pins which slide in the grooves.

If the assassination
Could *trammel* up the consequence, and catch
With his surcease success, . . .
We 'd jump the life to come. *Shak.*, Macbeth, i. 7. 3.

While I am striving . . .
How to entangle, *trammel* up, and snare
Your soul in mine. *Keats*, Lamia, ii.

2. To shackle; confine; hamper.

Mardonius would never have persuaded me, had dreams and visions been less constant and less urgent. What pious man ought to resist them? Nevertheless, I am still surrounded and *trammelled* by perplexities.
Landor, Imag. Conv., Xerxes and Artabanus.

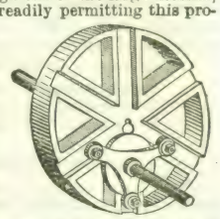
3. To train slavishly; inure to conformity or obedience. [Rare.]

Hackneyed and *trammelled* in the ways of a court.
Pope, To Gay, Oct. 16, 1727.

trammeled, trammelled (tram′eld), *p. a.* **1.** Caught; confined; shackled; hampered.—**2.** Having blazes or white marks on the fore foot and hind foot of one side, as if marked by trammels: said of a horse.—**Cross-trammeled,** having a white fore foot on one side and a white hind foot on the other, as a horse.

trammeler, trammeller (tram′el-ėr), *n.* [< *trammel* + *-er*[1].] **1.** One who or that which trammels or restrains.—**2.** One who uses a trammel-net.

The net is love's, right worthily supported;
Bacchus one end, the other Ceres guideth;
Like *trammellers* this god and goddess sported
To take each foule that in their walkes abideth.
An Old-fashioned Love (1594). (*Imp. Dict.*)



trammelet† (tram′el-et), *n.* [< *trammel* + *-et.*] A snare.

Or like Aurora when with pearl she sets

In a country fully stocked in proportion to all the business it had to *transact*, as great a quantity of stock would be employed in every particular branch as the nature and extent of the trade would admit.
Adam Smith, Wealth of Nations, i. 9.

II. *intrans.* To conduct, arrange, or settle matters; deal; treat; negotiate.

God *transacts* with mankind by gentle and paternal measures. *Ep. Parker*, Platonick Philos., p. 52.

transaction (tràns-ak'shon), *n.* [< F. *transaction* = Pr. *transactio* = Sp. *transacción* = Pg. *transacção* = It. *transazione*, < LL. *transactio(n-)*, a completion, an agreement, < L. *transigere*, complete, perform, transact: see *transact.*] **1.** The management or settlement of an affair; a doing or performing: as, the *transaction* of business. —**2.** A completed or settled matter or item of business; a matter or affair either completed or in course of completion: as, a *transaction* of questionable honesty.

Indifferent to truth in the *transactions* of life, he was honestly devoted to truth in the researches of speculation. *Macaulay*, Machiavelli.

3. *pl.* The reports or publications containing the several papers or abstracts of papers, speeches, discussions, etc., which have been read or delivered at the meetings of certain learned societies. Those of the Royal Society of London are known as the *Philosophical Transactions.*

I have delivered him a Copy of the *Transactions* of Things that concerned their Company at Rheinsburgh.
Howell, Letters, I. vi. 8.

4. In *civil law*, an adjustment of a dispute between parties by mutual agreement; the extinguishing of an obligation by an agreement by which each party consents to forego part of his claims in order to close the matter finally. It presupposes that each of the parties incurs some loss, otherwise the arrangement rather belongs to the class of donations. *Amos.*—**Personal transaction.** See *personal.*

transactor (tràns-ak'tor), *n.* [< OF. *transacteur* = Pg. *transactor*, < L. *transactor*, a manager, < *transigere*, pp. *transactus*, complete, transact: see *transact.*] One who transacts, performs, or conducts any business.

transalpine (tràns-al'pin), *a.* and *n.* [< F. *transalpin* = Sp. Pg. It. *transalpino*, < L. *transalpinus*, < *trans*, across, + *Alpes*, Alps, *Alpinus*, Alpine, of the Alps: see *Alp*[2], *Alpine.*] **I.** *a.* Being or situated beyond the Alps, especially from Rome: as, *transalpine* Gaul: opposed to *cisalpine.* Compare *transmontane.*

II. *n.* A native or an inhabitant of a country beyond the Alps, generally with reference to Rome.

transandine (tràns-an'din), *a.* [< *trans-* + *Andes* + *-ine*[1].] Across the Andes; to or on the other side of the Andes: as, *transandine* explorations.

transanimate (tràns-an'i-māt), *v. t.*; pret. and pp. *transanimated*, ppr. *transanimating.* [< *trans-* + *animate.*] To animate by the conveyance of a soul to another body. *Dean King*, Sermon, Nov., 1608. [Rare.]

transanimation (tràns-an-i-mā'shon), *n.* [= It. *transanimazione;* as *transanimate* + *-ion.*] Transmigration of the soul; metempsychosis; also, any doctrine or theory of reincarnation (as in the following extract).

Yf it may be graunted . . . that the spirites of dead men may reuiue in other (after the opinion and *transanimation* of Pythagoras), we may thynke that the soule of Archimedes was reuiued in Besson, that excellent Geometer of our tyme.
R. Eden (First Books on America, ed. Arber, p. xlvii).

trans-Appalachian (tràns-ap-a-lach'i-an), *a.* [< *trans-* + *Appalachian.*] Across the Appalachian range of mountains.

The *Trans-Appalachian* movement of Birds.
The Auk, Jan., 1891, p. 82.

transatlantic (tràns-at-lan'tik), *a.* [= F. *transatlantique* = Sp. *transatlántico;* as *trans-* + *Atlantic.*] **1.** Lying or being beyond the Atlantic; on the opposite side of the Atlantic from the country of the speaker or writer; specifically, in Europe, American.

I go to search where, dark and deep,
Those *Trans-atlantic* treasures sleep.
Scott, Rokeby, i. 21.

2. Crossing or passing across the Atlantic: as, a *transatlantic* line of steamers.

transaudient (tràns-â'di-ent), *a.* [< L. *trans-*, through, + *audien(t-)s*, ppr. of *audire*, hear: see *hearing.*] Permitting the passage of sound. [Rare.]

There were dwarfs, also, who danced and sang, and many a proprietor regretted the *transaudient* properties of canvas, which allowed the frugal public to share in the melody without entering the booth.
Lowell, Cambridge Thirty Years Ago.

transcalency (tràns-kā'len-si), *n.* [< *transcalen(t)* + *-cy.*] The property of being transcalent.

transcalent (tràns-kā'lent), *a.* [< L. *trans*, through, + *calen(t-)s*, ppr. of *calere*, be warm: see *calid.*] Pervious to heat; permitting the passage of heat. *E. Frankland*, Exper. Chem., p. 997.

transcend (tràn-send'), *v.* [< OF. *transcender* = Sp. *transcender, trascender* = Pg. *transcender* = It. *transcendere, trascendere*, < L. *transcendere, transscendere*, climb over, step over, surpass, transcend, < *trans*, over, + *scandere*, climb: see *scan.* Cf. *ascend, descend.*] **I.** *trans.* **1**†. To climb over or up; ascend; mount; reach or extend upward to.

The shore let her *transcend*, the promont to descry.
Drayton, Polyolbion, i. 71.

It will be thought a thing ridiculous . . .
. . . that any poet, void
Of birth, or wealth, or temporal dignity,
Should with decorum *transcend* Cæsar's chair.
B. Jonson, Poetaster, v. 1.

Make disquisition whether these unusual lights be meteorological impressions not *transcending* the upper region, or whether to be ranked among celestial bodies.
Howell. (*Latham.*)

2. To pass over; go beyond; overpass; overstep.

It is a dangerous opinion to such popes as shall *transcend* their limits and become tyrannical. *Bacon.*

The great will see that true love cannot be unrequited. True love *transcends* the unworthy object.
Emerson, Friendship, p. 206.

We may indeed require rigid proof of whatever *transcends* our experience, but it is not only Orientals who say that "With God all things are possible."
J. R. Seeley, Nat. Religion, p. 77.

3. To surpass; outdo; excel; exceed.

Secret scorching flames,
That far *transcend* earthly material fires,
Are crept into me, and there is no cure.
Beau. and Fl., King and No King, iii. 3.

High though her wit, yet humble was her mind;
As if she could not or she would not find
How much her worth *transcended* all her kind.
Dryden, Epitaph for Monument of a Lady at Bath.

4†. To cause to climb or pass; lift; elevate.

To that People thou a Law hast giv'n
Which from grosse earth *transcendeth* them to heav'n.
Heywood, Hierarchy of Angels, p. 530.

=**Syn. 2.** To overstep.—**3.** To outstrip, outdo.

II. *intrans.* **1**†. To climb; mount; pass upward or onward.

But to conclude an impossibility from a difficulty, or affirm whereas things not easily sink they do not drown at all, besides the fallacy, is a frequent addition in human expression, and an amplification not unusual as well in opinions as relations; which oftentimes give indistinct accounts of proximities, and without restraint *transcend* from one another. *Sir T. Browne*, Vulg. Err., vii. 15.

2. To be transcendent; excel.

transcendant†, *a.* An obsolete form of *transcendent.*

transcendence (tràn-sen'dens), *n.* [= F. *transcendance* = Sp. *transcendencia, trascendencia* = Pg. *transcendencia* = It. *transcendenza, trascendenza*, < LL. *transcendentia*, < L. *transcenden(t-)s*, transcendent: see *transcendent.*] The character of being transcendent; elevation; loftiness; exaggeration.

In a most weak and debile minister, great power, great *transcendence*. *Shak.*, All's Well, ii. 3. 40.

transcendency (tràn-sen'den-si), *n.* [As *transcendence* (see *-cy*).] Same as *transcendence.*

"It is true greatness to have in one the frailty of a man and the security of a God;" . . . this would have done better in poesy, where *transcendencies* are more allowed.
Bacon, Adversity (ed. 1887).

★**transcendent** (tràn-sen'dent), *a.* and *n.* [Formerly also *transcendant;* < OF. (and F.) *transcendant* = Pr. *trenscendant* = Sp. *transcendente*,

trascendente = Pg. *transcendente* = It. *trascendente* = G. *transscendent*, < L. *transcenden(t-)s*, ppr. of *transcendere*, surpass, transcend: see *transcend*.] **I.** *a.* **1.** Surpassing; excelling; superior or supreme; extraordinary: as, *transcendent* worth.

Clothed with *transcendent* brightness.
Milton, P. L., i. 86.

The Lords accused the Commons for their *transcendant* misbehaviour. *Evelyn*, Diary, June 2, 1675.

2. In *scholastic philos.*, not included under one of the ten categories; higher than the categories.—**3.** In *Kantian philos.*, transcending experience; unrealizable in experience; not an object of possible experience.

For any question or theorem which might pass beyond possible experience Kant reserved the term *transcendent*.
Adamson, Fichte, p. 112.

4. Transcending the universe of matter; not essentially connected with the universe; not cosmic: as, a *transcendent* deity.—**Transcendent judgment, univocation,** etc. See the nouns.=**Syn. 1.** Preëminent, surpassing, supereminent, unequaled, unparalleled, unrivaled, peerless.

II. *n.* **1.** That which surpasses or excels; anything greatly superior or supereminent.

This power of remission is a *transcendant*, passing through all the parts of the priestly offices.
Jer. Taylor, Works (ed. 1835), II. 260.

2. In *metaph.*: (*a*) A reality above the categories or predicaments. The transcendents were said to be six: Ens, Res (thing), Aliquid (something), Unum (one), Verum (true), Bonum (good); or five, Ens being omitted. (*b*) That which is altogether beyond the bounds of human cognition and thought. Compare I., 3.—**3.** In *math.*, a transcendental expression or function.

transcendental (tran-sen-den'tal), *a.* and *n.* [= F. *transcendantal* = Sp. *transcendental*, *trascendental* = Pg. *transcendental* = It. *trascendentale* = G. *transscendental*; as *transcendent* + *-al*.] **I.** *a.* **1.** Same as *transcendent*, 1.

Though the Deity perceiveth not pleasure nor pain as we do, yet he must have a perfect and *transcendental* perception of these and of all other things.
N. Grew, Cosmologia Sacra.

2. In *philos.*: (*a*) In Aristotelian philosophy, extending beyond the bounds of a single category. The doctrine implied is that every strictly univocal predicate is contained under one of the ten predicaments; but there are certain predicates, as *being* (*ens*), *one*, *true*, *good*, which are univocal in a modified but not very clearly defined sense, which extend over all the predicaments or categories. (*b*) In Cartesian philosophy, predicable both of body and of spirit. *Clauberg*. (*c*) Pertaining to the existence in experience of a priori elements; a priori. This is chiefly a Kantian term, but was also used by Dugald Stewart. See *Kantianism*, *category*, *a priori*.

Transcendental and transcendent do not mean the same thing. The principles of the pure understanding, which we explained before, are meant to be only of empirical, and not of *transcendental* application, that is, they cannot transcend the limits of experience. A principle, on the contrary, which removes those landmarks, nay, insists on our transcending them, is called transcendent.
Kant, Critique of Pure Reason (tr. by Müller), II. 256.

The belief which all men entertain of the existence of the material world (I mean their belief of its existence independently of that of percipient beings), and their expectation of the continued uniformity of the laws of nature, belong to the same class of ultimate or elemental laws of thought with those which have been just mentioned. The truths which form their objects are of an order so radically different from what are commonly called truths, in the popular acceptation of that word, that it might perhaps be useful for logicians to distinguish them by some appropriate appellation, such, for example, as that of metaphysical or *transcendental* truths. They are not principles or data . . . from which any consequence can be deduced, but form a part of those original stamina of human reason, which are equally essential to all the pursuits of science, and to all the active concerns of life.
D. Stewart, Collected Works (ed. Hamilton), III. 44.

(*d*) In Schellingistic philosophy, explaining matter and all that is objective as a product of subjective mind.—**3.** Abstrusely speculative; beyond the reach of ordinary, every-day, or common thought and experience; hence, vague; obscure; fantastic; extravagant.

The soul . . . conceptions of which preceded and led up to the more *transcendental* theory of the immaterial and immortal soul, which forms part of the theology of the higher nations. *E. B. Tylor*, Prim. Culture, II. 21.

4. Not producible by the algebraical operations of addition, subtraction, multiplication, division, and the extraction of roots, each repeated only a finite number of times. The commonest transcendental functions are e^x, $\log x$, $\sin x$, etc.—**Pure transcendental synthesis of reproduction.** See *reproduction*.—**Transcendental amphiboly.** See *amphiboly*.—**Transcendental analytic,** that part of transcendental logic which treats of the elements of pure intellectual cognition and the principles without which generally no object can be thought; the decomposition of our collective cognition a priori into the elements of pure intellectual cognition.—**Transcendental anatomy.** See *anatomy*.—**Transcendental apperception,** the original invariable self-consciousness, in which every thought is brought to logical unity.—**Transcendental cognition.** Same as *transcendental knowledge*.—**Transcendental critic,** the doctrine of the correctness of human cognition, showing how far it is to be trusted, and what elements are subjective, what objective.—**Transcendental curve.** See *curve*.—**Transcendental deduction,** the explanation of the way in which concepts a priori can refer to objects.—**Transcendental dialectic,** the destructive part of transcendental logic, showing how the speculative reason falls into fallacies, owing to the nature of the mind.—**Transcendental equation.** See *equation*.—**Transcendental esthetic,** the Kantian doctrine of the forms of pure sensibility, space, and time.—**Transcendental exposition,** the definition of a concept as a principle from which the possibility of other synthetical cognitions a priori can be understood.—**Transcendental function, geometry, idealism.** See the nouns.—**Transcendental ideality,** the mode of existence of space and time according to the Kantian theory—that they are real in the sense of truly belonging to real phenomenal objects, but unreal in so far as they are elements imported by the mind.—**Transcendental imagination,** the reproductive synthesis which takes place in all perception.—**Transcendental knowledge.** (*a*) As used by Kant, knowledge concerning our a priori concepts of objects. (*b*) Knowledge a priori. *Sir W. Hamilton*.—**Transcendental locus,** a locus which in the ordinary system of coördinates is represented by a transcendental equation.—**Transcendental logic,** the critic of thought; the theory of the origin of our knowledge in those elements of conception which cannot be attributed to sense.—**Transcendental object,** the unknown real object, according to the Kantian theory. See *universal*.—**Transcendental paralogism.** See *paralogism*.—**Transcendental perfection,** that perfection which consists in the presence of all that is necessary to the essence of the thing to which it belongs.—**Transcendental philosophy.** See *philosophy*.—**Transcendental place,** the fact that a concept belongs either to sensibility on the one hand, or to the pure understanding on the other; the determination of an object either to be a phenomenon or to be a thing in itself.—**Transcendental quantity.** (*a*†) The degree with which a quality is possessed.

There is also another quantity improperly so call'd, which consists not in the extension of parts, but in the perfection and vertue of every thing. Hence uses it to be call'd the quantity of perfection and quantity of vertue. For the essential perfections of things and vertues are compos'd of divers degrees, as the quantity of a heap or mole of several parts. This, because diffus'd almost through all the categories, uses to be call'd a *transcendental quantity*. *Burgersdicius*, tr. by a Gentleman (1697), I. v. 2.

(*b*) The value of a transcendental function.—**Transcendental reality.** Same as *absolute reality* (which see, under *absolute*).—**Transcendental reflection,** the faculty by which, according to Kant, we are immediately aware of the faculty which has furnished a concept, whether sense or understanding. See *reflection*.—**Transcendental relation, schema, surface,** etc. See the nouns.—**Transcendental synthesis,** a synthesis performed by the mind which occurs without reference to the nature of the intuitions, but refers merely to their spatial or temporal form.—**Transcendental topic,** the doctrine of transcendental places.—**Transcendental truth.** (*a*) The conformity of an object to the logical principle of consistency. (*b*) A first principle.—**Transcendental unity,** a unity brought about by the mind's action in cognition.

II. *n.* A transcendent conception, such as thing, something, one, true, good.

transcendentalism (tran-sen-den'tal-izm), *n.* [< *transcendental* + *-ism*.] **1.** The character of being transcendental. Specifically—**2.** In *philos.*, in general, the doctrine that the principles of reality are to be discovered by the study of the processes of thought. (*a*) Originally, the critical philosophy of Kant. (*b*) Usually, the principles of F. W. J. von Schelling. Especially applied in this sense to the teachings of Hedge, Emerson, and other American followers of Schelling.

transcendentalist (tran-sen-den'tal-ist), *n.* [< *transcendental* + *-ist*.] An adherent of some form of transcendentalism; especially, an American follower of Schelling.

transcendentality (tran″sen-den-tal'i-ti), *n.* [< *transcendental* + *-ity*.] The character of being transcendental. [Rare.]

transcendentalize (tran-sen-den'tal-īz), *v. t.* To render transcendental; interpret from a transcendental point of view.

transcendentally (tran-sen-den'tal-i), *adv.* In a transcendental manner; from a transcendental point of view; a priori.

transcendently (tran-sen'dent-li), *adv.* In a transcendent manner; surpassingly; extraordinarily.

The law of Christianity is eminently and *transcendently* called the word of truth. *South*, Sermons.

transcendentness (tran-sen'dent-nes), *n.* Transcendence.

transcendible (tran-sen'di-bl), *a.* [< *transcend* + *-ible*.] Capable of being climbed or passed over.

It appears that Romulus slew his brother because he attempted to leap over a sacred and inaccessible place, and to render it *transcendible* and profane.
Translation of Plutarch's Morals, ii. 354. (*Latham*.)

transcension† (tran-sen'shon), *n.* [< L. as if **transcensio(n-)*, < *transcendere*, surpass, transcend: see *transcend*.] A passing over or beyond.

Many a shady hill,
And many an echoing valley, many a field
Pleasant and wishful, did his passage yield
Their safe *transcension*.
Chapman, tr. of Homer's Hymn to Hermes, l. 185.

transcolate (trans'kō-lāt), *v. t.*; pret. and pp. *transcolated*, ppr. *transcolating*. [< L. *trans*, through, + *colare*, pp. *colatus*, filter, strain: see *colander*.] To strain; cause to pass through, or as through, a sieve or colander; filter; percolate. [Rare.]

The lungs are, unless pervious like a spunge, unfit to imbibe and *transcolate* the air. *Harvey*.

transcolation (trans-kō-lā'shon), *n.* [< *transcolate* + *-ion*.] The act of transcolating, or the state of being transcolated; percolation. [Rare.]

Mere *transcolation* may by degrees take away that which the chymists call the fined salt; and for the volatile salt of it, which being a more spirituous thing, it is not removable by distillation, and so neither can it be by *transcolation*. *Stillingfleet*, Origines Sacræ, iii. 4. (*Latham*.)

transcontinental (trans-kon-ti-nen'tal), *a.* [< *trans-* + *continent* + *-al*.] Across the continent; on the other side of a continent: as, a *transcontinental* journey; *transcontinental* railways.

transcorporate† (trans-kôr'pō-rāt), *v. t.* [< ML. *transcorporatus*, pp. of **transcorporare*, pass from one body into another, < L. *trans*, over, + *corpus* (*corpor-*), body: see *corporate*, *v.*] To pass from one body to another; transmigrate, as the soul. *Sir T. Browne*, Urn-burial, iv.

transcribbler (tran-skrib'lėr), *n.* [< *trans-* + *scribble* + *-er*[1].] One who transcribes hastily or carelessly; hence, a mere copier; a plagiary. [Contemptuous.]

He [Aristotle] has suffered vastly from the *transcribblers*, as all authors of great brevity necessarily must.
Gray, To T. Wharton, Sept. 11, 1746.

transcribe (tran-skrīb'), *v. t.*; pret. and pp. *transcribed*, ppr. *transcribing*. [= F. *transcrire* = Pr. *transcriure* = Sp. *transcribir* = Pg. *transcrever* = It. *transcrivere*, *trascrivere*, < L. *transcribere*, *transscribere*, write again in another place, transcribe, copy, < *trans*, over, + *scribere*, write: see *scribe*.] **1.** To copy out in writing: as, to *transcribe* the text of a document; to *transcribe* a letter.

They work daily and hard at the Catalogue, which they intend to Print; I saw 10 thick Folios of it fairly *transcrib'd* for the Press. *Lister*, Journey to Paris, p. 107.

2. In *music*, to arrange (a composition) for performance by a different voice or instrument from that for which it was originally written.

transcriber (tran-skrī'bėr), *n.* [< *transcribe* + *-er*[1].] One who transcribes; a copier or copyist.

I pray you desire your servants, or whoever else are the *transcribers* of my bookes, to keepe them from blotting and soyling. *W. Dugdale* (Ellis's Lit. Letters, p. 175).

transcript (tran'skript), *n.* [= F. *transcrit* = It. *transcritto*, *trascritto*, < ML. *transcriptum*, a copy, neut. of L. *transcriptus*, pp. of *transcribere*, copy, transcribe: see *transcribe*.] **1.** A writing made from and according to an original; a copy.

The decalogue of Moses was but a *transcript*, not an original. *South*, Sermons.

2. A copy of any kind; an imitation.

The Grecian learning was but a *transcript* of the Chaldean and Egyptian; and the Roman of the Grecian.
Glanville.

transcription (tran-skrip'shon), *n.* [< F. *transcription* = Sp. *transcripción*, *trascripción* = It. *trascrizione*, < LL. *transcriptio(n-)*, a transcription, transfer, < L. *transcribere*, pp. *transcriptus*, transcribe: see *transcribe*.] **1.** The act of transcribing or copying: as, errors of *transcription*.

[This] was by *transcription* successively corrupted, until it arrived in a most depraved copy at the press.
Sir T. Browne, Religio Medici, Pref.

2. A copy; a transcript.—**3.** In *music*, the arrangement (usually with more or less modification or variation) of a composition for some instrument or voice other than that for which it was originally composed. Also called *scoring*.

transcriptional (tran-skrip'shon-al), *a.* [< *transcription* + *-al*.] Of or pertaining to transcription: as, *transcriptional* errors.

transcriptive (tran-skrip'tiv), *a.* [< L. *transcriptus*, pp. of *transcribere*, transcribe, + *-ive*[1].] Concerned with, occurring in, or performing transcription; having the character of a transcript or copy.

He is to be embraced with caution, and as a *transcriptive* relator. *Sir T. Browne*, Vulg. Err., i. 8.

transcriptively (tran-skrip′tiv-li), *adv.* By transcription; by mere copying or imitation.

Not a few *transcriptively*, subscribing their names unto other mens endeavours, and merely transcribing almost all they have written. *Sir T. Browne*, Vulg. Err., i. 6.

transcur† (tran-kėr′), *v. i.* [= It. *trascorrere* = Sp. *trascurrir*, *transcurrir*, < L. *transcurrere*, run across, over, by, or through, < *trans*, over, through, + *currere*, run: see *current*[1].] To run or rove to and fro.

By the fixing of the mind upon one object of cogitation, whereby it doth not spatiate and *transcur*. *Bacon*, Nat. Hist., § 720.

transcurrence† (tran-kur′ens), *n.* [< L. *transcurren(t-)s*, ppr. of *transcurrere*, run over: see *transcur*.] A roving hither and thither.

transcurrent (tran-kur′ent), *a.* [< L. *transcurren(t-)s*, ppr. of *transcurrere*, run across: see *transcur*.] In *entom.*, extending crosswise or transversely: specifying the metanotal postfrena of a beetle, which diverge from the median line of the back to the bases of the hinder wings.

transcursion† (tran-kėr′shon), *n.* [< LL. *transcursio(n-)*, a passing over, a lapse (of time), < L. *transcurrere*, run over: see *transcur*.] A rambling; passage beyond certain limits; extraordinary deviation.

I am to make often *transcursions* into the neighbouring forests as I pass along. *Howell.*

transcursive† (tran-kėr′siv), *a.* [< L. *transcursus*, pp. of *transcurrere*, run over, + *-ive*.] Rambling.

In this *transcursive* reportory. *Nashe*, Lenten Stuffe (Harl. Misc., VI. 149).

transdialect (tranz-dī′a-lekt), *v. t.* [< *trans-* + *dialect*.] To translate from one dialect into another. [Rare.]

The fragments of these poems, left us by those who did not write in Doric, are in the common dialect. It is plain then they have been *transdialected*. *Warburton*, Divine Legation, ii. § 3.

transduction (tranz-duk′shon), *n.* [< L. *transducere*, *traducere* (pp. *transductus*, *traductus*), lead over, < *trans*, over, + *ducere*, lead: see *duct*. Cf. *traduce*, *traduction*.] The act of leading or carrying over. [Rare.]

transductor (tranz-duk′tor), *n.* [NL., < L. *transducere*, pp. *transductus*, lead over: see *traduce*.] In *anat.*, that which draws across: specifying a muscle of the great toe.—**Transductor hallucis**, a transverse muscle of the sole of the human foot, acting upon the great toe; the transversus pedis.

transe†. An obsolete spelling of *trance*[1], *trance*[2].

transearth† (tranz-ėrth′), *v. t.* [< *trans-* + *earth*[1].] To transplant.

Fruits of hotter countries *transearth'd* in colder climates have vigour enough in themselves to be fructuous according to their nature. *Feltham*, Resolves, i. 19.

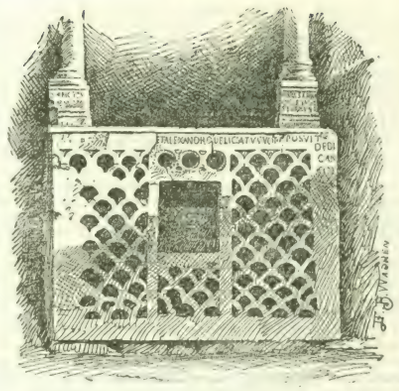
transect (tran-sekt′), *v. t.* [< L. *trans*, across, + *secare*, pp. *sectus*, cut: see *section*.] To cut across; dissect transversely.

The meshes of the dotted substance, as described by other authors, are only the *transected* sheaths of the tubules. *Amer. Jour. Psychol.*, I. 488.

transection[1] (tran-sek′shon), *n.* [< *transect* + *-ion*.] In *anat.*, the dissection of a body transversely; transverse section: correlated with *longisection*. *Wilder*, N. Y. Med. Jour., Aug. 2, 1884, p. 114.

transection[2]†, *n.* See *transexion*.

transelement† (tranz-el′ē-ment), *v. t.* [< *trans-* + *element*.] To change or transform the elements of.



For, as he saith wee are *transelemented*, or trans-natured, and changed into Christe, euen so, and none otherwise, wee saie, the breade is *transelemented*, or changed into Christes body. *Bp. Jewell*, Reply to Harding, p. 238.

transelementate† (tranz-el-ē-men′tāt), *v. t.* [< *trans-* + *element* + *-ate*[2].] Same as *transelement*. *Jer. Taylor*, Real Presence, xii.

transelementation† (tranz-el″ē-men-tā′shon), *n.* [< *transelementate* + *-ion*.] The change or transformation of one element into another.

He [Minutius Felix] describes the Pagan systems, not much unlike that of Epicurus of old, and our later Atheists, who ascribe all to chance or *transelementation*. *Evelyn*, True Religion, I. 104.

transenna (tran-sen′ä), *n.* [< L. *transenna*, *trasenna*, plaited work, a net, a lattice.] In *Christian antiq.*, a carved latticework or grating of marble, silver, etc., used to inclose shrines, as those of martyrs. It allowed the sacred coffer to be seen, but protected it from being handled. See cut in next column.

Transenna in Church at the entrance of the Catacombs of St. Alexander, Rome.

transept (tran′sept), *n.* [Formerly erroneously *transcept*; = F. *transept*, < L. *trans*, across, + *septum*, *sæptum*, a partition, inclosure: see *septum*.] In *arch.*, the transverse arm of a cruciform church; technically, one of the two sub-

Salisbury Cathedral, from the northeast, showing the two Transepts.

divisions of this arm, one on each side of the body of the church, generally described as the *north* or the *south* transept. Some medieval churches, particularly in England, have two transepts, as shown in the cut. See plans under *basilica*, *cathedral*, and *squant*.

His body was buried in the south *Transcept* or large south Isle joyning to the Choir of St. Peter's Church in Westminster. *Wood*, Fasti Oxon., II. 145.

transept-aisle (tran′sept-īl), *n.* An aisle of a transept where, as is commonly the case in cathedrals and large medieval churches, the transept is divided, like the body of the church, into nave and aisles. See plan under *cathedral*.

Where there are no *transept aisles*, as in the east transept of Lincoln, there are, of course, no vertical divisions in the façade [end of transept]. *C. H. Moore*, Gothic Architecture, p. 160.

transeptal (tran-sep′tal), *a.* [< *transept* + *-al*.] Of or pertaining to a transept.

Transeptal towers occur elsewhere in England only in the collegiate church of Ottery, in Devonshire, where the cathedral served as a model. *Encyc. Brit.*, VIII. 802.

transeunt (tran′sē-unt), *a.* [< L. *trans*, over, + *eun(t-)s*, ppr. of *ire*, go. Cf. *transient*.] Passing outward; operating outside of itself: opposed to *immanent*.

The functions of the subject or psyche . . . may be exhaustively divided into (1) sense-presentation. . . . (3) volitionally reactive redintegration, with its two stages, immanent and *transeunt* action. *Athenæum*, No. 3289, p. 631.

transexion† (tran-sek′shon), *n.* [Erroneously *transection*; < *trans-* + *sex* + *-ion*.] Transformation as regards sex; change of sex.

It much impeacheth this iterated *transection* of hares if that be true which Cardan and other physitians affirm, that transmutation of sex is only so in opinion. *Sir T. Browne*, Vulg. Err., iii. 17.

transfard†. A corrupt form of *transferred*.

transfeminate† (tranz-fem′i-nāt), *v. t.* [< L. *trans*, over, + *femina*, woman, + *-ate*[2].] To change from female to male.

Cardan and other physitians affirm that transmutation of sex is only so in opinion, and that these *transfeminated* persons were really men at first, although succeeding years produced the manifesto or evidence of their virilities. *Sir T. Browne*, Vulg. Err., iii. 17.

transfer (tranz-fėr′), *v. t.*; pret. and pp. *transferred*, ppr. *transferring*. [= F. *transférer* = Sp. *transferir*, *trasferir* = Pg. *transferir* = It. *transferire*, *trasferire*, < L. *transferre*, pp. *translatus*, bear across, carry over, transfer, translate, < *trans*, over, + *ferre* = E. *bear*[1].] 1. To convey from one place or person to another; transport; transmit; pass or hand over: usually followed by *to* (*unto*, *into*), sometimes by *on* (*upon*): as, to *transfer* a thing from one hand *to* the other.

In things right true my heart and eyes have erred,
And *to* this false plague are they now *transferr'd*.
Shak., Sonnets, cxxxvii.

The war being now *transferred into* Munster, the series both of matters and times calleth me thither also. *Camden*, Elizabeth, an. 1601.

They forgot from whence that ease came, and *transferred* the honour of it *upon* themselves. *Bp. Atterbury.*

2. To make over the possession or control of; convey, as a right, from one person to another; sell; give: as, to *transfer* a title to land by deed, or the property in a bill of exchange by indorsement.

The lucrative right of supplying the Spanish colonies in America with negroes was *transferred* from a French company to the English. *Lecky*, Eng. in 18th Cent., i.

3. To convey by means of transfer-paper, as a written or drawn design to the lithographic stone from which it is to be printed.—4. To remove from one background to another for decorative purposes. In embroidering, this is done by attachment to a new background, the embroidered pattern being carefully cut out with so much of the old material as supports it, and sewed upon a new piece of stuff; in lace-making, the sprigs, flowers, or pattern of lace are removed from their old background and sewed strongly upon ★a new réseau or mesh.

transfer (tranz′fėr), *n.* [< *transfer*, *v.*] 1. Removal or conveyance from one place or person to another; transference.

The conviction of this reconciled the nation to the *transfer* of authority into other hands. *Prescott*, Ferd. and Isa., ii. 1.

The Messrs. Betts, transit agents at Suez, had also exerted themselves greatly in expediting the *transfer* of the troops. *W. H. Russell*, Diary in India, I. 34.

2. The conveyance of right, title, or property, either real or personal, from one person to another, either by sale, by gift, or otherwise. In law it usually implies something more than a delivery of possession. *Transfer* in English law corresponds to *conveyance* in Scots law, but the particular forms and modes used under the two systems differ very materially. See *conveyance*, *conveyancing*.

3. That which is transferred. Particularly—(*a*) The print or impression on transfer-paper of a writing, engraving, or drawing intended to be transferred to a stone for printing. (*b*) A reversed impression taken by laying any material upon an original in copying-ink or any other vehicle that will print, and applying pressure. (*c*) *Milit.*, a soldier transferred from one troop or company to another.

4. In *railway transportation*: (*a*) A point on a railway where the cars are ferried or transferred over a river or bay. (*b*) A ferry-boat or barge for transporting freight-cars. (*c*) The system or process of conveying passengers and baggage in vehicles from one railway-station in a city to another railway-station or to a steamer: as, a *transfer* company. [U. S.] (*d*) A ticket issued to a passenger on a line of transportation, giving passage on a connecting line or branch.—5. In the United States Post-office Department, the loan of funds from one account to another by authority of the postmaster-general. *Glossary of Postal Terms.*—6. In *naval tactics*. See *advance*, 12.—**Land-transfer Act, Transfer of Land Act.** See *land*[1].

transferability (tranz-fėr-a-bil′i-ti), *n.* [< *transferable* + *-ity* (see *-bility*).] The character or condition of being transferable. Also *transferrability*, *transferribility*.

Its easy and safe *transferability*, its use in paying foreign bills of exchange. *Adam Smith*, Wealth of Nations, iv. 3.

transferable (tranz-fėr′a-bl), *a.* [Also *transferrable*; = F. *transférable*; as *transfer* + *-able*. Cf. *transferrible*.] Capable of being transferred, or conveyed from one place or person to another; specifically, capable of being legitimately passed into the possession of another, and legally conveying all appertaining rights, etc., to the new holder: as, that ticket or pass is not *transferable*.

Paper bills of credit, . . . made *transferable* from hand to hand, like bank-notes. *Adam Smith*, Wealth of Nations, v. 2.

transferal, transferral (tranz-fėr′al), *n.* [< *transfer* + *-al*.] Transfer; transference.

The individual cannot transfer to the nation that which is involved in his vocation. Since it is the realization of personality, there can be no *transferal* of it, but the individual is to work in it, and to work it out. *E. Mulford*, The Nation, xiv.

transfer-book (tranz′fėr-bůk), *n.* A register of the transfer of property, stock, or shares from one party to another.

transfer-day (tråns'fėr-dā), *n.* One of certain regular days at the Bank of England for registering transfers of bank-stock and government funds in the books of the corporation. *Simmonds.*

transferee (tråns-fėr-ē'), *n.* [< *transfer* + *-ee*[1].] The person to whom a transfer is made.

transfer-elevator (tråns'fėr-el″ē-vā-tọr), *n.* An elevator or crane for transferring the cargo of one vessel to another, and for similar service. *E. H. Knight.*

transference (tråns'fėr-ens), *n.* [Also *transferrence;* < *transfer* + *-ence.*] 1. The act of transferring; the act of conveying from one place, person, or thing to another; the passage or conveyance of anything from one place or person to another; transfer.

There is . . . a never-ceasing *transference* of solid matter from the land to the ocean—*transference*, however, which entirely escapes cognizance by the sight, since the matter is carried down in a state of invisible solution.
Huxley, Physiography, viii.

2. In *Scots law*, that step by which a depending action is transferred from a person deceased to his representatives; revival and continuance.

transferential (tråns-fẹ-ren'shal), *a.* [< *transference* + *-ial.*] Pertaining to or involving transference.

So the Energy of Kinesis is seen to be a mere *transferential* mode from one kind of separation to another.
Nature, XXXIX. 290.

transfer-gilding (tråns'fėr-gil″ding), *n.* In *ceram.*: (*a*) Gilding done by transferring to the glazed ware a pattern of any sort in oil, and then applying gold in the form of powder, when a sufficient amount clings to the surface to allow of fixing by heat. (*b*) Gilding done by transferring gold with oil or some other medium from the paper to the ware.

transfer-ink (tråns'fėr-ingk), *n.* In *lithog.*, a mixture of tallow, wax, soap, and shellac with fine dry black, which, after manipulation with water, is used as the medium for writing or drawing on, or of transfer to, a lithographic stone.

transferography (tråns-fẹ-rog'ra-fi), *n.* [< *transfer* + Gr. *-γραφία*, < *γράφειν*, write.] The act or art of copying inscriptions from ancient tombs, tablets, etc. [Rare.] *Imp. Dict.*

transferor, *n.* Same as *transferrer:* common in legal use.

transfer-paper (tråns'fėr-pā″pėr), *n.* 1. In *lithog.*, paper coated in a thin film with a preparation of glue, starch, and flake-white, which readily receives an impression of transfer-ink, and as readily transfers it to a stone.—2. See *paper.*

transfer-press (tråns'fėr-pres), *n.* Same as *transferring-machine.*

transfer-printing (tråns'fėr-prin″ting), *n.* 1. The process of making an impression on transfer-paper.—2. Printing from a stone that has been prepared with a transfer.—3. In *ceram.*, a common method of decorating the surface of fine earthenware used for table-service, etc. An engraving is made upon a copperplate, and impressions of this on paper are applied to the ware. The process is of two kinds. (*a*) Press-printing is done upon the biscuit. The color which is applied to the copperplate is mixed with oil, and is kept hot during the process of mixing and application. When this has been printed upon paper, the latter is laid upon the ware, and is rubbed forcibly upon the back; it is then plunged into water, and the paper is washed off, while the color mixed with oil remains upon the biscuit. The oil is then entirely driven away by heat in the hardening-kiln. This is necessary, because the glaze would otherwise be rejected by the oily color. (*b*) Bat-printing is done upon the glaze, the engraved copperplate being oiled and then cleaned off, so that the oil remains in the engraved lines; this is transferred to a surface of glue, and from that to the already glazed pottery, upon which the design appears in pure oil, the color being afterward dusted upon it, and adhering to the oil until fired in the enamel-kiln.

transferral, *n.* See *transferal.*

transferrence (tråns-fėr'ens), *n.* See *transference.*

transferrer (tråns-fėr'ėr), *n.* [< *transfer* + *-er*[1].] 1. One who or that which transfers; an implement used in transferring something.

A system of vessels which continues . . . to be the *transferrer* of nutriment from the places where it is absorbed and prepared to the places where it is needed for growth and repair.
H. Spencer, Universal Progress, p. 406.

Specifically—2. One who makes a transfer or conveyance.—3. In an air-pump, a base-plate for a receiver, by means of which it can be withdrawn from the pump when exhausted.

transfer-resistance (tråns'fėr-rẹ̄-zis″tans), *n.* In electrolytic or voltaic cells, or vacuum apparatus, an apparent resistance to the passage of the current from the metal to the liquid, or vice versa. Usually called *transition resistance.*

transferribility (tråns-fėr-i-bil'i-ti), *n.* [< *transferrible* + *-ity* (see *-bility*).] See *transferability.*

transferrible (tråns-fėr'i-bl), *a.* [= Pg. *transferivel* = It. *trasferibile;* as *transfer* + *-ible.*] See *transferable.*

transferring-machine (tråns-fėr'ing-ma-shēn″), *n.* An apparatus used for transferring an engraving on a steel plate to a soft steel roller which may be hardened and used for printing. It is especially used for preparing printing-blocks or -rollers for bank-notes. Also called *transfer-press.* *E. H. Knight.*

transfer-work (tråns'fėr-wėrk), *n.* Decoration by transferring or transfer-printing.

transfigurate (tråns-fig'ū-rāt), *v. t.*; pret. and pp. *transfigurated*, ppr. *transfigurating.* [< L. *transfiguratus*, pp. of *transfigurare*, transform, transfigure: see *transfigure.*] To transfigure. [Rare.]

High heaven is there
Transfused, *transfigurated.*
Byron, Prophecy of Dante, iv.

transfiguration (tråns-fig-ū-rā'shọn), *n.* [< F. *transfiguration* = Pr. *transfiguratiō* = Sp. *transfiguración* = Pg. *transfiguração* = It. *transfigurazione*, < L. *transfiguratio*(*n-*), a change of form, < *transfigurare*, transfigure: see *transfigure.*] 1. A change of form or appearance; particularly, the change in the personal appearance of Christ, in the presence of three of his disciples (Peter, James, and John), described in Mat. xvii. 1–9; hence, some similar transformation. Of the nature and source of Christ's transfiguration the Scripture offers no explanation. It took place on "an high mountain apart," generally supposed to be either Mount Hermon or Mount Tabor.

2. [*cap.*] A festival observed in the Greek, the Roman Catholic, and the Anglican Churches on August 6th, in commemoration of Christ's transfiguration.—**Syn. 1.** See *transform, v. t.*

transfigure (tråns-fig'ūr), *v. t.*; pret. and pp. *transfigured*, ppr. *transfiguring.* [< ME. *transfiguren*, < OF. (and F.) *transfigurer* = Pr. *transfigurar, trasfigurar* = Sp. Pg. *transfigurar* = It. *transfigurare, trasfigurare*, < L. *transfigurare*, change the figure or form of, < *trans*, over, + *figurare*, form, shape, < *figura*, form, figure: see *figure.*] 1. To transform; change the outward form or appearance of: specifically used of the transfiguration of Christ.

I noot wher she be womman or goddesse;
But Venus is it, sothly as I gesse.
. . . Venus, if it be thy wil,
Yow in this gardyn thus to *transfigure.*
Chaucer, Knight's Tale, l. 247.

And Merlyn com to Vlfyn, and *transfigured* hym to the semblaunce of Iurdan, and than sente hym to the kynge.
Merlin (E. E. T. S.), i. 76.

Jesus taketh Peter, James, and John his brother, and bringeth them up into an high mountain apart, and was *transfigured* before them; and his face did shine as the sun; and his raiment was white as the light. Mat. xvii. 2.

2. To give an elevated or glorified appearance or character to; elevate and glorify; idealize: often with direct or indirect allusion to the transfiguration of Christ.

There on the dais sat another king,
Wearing his robes, his crown, his signet-ring;
King Robert's self in features, form, and height,
But all *transfigured* with angelic light!
It was an Angel.
Longfellow, Wayside Inn, Robert of Sicily.

=**Syn.** *Transmute*, etc. See *transform.*

transfigurement (tråns-fig'ūr-mẹnt), *n.* [= It. *transfiguramento, trasfiguramento;* as *transfigure* + *-ment.*] A transfiguration. [Rare.]

When love dawned on that world which is my mind,
Then did the outer world wherein I went
Suffer a sudden strange *transfigurement.*
R. W. Gilder, The Celestial Passion, When Love Dawned.

transfission (tråns-fish'ọn), *n.* [< L. *trans*, across, + *fissio*(*n-*), a cleaving: see *fission.*] Transverse fission; cross-section, as a natural process of multiplication with some low animals.

transfix (tråns-fiks'), *v. t.* [< L. *transfixus*, pp. of *transfigere* (> It. *trafiggere*), transfix, < *trans*, through, + *figere*, fix, fasten: see *fix.*] To pierce through, as with a pointed weapon; transpierce: as, to *transfix* one with a dart or spear; also, to fasten by something sharp thrust through.

Her trembling hart . . .
Quite through *transfixed* with a deadly dart.
Spenser, F. Q., III. xii. 21.

=**Syn.** *Pierce*, etc. See *penetrate.*

transfixation (tråns-fik-sā'shọn), *n.* [< *transfix* + *-ation.*] Same as *transfixion.* *Lancet*, 1889, I. 273.

transfixed (tråns-fikst'), *a.* In *her.*, represented as pierced with a spear, sword, or other weapon, which is always specified.

transfixion (tråns-fik'shọn), *n.* [= F. *transfixion* = Sp. *transfixión* = Pg. *transfixão;* as *transfix* + *-ion.*] 1. The act of transfixing, or piercing through; the act of piercing and thus fastening.—2. The state of being transfixed or pierced. [Rare.]

Christ shed blood . . . in his scourging, in his affixion, in his *transfixion.*
Bp. Hall, Sermon, Gal. ii. 20.

3. In *surg.*, a method of amputating by piercing the limb transversely with the knife and cutting from within outward.

In cutting the posterior flap by *transfixion* . . . the surgeon should always support it with his left hand.
Bryant, Surgery, p. 941.

transfluent (tråns'flö-ẹnt), *a.* [< L. *transfluen*(*t-*)*s*, ppr. of *transfluere*, flow or run through, < *trans*, through, + *fluere*, flow: see *fluent.*] 1. Flowing or running across or through: as, a *transfluent* stream.—2. In *her.*, represented as running or pouring through: thus, a bridge of three arches sable, water *transfluent* azure.

transflux (tråns-fluks'), *n.* [< L. *trans*, through, + *fluxus*, a flowing: see *flux*, and cf. *transfluent.*] A flowing through or beyond. [Rare.] *Imp. Dict.*

transforate (tråns'fọ-rāt), *v. t.*; pret. and pp. *transforated*, ppr. *transforating.* [< L. *transforatus*, pp. of *transforare* (> It. *traforare* = Pr. *transforar, trasforar*), pierce through, < *trans*, through, + *forare*, bore, pierce: see *foramen.* Cf. *perforate.*] To bore through; perforate; specifically, in *surg.*, to perforate repeatedly (the base of the fetal skull) in performing craniotomy.

transforation (tråns-fọ-rā'shọn), *n.* [< *transforate* + *-ion.*] The act of transforating, as in craniotomy.

transform (tråns-fôrm'), *v.* [< ME. *transformen*, < OF. (and F.) *transformer* = Pr. Sp. Pg. *transformar* = It. *transformare, trasformare*, < L. *transformare*, change the shape of, transform, < *trans*, over, + *formare*, form, shape, < *forma*, form: see *form.*] **I.** *trans.* 1. To change the form of; metamorphose; change to something dissimilar.

Love may *transform* me to an oyster.
Shak., Much Ado, ii. 3. 25.

But ah! by constant heed I know
How oft the sadness that I show
Transforms thy smiles to looks of woe.
Cowper, To Mary.

The delicately-reared imaginations of great investigators of natural things have from time to time given birth to hypotheses—guesses at truth—which have suddenly *transformed* a whole department of knowledge.
E. R. Lankester, Degeneration, p. 8.

2. Specifically, in *alchemy*, to change into another substance; transmute.

The victor sees his fairy gold
Transformed, when won, to drossy mould.
Scott, Rokeby, i. 31.

3. To change the nature, character, or disposition of.

Be ye *transformed* by the renewing of your mind.
Rom. xii. 2.

These dispositions, that of late *transform* you
From what you rightly are. *Shak.*, Lear, i. 4. 242.

4. In *math.*, to alter from one figure or expression to another differing in form but equal in quantity. See *transformation*, 4.—**Syn. 1-3.** *Transform, Transmute, Transfigure*, and *Metamorphose* agree in representing a thorough change, *transform* being the most general word. *Transform* is the only one that applies to change in merely external aspect, as by a change in garments, but it applies also to internal change, whether physical or spiritual: as, the caterpillar is *transformed* into the butterfly; the drunkard is *transformed* into a self-controlling man. *Transmute* is founded upon the idea of a rearrangement of material, but it really notes the highest degree or the most remarkable forms of change, a complete change of nature, amounting even to the miraculous or the impossible: as, to *transmute* iron into gold; the word is figurative when not applied to physical change. *Transfigure* is controlled in its signification by the use of the word in connection with the change in the appearance of Jesus Christ, as related in Mat. xvii., Mark ix., and Luke ix. It applies only to a change in aspect by which a spiritual uplifting seems to exalt and glorify the whole person, and especially the countenance. *Metamorphose* now seems figurative when not used with scientific exactness according to the definitions under *metamorphosis.*

II. *intrans.* To change in appearance or character; undergo transformation; be metamorphosed: as, some insects *transform* under ground; the pupa *transforms* into the imago.

Merlin that was with hem *transformed* in to the semblaunce of a yonge knyght of xv yere age.
Merlin (E. E. T. S.), iii. 607.

His hair *transforms* to down.
Addison, tr. of Ovid's Metamorph., ii.

transformable (tråns-fôr'ma-bl), *a.* [< *transform* + *-able.*] Capable of being transformed. *H. Spencer*, Prin. of Psychol., § 47.

transformance† (tråns-fôr'måns), *n.* [< *transform* + *-ance.*] A transformation; a semblance; a disguise.

Take such a *transformance* as you may be sure will keep you from discovery. *Chapman*, May-Day, ii. 4.

transformation (tråns-fôr-mā'shọn), *n.* [< F. *transformation* = Sp. *transformación*, *trasformación* = Pg. *transformação* = It. *transformazione*, *trasformazione*, < LL. *transformatio(n-)*, a change of shape, < L. *transformare*, change the shape of: see *transform.*] 1. The act or operation of transforming, or the state of being transformed; a change in form, appearance, nature, disposition, condition, or the like.

Transformation of apostate man
From fool to wise, from earthly to divine,
Is work for Him that made him.
Cowper, Task, v. 695.

The *transformation* of barren rock into life-supporting soil takes countless ages.
H. Spencer, Social Statics, p. 378.

2. In *biol.*, metamorphosis, in any sense; especially, the metamorphosis of those organisms which undergo obvious and great changes of form, as that of insects in passing from the larval to the imaginal state. *Metamorphosis* is the more frequent technical term. By some zoölogists *transformation* is restricted to the series of changes which

Danais archippus, ideal figures, showing transformation: *a*, larva suspended; *b*, pupa forming with larva-skin still attached; *c*, the same, showing manner of withdrawing from larva-skin.

every germ undergoes in completing the embryonic condition, as those observed within the egg; while *metamorphosis*, according to the same authorities, designates the alterations which are undergone after exclusion from the egg, and which alter extensively the general form and mode of life of the individual. But this distinction of the synonymous words is seldom maintained. See *metamorphosis*, 2, 4, and compare *transformism.*

3. The change of one metal into another; transmutation of metals, according to the alchemists. —4. In *math.*, a passage in the imagination from one figure or expression to another different in form but equal in quantity. Thus, the volume of an oblique prism is ascertained by a transformation of it into a right prism of equal volume. Especially —(*a*) The passage from one algebraical expression to another in other terms. (*b*) The passage from one equation to another expressive of the same relation, by substituting for the independent variables it involves their values in terms of another set of such variables equal in number to the old ones. This is called a *transformation of the equation;* but when this defines a locus, and one set of coördinates is substituted for another, it is inaccurately but universally called a *transformation of the coördinates.* (*c*) A correspondence. If in the transformation of coördinates the new coördinates are conceived to be measured in a different space or locus in quo, a projection or correspondence has taken place, and this, being still called a *transformation*, gives rise to such phrases as a *transformation between two planes.* Thus, if in the equation of a conic we substitute $x = 1/x'$, $y = 1/y'$, $z = 1/z'$, we effect a transformation of the equation. This may be regarded as signifying a mere transformation of coördinates; but if x', y', z' are conceived to be coördinates of a corresponding point in the same or another plane, and measured similarly to x, y, z, we have a transformation between the planes, which transforms the conic into a unicursal quartic. The whole analytical theory being identical under the two interpretations, the word *transformation* has been unadvisedly transferred from one application to the other. 5. In *pathol.*, a morbid change in a part, which consists in the conversion of its texture into one which is natural to some other part, as when soft parts are converted into cartilage or bone. Such transformation is generally a degenerative or retrograde metamorphosis.—6. In *physiol.*, the change which takes place in the component parts of the blood during its passage from the minute arteries through the capillary system of vessels into the radicles of the venous system. See *intussusception*, *apposition*, and *secretion.*—7. In *physics*, change: as, *transformation* of energy (from kinetic to potential or vice versa); *transformation* of heat into work; *transformation* of state, as from solid to liquid or from liquid to gas. Also, the change of the potential difference of an alternating electric current by means of a transformer.

8†. The shape to which some person or thing has been transformed.

If it should come to the ear of the court how I have been transformed, and how my *transformation* has been washed and cudgelled, they would melt me out of my fat drop by drop. *Shak.*, M. W. of W., iv. 5. 98.

Arguesian transformation, a transformation between two spaces where the relation between the two sets of point- or line-coördinates is defined by the equations $xx' = yy' = zz' = ww'$. Every surface will thus be transformed into a surface having the edges of the tetrahedron of reference as nodal lines.—**Bäcklund's transformation,** a transformation between two pseudospherical surfaces having equal negative curvature.—**Bilinear transformation,** a transformation defined by a lineolinear equation.—**Biquadratic transformation,** a transformation by substituting for one set of variables others that are biquadratic functions of them.—**Birational transformation,** a transformation where the variables of each of the two sets are rational functions of those of the other set. When the variables are homogeneous coördinates, and the transformation is not linear, there is a certain nodal locus whose correspondence is indeterminate.—**Caseous** or **cheesy transformation.** See *caseous.*—**Cremona transformation,** a birational transformation between two planes. Every curve in one plane is transformed into a curve of the same deficiency in the other plane, and there are certain nodal points through which all such curves pass, having certain lines as multiple tangents.—**Cubic transformation,** a transformation by substituting for one set of variables others that are cubic functions of them.—**Degree of a transformation.** See the quotation.

When the points of a space S have a (1, 1) correspondence with those of another space *s* in such a manner that the planes and the right lines of *s* correspond to surfaces F of mth order, and to curves C of the nth order in the former space S, I say that the *transformation* of *s* into S is *of the* m^{th} *degree*, and that the inverse *transformation* is *of the* n^{th} *degree.* *Cremona.*

Determinant of a linear transformation. See *determinant.*—**Hessian transformation,** a transformation of a ternary quantic, obtained by substituting for the homogeneous variables the umbræ A_1, A_2, A_3, which are such that A_1A_1, A_1A_2, etc., are the minors of the Hessian of the quantic.—**Homographic transformation.** (*a*) A transformation between two planes or spaces such that the point-coördinates in one correspond to tangential coördinates in the other. (*b*) A transformation by means of a lineolinear equation connecting the old variable with the new one. Such a transformation is called *homographic* for the reason that it does not alter the value of a cross-ratio.—**Imaginary transformation.** See *imaginary.*—**Infinitesimal transformation,** a transformation in which the variables are increased by infinitesimal amounts. The infinitesimal transformation ξ, η is that which results from the substitution of $x + \epsilon\xi$ for x and $y + \epsilon\eta$ for y, where ϵ is infinitesimal. If this substitution can be made in a differential equation by virtue of that equation, the equation is said to admit the infinitesimal transformation ξ, η.—**Landen's transformation** [named after its discoverer, the English mathematician John Landen (1719–90)], a transformation of an elliptic integral of the first species by which its modulus is changed from k to the arithmetico-geometrical mean of k' and unity.—**Lie's transformation,** a transformation in which to all the lines tangent to one surface at each point correspond all the spheres tangent to another surface at a corresponding point.—**Linear transformation,** a transformation by means of a system of equations giving the values of the old variables as linear functions of the new.—**Line-point transformation,** a transformation in which lines correspond to points.—**Modular transformation of an elliptic integral.** See *modular.*—**Modulus of a linear transformation.** See *modulus.*—**Order of a transformation.** Same as *degree of a transformation.*—**Orthogonal transformation,** a linear transformation in which the sum of the squares of the variables remains unchanged.—**Polar transformation.** (*a*) A transformation in which two variables r and θ are replaced by two others r' and θ', by means of the equations $\theta = m\theta'$, $\log r = m \log r'$. The geometrical effect is that of passing from the stereographic to Lagrange's map-projection (which see, under *projection*). (*b*) A transformation by means of polar triangles in spherical trigonometry.—**Quadratic** or **quadric transformation,** a transformation in which each of the old variables is a quadratic function of the new ones; especially, a quadratic Cremona transformation where to a right line in either of two planes corresponds a conic in the other, with three nodal points.—**Rational transformation.** See *rational.*—**Reciprocal transformation,** a transformation by means of the equations $x : y : z = x_1^{-1} : y_1^{-1} : z_1^{-1}$.—**Transformation by symmetric functions,** a transformation of an equation by substituting for the variable a rational function of the roots by means of the properties of symmetric functions.—**Transformation of energy.** See *correlation of energies*, under *energy.*—**Tschirnhausen transformation,** the expression of any rational function of an unknown by means of a given algebraic equation in that unknown, as an integral function of a degree less than that of the given equation.—**Unimodular transformation.** See *unimodular.*—**Syn.** See *transform, v. t.*

transformation-scene (tråns-fôr-mā'shọn-sēn), *n.* *Theat.*, a scene which changes in sight of the audience; specifically, a gorgeous scene at the conclusion of the burlesque of a pantomime, in which the principal characters are supposed to be transformed into the chief actors in the immediately following harlequinade.

transformative (tråns-fôr'ma-tiv), *a.* [< L. *transformatus*, pp. of *transformare*, transform (see *transform*), + *-ive.*] Having power or a tendency to transform.

transformator (tråns-fôr'mā-tọr), *n.* [< NL. *transformator*, < L. *transformare*, transform: see *transform.*] In *elect.*, same as *transformer.*

transformer (tråns-fôr'mėr), *n.* One who or that which transforms. The alternate-current transformer, which is the one most extensively used in electricity, is an apparatus similar to an induction-coil, but usually having a closed magnetic circuit, consisting of two coils of insulated wire wound on an iron core for the purpose of furnishing, by means of a current of small quantity and high potential in one circuit, a current of large quantity and low potential in another circuit or inversely. The coil which receives the electric power is called the primary coil; the coil which supplies the power to the external circuit, the secondary coil. When transforming from high voltage and low current to lower voltage and higher current it is called *step-down transformer;* when transforming from low voltage to higher voltage and lower current, *step-up transformer.* Transformers using mechanical rotation for transformation are called *converters* (see *converter*) when the transformation takes place in one machine, *dynamotors* when two armatures but the same magnetic field is used, and *motor-generators* when two separate machines are used.

transformism (tråns-fôr'mizm), *n.* [< *transform* + *-ism.*] In *biol.*, the fact or the doctrine of such modification of specific characters in any organism as suffices to change one species into a different species, whether immediately or in the course of time; transmutation of species (see *transmutation*, 1 (*c*)). The term has nothing to do with the transformation or metamorphosis which any organism may undergo in the course of its individual life-cycle. It has attached to some extreme views of the natural possibilities of transmutation, as of a plant into an animal, a horsehair into a hairworm, and the like—nothing of this sort being known as a fact in nature. But in the scientific conception of the term, *transformism*, like *transmutation* in its biological sense, is simply the doctrine of descent with modification on accepted principles of evolution, and, so understood, commands the assent of nearly all biologists. See *Darwinism*, *evolution*, 2 (*a*), *selection*, 3, *species*, 5, *transmutation*, 1 (*c*), and *transpeciation.*

transformist (tråns-fôr'mist), *n.* [< *transform* + *-ist.*] A believer in or an advocate of the doctrine of transformism, in any sense.

Agardh . . . was a little too earnest a *transformist*, and believed that certain algæ could become animals.
Pop. Sci. Mo., XXXVIII. 257.

transformistic (tråns-fôr-mis'tik), *a.* [< *transformist* + *-ic.*] Pertaining to transformism or to transformists.

In the chapter on the first appearance of man, the various *transformistic* theories are passed in review.
Nature, XXXV. 389.

transfreight†, *v. i.* A corrupt form of *transfrete.* *Waterhouse*, Apology (1653), p. 52. (*Latham.*)

transfretation† (tråns-frē-tā'shọn), *n.* [< L. *transfretatio(n-)*, crossing over a strait, < *transfretare*, cross over a strait: see *transfrete.*] The act of passing over a strait or narrow sea.

She had a rough Passage in her *Transfretation* to Dover Castle. *Howell*, Letters, I. iv. 22.

transfrete† (tråns-frēt'), *v. i.* [Also, corruptly, *transfreight*; < OF. *transfreter* = Sp. *transfretar*, < L. *transfretare*, cross over a strait, convey over a strait, < *trans*, over, + *fretum*, a strait: see *frith*[2].] To pass over a strait or narrow sea.

Shortly after that kyng Henry had taryed a convenient space, he *transfreted* and arryved at Dover, and so came to his maner of Grenewiche. *Hall*, Hen. VII., an. 7.

transfrontal (tråns-fron'tal), *a.* [< L. *trans*, across, + *fron(t-)s*, front: see *frontal.*] Traversing the frontal lobe of the brain: specifying certain fissures of that lobe. *Buck's Handbook of Med. Sciences*, VIII. 152.

transfrontier (tråns-fron'tēr), *a.* [< *trans-* + *frontier.*] Beyond the frontier, or of or pertaining to what is beyond the frontier: as, the *transfrontier* tribes (that is, usually, the tribes beyond the frontier of the Anglo-Indian empire).

Of the new maps, 4,062 were published during the year, and heavy demands continue to be made for *transfrontier* maps, and maps of Upper Burmah. *Science*, XIV. 216.

transfuge (tråns'fūj), *n.* [< F. *transfuge* = Sp. *tránsfuga*, *tránsfugo*, *trásfuga*, *trásfugo* = Pg. It. *transfuga*, < L. *transfuga*, a deserter, < *transfugere*, desert, flee over to the other side, < *trans*, over, + *fugere*, flee: see *fugitive.*] A deserter, in the military sense.

The protection of deserters and *transfuges* is the invariable rule of every service in the world.
Lord Stanhope, To George Ticknor, May 12, 1855.

transfugitive (tråns-fū'ji-tiv), *n.* [< *trans-*, over, + *fugitive.* Cf. *transfuge.*] Same as *transfuge.* *Eclectic Rev.* (*Worcester.*)

transfund (tråns-fund'), *v. t.* [= Sp. Pg. *transfundir* = It. *transfondere*, < L. *transfundere*, pour out from one vessel into another, < *trans.*

over, + *fundere*, pour: see *found*[3]. Cf. *transfuse*.] To transfuse.

Transfunding our thoughts and our passions into each other. *Barrow*, Works, I. viii.

transfuse (tråns-fūz'), *v. t.*; pret. and pp. *transfused*, ppr. *transfusing*. [= F. *transfuser*, < L. *transfusus*, pp. of *transfundere*, pour out from one vessel into another: see *transfund*.] 1. To pour out of one vessel into another; transfer by pouring.

All the unsound juices taken away, and sound juices immediately *transfused*. *Arbuthnot*.

2. In *med.*, to transfer (blood) from the veins or arteries of one person to those of another, or from an animal to a person; also, to inject into a blood-vessel (other liquids, such as milk or saline solutions), with the view of replacing the bulk of fluid lost by hemorrhage or drained away in the discharges of cholera, etc.—3. To cause to pass from one to another; cause to be instilled or imbibed.

Into thee such virtue and grace
Immense I have *transfused*. *Milton*, P. L., vi. 704.

And that great Life, *transfused* in theirs,
Awaits thy faith. *Whittier*, Chapel of the Hermits.

transfuser (tråns-fū'zėr), *n.* [< *transfuse* + *-er*[1].] One who or that which transfuses. *The Nation*, XLIX. 319.

transfusible (tråns-fū'zi-bl), *a.* [< *transfuse* + *-ible*.] Capable of being transfused. *Boyle*, Works, II. 121.

transfusion (tråns-fū'zhọn), *n.* [< F. *transfusion* = Sp. *transfusión* = Pg. *transfusão* = It. *transfusione*, < L. *transfusio(n-)*, a pouring from one vessel into another, < *transfundere*, pp. *transfusus*, pour from one vessel into another: see *transfuse*.] 1. The act of transfusing, or of pouring, as a liquid, out of one vessel into another; hence, in general, transmission; transference.

Poesy is of so subtile a spirit that in the pouring out of one language into another it will all evaporate; and if a new spirit be not added in the *transfusion*, there will remain nothing but a "caput mortuum." *Sir J. Denham*.

Their wild, imaginative poetry, scarcely capable of *transfusion* into a foreign tongue. *Prescott*, Ferd. and Isa., i. 8.

2. In *med.*, the transmission of blood from one living animal to another, or from a human being or one of the lower animals into a human being, with the view of restoring the vigor of exhausted subjects or of replacing the blood lost by hemorrhage; also, the intravenous injection of other liquids, such as milk or saline solutions. The transfusion of a physiological salt solution is performed in order to restore the circulating fluid to its normal volume, as after hemorrhage or the serous discharge of cholera, or to remove impurities by diluting the blood and accelerating the elimination of extraneous matters contained in it.

Mem. that at the Epiphanie, 1649, when I was at his house, he then told me his notion of cureing diseases, &c., by *transfusion* of bloud out of one man into another, and that the hint came into his head reflecting on Ovid's story of Medea and Jason. *Aubrey*, Lives (Francis Potter).

Direct or **immediate transfusion**, the transmission of blood directly from the veins of the donor into those of the recipient.—**Indirect** or **mediate transfusion**, the injection into the veins of the recipient of blood which has been first allowed to flow into a bowl or other vessel and there defibrinated.—**Peritoneal transfusion**, the injection of defibrinated blood into the peritoneal cavity, with a view to its absorption into the system.

transfusionist (tråns-fū'zhọn-ist), *n.* [< *transfusion* + *-ist*.] One who is skilled in the surgical process of transfusion; one who advocates that process.

The early *transfusionists* reasoned, in the style of the Christian Scientists, that the blood is the life.
Pop. Sci. Mo., XXXIV. 808.

transfusive (tråns-fū'siv), *a.* [< L. *transfusus*, pp. of *transfundere*, transfuse, + *-ive*.] Tending or having power to transfuse.

transfusively (tråns-fū'siv-li), *adv.* So as to transfuse; in a transfusive manner. [Rare.]

The Sunne . . . his beames *transfusively* shall run
Through Mars his Sphere, or loves benigner Star.
Heywood, Hierarchy of Angels, p. 278.

transgangetic (tråns-gan-jet'ik), *a.* [< *trans-* + *Gangetic*.] On the opposite side of the Ganges; pertaining or relating to regions beyond the Ganges.

transgress (tråns-gres'), *v.* [< F. *transgresser*, a freq. form (due in part to the noun *transgression*) of OF. *transgredir* = Sp. *transgredir*, *trasgredir* = Pg. *transgredir* = It. *transgredire*, *trasgredire*, < L. *transgredi*, pp. *transgressus*, step across, step over, transgress, < *trans*, over, + *gradi*, step, walk: see *grade*[1]. Cf. *aggress*, *congress*, *digress*, *progress*, etc.] **I.** *trans.* 1. To pass over or beyond; go beyond.

'Tis time my hard-mouth'd coursers to control,
Apt to run riot, and *transgress* the goal.
Dryden, tr. of Ovid's Metamorph., xv. 669.

The Furies, they said, are attendants on justice, and if the sun in heaven should *transgress* his path they would punish him. *Emerson*, Compensation.

Hence—2. To overpass, as some law or rule prescribed; break or violate; infringe.

It is evident that Aristotle *transgressed* the rule of his own ethics. *Sir T. Browne*, Religio Medici, i. 55.

Whilst men continue social units, they cannot *transgress* the life principle of society without disastrous consequences. *H. Spencer*, Social Statics, p. 488.

3†. To offend against (a person); disobey; thwart; cross; vex.

I never
Blasphem'd 'em, uncle, nor *transgress'd* my parents.
Fletcher, Bonduca, iv. 2.

=**Syn.** 2. *Infringe upon*, *Encroach upon*, etc. (see *trespass*, *v. i.*), pass, transcend, overstep, contravene.

II. *intrans.* To offend by violating a law; sin.

The troubler of Israel, who *transgressed* in the thing accursed. 1 Chron. ii. 7.

I would not marry her, though she were endowed with all Adam had left him before he *transgressed*.
Shak., Much Ado, ii. 1. 260.

transgressible (tråns-gres'i-bl), *a.* [< *transgress* + *-ible*.] Liable to transgression, or capable of being transgressed. *Imp. Dict.*

★**transgression** (tråns-gresh'ọn), *n.* [< F. *transgression* = Pr. *transgressio* = Sp. *transgresión*, *tragresión* = Pg. *transgressão* = It. *transgressione*, *trasgressione*, < L. *transgressio(n-)*, a passing over, transposition, also a transgression of the law, < *transgredi*, pp. *transgressus*, pass over: see *transgress*.] The act of transgressing; the violation of any law; disobedience; infringement; trespass; offense.

Whosoever committeth sin trangresseth also the law: for sin is the *transgression* of the law. 1 John iii. 4.

They that are in the flesh . . . live in sin, committing many actual *transgressions*.
Book of Common Prayer, Baptism of those of Riper Years.

=**Syn.** *Sin*, *Trespass*, etc. (see *crime*), infraction, breach.

transgressional (tråns-gresh'ọn-al), *a.* [< *transgression* + *-al*.] Pertaining to or involving transgression. [Rare.]

Forgive this *transgressional* rapture; receive my thanks for your kind letter. *Ep. Burnet*, Life, I. p. xlix.

transgressive (tråns-gres'iv), *a.* [< LL. *transgressivus*, that goes or passes over, < L. *transgredi*, pass over: see *transgress*.] Inclined or apt to transgress; faulty; sinful; culpable.

Permitted unto his proper principles, Adam perhaps would have sinned without the suggestion of Satan, and from the *transgressive* infirmities of himself might have erred alone, as well as the angels before him.
Sir T. Browne, Vulg. Err., i. 10.

transgressively (tråns-gres'iv-li), *adv.* 1. In a transgressive manner; by transgressing.—2. In *geol.*, unconformably.

Let us suppose, for example, that a mountain range consists of upraised Lower Silurian rocks, upon the upturned and denuded edges of which the Carboniferous Limestone lies *transgressively*. *A. Geikie*, Encyc. Brit., X. 371.

transgressor (tråns-gres'ọr), *n.* [< ME. *transgressour*, < OF. *transgresseur* = Pr. *transgressor* = Sp. *transgresor*, *trasgresor* = Pg. *transgressor* = It. *trasgressore*, < L. *transgressor*, an infringer, transgressor, < *transgredi*, pp. *transgressus*, pass over: see *transgress*.] One who transgresses; one who breaks a law or violates a command; one who violates any known rule or principle of rectitude; a sinner; an offender.

Good understanding giveth favour; but the way of *transgressors* is hard [the way of the treacherous is rugged, R. V.]. Prov. xiii. 15.

transhape (tran-shāp'), *v. t.* [< *tran(s)-* + *shape*.] Same as *trans-shape*. [Rare.]

transhape (tran-shāp'), *n.* [< *transhape*, *v.*] A transformation.

If this displease thee, Midas, then I'll shew thee,
Ere I proceed with Cupid and his love,
What kind of people I commerc'd withal
In my *transhape*.
Heywood, Love's Mistress, p. 16. (*Halliwell*.)

tranship (tran-ship'), *v. t.*; pret. and pp. *transhipped*, ppr. *transhipping*. [Also *trans-ship*; < *tran(s)-* + *ship*.] To convey from one ship, car, or other conveyance to another; also, to transfer in this way and convey to some destination.

Sunday, August 4th. This day . . . the loading was completed, and all the baggage and presents put on board the large junks, to be *transhipped* into smaller ones.
Lord Macartney, Works, II. 180.

The system of pipe transport from the wells to the railway station, whence they are to be *transhipped* either to the refinery or the sea-board. *Ure*, Dict., IV. 568.

transhipment (tran-ship'ment), *n.* [Also *transshipment*; < *tranship* + *-ment*.] The act of transhipping. See *tranship*.

When this lantern was attempted to be landed here for the purpose of *transhipment* to Montevideo.
Morning Chronicle, Dec. 2, 1719. (*Jodrell*.)

transhuman (tråns-hū'man), *a.* [< *trans-* + *human*.] More than human; superhuman. [Rare.]

Words may not tell of that *transhuman* change.
Cary, tr. of Dante's Purgatory, i. 68.

transhumanize (tråns-hū'man-īz), *v. t.* [< *transhuman* + *-ize*.] To elevate or transform to something beyond what is human; change from a human into a higher, purer, nobler, or celestial nature. [Rare.]

Souls purified by sorrow and self-denial, *transhumanized* to the divine abstraction of pure contemplation.
Lowell, Among my Books, 2d ser., p. 43.

transience (tran'shens), *n.* [< *transien(t)* + *-ce*.] Transientness; also, that which is transient or fleeting.

Man is a being of high aspirations, "looking before and after," whose "thoughts wander through eternity," disclaiming alliance with *transience* and decay; existing but in the future and the past. *Shelley*, in Dowden, I. 332.

transiency (tran'shen-si), *n.* [As *transience* (see *-cy*).] Same as *transience*.

Poor sickly *transiencies* that we are, coveting we know not what. *Carlyle*, Reminiscences, I. 251.

transient (tran'shent), *a.* and *n.* [< L. *transien(t-)s*, ppr. of *transire*, go over, pass over, pass through, < *trans*, over, + *ire*, go: see *iter*[1]. Cf. *ambient* and *transeunt*.] **I.** *a.* 1. Passing across, as from one thing or person to another; communicated.

Thus indeed it is with healthiness of the body: it hath no *transient* force on others, but the strength and healthiness of the minde carries with it a gracious kinde of infection. *Hales*, Remains, Sermon on Rom. xiv. 1.

Transient in a trice
From what was left of faded woman-slough
To sheathing splendors and the golden scale
Of harness. *Tennyson*, Princess, v.

2. Passing with time; of short duration; not permanent; not lasting or durable; temporary: as, a *transient* impression.

How soon hath thy prediction, Seer blest,
Measured this *transient* world, the race of time,
Till time stand fix'd! *Milton*, P. L., xii. 554.

A spirit pervaded all ranks, not *transient*, not boisterous, but deep, solemn, determined.
D. Webster, Speech, Bunker Hill Monument, June 17, 1825.

3. Hasty; momentary; passing: as, a *transient* glance of a landscape.

He that rides post through a country may, from the *transient* view, tell how in general the parts lie. *Locke*.

4. In *music*, intermediate—that is, serving as a connective, but unessential in itself: as, a *transient* chord, modulation, or note. Compare *passing-note*.—**Transient act.** See *act*.—**Transient action.** See *immanent action*, under *action*.—**Transient cause.** See *cause*, 1.—**Transient chord.** See *chord*, 4.—**Transient effect**, in *painting*, a representation of an appearance in nature produced by a cause that is not permanent, as the shadow cast by a passing cloud. Also expressed by *accident*.—**Transient matter.** Same as *matter of generation* (which see, under *matter*).=**Syn. 2.** *Transient*, *Transitory*, *Fleeting*. Strictly, *transient* marks the fact that a thing soon passes or will soon pass away: as, a *transient* impression; a *transient* shadow. *Transitory* indicates that lack of permanence is in the nature of the thing: as, *transitory* pleasure; this *transitory* life. *Fleeting* is by figure a stronger word than *transient*, though in the same line of meaning. See list under *transitory*.

II. *n.* 1. One who or that which is temporary, passing, or not permanent.

For before it can fix to the observation of any one its object is gone: Whereas, were there any considerable thwart in the motion, it would be a kind of stop or arrest, by the benefit of which the soul might have a glance of the fugitive *transient*.
Glanville, Vanity of Dogmatizing, ix. (*Encyc. Dict.*)

Specifically—2. A transient guest. [Colloq.]

Many surroundings (to coin a word to describe us summer *transients*) now flit along these streams.
Scribner's Mag., VIII. 496.

transiently (tran'shent-li), *adv.* In a transient manner; in passing; for a short time; not with continuance; transitorily.

I touch here but *transiently* . . . on some few of those many rules of imitating nature which Aristotle drew from Homer. *Dryden*.

transientness (tran'shent-nes), *n.* The state or quality of being transient; shortness of continuance; speedy passage. *Winer*, Grammar of New Testament, p. 281.

transiliac (tråns-il'i-ak), *a.* [< *trans-* + *iliac*[1].] Extending transversely from one iliac bone to the other: as, the *transiliac* axis or diameter of the pelvic inlet.

transilience (tran-sil'i-ens), *n.* [< *transilien(t-)* + *-ce*.] Same as *transiliency*.

transiliency (tran-sil'i-en-si), *n.* [As *transilience* (see *-cy*).] A leap from one thing to another. *Glanville*, Vanity of Dogmatizing, xii. [Rare.]

transilient (trăn-sil′i-ent), *a.* [< L. *transilien(t-)s*, ppr. of *transilire, transsilire*, leap or spring across or over, < *trans*, over, + *salire*, leap, jump: see *salient*.] Leaping or extending across, as from one base of support to another.—**Transilient fibers**, nerve-fibers passing from one convolution of the brain to another not immediately adjacent.

transillumination (trăns-i-lū-mi-nā′shŏn), *n.* [< L. *trans*, through, + LL. *illuminatio(n-)*, illumination.] A shining through; the process of causing light to pass through; specifically, in *med.*, the throwing of a strong light through an organ or portion of the body as a means of diagnosis.

It [a tooth] was translucent by electric *transillumination*, showing that the pulp was living.
Lancet, 1890, I. 480.

transincorporation (trăns-in-kôr-pō-rā′shŏn), *n.* [< *trans-* + *incorporation*.] Transmigration of the soul; metempsychosis. [Rare.]

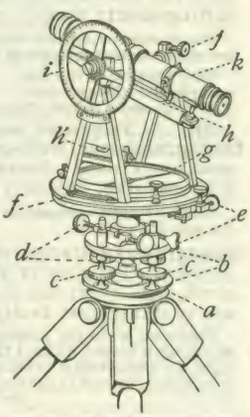
Its contents are full of curious information, more particularly those on the *transincorporation* of souls.
W. Robberds, Memoir of W. Taylor, II. 305.

transinsular (trăns-in′sū-lăr), *a.* [< L. *trans*, across, + *insula*, island: see *insular*.] In *anat.*, traversing the insula of the brain: said of a fissure of the island of Reil. *Buck's Handbook of Med. Sciences*, VIII. 149.

transire (trăns-ī′rē), *n.* [< L. *transire*, go across, cross over: see *transient, transit*.] A custom-house permit to let goods pass or be removed. *Anderson*, Law Dict.

transischiac (trăns-is′ki-ak), *a.* [< *trans-* + *ischiac*.] Extending transversely from one ischiac bone to the other: as, the *transischiac* diameter of the pelvic outlet.

transisthmian (trăns-ist′mi-an), *a.* [< L. *trans*, across, + *isthmus*, isthmus.] Extending across an isthmus: used chiefly with reference to the isthmus of Suez, or to that joining North and South America.



★ A *trans-isthmian* canal will be a military disaster to the United States. *The Atlantic*, LXVI. 822.

transit (trăn′sit), *n.* [< F. *transit* = Sp. *tránsito* = Pg. *transito* = It. *transito*, a going over, a passing, passage, transition, < L. *transire*, pp. *transitus*, go across, pass: see *transient*. Cf. *exit, circuit*. See also *trance*[1], *trance*[2].] **1.** The act of passing; a passing over or through; a passage; the act of moving, or the state of being conveyed; also, the act or process of causing to pass; conveyance: as, the *transit* of goods through a country; the problem of rapid *transit* in cities.

For the adaptation of his [man's] moral being to an ultimate destination, by its *transit* through a world full of moral evil, the economy of the world appears to contain no adequate provision. *Whewell.*

The necessity of subjecting the thousands of tons of provisions consumed daily by a large army to such long and complicated *transits* limits the transportation by wagons considerably, and renders the powerful assistance of steam indispensable, both by water and by rail.
Comte de Paris, Civil War in America (trans.), I. 202.

2. A line of passage or conveyance through a country: as, the Nicaragua *transit*.—**3.** In *astron.*: (*a*) The passage of a heavenly body across the meridian of any place. The right ascension of such a body is the sidereal time of its upper transit. (*b*) The passage of a celestial body (specifically either of the planets Mercury and Venus) across the sun's disk, or of a satellite, or the shadow of a satellite, across the face of its primary. The passage of the moon across the sun's face, however, is called an *eclipse*. The planet Mercury passes across the sun's face usually at intervals either of 13 or of 7 years, transits at the planet's ascending node occurring in November, and those at the descending node in May. November transits have occurred or will occur in 1651, 1664, 1677, 1690, 1697, 1710, 1723, 1736, 1743, 1756, 1769, 1776, 1782, 1789, 1802, 1815, 1822, 1835, 1848, 1861, 1868, 1881, 1894, 1907, 1914, 1927, 1940, 1953, 1960, 1973, 1986, 1999, and May transits in 1674, 1707, 1740, 1753, 1786, 1799, 1832, 1845, 1878, 1891, 1924, 1937, 1970, 2003. Owing to the proximity of Mercury to the sun, its transits do not have the astronomical importance of those of Venus, as they are less suitable for determining the solar parallax. Transits of Venus occur at intervals of 8, 105½, 8, 121½, 8, 105½, . . . years, and always in June or December. They are of great importance to the astronomer, for they afford an excellent method of determining the sun's parallax. The actual calculation of this from a transit is very intricate, as many slight corrections and sources of error have to be considered. The principle involved, however, will be understood from the diagram, in which AB represents the earth, and V and S Venus and the sun. Observers at A and B see Venus projected on the sun's disk at A′ and B′ respectively, the observations being made simultaneously. The apparent positions A′, B′ are carefully determined by photography, by micrometric measures, or otherwise; and a subsequent comparison of notes gives the angle α. If R and r denote the respective distances of the earth and Venus from the sun, the angle β is given by the equation $\alpha : \beta = r : R$. The ratio $r : R$ is known with great precision from the sidereal periods of Venus and the earth, and since α was found by observation, the foregoing equation determines β. The angle AB′B (being the angle subtended by the earth's diameter at the sun's distance) is equal to double the solar parallax, or to 2π. From the triangle AVB′ it follows that $\beta = \alpha + 2\pi$, or $\pi = \frac{1}{2}(\beta - \alpha) = \frac{1}{2}\alpha(R/r - 1)$. The transit of 1769 was observed by expeditions sent out expressly for the purpose by the British, French, Russian, and other governments. The celebrated expedition of Captain Cook to Otaheite was one of them. The transits of December 8th, 1874, and December 6th, 1882, were also observed by various government expeditions. The next two transits of Venus will take place on June 8th, 2004, and June 6th, 2012, respectively. The satellites of Mars, Uranus, and Neptune are too small to be seen in transit, and even Titan is an unsatisfactory object to follow across the face of Saturn. Great interest attaches, however, to transits of the satellites of Jupiter, or of the shadows of these satellites. When one of them crosses a dark belt it can usually be followed entirely across the disk as a round shining spot. The brightness of the satellites is variable, however, and sometimes they look like dusky or even black spots when seen against the disk of the planet. The transit of a satellite's shadow is readily observed. The shadow may be on the disk when the satellite casting it is off, or the two may be seen on the disk at the same time. The shadows are not always black, but are sometimes so bright as to be invisible. They are often, and perhaps usually, different in size from the satellites casting them; and they have repeatedly been seen elliptical in outline. On a few occasions comets are thought to have been seen in transit.

Transit of Venus.

4. An abbreviation of *transit-circle* or *transit-instrument*.—**5.** An instrument used in surveying for measuring horizontal angles. It resembles a theodolite, but is not intended for very precise measurement. Most transits read only to the nearest minute of arc, though some read to the nearest half-minute, or twenty seconds, or even ten seconds.—**Lower transit.** Same as *subpolar transit*.—**Stoppage in transit.** See *stoppage*.—**Subpolar transit**, a transit across that part of the meridian which lies below the pole.—**Upper transit**, a transit across that part of the meridian which lies above the pole, or on the zenith side of it. Transits are always understood to be upper, unless distinctly called ★subpolar.

Surveyors' Transit.

a, tripod stand; *b*, leveling-plates; *c*, leveling-screws; *d*, tangent screws; *e*, clamping-screws; *f*, vernier; *g*, compass; *h*, *h′*, levels; *i*, vertical circle; *j*, clamping-screw; *k*, telescope.

transit (trăn′sit), *v. t.* [< *transit*, *n.*] To pass over the disk of, as of a heavenly body.

It was also well known that Venus would *transit* the northern part of the sun during the forenoon of the 9th of December, 1874. *Science*, XVI. 303.

transitation†, *n.* Passage; lapse.

He obuiated a rurall person, and interrogating him concerning the *Transitation* of the time, . . . found him a meere simplician, whereas if in his true speech he had asked him what was the clocke, . . . his ignorance might of the simplician haue beene informed.
Verstegan, Rest. of Decayed Intelligence (ed. 1628), [p. 205.

transit-circle (trăn′sit-sėr″kl), *n.* An astronomical instrument for observing the transit of a heavenly body across the meridian. It consists of a telescope mounted upon a fixed axis which is perpendicular to the plane of the meridian and carries a finely graduated circle. In the sidereal focus of the telescope cross-wires are placed; by observing the instant at which a star passes the center of the field of view, and, taking the corresponding reading of the circle, the right ascension and declination of the object are determined if the clock error is known; or, vice versa, the clock error and latitude of the observer are determined if the right ascension and declination of the star are known. The instrument is now more usually called the *meridian-circle* (which see). Compare *transit-instrument*.

transit-compass (trăn′sit-kum″pas), *n.* Same as *transit*, 5.

transit-duty (trăn′sit-dū″ti), *n.* A duty paid on goods that pass through a country.

transit-instrument (trăn′sit-in″strŏ-ment), *n.* An astronomical instrument for observing the passage of a celestial body across the meridian: often used in the same sense as *transit-circle*, but properly an instrument whose chief object is the determination of the time of transit. The circle fixed to the axis of the ordinary transit-instrument is intended simply as an aid in setting the instrument properly, and not for the determination of zenith distance or declination. The idea of having an instrument fixed in the plane of the meridian is as old at least as the time of Ptolemy. The first transit-instrument, as the word is now understood, was constructed in 1689 by the Danish astronomer Olaus Roemer. In 1704 Roemer constructed a private observatory near Copenhagen, into which he put a transit-instrument combined with a vertical circle for measuring declinations. This was the first transit-circle made.—**Prime vertical transit-instrument.** See *prime*. ★

transition (trăn-sish′ŏn), *n.* [< F. *transition* = Pr. *transitio* = Sp. *transicion* = Pg. *transição* = It. *transizione*, < L. *transitio(n-)*, a passing over or away, < *transire*, go or pass over: see *transient, transit*.] **1.** Passage from one place, state, or act to another; change: as, a sudden *transition* from anger to mirth; a state of *transition*.

Thence, by a soft *transition*, we repair
From earthly vehicles to these of air.
Pope, R. of the L., i. 49.

What sprightly *transitions* does she make from an opera or a sermon to an ivory comb or a pincushion!
Addison, Spectator, No. 45.

When Bunyan passed from this horrible condition [of doubt] into a state of happy feeling, his mind was nearly overthrown by the *transition*. *Southey*, Bunyan, p. 33.

2. In *rhet.*, a passing from one subject to another.

So here the archangel paused
Betwixt the world destroy'd and world restored. . . .
Then, with *transition* sweet, new speech resumes.
Milton, P. L., xii. 5.

3. In *music*, same (usually) as *modulation*. Sometimes, however, the term is used more precisely either for a sudden, abrupt shift from one tonality to another unrelated to it, or for a modulation without change of mode. The latter is the technical usage of the tonic sol-faists.

4. In *geol.*, the English form of the name (used attributively or as an adjective) given by Werner to certain strata which he investigated in northern Germany, and found to have, to a certain extent, the mineral character of the so-called primitive rocks, while also exhibiting indications of a mechanical origin, and even containing occasional fossils, thus indicating a transition or passage from primary to secondary. The name was afterward extended so as to embrace rocks of similar character in other regions. The argillaceous sandstone called by the Germans *grauwacke* (see *graywacke*) formed a part of the transition formation, and it was the rocks previously called *grauwacke* and *transition limestone* which Murchison studied in England and Wales, and to which, having worked out their order of succession, he gave the name of *Silurian*. See *Silurian*.

5. In *art hist.*, an epoch or stage of change from one style or state of development in art to the next succeeding; especially, in Greek art, the stage of change from the archaic to the bloom of art, and in medieval art, that from the round-arched or Romanesque to the Pointed style.—**Transition resistance.** See *resistance*.—**Transition-tint.** See *specific rotatory power*, under *rotatory*.—**Transition tumor**, a tumor which, upon recurring after removal, tends to assume a malignant form. ★

transitional (trăn-sish′on-al or -sizh′on-al), *a.* [< *transition* + *-al*.] **1.** Of or pertaining to transition; containing, involving, or denoting transition; changing; passing: as, the *transitional* stages of a tadpole; the *transitional* plumage of a molting bird. [The word may have a strong sense, like *metamorphic* or *transmutational* (see def. 2), but is usually much weaker, and more nearly synonymous with *transitory* or *transient*.]

One of the commonest *transitional* rocks deserves in several respects a further description.
Darwin, Geol. Observations, i. 66.

At Parenzo, the real charm is to be found in the traces which it keeps of the great *transitional* ages when Roman and Teuton stood side by side.
E. A. Freeman, Venice, p. 100.

Every period, however original and creative, has a *transitional* aspect in its relation to the years before and after. *Stedman*, Vict. Poets, p. 14.

2. In *biol.*, of intermediate or intergraded character between two or more species, genera, etc., and thus, as it were, exhibiting or illustrating a transition from one to another form of organic life; transmutational: as, a *transitional* specimen; also, pertaining to or effecting such transmutation: as, a *transitional* theory; a *transitional* process.—**3.** Specifically, in *art*, relating to, characterizing, or belonging to an epoch or stage of change from one style or state of development to the next succeeding, and especially to that between archaism and full development in Greek art, and to that between the Romanesque and the Pointed in medieval art.—**Transitional epithelium.** See *epithelium*.

transitionally (trăn-sish′on-al-i or -sizh′on-al-i), *adv.* In a transitional manner. *Nature*, XLI. 514.

transitionary (trăn-sish'ọn-ā-ri), *a.* [< *transition* + *-ary.*] Same as *transitional.* *Imp. Dict.*

transitive (trăn'si-tiv), *a.* and *n.* [< F. *transitif* = Pr. *transitiu* = Sp. Pg. It. *transitivo* = D. *transitief* = G. Sw. Dan. *transitiv*, < LL. *transitivus*, transitive, passing over (applied to verbs), < L. *transire*, pass or go over: see *transit.*]

I. *a.* 1. Having the power of passing, or making transition; passing over into something.

Cold is active and *transitive* into bodies adjacent, as well as heat. *Bacon*, Nat. Hist., § 70.

Acts may be called *transitive* when the motion is communicated from the person of the agent to some foreign body: that is, to such a foreign body on which the effects of it are considered as being material, as where a man runs against you, or throws water in your face.
Bentham, Introd. to Morals and Legislation, vii. 13.

2. Effected by, or existing as the result of, transference or extension of signification; derivative; secondary; metaphorical. [Rare.]

Although by far the greater part of the *transitive* or derivative applications of words depend on casual and unaccountable caprices of the feelings or the fancy, there are certain cases in which they open a very interesting field of philosophical speculation. *D. Stewart.*

3. In *gram.*, taking a direct object; followed by a substantive in an accusative relation: said of a verb, or of the action expressed by a verb. *Transitive* is opposed to *intransitive;* but the distinction, though practically valuable, is only of minor importance, since no transitive verb is in English incapable of intransitive use, and also many intransitives can be used transitively, and verbs that are transitive in one language are the opposite in another, and so on. Abbreviated *t.* and *trans.*

4. Serving as a medium or means of transition. [Rare.]

An image that is understood to be an image can never be made an idol; or, if it can, it must be by having the worship of God passed through it to God; it must be by being the analogical, the improper, the *transitive*, the relative (or what shall I call it) object of Divine worship.
Jer. Taylor, Rule of Conscience, II. ii. 6.

Transitive copula, a copula which signifies a transitive relation.—**Transitive function**, a function which admits a system of transitive substitutions.—**Transitive group.** See *group*[1].—**Transitive relation.** See *relation*, 3.

II. *n.* A transitive verb.

transitively (trăn'si-tiv-li), *adv.* In a transitive manner.

transitiveness (trăn'si-tiv-nes), *n.* The state or character of being transitive.

transitivity (trăn-si-tiv'i-ti), *n.* The character of being transitive, as a group.

transitorily (trăn'si-tō-ri-li), *adv.* In a transitory manner; for a little while.

I make account to be in London, *transitorily*, about the end of August. *Donne*, Letters, xliii.

transitoriness (trăn'si-tō-ri-nes), *n.* The state of being transitory; short continuance; evanescence; transientness.

The worldly man is at home in respect of his affections; but he is, and shall be, a meer sojourner in respect of his *transitoriness*. *Bp. Hall*, Remains, p. 202. (*Latham.*)

We . . . are reminded of the *transitoriness* of life by the mortuary tablets under our feet.
Lowell, Among my Books, 2d ser., p. 173.

transitorious† (trăn-si-tō'ri-us), *a.* [< L. *transitorius*, transitory: see *transitory.*] Transitory.

Saynt Eanswyde, abbesse of Folkstane in Kent, inspyred of the deuyll, dyffyned christen marryage to be barren of all vertues, to haue but *transytoryouse* frutes, and to be a fylthye corruptyon of virginitie.
Bp. Bale, Eng. Votaries, i.

transitory (trăn'si-tō-ri), *a.* [< ME. *transitorie*, < OF. **transitorie*, *transitoire* = F. *transitoire* = Pr. *transitori* = Sp. *transitorio* = It. *transitorio*, < L. *transitorius*, having a passageway, LL. passing, transitory, < *transire*, pass over: see *transit.*] 1. Passing without continuing; lasting only a short time; unstable and fleeting; speedily vanishing.

For the Ricchesse of this World, that is *transitorie*, is not worthe. *Mandeville*, Travels, p. 294.

Considering the chances of a *transitory* life, I would not answer for thee a moment.
Sterne, Tristram Shandy, vii. 19.

2†. Occurring or done in passing; cursory. [Rare.]

That adventure . . . gave him also a *transitory* view of that excellent Lady whom the supreme Moderator of all things had reserved for him.
H. L'Estrange, Reign of K. Charles (ed. 1655), p. 3.

Chose transitory. See *chose*[2].—**Transitory action**, in *law*, an action which may be brought in any county, as actions for debt, detinue, or slander: distinguished from *local actions*, which must be brought in the place where the property to be affected is, or where the transaction in question occurred, etc.—**Transitory venue.** See *venue*[1].

=Syn. 1. *Fleeting*, etc. (see *transient*), temporary, evanescent, ephemeral, momentary, short-lived.

transit-trade (trăn'sit-trād), *n.* In *com.*, the trade which arises from the passage of goods through one country or region to another.

transjordanic (trăns-jôr-dan'ik), *a.* [< L. *trans*, across, + *Jordanus*, Jordan.] Situated across or beyond the Jordan. [Rare.]

Abalaa. The Egyptian name of a *transjordanic* town.
Cooper, Archaic Dict., p. 8.

translatable (trăns-lā'tạ-bl), *a.* [< *translate* + *-able.*] Capable of being translated, or rendered into another language; that may be expressed in other words or terms.

What is really best in any book is *translatable*—any real insight or broad human sentiment. *Emerson*, Books.

translatableness (trăns-lā'tạ-bl-nes), *n.* The character of being translatable. *Athenæum*, ★March 4, 1882, p. 278.

translate (trăns-lāt'), *v.*; pret. and pp. *translated*, ppr. *translating.* [< ME. *translaten*, < OF. (obs.) *translater* = Pr. *translatar* = Sp. *trasladar* = It. *translatare*, < ML. *translatare*, transfer, translate, < L. *translatus*, pp. of *transferre*, bring over, carry over, transfer: see *transfer.* Cf. *tralation.*]

I. *trans.* 1. To bear, carry, or remove from one place to another; transfer; specifically, in *mech.*, to impart to (a particle or body) a motion in which all its parts move in the same direction.

By turning, *translating*, and removing the [land] marks into other places they may destroy their enemies navies, be they never so many.
Sir T. More, Utopia (tr. by Robinson), ii. 1.

The weeping Niobe, *translated* hither
From Phrygian mountains.
B. Jonson, Cynthia's Revels, i. 1.

After dinner you may appear again, having *translated* yourself out of your English cloth cloak into a light Turkey grogram. *Dekker*, Gull's Hornbook, p. 97.

Now let the two parts while superposed be *translated* to any other position, then the piece B may be slid off and back to its original position. *Encyc. Brit.*, XV. 660.

2. To transfer from one office or charge to another. In *eccles. law:* (*a*) To remove from one see to another: said of a bishop.

At home, at this time, died John Peers, Archbishop of York, in whose place succeeded Matthew Hatton, *translated* from the See of Durham. *Baker*, Chronicles, p. 381.

(*b*) In Scottish Presbyterian churches, to transfer from one pastoral charge to another: said of a clergyman.

3. To remove or convey to heaven without death.

By faith Enoch was *translated* that he should not see death. Heb. xi. 5.

4†. To put into an ecstasy; ravish; put out of or beside one's self.

He [St. Paul] was *translated* out of himself to behold it [Heaven]; but being returned into himself could not express it. *Sir T. Browne*, Religio Medici, i. 49.

5†. To cause to remove from one part of the body to another: as, to *translate* a disease.—

6. To change into another form; transform.

Unnethe the peple hir knew for hir fairnesse,
Whan she *translated* was in swich richesse.
Chaucer, Clerk's Tale, l. 329.

Re-enter Puck, and Bottom with an ass's head. . . .
Quince. Bless thee, Bottom! bless thee! thou art *translated.* *Shak.*, M. N. D., iii. 1. 122.

Poets that can men into stars *translate*,
And hurle men downe under the feete of Fate.
Brome, Sparagus Garden, iii. 5.

7. To render into another language; express the sense of (something expressed in the words of one language) in the words of another language; interpret.

And ȝee schulle undirstonde, that I have put this boke out of Latyn into Frensche, and *translated* it ayen out of Frensche into Englyssche, that every man of my nacioun may undirstonde it. *Mandeville*, Travels, p. xi.

Neither of the rivals [Pope and Tickell] can be said to have *translated* the "Iliad," unless, indeed, the word translation be used in the sense which it bears in the "Midsummer Night's Dream." *Macaulay*, Addison.

8. To explain by using other words; express in other terms; hence, figuratively, to present in another form.

Translating into his own clear, pure, and flowing language what he found in books well known to the world, but too bulky or too dry for boys and girls.
Macaulay, Oliver Goldsmith.

There is a magnificent series of stalls, which are simply the intricate embroidery of the tombs *translated* into polished oak. *H. James, Jr.*, Little Tour, p. 247.

9. To make clear or evident to the mind or to the senses without speech; convey to the mind or the senses, as by experience.—10. To manufacture from old material; especially, in cheap shoemaking, to make (shoes or boots) by using parts of old ones. [Slang.]

Among these things are blankets, . . . *translated* boots, mended trowsers.
Mayhew, London Labour and London Poor, II. 110.

11. In *teleg.*, to retransmit (a message). See *translation*, 7.—Syn. 7 and 8. *Render, Interpret, Translate, Construe. Render* is the most general in its meaning, but is usually followed by *into:* as, to *render* Gray's "Elegy" *into* Latin verse; to *render* a learned discourse *into* vernacular. *Interpret*, like *render*, does not necessarily mean to change to another language, but it does mean, as *render* need not, to change to intelligible form, generally by following the text closely: as, to *interpret* an inscription; to *interpret* an address by a foreigner. *Translate* is literally to turn from one language to another, which is presumably one's own, unless another is mentioned, but the word has, figuratively, the meaning of *interpret.* To *construe* is to *translate* or to *interpret*, generally by following along word by word or clause by clause; hence the word is very often used of the work of a beginner: as, the painful *construing* of a sentence of Cæsar's "Commentaries." In its figurative use it retains much of this meaning: as, I cannot *construe* his language in any other way. See *explain.*

II. *intrans.* 1. To be engaged in translating, or practise translation.

All these my modest merit bade *translate*,
And own'd that nine such poets made a Tate.
Pope, Prol. to Satires, l. 189.

2. In *teleg.*, to retransmit a message automatically over another line, or over a continuation of the same line.

translating-screw (trăns-lā'ting-skrö), *n.* A screw used to move any part of a machine or apparatus relatively to another part or parts, either as a part of some general action of the machine or for purposes of adjustment; specifically, in breech-loading ordnance, a screw for ★moving in or out the wedge in the fermeture.

translation (trăns-lā'shọn), *n.* [< ME. *translation, translacion*, < OF. (and F.) *translation* = Pr. *translatio* = Sp. *translación, traslación* = Pg. *translação* = It. *translazione, traslazione*, < L. *translatio(n-)*, transference, transplanting, version, transferring, translation, < *translatus*, pp. of *transferre*, transfer, translate: see *translate, transfer.*] 1. The act of translating. (*a*) The removing or conveying of a thing from one place to another; transportation; removal.

Made and done was the *translacion* [to Paris] . . .
Off hed and of the glorious body [of St. Louis].
Rom. of Partenay (E. E. T. S.), l. 6206.

The solemn *translation* of St. Elphege's body from London to Canterbury is taken especial notice of in the Saxon Chronicle under the year 1023.
Rock, Church of our Fathers, III. i. 352, note.

(*b*) The removal of a person from one office to another, or from one sphere of duty to another; specifically, the removal of a bishop from one see to another; in Scotland, the removal of a clergyman from one pastoral charge to another.

Does it follow that a law for keeping judges independent of the crown by preventing their *translation* is absolutely superfluous? *Brougham.*

We can quite understand . . . Richard I. meditating the *translation* of the Archbishop of Monreale to Canterbury. *Stubbs*, Medieval and Modern Hist., p. 134.

(*c*) The removal of a person to heaven without death.

Time, experience, self-reflections, and God's mercies make in some well-tempered minds a kind of *translation* before death. *Sir T. Browne*, Christ. Mor., ii. 6.

(*d*) The act of turning into another language; interpretation.

The chiefest of his [King Athelstan's] Works for the Service of God and Good of his Subjects was the *Translation* of the Bible into the Saxon Tongue.
Baker, Chronicles, p. 10.

At best, the *translation* of poetry is but an imitation of natural flowers in cambric or wax.
Lowell, Study Windows, p. 324.

2. That which is produced by turning into another language; a version; the reproduction of a literary composition in a language foreign to that of the original.

The English *Translation* of the Bible is the best *Translation* in the World. *Selden*, Table-Talk, p. 20.

3†. In *rhet.*, transference of the meaning of a word or phrase; metaphor.

Metaphors, far-fet, hinder to be understood; and, affected, lose their grace. Or when the person fetcheth his *translations* from a wrong place. *B. Jonson.*

4. In *med.*, a change in the seat of a disease; metastasis.

His disease was an asthma; the cause a metastasis or *translation* of humours from his joints to his lungs.
Harvey.

5. The process of manufacturing from old material. [Slang.]

Translation, as I understand it (said my informant), is this—to take a worn old pair of shoes or boots, and by repairing them make them appear as if left off with hardly any wear, as if they were only soiled.
Mayhew, London Labour and London Poor, II. 40.

6. In *mech.*, motion in which there is no rotation; rotation round an infinitely distant axis.

A change of place in which there is no rotation is called a *translation.* In a rotation the different parts of the body are moving in different ways, but in a *translation* all parts move in the same way. *W. K. Clifford*, Lectures, II. 12.

7. In *teleg.*, the automatic retransmission of a message received on one line over another, or over a continuation of the same line. This is used on long lines to increase speed of working, and also at receiving-stations, and the translation is made from the line-circuit to a local circuit containing a local battery and the

receiving-instrument, the object being to obtain a strong current to work the sounder or recorder.—**Energy of translation, equation of translation, principle of translation, surface of translation.** See *energy*, etc. —**Translation of a feast,** the postponement to some future day of the observance of a feast, when the day of its ordinary observance falls upon a festival of superior rank.=**Syn. 1.** (*d*) *Translation, Version*, rendering. *Translation* and *version* are often the same in meaning. *Translation* is rather the standard word. *Version* is more likely to be employed in proportion to the antiquity of the work: as, the Syriac *version;* Dryden's *version* of the Nun's Priest's Tale; it is also more commonly used of the Bible than of other books: as, a comparison of the authorized with the revised *version*. Where *translations* differ, they are often spoken of as *versions*, as Lord Derby's and Mr. Bryant's *translations* or *versions* of Homer. *Version* applies more to the meaning, *translation* more to the style. Each has meanings not shared by the other.

translational (tråns-lā′shọn-ạl), *a.* [< *translation* + *-al.*] Pertaining to or having the character of translation. See *translation*, 6.

The whole *translational* energy . . . must ultimately become transformed . . . into vibrational energy.
Philos. Mag., 5th ser., XXX. clxxxii. 95.

translatitious† (tråns-lā-tish′us), *a.* [< L. *translaticius, translatitius*, handed down, transmitted, hereditary, < *translatus*, pp. of *transferre*, transfer, translate: see *translate*. Cf. *tralatitious.*] **1.** Transmitted; transferred; hereditary.

I have frequently doubted whether it be a pure indigene, or *translatitious.* *Evelyn*, Sylva, I. iv. § 8.

2. Same as *tralatitious.*

A delegated *translatitious* Majesty we allow.
Milton, Answer to Salmasius, vii. 179.

translative (tråns′lā-tiv), *a.* [= Sp. *translativo, traslativo* = It. *traslativo;* as *translate* + *-ive.*] Relating or pertaining to translation; especially, involving transference of meaning; metaphorical. [Rare.]

If our feete Poeticall want these qualities, it can not be sayd a foote in sence *translatiue* as here.
Puttenham, Arte of Eng. Poesie, p. 56.

translator (tråns-lā′tọr), *n.* [= F. *translateur* = It. *traslatore* (cf. Sp. Pg. *trasladador* = It. *traslatatore*), < L. *translator*, one who transfers or interprets, < *translatus*, pp. of *transferre*, transfer, translate: see *translate.*] One who or that which translates.

The changer and *translator* of kyngedoms and tymes.
Joye, Expos. of Daniel, v.

Specifically—(*a*) One who renders something spoken or written in one language into another: as, he held the office of public *translator.*

A noble author would not be pursued too close by a *translator.* We lose his spirit when we think to take his body. *Dryden*, Orig. and Prog. of Satire.

(*b*) A cobbler of a low class, who manufactures boots and shoes from the material of old ones, selling them at a low price to second-hand dealers. [Slang.]

The cobbler is affronted if you don't call him Mr. *Translator.* *Tom Brown*, Works, III. 73. (*Davies.*)

(*c*) *pl.* Second-hand boots mended and sold at a low price. [Slang.]

A costermonger . . . will part with everything rather than his boots, and to wear a pair of second-hand ones, or *translators* (as they are called), is felt as a bitter degradation by them all.
Mayhew, London Labour and London Poor, I. 51.

(*d*) In *teleg.*, a sensitive receiving-instrument used for retransmitting a message, or for translation: commonly called a *relay.* (*e*) Any instrument for converting one form of energy into another: thus, the magneto-electric engine which transforms the power of a steam-engine into electricity is a *translator.*

translatory (tråns′lā-tọ-ri), *a.* [< *translate* + *-ory.*] **1.** Transferring; serving to translate.

The *translatory* is a lie that transfers the merits of a man's good action to another more deserving. *Arbuthnot.*

2. Same as *translational.*

The *translatory* velocity of the whirlwind itself.
The Atlantic, XLIX. 331.

translatress (tråns-lā′tres), *n.* [< *translator* + *-ess.*] A woman who translates, in any sense of that word.

Your great Achilles, Cardinal Perron (in French; as also his noble *Translatress*, misled by him, in English), . . . hath made bold with the Latin tongue.
Chillingworth, Religion of Protestants, I. vi. § 29.

translavation† (tråns-lā-vā′shọn), *n.* [< L. *trans*, over, + *lavatio(n-)*, a washing: see *lave*[1].] A laving or lading from one vessel into another.

transliterate (tråns-lit′ẹ-rāt), *v. t.*; pret. and pp. *transliterated*, ppr. *transliterating.* [< L. *trans*, over, + *litera*, letter: see *letter*[3], *literate.*] To express or write, as words of a language having peculiar alphabetic characters, in the alphabetic characters of another language; spell (the same, or approximately the same, sound) in different characters.

Greek names *transliterated* into a Latin alphabet are subject to the laws of Latin phonology.
Isaac Taylor, The Alphabet, I., Pref., p. ix.

transliteration (tråns-lit-ẹ-rā′shọn), *n.* [< *transliterate* + *-ion.*] The act of transliterating; the rendering of a letter or letters of one alphabet by equivalents in another.

The *transliteration* does not profess to give all the exact vocalic differences. *The Academy*, June 28, 1890, p. 448.

transliterator (tråns-lit′ẹ-rā-tọr), *n.* [< *transliterate* + *-or*[1].] One who transliterates; one who makes a transliteration.

It seems to have been the object of the *transliterator* to represent, at least approximately, in Anglo-Saxon letters the current pronunciation of the Greek words.
J. Hadley, Essays, p. 128.

translocalization (tråns-lō″kạl-i-zā′shọn), *n.* [< *trans-* + *localization.*] Same as *translocation.*

Patients often unfold a train of reminiscence extempore upon any theme, and sometimes cannot repeat the same pseudo-experience twice alike, *translocalizations* in time being especially common. *Amer. Jour. Psychol.*, I. 538.

translocate (tråns-lō′kāt), *v. t.*; pret. and pp. *translocated*, ppr. *translocating.* [< L. *trans*, over, + *locatus*, pp. of *locare*, place: see *locate.*] To cause to change place, or to exchange places; put in a different relative position; displace; dislocate.

In the Batrachians the ribs have been *translocated* from the original position on the intercentrum to the neurapophyses. *Amer. Nat.*, XXI. 944.

translocation (tråns-lọ-kā′shọn), *n.* [< *trans-* + *location.*] The act of translocating, or the state of being translocated. Also *translocalization.*

The *translocation* of the souls of beasts into such matter as is most fitting for them.
Dr. H. More, Immortal. of Soul, iii. 13.

transluce† (tråns-lūs′), *v. t.* [< L. *translucere*, shine across or through: see *translucent.*] To shine through.

Let Joy *transluce* thy Beauties' blandishment.
Davies, Holy Roode, p. 26. (*Davies.*)

translucence (tråns-lū′sẹns), *n.* [< *translucen(t)* + *-ce.*] Same as *translucency.*

translucency (tråns-lū′sẹn-si), *n.* [As *translucence* (see *-cy*).] The property of being translucent.

The spheres
That spight thy crystalline *translucencie.*
Davies, Witte's Pilgrimage, sig. C iv. b. (*Latham.*)

translucent (tråns-lū′sẹnt), *a.* [< L. *translucen(t-)s*, ppr. of *translucere*, shine across or through, < *trans*, over, + *lucere*, shine: see *lucent.* Cf. *tralucent.*] **1.** Transmitting rays of light diffusely, as alabaster.

The subtle essence acted on him like a charmed draught, and caused the opaque substance of his animal being to grow transparent, or at least *translucent;* so that a spiritual gleam was transmitted through it with a clearer lustre than hitherto. *Hawthorne*, Seven Gables, vii.

2. Transparent; clear.

The golden ew'r a maid obsequious brings,
Replenish'd from the cool, *translucent* springs.
Pope, Odyssey, i. 180.

translucently (tråns lū′sẹnt-li), *adv.* In a translucent manner. *Drayton*, Edward IV. to Mistress Shore, Annotation 3.

translucid (tråns-lū′sid), *a.* [= F. *translucide* = Sp. *traslúcido* = Pg. *translucido* = It. *translucido, traslucido*, < L. *translucidus, traslucidus*, shining through, < *translucere*, shine through: see *translucent.* Cf. *lucid.*] Translucent.

Flowers whose purple and *translucid* bowls
Stand ever mantling with aërial dew.
Shelley, Prometheus Unbound, iii. 3.

translunar (tråns-lū′nạr), *a.* [< L. *trans*, across, + *luna*, moon: see *lunar.*] Being beyond the moon: opposed to *sublunary.* *Drayton*, To Henry Reynolds.

translunary (tråns′lū-nạ-ri), *a.* Same as *translunar.*

transmarine (tråns-mạ-rēn′), *a.* [< F. *transmarin* = Pg. *transmarino* = Sp. It. *transmarino, trasmarino*, < L. *transmarinus*, beyond or from beyond sea, < *trans*, over, + *mare*, sea, *marinus*, of the sea, marine: see *marine.*] Located or existing beyond the sea.

Their Dutch appellations are really too hard
To be brought into verse by a *transmarine* Bard.
Barham, Ingoldsby Legends, II. 19.

transmeable (tråns′mē-ạ-bl), *a.* [< L. *transmeare, trameare*, go over or through (see *transmeate*), + *-able.*] Capable of being transmeated or traversed. *Bailey*, 1727. [Rare.]

transmeate (tråns′mē-āt), *v. t.*; pret. and pp. *transmeated*, ppr. *transmeating.* [< L. *transmeatus, trameatus*, pp. of *transmeare, trameare*, go over or through, < *trans*, over, + *meare*, go, pass: see *meatus.* Cf. *permeate.*] To pass over or beyond. *Coles.* [Rare.]

transmeation (tråns-mē-ā′shọn), *n.* [< *transmeate* + *-ion.*] The act of transmeating, or passing through. *Bailey*, 1731. [Rare.]

transmedian (tråns-mē′di-ạn), *a.* and *n.* [< *trans-* + *median.*] **I.** *a.* Passing or lying across the median line of the body, as a muscle. Also *mediotransverse.*

II. *n.* The transmedian muscle of a brachiopod. *T. Davidson*, Encyc. Brit., IV. 193.

transmeridional (tråns-mẹ-rid′i-ọ-nạl), *a.* [< *trans-* + *meridian* + *-al* (see *meridional*).] Crossing a meridian; forming an angle with a meridian.

How the Mediterranean and Indian Ocean shores came to have general *transmeridional* trends is a question which must find its solution in the events of Mesozoic and Cænozoic geological history.
Winchell, World-Life, p. 355.

transmew† (tråns-mū′), *v. t.* [Also *transmue;* < ME. *transmewen, transmuen, transmuwen*, < OF. *transmuer* = Pr. *transmudar, trasmudar* = Sp. *transmutar, trasmutar* = Pg. *transmudar* = It. *transmutare, trasmutare*, < L. *transmutare*, change into another form: see *transmute.* Cf. *mew*[3].] To transmute; transform; metamorphose.

Thow moost me ferst *transmuwen* in a stoon.
Chaucer, Troilus, iv. 467.

Men into stones therewith he could *transmew.*
Spenser, F. Q., I. vii. 35.

To *transmew* thyself from a holy hermit into a sinful forester. *Scott*, Ivanhoe, xx.

transmigrant (tråns′mi-grạnt), *a.* and *n.* [< L. *transmigran(t-)s*, ppr. of *transmigrare*, transmigrate: see *transmigrate.*] **I.** *a.* Passing into another country or state for residence, or into another form or body; migrating. *Imp. Dict.*

II. *n.* **1.** One who migrates or leaves his own country and passes into another for settlement; a colonist.

There are other . . . implicit confederations. That of colonies, or *transmigrants*, towards their mother nation.
Bacon, Holy War.

2. One who passes into another state or body. *Imp. Dict.*

transmigrate (tråns′mi-grāt), *v.*; pret. and pp. *transmigrated*, ppr. *transmigrating.* [< L. *transmigratus*, pp. of *transmigrare* (> It. *trasmigrare* = Sp. *transmigrar, trasmigrar* = F. *transmigrer*), remove from one place to another, < *trans*, over, + *migrare*, depart, migrate: see *migrate.* Cf. *emigrate, immigrate.*] **I.** *intrans.* **1.** To migrate; pass from one country or jurisdiction to another for the purpose of residing in it.

This complexion . . . is evidently maintained by generation, . . . so that strangers contract it not, and the natives which *transmigrate* amit it, not without commixture.
Sir T. Browne, Vulg. Err., vi. 10.

2. To pass from one body into another; be transformed; specifically, to become incarnate in a different body; metempsychosize.

It [the crocodile] lives by that which nourisheth it; and, the elements once out of it, it *transmigrates.*
Shak., A. and C., ii. 7. 51.

Rabbi Benjamin of Tudela records in the 12th century of the Druses of Mount Hermon: "They say that the soul of a virtuous man is transferred to the body of a new-born child, whereas that of the vicious *transmigrates* into a dog, or some other animal."
E. B. Tylor, Prim. Culture, II. 13.

II. *trans.* To cause to pass or migrate from one region or state of existence to another.

Excellent Spirits are not by Death extinguished or neglected, but are rather *transmigrated* from the earth, to reigne with the Powers aboue.
Heywood, Hierarchy of Angels, p. 463.

transmigration (tråns-mi-grā′shọn), *n.* [< ME. *transmigracioun*, < OF. (and F.) *transmigration* = Sp. *transmigración, trasmigración* = Pg. *transmigração* = It. *trasmigrazione*, < LL. *transmigratio(n-)*, < L. *transmigrare*, transmigrate: see *transmigrate.*] The act of transmigrating; passage from one place, state, or form into another.

Lately hath this peerlesse man [Isaac Casabonus] made a happy *transmigration* out of France into our renowned island of great Britaine. *Coryat*, Crudities, I. 43.

What see I on any side but the *transmigrations* of Proteus? *Emerson*, History.

Specifically—(*a*) In *physiol.*, the passage of cells through a membrane or the wall of a vessel: as, the *transmigration*

of the white blood-corpuscles from the capillaries into the surrounding tissues in commencing inflammation. (*b*) The supposed passing of the soul into another body after death; metempsychosis; reincarnation.

> In life's next scene, if *transmigration* be,
> Some bear or lion is reserv'd for thee.
> *Dryden*, Aurengzebe, iii. 1.

The theory of the *Transmigration* of Souls, which has indeed risen from its lower stages to establish itself among the huge religious communities of Asia, great in history, enormous even in present mass, yet arrested and as it seems henceforth unprogressive in development; but the more highly educated world has rejected the ancient belief, and it now only survives in Europe in dwindling remnants. *E. B. Tylor*, Prim. Culture, II. 2.

transmigrationism (tråns-mi-grā′shọn-izm), *n.* [< *transmigration* + *-ism*.] The theory or doctrine of metempsychosis. *Fortnightly Rev.*, N. S., XLIII. 103.

transmigrator (tråns′mi-grā-tọr), *n.* [< *transmigrate* + *-or*[1].] One who transmigrates.

transmigratory (tråns-mī′grā-tọ-ri), *a.* [< *transmigrate* + *-ory*.] Passing from one place, body, or state to another.

transmisst, *v. t.* [< L. *transmissus*, pp. of *transmittere*, transmit: see *transmit*.] To transmit.

> *Bag.* Any reversions yet? nothing *transmiss'd*?
> *Rime.* No gleanings, James? no trencher analects?
> *W. Cartwright*, The Ordinary (1651). (*Nares.*)

★ **transmissibility** (tråns-mis-i-bil′i-ti), *n.* [< *transmissible* + *-ity* (see *-bility*).] The character of being transmissible.

> Lately the *transmissibility* of acquired mental faculties has come to be an acknowledged fact.
> *E. Montgomery*, Mind, IX. 370.

transmissible (tråns-mis′i-bl), *a.* [= OF. *transmissible* = Pg. *transmissivel*, < L. as if **transmissibilis*, < *transmittere*, pp. *transmissus*, transmit (see *transmit*), + *-ible*.] Capable of being transmitted, in any sense.

> Wisely discarding those establishments which have connected with hereditary possessions in the soil, and *transmissible* dignities in the state. *Everett*, Orations, I. 216.

★ **transmission** (tråns-mish′ọn), *n.* [= F. *transmission* = Sp. *transmisión*, *trasmisión* = Pg. *transmissão* = It. *trasmissione*, < L. *transmissio*(*n-*), a sending over, passage, < *transmittere*, send over, transmit: see *transmit*.] 1. The act of transmitting, or the state of being transmitted; transmittal; transference.

> Although an author's style may lose somewhat by *transmission*, it loses little in prose if it is good for anything; not so in poetry.
> *Landor*, Imag. Conv., Alfieri and Metastasio.

2. In *biol.*, specifically, same as *inheritance*.

> An organism, as a rule, inherits — that is to say, is born with — the peculiarities of its parents; this is known as *Transmission*. *E. R. Lankester*, Degeneration, p. 13.

3. In *physics*, a passing through, as of light through glass or other transparent body, or of radiant heat through a diathermanous body.

> Each transparent substance has its own rate of *transmission* for ether-waves of each particular frequency.
> *A. Daniell*, Prin. of Physics, p. 459.

★ **transmissive** (tråns-mis′iv), *a.* [< L. *transmittere*, pp. *transmissus*, transmit (see *transmit*), + *-ive*.] Obtained by transmission or inheritance; transmitted; derived.

> His praise, eternal on the faithful stone,
> Had with *transmissive* honour grac'd his Son.
> *Fenton*, in Pope's Odyssey, i. 308.

transmit (tråns-mit′), *v. t.*; pret. and pp. *transmitted*, ppr. *transmitting*. [= F. *transmettre* = Sp. *transmitir*, *trasmitir* = Pg. *transmittir* = It. *trasmettere*, < L. *transmittere*, *tramittere*, cause to go across, send over, despatch, transmit, < *trans*, over, + *mittere*, send: see *mission*.] 1. To send over, onward, or along; hand along or down; transfer; communicate: as, to *transmit* a letter or a memorial; to *transmit* despatches.

> Whatever they learn and know is *transmitted* from one to another. *Bacon*, Fable of Perseus.
>
> To solicite this Peace, Peter Reuben the famous rich Painter of Antwerp . . . as Agent was *transmitted* hither. *H. L'Estrange*, Reign of K. Charles (ed. 1655), p. 106.
>
> Resolving to *transmit* to posterity not only their names and blood, but their principles also.
> *D. Webster*, Speech, Concord, Sept. 30, 1834.

2. To suffer to pass through; conduct.

> A love which pure from soul to soul might pass,
> As light *transmitted* through a crystal glass.
> *Dryden*, Tyrannic Love, v. 1.
>
> The shell of sense, growing daily thinner and more transparent, *transmitted* the tremor of his quickened spirit. *H. James, Jr.*, Passionate Pilgrim, p. 107.

Bevel-gear transmitting dynamometer. Same as *balance-dynamometer*.

transmittable (tråns-mit′a-bl), *a.* [< *transmit* + *-able*.] Transmissible.

transmittal (tråns-mit′al), *n.* [< *transmit* + *-al*.] Transmission.

> The *transmittal* to England of two-thirds of the revenues of Ireland. *Swift.*

Letter of transmittal, a written official communication from one person to another, notifying or advising the recipient that other documents, which usually accompany the letter, are sent or otherwise made over to him by the writer. The phrase is official or technical in various departments of the United States government.

transmittance (tråns-mit′ans), *n.* [< *transmit* + *-ance*.] The act of transmitting, or the state ★of being transmitted; transmission; transfer.

transmitter (tråns-mit′ėr), *n.* [< *transmit* + *-er*[1].] One who or that which transmits.

> The one *transmitter* of their ancient name,
> Their child. *Tennyson*, Aylmer's Field.

Specifically — (*a*) In *teleg.*, the sending or despatching instrument, especially that under the automatic system, in which a paper strip with perforations representing the Morse or a similar alphabet is passed rapidly through an instrument called an *automatic transmitter*, in which contacts are made by metallic points wherever a perforation occurs, and are prevented where the paper is unpierced. *E. H. Knight.* (*b*) In *telephony*, the microphonic or other apparatus, together with the funnel for receiving the voice and converging the waves of sound upon the thin iron diaphragm. See *telephone*.

transmittible (tråns-mit′i-bl), *a.* [< *transmit* + *-ible*.] 1. Transmissible. — 2†. Capable of being put or projected across.

> A *transmittible* gallery over any ditch or breach in a town-wall.
> *Marquis of Worcester*, Century of Inventions, § 73. [(*Latham.*)

transmogrification (tråns-mog″ri-fi-kā′shọn), *n.* [< *transmogrify* + *-ation*.] The act of transmogrifying, or the state of being transmogrified. [Humorous and contemptuous.]

> But of all restorations, reparations, and *transmogrifications*, that inflicted upon the "Cnidian Venus" [an undraped statue, which has been partially draped in painted tin] of the Vatican is the most grotesque.
> *The Nation*, March 20, 1884, p. 250.

transmogrify (tråns-mog′ri-fī), *v. t.*; pret. and pp. *transmogrified*, ppr. *transmogrifying*. [Formerly also *transmography*; a substitute for *transform*, the termination *-mography* simulating a Gr. origin (cf. *geography*, etc.), *-mogrify* a L. origin (cf. *modify*).] To transform into some other person or thing, as by magic; convert or transform in general. [Humorous and contemptuous.]

> I begin to think . . . that some wicked enchanters have *transmographied* my Dulcinea.
> *Fielding*, Love in Several Masques, v. 4.
>
> Jonathan was for an instant paralysed by our impudence; but just as we were getting before the wind, he yawed, and let drive his whole broadside; and fearfully did it *transmogrify* us. *M. Scott*, Tom Cringle's Log, iii.

transmontane (tråns-mon-tān′), *a.* [< ME. *transmontane*, < OF. *transmontane*, < L. *transmontanus*, beyond the mountains, < *trans*, beyond, + *mon*(*t-*)*s*, mountain, *montanus*, of a mountain: see *mountain*. Cf. *tramontane*, *tramountain*. Cf. also *ultramontane*.] Across or beyond a mountain or mountains.

> In that Lond, ne in many othere bezonde that, no man may see the Sterre *transmontane*, that is clept the Sterre of the See, that is unmevable, and that is toward the Northe, that we clepen the Lode Sterre.
> *Mandeville*, Travels, p. 180.
>
> *Trans-montane* commerce. *Science*, III. 220.

transmorphism (tråns-môr′fizm), *n.* [< L. *trans*, over, + Gr. μορφή, form, + *-ism*.] The evolution of one thing from another; the transformation of one thing into another.

> The Democriteans evolve the higher from the lower by the operation of chance. Proof there is none, and we will therefore substitute for the guess of *transmorphism* the assertion of a metaschematism intentionally devised for ethical ends by the moral ruler of the world.
> *Amer. Jour. Philol.*, IX. 417.

transmovet (tråns-möv′), *v. t.* [< L. *transmovere*, remove, transfer, < *trans*, over, + *movere*, move: see *move*.] To transform.

> Next Saturne was, . . .
> That to a Centaure did him selfe *transmove*.
> *Spenser*, F. Q., III. xi. 43.

transmuet (tråns-mū′), *v. t.* See *transmew*.

transmutability (tråns-mū-ta-bil′i-ti), *n.* [< *transmutable* + *-ity* (see *-bility*).] The property of being transmutable; susceptibility of change into another nature or substance; transmutableness.

transmutable (tråns-mū′ta-bl), *a.* [< ME. *transmutable*, < OF. **transmutable* = Sp. *transmutable*, < L. as if **transmutabilis*, < *transmutare*, transmute: see *transmute*.] Capable of being transmuted, or changed into a different substance, or into something of a different form or nature.

> Oure 5 essencie is the instrument of alle vertues of thing *transmutable* if thei be putt in it, encreessynge an hundrid foold her worchingis.
> *Book of Quinte Essence* (ed. Furnivall), p. 14.

> The fluids and solids of an animal body are easily *transmutable* into one another. *Arbuthnot*, Aliments.

transmutableness (tråns-mū′ta-bl-nes), *n.* Transmutability.

> Some learned modern naturalists have conjectured at the easy *transmutableness* of water. *Boyle*, Works, III. 69.

transmutably (tråns-mū′ta-bli), *adv.* With or through transmutation; with capacity of being changed into another substance or nature

transmutant (tråns-mū′tant), *a.* In *math.*, replacing facients of a covariant by first derived functions of a contravariant, or facients of a contravariant by first derived functions of a covariant.

transmutatet (tråns′mū-tāt), *v. t.* [< L. *transmutatus*, pp. of *transmutare*, change, shift, transfer: see *transmute*.] To transmute; change.

> Here fortune her faire face first *transmutated*.
> *Vicars*, tr. of Virgil. (*Nares.*)

transmutatet (tråns′mū-tāt), *a.* [< L. *transmutatus*, pp.: see the verb.] Transmuted; changed.

> As if the fiery part of the candle were annihilated, or *transmutate*, as some philosophers imagine, when the candle goeth out, and were not fire and in action still.
> *Baxter*, Dying Thoughts.

transmutation (tråns-mū-tā′shọn), *n.* [< ME. *transmutacioun*, < OF. *transmutacion*, F. *transmutation* = Pr. *transmutacio* = Sp. *transmutación*, *trasmutación* = Pg. *transmutação* = It. *trasmutazione*, < L. *transmutatio*(*n-*), a changing, a shifting, < *transmutare*, change, transmute: see *transmute*.] 1. The act of transmuting, or the state of being transmuted; change into another substance, form, or nature.

> I seie to you truly that this is the higeste maistrie that may be in *transmutacioun* of kynde, for rigt fewe lechis now lyuynge knowe this priuytee.
> *Book of Quinte Essence* (ed. Furnivall), p. 15.
>
> Within our experimental range of knowledge there is no *transmutation* of elements, and no destruction or creation of matter. *A. Daniell*, Prin. of Physics, p. 193.

(*a*) In *alchemy*, the changing of baser metals into metals of greater value, especially into gold or silver.

> The conversion . . . as if silver should be turned to gold, or iron to copper . . . is better called, for distinction sake, *transmutation*. *Bacon*, Nat. Hist., § 338.

(*b*) In *geom.*, the change or reduction of one figure or body into another of the same area or solidity but of a different form, as of a triangle into a square; transformation. (*c*) In *biol.*, the change of one species into another by any means; transpeciation; transformism. The history of the idea or of the fact runs parallel with that of *transformism*, from an early crude or vulgar notion akin to that involved in the alchemy of metals (see above) to the modern scientific conception of transmutation as an evolutionary process, or the gradual modification of one species into another by descent with modification through many generations.

> The *transmutation* of plants one into another is "inter magnalia naturæ": for the *transmutation* of species is, in the vulgar philosophy, pronounced impossible; . . . but seeing there appear some manifest instances of it, the opinion of impossibility is to be rejected.
> *Bacon*, Nat. Hist., § 525.
>
> As a palæontologist I have from the beginning stood aloof from this new theory of *transmutation* now so widely admitted by the scientific world.
> *Agassiz*, quoted in Dawson's Nature and the Bible, [App. B, p. 241.

2. Successive change; alternation; interchange.

> This wrecched worldes *transmutacioun*,
> As wele or wo, now poure and now honour.
> *Chaucer*, Fortune, l. 1.
>
> And the constant change and *transmutation*
> Of action and of contemplation.
> *Longfellow*, Golden Legend, iii.

Transmutation glaze, a name given to certain porcelain glazes which have an iridescent changeable luster. = **Syn.** 1. See *transform*, *v. t.*

transmutationist (tråns-mū-tā′shọn-ist), *n.* [< *transmutation* + *-ist*.] One who believes in transmutation, as of metals in alchemy or of species in natural history; a transformist. See *transformism*, and *transmutation*, 1 (*a*) (*c*).

> Naturalists, being convinced by him [Darwin] as they had not been by the *transmutationists* of fifty years' earlier date, were compelled to take an entirely new view of the significance of all attempts at framing a "natural" classification. *Encyc. Brit.*, XXIV. 809.

transmutative (tråns-mū′ta-tiv), *a.* [< *transmutate* + *-ive*.] Pertaining to or characterized by transmutation.

> It is this conception which later developed into the theory of an actual *transmutative* development of lower into higher organisms. *Encyc. Brit.*, XXIV. 815.

transmute (tråns-mūt′), *v. t.*; pret. and pp. *transmuted*, ppr. *transmuting*. [< late ME. *transmuten*, < L. *transmutare*, change, transmute, < *trans*, over, + *mutare*, change: see *mute*[2], *mew*[3]. Cf. *transmew*, the earlier form.] To change from one nature, form, or substance into another; transform.

Lord, what an alchymist art thou, whose skill
Transmutes to perfect good from perfect ill!
Quarles, Emblems, iv. 4.

A state of feeling in which the reasons which had acted on her conscience seemed to be *transmuted* into mere self-regard. *George Eliot*, Mill on the Floss, vi. 13.

=**Syn.** *Metamorphose*, etc. See *transform*.

transmuted (trȧns-mū'ted), *p. a.* 1. Changed into another substance, form, or nature.—2. In *her.*, same as *counterchanged*.

transmuter (trȧns-mū'tėr), *n.* [< *transmute* + *-er*[1].] One who transmutes. *Imp. Dict.*

transmutual (trȧns-mū'tū-ȧl), *a.* [< *trans-* + *mutual*.] Reciprocal; commutual. *Coleridge. Imp. Dict.* [Rare.]

transnaturation (trȧns-nat-ū-rā'shọn), *n.* [< *transnature* + *-ation*.] The act or process of changing the nature of anything; the state of being changed in nature. [Rare.]

Save by effecting a total *transnaturation* or stagnation of the human mind, how could a language be prevented from undergoing changes? *F. Hall*, Mod. Eng., p. 280.

transnature (trȧns-nā'tūr), *v. t.* [< *trans-* + *nature*.] To transfer or transform the nature of. See the quotation under *transelement*.

trans-Neptunian (trȧns-nep-tū'ni-ȧn), *a.* [< L. *trans*, beyond, + *Neptunus*, Neptune, + *-ian*.] In *astron.*, being beyond the planet Neptune.

transnominate† (trȧns-nom'i-nāt), *v. t.* [< L. *trans*, over, + *nominatus*, pp. of *nominare*, name: see *nominate*.] To change the name of. [Rare.]

He [Domitian] also *trans-nominated* the two moneths of September and October to Germanicus and Domitian. *Heywood*, Hierarchy of Angels, p. 523.

transnormal (trȧns-nôr'mal), *a.* [< *trans-* + *normal*.] Exceeding or beyond what is normal; abnormal by excess; supernormal.

The distinctive features which already his [Euripides's] quickwitted contemporaries found mirrored in his *trans-normal* productions. *A. W. Ward*, Eng. Dram. Lit., Int., p. xxiii.

transoceanic (trȧns-ō-shē-an'ik), *a.* [< L. *trans*, beyond, + *oceanus*, ocean, + *-ic*.] 1. Located or existing beyond the ocean: as, a *transoceanic* country; of or pertaining to what is across the ocean.—2. Crossing the ocean: as, the *transoceanic* flight of a bird; relating to the crossing of the ocean: as, a *transoceanic* theory of the dispersion of human races.

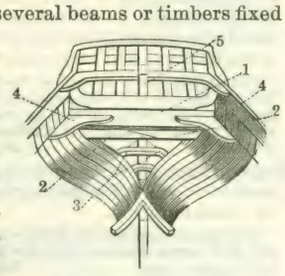
I maintain against all the world that no man knows anything about the *transoceanic* power of migration. *Edinburgh Rev.*, CXLV. 439.

★ **transom** (tran'sum), *n.* [Formerly *transome*, late ME. *traunsom*; prob., through an OF. form not found, < L. *transtrum*, a cross-bank in a vessel, a thwart, in arch. a cross-beam, a transom; appar. < *trans*, across, + suffix *-trum*. Some take it to be an accom. form of a supposed Gr. **θρανιστρον*, < *θρᾶνος*, a bench, bank.] 1. In *arch.*, a horizontal bar of timber or stone across a window; also, the cross-bar separating a door from the fanlight above it. See *mullion*.

Transtra; Seates whereon rowers sit in shippes boates, or galeis; also a *transome* goyng ouerthwarte an house. Vitruvius. *Cooper*, Thesaurus (ed. 1565).

All seemed of gold—the wall, the columns which run up to the central golden roof, and the *transoms* which connect them. *The Century*, XL. 196.

2. Same as *transom-window*, 2. [U. S.]



The dome lights and *transoms* are of rich mosaic glass, in admirable keeping with the woodwork. *The Century*, XXXVIII. 367.

3†. A slat of a bedstead.

Yᵉ *Transome* of a bed; trabula. *Levins*, Manip. Vocab. (E. E. T. S.), p. 161.

Item, to John Heyth a materas with a *traunsom*, a peire shetes, a peire blankettes, and a coverlight. *Paston Letters*, III. 288.

4. *Naut.*, one of several beams or timbers fixed across the stern-post of a ship to strengthen the after part and give it the figure most suitable to the service for which the vessel is intended. See also cut under *counter*.—5. In a saw-pit, a joist resting transversely upon the strakes.—6. One of two beams of wood or metal secured horizontally to the side frames of a railway car-truck. They are placed one on each side of the swing-bolster.—7. In *gun.*, a piece of wood or iron joining the cheeks of gun-carriages, whence the terms *transom-plates*, *transom-bolts*, etc.—8. In *surv.*, a piece of wood made to slide upon a cross-staff; the vane of a cross-staff.—**Deck-transom**, a beam or framework across the stern of a vessel, supporting the after part of the deck.

Transoms and Frame of Ship, inside of Stern.
1, main transom; 2, 2, half transoms; 3, transom; 4, 4, transom-knees; 5, stern-post.

transomed (tran'sumd), *a.* Fitted with a transom or with transoms, as a door or window. *Colonial and Indian Exhibition* (1886), p. 100.

transomer†, *n.* [Late ME., < *transom* + *-er*[2].] A transom.

Canvas in the Warderop and fyne Lynen Clothe of dyuers sortes. . . . Item, iiij *transomers*. *Paston Letters*, I. 480.

transom-knee (tran'sum-nē), *n.* In *ship-building*, a knee bolted to a transom and after-timber.

transom-window (tran'sum-win″dō), *n.* 1. A window divided by a transom.—2. A window over the transom of a door. Also called *transom*.

transpadane (trȧns-pā'dān), *a.* [< L. *transpadanus*, < *trans*, beyond, + *Padus*, Po, *Padanus*, of or pertaining to the river Po.] Situated beyond the river Po, especially with reference to Rome.—**Transpadane Republic**, a republic formed in 1796 by Napoleon Bonaparte, out of Lombardy, and modeled on that of France. In 1797 it was merged with the Cispadane Republic into the Cisalpine Republic.

Is it to the Cispadane or to the *Transpadane* republics, which have been forced to bow under the galling yoke of French liberty, that we address all these pledges of our sincerity? *Burke*, A Regicide Peace, iii.

transpalatine (trȧns-pal'ȧ-tin), *a.* and *n.* [< *trans-* + *palatine*[2].] **I.** *a.* Transverse, as a palatine bone which extends on either side from the median line.

II. *n.* The transpalatine bone of certain sauropsidan vertebrates.

transpalmar (trȧns-pal'mär), *a.* [< L. *trans*, across, + *palma*, palm: see *palm*[1], *palmar*.] Situated across the palm of the hand; lying crosswise in the palm.—**Transpalmar muscle**, the transpalmaris.

transpalmaris (trȧns-pal-mā'ris), *n.*; pl. *transpalmares* (-rēz). [NL.: see *transpalmar*.] The transpalmar muscle of the hand; the palmaris ★brevis. See *palmaris*. *Coues*, 1887.

transpanamic (trȧns-pa-nam'ik), *a.* [< *trans-* + *Panama* (see def.) + *-ic*.] Existing or located on the other side of the Isthmus of Panama from the position of the speaker. [Rare.]

The Formicariidæ . . . thin out very much in the *Transpanamic* subregion on the north. *P. L. Sclater*, Cat. Birds Brit. Mus., XV. 176.

transpare† (trans-pãr'), *v. i.* [= It. *trasparere*, *trasparire*, < ML. *transparere*, shine through, < L. *trans*, through, + *parere*, appear: see *appear*.] To appear through something else; be visible through something.

But through the yce of that vniust disdaine,
Yet still *transpares* her picture and my paine.
Stirling, Aurora, Sonnet xcix.

transparence (trans-pãr'ẹns), *n.* [Formerly also *transparance*; < F. *transparence* = Sp. *transparencia*, *trasparencia* = Pg. *transparencia* = It. *trasparenzia*, *trasparenza*, < ML. *transparentia*, < *transparen(t-)s*, transparent: see *transparent*.] Same as *transparency*.

(The casements standing wide)
Clearely through that *transparance* is espy'de
This Glutton, whom they by his habit knew.
Heywood, Hierarchy of Angels, p. 575.

But breezes played, and sunshine gleamed, . . .
Reddened the fiery hues, and shot
Transparence through the golden.
Wordsworth, Yarrow Revisited.

★ **transparency** (trȧns-pãr'en-si), *n.* [As *transparence* (see *-cy*).] 1. The property or state of being transparent; that state or property of a body by which it transmits rays of light without diffusion so that forms, colors, and brightness of objects can be seen through it; diaphaneity.

The clearness and *transparency* of the stream. *Addison*, Remarks on Italy (ed. Bohn, I. 367).

Their silver wings flashing in the pure *transparency* of the air. *Hawthorne*, Marble Faun, vi.

2. Something intended to be seen by means of transmitted light, as a picture, a sign, or other representation; often, an announcement of news, painted on canvas or other translucent material and lighted from behind; hence, by extension, a frame or construction, usually of wood and muslin, containing the lights necessary, and having one, two, or four inscriptions, or the like, on different sides.

Three *transparencies*, made in a rage for *transparencies*, for the three lower panes of one window, where Tintern Abbey held its station between a cave in Italy and a moonlight lake in Cumberland. *Jane Austen*, Mansfield Park, xvi.

3. In *photog.*, a positive picture on glass, intended to be viewed by transmitted light. Such pictures are in common use for hanging in windows as ornaments, and are still more common as lantern-slides, for projection on a screen by the magic-lantern or stereopticon.

4. [*cap.*] A translation of the German title *Durchlaucht* (Seine Durchlaucht, literally 'His Perlustriousness,' used like the English *His Serene Highness*). [Burlesque.]

Then came his *Transparency* the Duke [of Pumpernickel] and Transparent family. *Thackeray*, Vanity Fair, lxii.

transparency-painting (trȧns-pãr'ẹn-si-pān″-ting), *n.* A painting designed to be viewed by transmitted light; also, the art of making such paintings. It is executed on muslin strained on a frame and sized with two coats of gilders' size, isinglass, or gelatin size, which, when dry, is carefully rubbed with pumice-stone to confer a smooth, paper-like surface, on which a design is then traced or pounced and afterward secured by being touched with a lead-pencil, or a reed-pen charged with India ink. For painting, flat hog-hair brushes are used, but broad, flat, and thin tintings may be rubbed in with a fine sponge, and heavy masses of color dabbed on with a coarse honeycombed sponge. The painting may be executed in oil-colors mixed with any good vehicle, or in water-color with a solution of gum tragacanth. Pleasing effects are produced by the combination of two or three surfaces of muslin strained on different frames and placed one behind the other. If three are used, the nearest figures and foreground are painted on the one in front, the middle distance on the next, and the extreme distance on the surface behind.

transparent (trȧns-pãr'ẹnt), *a.* and *n.* [< F. *transparent* = Pr. *transparent* = Sp. *transparente*, *trasparente* = Pg. *transparente* = It. *trasparente*, < ML. *transparere*, shine through: see *transpare*.] **I.** *a.* 1. Having the property of transmitting rays of light so that bodies situated beyond or behind can be distinctly seen; transmitting light-waves radiated from some source, without absorption or scattering; pervious to light; diaphanous; pellucid: as, *transparent* glass; a *transparent* diamond: opposed to *opaque*, and distinguished from *translucent*.

Nor shines the silver moon one half so bright
Through the *transparent* bosom of the deep.
Shak., L. L. L., iv. 3. 31.

2. Admitting the passage of light through interstices.

And Heaven did this *transparent* veil provide,
Because she had no guilty thoughts to hide.
Dryden, Epitaph on Monument of a Lady at Bath.

3. Figuratively, easily seen through or understood; easily intelligible.

He was to exhibit the specious qualities of the tyrant in a light which might render them *transparent*, and enable us at once to perceive the covering and the vices which it concealed. *Macaulay*, History.

Transparent discourse to a popular audience will be largely Saxon in its vocabulary. *A. Phelps*, English Style, p. 150.

4. Bright; shining; clear.

This fell tempest shall not cease to rage
Until the golden circuit on my head,
Like to the glorious sun's *transparent* beams,
Do calm the fury of this mad-bred flaw.
Shak., 2 Hen. VI., iii. 1. 353.

Transparent colors, in *painting*, colors such as will transmit light, or so delicately or thinly laid on as to veil without concealing the ground or other colors behind them: opposed to *opaque colors*, which only reflect light; also, colors which appear only by transmitted light, as those of stained glass, which, as correctly conceived, should be wholly transparent and with no opaque shadows.—**Transparent corpuscles of Norris**, colorless bodies found in the blood, supposed to be decolorized red blood-corpuscles.—**Transparent gold ocher.** See *ocher*.—**Transparent lacquer, leather, soap.** See the nouns.—**Transparent oxid of chromium.** See *chromium*.

=**Syn.** 1. Bright, limpid, crystalline.

II. *n.* A costume consisting of a dress of lace, tulle, gauze, or other thin fabric, worn over another dress of rich material. This fashion seems to have been introduced about 1675.

transparently (trȧns-pãr'ẹnt-li), *adv.* In a transparent manner; so as to be seen through; clearly.

transparentness (trȧns-pãr'ẹnt-nes), *n.* The property or state of being transparent; transparency; diaphaneity.

transpass† (trȧns-pȧs'), *v.* [< ML. *transpassare*, pass over, < L. *trans*, over, + ML. *passare*, pass: see *pass*. Cf. *trespass*, an older form of the same word.] **I.** *trans.* To pass over.

The river Hyphasis, or, as Ptolemy calleth it, Bipasis, was Alexander's non ultra; which yet he *transpassed*, and set up altars on the other side. *Gregory*, Notes on Scripture, p. 75. (*Latham.*)

II. *intrans.* To pass by or away.

Thy form and flatter'd hue,
Which shall so soon *transpass*,
Is far more fair than is thy looking-glass.
Daniel, Description of Beauty.

transpassable† (tråns-pȧs′ȧ-bl), *a.* [< *trans-pass* + *-able*.] Capable of being transpassed. *Imp. Dict.*

transpatronize† (tråns-pā′tron-īz), *v. t.* [< *trans-* + *patronize*.] To transfer the patronage of. [Rare.]

As to *trans-patronize* from him
To you mine orphant Muse.
Warner, Albion's England, ix., To Sir Geo. Carey.

transpeciate (trån-spē′shi-āt), *v. t.* [< *trans-* + *species* + *-ate*[2].] To transform from one species to another; change the species of.

I do not credit . . . that the devil hath power to *transpeciate* a man into a horse.
Sir T. Browne, Religio Medici, i. § 30.

transpeciation (trån-spē-shi-ā′shọn), *n.* [< *transpeciate* + *-ion*.] Transformation of one species or kind into another; specifically, in *biol.*, transmutation of species. See *transmutation*, 1 (*c*), and *transformism*.

First, that there has been what we may call a nisus of evolution in nature, and, secondly, that progressive *transspeciations* of matter have been events of it.
Maudsley, Body and Will, p. 132.

transperinæus (tråns-per-i-nē′us), *n.*; pl. *transperinæi* (-ī). [NL., < L. *trans*, across, + NL. *perinæum*, q. v.] The transverse perineal muscle; the transversus perinæi. *Coues*, 1887.

transperitoneal (tråns-per″i-tō-nē′al), *a.* [< *trans-* + *peritoneal*.] Traversing the peritoneal cavity.

transpicuous (trån-spik′ū-us), *a.* [= It. *traspicuo*, < L. as if **transpicuus*, < *transpicere*, see or look through, < *trans*, through, + *specere*, look: see *spy*. Cf. *conspicuous*, *perspicuous*.] Transparent; pervious to the sight.

That light,
Sent from her through the wide *transpicuous* air
To the terrestrial moon. *Milton*, P. L., viii. 141.

transpierce (tråns-pērs′), *v. t.*; pret. and pp. *transpierced*, ppr. *transpiercing*. [< F. *transpercer*; as *trans-* + *pierce*.] To pierce through; penetrate; pass through; transfix.

He saw him wounded and *trans-pierced* with steele.
Heywood, Hierarchy of Angels, p. 225.

They . . . were often *transpierced*, horse and rider, by the Moorish darts, impeding the progress of their comrades by their dying struggles. *Irving*, Granada, p. 91.

transpinalis (trån-spi-nā′lis), *n.*; pl. *transpinales* (-lēz). [NL., < L. *trans*, across, + *spina*, spine: see *spinalis*.] A muscle of the spine which lies between successive transverse processes of the vertebræ; an intertransverse muscle.

transpirable (trån-spīr′ȧ-bl), *a.* [< OF. *transpirable* = Sp. *transpirable* = It. *traspirabile*; as *transpire* + *-able*.] Capable of transpiring, or of being transpired.

transpiration (trån-spi-rā′shọn), *n.* [< F. *transpiration* = Sp. *transpiración*, *traspiración* = Pg. *transpiração* = It. *traspirazione*, < L. as if **transpiratio(n-)*, < **transpirare*, **transspirare*, breathe through, transpire: see *transpire*.] **1.** The act or process of transpiring; especially, exhalation through the skin: as, the *transpiration* of obstructed fluids.

I never neede other powdering to my hair, . . . which dos certainely greately prejudice *transpiration* by filling up or lying heavy upon the pores.
Evelyn, To Doctor Beale.

2. In *bot.*, the exhalation of watery vapor from the surface of aërial parts of plants. A great part of the water which serves as the vehicle of the nutritious substances contained in the sap is disposed of by transpiration. When thus given out it sometimes appears in the form of extremely small drops at the tip of the leaf, and especially at the extremities of the nerves.—**Pulmonary transpiration**, the exhalation of watery vapor from the blood circulating through the lungs. It may be made evident by breathing on a cold reflecting surface.—**Transpiration of gases**, the motion of gases through a capillary tube under pressure. The rate of motion varies with the composition of the gas, but bears a constant relation not coinciding with density, diffusion, or any other known property. The velocity depends not simply on the friction of the gas against the surface of the tube, but much more on the friction of the gas-particles against each other, and the transfer of momentum which thus results. A comparison of the velocity of transpiration with that of effusion has led to important conclusions in regard to molecular magnitudes.—**Transpiration of liquids**, the motion of liquids through minute orifices or capillary tubes under pressure. The rates of such motions are greatly increased by heat.

transpiratory (trån-spīr′ȧ-tō-ri), *a.* [< *transpire* + *-at-ory*.] Of or pertaining to transpiration; transpiring; exhaling.

transpire (trån-spīr′), *v.*; pret. and pp. *transpired*, ppr. *transpiring*. [< F. *transpirer* = Sp. *transpirar*, *traspirar* = Pg. *transpirar* = It. *traspirare*, < L. as if **transpirare*, **transspirare*, < *trans*, through, + *spirare*, breathe: see *spire*[3].]

I. *trans.* To emit through the excretories of the skin or lungs; send off in vapor; exhale.

II. *intrans.* **1.** To send out an exhalation; exhale. [Rare.]

This, that, and ev'ry thicket doth *transpire*
More sweet than storax from the hallowed fire.
Herrick, Apparition of his Mistresse Calling him to [Elizium.

2. To pass through or out of some body, as an exhalation; specifically, to be emitted through the excretories of the skin or lungs; exhale; pass off from the body in vapor, as in insensible perspiration.

What [substance] redounds, *transpires*
Through spirits with ease. *Milton*, P. L., v. 438.

They [root-hairs] abound most in plants inhabiting dry places and in those which *transpire* freely. *Science*, V. 36.

But how are we to account, in a mind otherwise sane, for his [Harrington's] notion that his thoughts *transpired* from him, and took the shape of flies or bees?
I. D'Israeli, Amen. of Lit., II. 385.

3. In *bot.*, to exhale watery vapor. See *transpiration*, 2.—**4.** To escape from secrecy; become public gradually; come to light; ooze out.

To *transpire*, . . . to escape from secrecy to notice: a sense lately innovated from France without necessity.
Johnson, Dict.

So the whole journal *transpires* at length by piecemeal.
Lamb, Last Essays of Elia.

There is no den in the wide world to hide a rogue. . . . Some damning circumstance always *transpires*.
Emerson, Compensation.

5. To happen or come to pass; occur. [An erroneous use.]

The penny-a-liners "allude" in cases where others would "refer"; and, in their dialect, things "*transpire*," and only exceptionally "take place."
F. Hall, On Adjectives in -able, p. 161.

transpiry (tråns′pi-ri), *n.* [< *transpire* + *-y*[3]. Cf. *expiry*.] The act or process of transpiring; transpiration. [Rare.]

On this belief in the Constancy of Nature are based . . . all our arrangements from day to day, which are subject to the *transpiry* of facts unknown or unforeseen at the time when these arrangements were made.
A. Daniell, Prin. of Physics, Int., p. 3.

transplace (tråns-plās′), *v. t.*; pret. and pp. *transplaced*, ppr. *transplacing*. [< OF. *transplacer*; as *trans-* + *place*.] **1.** To remove; put in a new place. [Rare.]

It [an obelisk] . . . was *transplaced* from the left side of the Vatican into a more eminent place.
Bp. Wilkins, Archimedes, x.

2. To cause to exchange places. [Rare.]

Transplace not their proprieties, and confound not their distinctions. *Sir T. Browne*, Christ. Mor., i. 31.

transplant (tråns-plant′), *v. t.* [< ME. *transplaunten*, < OF. (and F.) *transplanter* = Pr. *transplantar* = Sp. *trasplantar* = Pg. *transplantar* = It. *traspiantare*, < LL. *transplantare*, plant in another place, remove, < L. *trans*, over, + *plantare*, plant: see *plant*[1].] **1.** To plant anew in a different place.

Every foile is
Maade tender twyes if it be *transplaunted*.
Palladius, Husbondrie (E. E. T. S.), p. 51.

Methods of *transplanting* trees,
To look as if they grew there.
Tennyson, Amphion.

2. In general, to remove from one place to another; especially, to remove and establish for residence in another place.

These cautions are to be observed: . . . That if any *transplant* themselves into plantations abroad who are known schismatics, outlaws, or criminal persons, that they be sent for back upon the first notice; such persons are not fit to lay the foundation of a new colony.
Bacon, Advice to Villiers, vii.

That we may enjoy our consciences in point of God's worship: the main end of *transplanting* ourselves into these remote corners of the earth.
N. Morton, New England's Memorial, App., p. 418.

He prospered at the rate of his own wishes, being *transplanted* out of his cold barren diocese of St. David's into a warmer climate. *Clarendon*.

3. In *surg.*, to transfer from one part of the body or from one person to another. See *transplantation*, 3.

transplantable (tråns-plan′tȧ-bl), *a.* [< *transplant* + *-able*.] That can or may be transplanted.

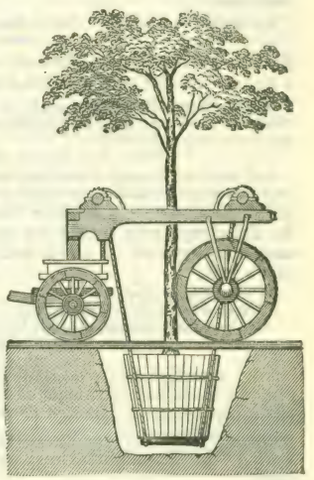
A *transplantable* an' thrifty fem'ly-tree.
Lowell, Biglow Papers, 2d ser., iii.

transplantar (tråns-plan′tär), *a.* [< L. *trans*, over, + *planta*, the sole of the foot: see *plantar*.] Situated transversely in the sole of the foot; lying across the planta: as, a *transplantar* muscle. *Coues*.

transplantation (tråns-plan-tā′shọn), *n.* [< F. *transplantation* = Sp. *trasplantación* = Pg. *transplantação*; as *transplant* + *-ation*.] **1.** The act of transplanting a living plant or shifting it to new soil.

Athenians . . . pretending that . . . our own religion is only a cutting or slip from theirs, much withered and dwarfed by *transplantation*.
Landor, Imag. Conv., Alcibiades and Xenophon.

2. The removal of an inhabitant or the inhabitants of one place or region to a different one for residence; also, the persons so removed.



Most of kingdoms have thoroughly felt the calamities of forcible *transplantations*, being either overwhelmed by new colonies that fell upon them, or driven, as one wave is driven by another, to seek new seats, having lost their own. *Raleigh*.

For of the ancient Persians there are few, these being the posteritie of those which haue beene here seated by the *transplantations* of Tamerlane and Ismael.
Purchas, Pilgrimage, p. 385.

3. In *surg.*, the removal of living tissue from one part of the body to another, or from one individual to another, to supply a part that has been lost or to lessen a deformity, as in the Taliacotian operation.—**4.** A pretended method of curing any disease by making it pass from the sick person to another person, or even to an animal or a vegetable.

A cure by *transplantation*, performed on the son of one that was wont to make chymical vessels for me.
Boyle, Works, II. 167.

★ **transplanter** (tråns-plan′tėr), *n.* [< *transplant* + *-er*[1].] **1.** One who transplants.—**2.** In *gardening*, a hand-tool for lifting and transplanting small plants with a ball of earth about the roots. It consists essentially of two pointed trowels with long handles, hinged together like scissors.

Transplanter, 3.

3. A machine for moving trees. A usual form consists of a high-framed truck fitted with gearing for hoisting up the tree between the wheels from a hole previously dug around the roots, and lowering it again into a new hole. Also called *tree-remover*. *E. H. Knight*.

transplanting (tråns-plan′ting), *n.* [Verbal n. of *transplant*, *v.*] **1.** The act or process of removing and resetting, as a plant; transplantation.

So far as the plant is concerned, three or four *transplantings* are better than one. *Science*, XIV. 364.

2. That which is transplanted.

Such colonies become so intimately fused with others that not seldom the *transplantings* from them turn out impure. *Alien. and Neurol.*, X. 470.

transplendency (trån-splen′den-si), *n.* [< *transplenden*(*t*) + *-cy*.] Supereminent splendor.

The supernatural and unimitable *transplendency* of the Divine presence.
Dr. H. More, Antidote against Idolatry, ii.

transplendent (trån-splen′dent), *a.* [< *trans-* + *splendent*.] Resplendent in the highest degree.

The clear crystal, the bright *transplendent* glass,
Doth not bewray the colours hid, which underneath it has.
Wyatt, Complaint of the Absence of his Love.

transplendently (trån-splen′dent-li), *adv.* In a transplendent manner; with extreme splendor.

The divinity, with all its adorable attributes, is hypostatically, vitally, and *transplendently* residing in this humanity of Christ.
Dr. H. More, Antidote against Idolatry, ii.

transpleural (tråns-plö′ral), *a.* [< *trans-* + *pleural*.] Traversing the pleural cavity.

transponibility (tråns-pō-ni-bil′i-ti), *n.* Capability of being transposed without violation of an assumed condition.

transponible (tråns-pō′ni-bl), *a.* Transposable.

transpontine (tråns-pon′tin), *a.* [= F. *transpontin* = Sp. *traspontino*, < L. *trans*, beyond, + *pons* (*pont-*), a bridge: see *pons*, *pontine*[2].] Situated or existing across or beyond a bridge; specifically, belonging to the part of London lying on the Surrey side of the Thames: applied to the Surrey and Victoria theaters, at

which cheap melodrama was formerly popular, and hence, in London theatrical parlance, to any play of a cheap, melodramatic character.

The incidents are melodramatic, and the comic characters are of the true *transpontine* race.
Athenæum, No. 3085, p. 793.

Calls from *transpontine* and barbaric regions came fast upon him [O. W. Holmes, in Boston, Massachusetts] as his popularity grew.
E. C. Stedman, The Century, XXIX. 506.

transport (tråns-pōrt'), *v. t.* [< ME. *transporten*, < OF. (and F.) *transporter* = Pr. Sp. *transportar*, *trasportar* = Pg. *transportar* = It. *trasportare*, < L. *transportare*, carry over or across, < *trans*, over, + *portare*, carry: see *port*[3].] 1. To convey from one place to another; transfer.

The kyng, gredy of comune slaughter, caste hym to *transporten* [var. *transpor*] upon al the ordre of the senat the gilt of his real majeste. *Chaucer*, Boëthius, i. prose 4.

Her ashes . . .
Transported shall be at high festivals
Before the kings and queens of France.
Shak., 1 Hen. VI., i. 6. 26.

The bee *transports* the fertilizing meal
From flow'r to flow'r. *Cowper*, Task, iii. 538.

It is easy to realize the enormous floating and *transporting* power of such great bodies of ice.
Prestwich, Geology, i. 186.

2†. To transform; alter.

And in to sorow *transport* our gladnesse,
Our huge uigour to feblesse this instance,
Our plesire into displesance expresse,
Our full good fortune into gret misc[h]ance.
Rom. of Partenay (E. E. T. S.), l. 3739.

3†. To remove from this world; kill: a euphemistic use.

He cannot be heard of. Out of doubt he is *transported*.
Shak., M. N. D., iv. 2. 4.

4. To carry into banishment, as a criminal to a penal colony; carry beyond seas.

But we generally make a shift to return after being *transported*, and are ten times greater rogues than before, and much more cunning.
Swift, Last Speech of Ebenezer Elliston.

And never mind what Felix says, for he 's so masterful he'd stay in prison and be *transported* whether or no, only to have his own way. *George Eliot*, Felix Holt, xxxviii.

5. To carry away by strong emotion, as joy or anger; carry out of one's self; render beside one's self.

The hearts of men, . . .
Transported with celestiall desyre
Of those faire formes, may lift themselves up hyer.
Spenser, Hymn of Heavenly Beauty, l. 18.

Oh, my joys!
Whither will you *transport* me?
Beau. and Fl., Knight of Burning Pestle, iii. 1.

★**transport** (tråns'pōrt), *n.* [< F. *transport* = Sp. *transporte*, *trasporte* = Pg. *transporte*; from the verb.] 1. Transportation; carriage; conveyance.

The Romans . . . stipulated with the Carthaginians to furnish them with ships both for *transport* and war.
Arbuthnot, Ancient Coins, p. 239.

The *transport* of blocks by ice in rivers of cold climates has often been described. *Prestwich*, Geology, i. 190.

2†. Transformation; alteration.

Many are now poor wandering beggars . . . who are descended of the blood and lineage of great kings and emperors, occasioned . . . by the *transport* and revolutions of kingdoms and empires. *Urquhart*, tr. of Rabelais, i. 2.

3. A ship or vessel employed by government for carrying soldiers, warlike stores, or provisions from one place to another, or to convey convicts to the place of their destination.

Grant organized an expedition to counteract this design, and on the evening of November 6 left Cairo with about 3000 men on *transports*, under convoy of 2 gun-boats, and steamed down the river. *The Century*, XXXVI. 575.

4. A convict transported or sentenced to exile.

If he had been a *transport* he could not have been treated worse. He told his father that he was driving him on the road to transportation.
Mayhew, London Labour and London Poor, I. 470.

5. Vehement emotion; passion; rapture; ecstasy.

In the afternoone I went againe with my Wife to the Dutchess of Newcastle, who receiv'd her in a kind of *transport*, suitable to her extravagant humour and dresse.
Evelyn, Diary, April 27, 1667.

I broke open my letter in a *transport* of joy.
Addison, A Friend of Mankind.

Transport screw. See *screw*[1].

transportability (tråns-pōr-ta-bil'i-ti), *n.* [< *transportable* + *-ity* (see *-bility*).] The character of being transportable; the capacity of being transported.

transportable (tråns-pōr'ta-bl), *a.* [= F. *transportable* = It. *trasportabile*; as *transport* + *-able*.] 1. Capable of being transported.

The direct result of a union of two or more distinct protoplasmic masses, in plant life, is a condensed, inactive, and *transportable* condition of the life of the species — that is, a seed or spore. *Amer. Nat.*, June, 1890, p. 577.

2. Involving transportation; subjecting to transportation.

The statute 7 Geo. II. c. 21 . . . makes it a felony (*transportable* for seven years) unlawfully and maliciously to assault another with any offensive weapon or instrument, . . . with a felonious intent to rob.
Blackstone, Com., IV. xvii.

transportage† (tråns-pōr'tāj), *n.* [< *transport* + *-age*.] Transportation.

Here be my keyes, my trunks take to thy charge;
Such gold fit for *transportage* as I have
Ile beare along.
Heywood, Fair Maid of the West (Works, ed. 1874, II. 273).

transportal (tråns-pōr'tal), *n.* [< *transport* + *-al*.] The act of removal from one locality to another; transportation.

The relative length of these organs [pistils and stamens] is an adaptation for the safe *transportal* by insects of the pollen from the one form to the other.
Darwin, Different Forms of Flowers, p. 253.

transportance† (tråns-pōr'tans), *n.* [< *transport* + *-ance*.] Conveyance.

O, be thou my Charon,
And give me swift *transportance* to those fields
Where I may wallow in the lily-beds
Proposed for the deserver!
Shak., T. and C., iii. 2. 12.

transportant† (tråns-pōr'tant), *a.* [< *transport* + *-ant*.] Transporting; ravishing.

So rapturous a joy, and *transportant* love.
Dr. H. More, Mystery of Godliness, p. 227. (*Latham*.)

★**transportation** (tråns-pōr-tā'shon), *n.* [< F. *transportation* = Pr. *transportacio* = Sp. *transportación*, *trasportación* = Pg. *transportação* = It. *trasportazione*, < L. *transportatio*(*n-*), a removing, transporting, < *transportare*, pp. *transportatus*, remove, transport: see *transport*.] 1. The act of transporting, or conveying from one place to another, or the state of being so transported; carriage; conveyance; transmission.

There may be *transportation* and isolation of very small fragments of a very variable species.
Amer. Jour. Sci., XL. 9.

2. The removal or banishment, for a specified term, of a convict to a penal settlement in another country. The transportation of persons convicted of crime prevails in France and Russia, but in Great Britain it is now superseded by penal servitude. See *penal*.

3. Transport; ecstasy; rapture.

She did bite her lips in pronouncing the words softly to herself; sometimes she would smile, and her eyes would sparkle with a sudden *transportation*.
History of Francion (1655). (*Nares*.)

All pleasures that affect the body must needs weary, because they transport; and all *transportation* is a violence, and no violence can be lasting.
Steele, Tatler, No. 211.

4. Means of transporting, as wagons or other vehicles; also, the cost of traveling. [U. S.]

A lot of miscellaneous *transportation*, composed of riding-horses, ambulances, and other vehicles, which, over roads rendered almost impassable by mud, made their progress to the last degree vexatious and toilsome.
The Century, XXXIX. 564.

Transportation of a church, in *Scottish eccles. law*, the erection of a parish church in a different part of the parish from that in which the church formerly stood.

Transportation of the *church* to another part of the parish requires the sanction of the Court of Teinds, but not a mere variation of its site.
W. Mair, Digest of Church Laws, p. 284.

transportedly† (tråns-pōr'ted-li), *adv.* In a transported manner; especially, in a state of rapture.

If we had for God but half as much love as we ought, or even pretend to have, we could not but frequently (if not *transportedly*) entertain our selves with his leaves, which . . . are at once his writings and his pictures.
Boyle, Works, II. 317.

transportedness (tråns-pōr'ted-nes), *n.* The condition of being transported; the state of being beside one's self, as with anger, joy, or some other emotion.

That we who are old men, Christian philosophers and divines, should have so little government of ourselves, as to be puffed up with those poor accessions of titular respects, which those who are really and hereditarily possessed of can wield without any such taint or suspicion of *transportedness*! *Bp. Hall*, Works, VIII. 488.

transportee (tråns-pōr-tē'), *n.* One who has ★been transported; a convict. [Australia.]

transporter (tråns-pōr'tėr), *n.* [< *transport* + *-er*[1].] One who or that which transports or removes.

What shall become of that unspeakably rich *transporter* who carries out men and money, . . . and brings home gauds and puppets? *Rev. T. Adams*, Works, II. 571.

transporting (tråns-pōr'ting), *p. a.* [Ppr. of *transport*, *v.*] Ravishing with delight; bearing away the soul in pleasure; ecstatic.

The pleasure which affects the human mind with the most lively and *transporting* touches is the sense that we act in the eye of infinite wisdom, power, and goodness, that will crown our endeavours here with happiness hereafter. *Tillotson*.

transportingly (tråns-pōr'ting-li), *adv.* In a ★transporting manner; ravishingly.

transportive† (tråns-pōr'tiv), *a.* [< *transport* + *-ive*.] Passionate; excessive.

It is the voice of *transportive* fury, "I cannot moderate my anger." *Rev. T. Adams*, Works, II. 315.

transportment† (tråns-pōrt'ment), *n.* [< OF. *transportement*, < *transporter*, transport: see *transport*.] 1. The act of transporting, or the state of being transported; transference.

Are not you he, when your fellow-passengers,
Your last *transportment*, being assail'd by a galley,
Hid yourself i' the cabin?
Fletcher (*and another*), Queen of Corinth, iv. 1.

2. Passion; anger.

There he attack'd me
With such *transportment* the whole town had rung on 't
Had I not run away. *Digby*, Elvira, iv. (*Davies*.)

transport-rider (tråns'pōrt-rī″dėr), *n.* A carrier. [South Africa.]

I hired myself to drive one of a *transport-rider's* wagons. *Olive Schreiner*, Story of an African Farm, ii. 11.

transport-ship (tråns'pōrt-ship), *n.* A ship or other vessel employed in conveying soldiers, military stores, or convicts; a transport.

transport-vessel (tråns'pōrt-ves″el), *n.* Same as *transport-ship*.

transposable (tråns-pō'za-bl), *a.* [< *transpose* + *-able*.] Capable of being transposed. *Imp. Dict.*

transposal (tråns-pō'zal), *n.* [< *transpose* + *-al*.] The act of transposing, or the state of being transposed; transposition. *Swift*, Tale ★of a Tub, Pref.

transpose (tråns-pōz'), *v. t.*; pret. and pp. *transposed*, ppr. *transposing*. [< ME. *transposen*, < OF. (and F.) *transposer*, transpose; cf. Sp. *transponer*, *trasponer* = Pg. *traspor* = It. *trasponere*, *trasporre*, < L. *transponere*, set over, remove, < *trans*, over, + *ponere*, place: see *ponent* and *pose*[2].] 1†. To remove to a different place; transfer; transport.

So many other nations of the world haue beene *transposed* and forced to flie from one region to another.
Verstegan, Rest. of Decayed Intelligence (ed. 1628), p. 43.

Bethink you of a place
You may *transpose* her.
Shirley, Maid's Revenge, iii. 1.

2. To cause (two or, less frequently, more objects) to change places.

"This infant was called John Little," quoth he;
"Which name shall be changed anon;
The words we'll *transpose*; so, wherever he goes,
His name shall be call'd Little John."
Robin Hood and Little John (Child's Ballads, V. 222).

3. In *alg.*, to bring, as any term of an equation, over from one side to the other side. See *transposition*, 2.—4. In *rhet.*, to change the usual order of (words).—5. In *music*, to alter the tonality of (a piece or passage) from a given tonality, either in performance or in transcription. See *transposition*, 4.—6†. To transform.

That which you are my thoughts cannot *transpose*;
Angels are bright still, though the brightest fell.
Shak., Macbeth, iv. 3. 21.

Inference of transposed quantity. See *inference*.—**Transposed quantity.** See *quantity*.

transpose† (tråns-pōz'), *n.* [< *transpose*, *v.*] Transposition.

This man was very perfit and fortunate in these *transposes*. *Puttenham*, Arte of Eng. Poesie, ii. (canceled [pages]). (*Davies*.)

transposer (tråns-pō'sėr), *n.* [< *transpose* + *-er*[1].] One who transposes. *Imp. Dict.*

transposing (tråns-pō'zing), *p. a.* Serving to transpose; effecting transposition.—**Transposing instrument**, a musical instrument which is constructed or adjusted to be played in a given tonality, as a B-flat clarinet, but the music for which is customarily written in another tonality, usually that of C. Music for various instruments — mostly wind-instruments, such as clarinets, trumpets, horns, etc., and also double basses and tympani — is habitually thus written. The name is more or less deceptive, since all that is meant by writing such music nominally in the key (tonality) of C is that the desired tones have certain tonal relations — that is, are definitely related to a key-note, the pitch of that key-note being fixed by the construction or the adjustment of the instrument. Accordingly, a generalized notation, like that of the tonic sol-fa system, is more appropriate, in which the tonal relations are indicated irrespective of the absolute pitch of the key-note.—**Transposing pianoforte**, a pianoforte on which transposition can be effected by purely mechanical means. In some cases the strings are moved without disturbing the keyboard; in some the keyboard is shifted bodily, and in some the keyboard is made in duplicate, the upper digitals being movable over the lower. One of the last-mentioned devices is called *transpositeur*. Transposing organs, harpsichords, etc., have also been made.—★**Transposing scale.** See *mode*[1], 7 (*a*) (1).

transposition (tråns-pō-zish'on), *n.* [< F. *transposition* = Pr. *transpositio* = Sp. *transposición*,

trasposición = Pg. ***trasposição*** = It. ***trasposizione***, ⟨ LL. ***transpositio(n-)***, ⟨ L. ***transponere***, pp. ***transpositus***, transpose: see ***transpose***.] **1.** The act of transposing; a putting of each of two things in the place before occupied by the other; less frequently, a change in the order of more than two things; also, the state of being transposed, or reciprocally changed in place. —**2.** In *alg.*, the bringing over of any term or terms of an equation from one side to the other side. This is done by changing the sign of every term so transposed, the operation being in effect the adding of the term with its sign reversed to both sides of the equation. If $a + x = b + c$, then by transposition we get $x = b + c - a$, or $x - b = c - a$, or $x + a - c = b$, etc. **3.** In *rhet.* and *gram.*, a change of the usual order of words in a sentence; words changed from their ordinary arrangement for the sake of effect.

We have deprived ourselves of that liberty of ***transposition*** in the arrangement of words which the ancient languages enjoyed. *H. Blair*, Rhetoric, viii.

4. In *music*, the act, process, or result of altering the tonality of a piece or passage from a given tonality, either in performance or in transcription. Transposition in itself involves only a change of key-note and a uniform shift of pitch upward or downward; but such a change may also involve more or less serious collateral changes. In purely vocal music slight transpositions are practically immaterial, and considerable ones are only noticeable because they change the ease or the method in which given tones are produced. Transposition in instrumental music, however, usually involves somewhat radical changes in the mechanism of performance, as in fingering, stopping, etc.; and these changes often involve also extensive changes in the ordinary staff-notation. Musically such mechanical or graphic changes are merely nominal and fictitious, though they often appear to have considerable importance. **5.** In *med.*, same as *metathesis*, 2.—**Transposition of the viscera**, a condition in which the organs within the abdomen and thorax are situated on the side opposite to that which they normally occupy, the liver being on the left side, the spleen on the right, etc.

transpositional (tråns-pō-zish′ọn-ạl), *a.* [⟨ ***transposition*** + ***-al***.] Of or pertaining to transposition; also, of the nature of transposition; transpositive.

The most striking and most offensive error in pronunciation among the Londoners, I confess, lies in the ***transpositional*** use of the letters *w* and *v*, ever to be heard when there is any possibility of inverting them. Thus they always say "weal" for "veal," "vicked" for "wicked."
Pegge, Anecdotes of the Eng. Lang.

transpositive (tråns-poz′i-tiv), *a.* [= F. ***transpositif***; as ***transpose*** + ***-it-ive***.] Of the nature of transposition; made by transposing; consisting in transposition.

The French language is . . . the most determinate in the order of its words. . . . The Italian retains the most of the ancient ***transpositive*** character. *H. Blair*, Rhetoric, vii.

transpositively (tråns-poz′i-tiv-li), *adv.* By transposition; in a transpositional manner. *Stormonth.*

transpositor (tråns-poz′i-tọr), *n.* [⟨ L. as if **transpositor*, ⟨ ***transponere***, transpose: see ***transpose***.] One who transposes; a transposer. *Landor.* (*Imp. Dict.*)

transprint (tråns-print′), *v. t.* [⟨ ***trans-*** + ***print***.] To print in the wrong place; transfer to the wrong place in printing. *Imp. Dict.* [Rare.]

transprocess (tråns-pros′es), *n.* [⟨ ***trans-*** + ***process***.] A transverse process of a vertebra; a diapophysis. *Coues.* [Recent.]

transprojection (tråns-prō-jek′shọn), *n.* In *persp.*, a perspective projection in which the point of sight lies between the natural object and the projection.

transprose† (tråns-prōz′), *v.* [⟨ ***trans-*** + ***prose***.] To change from verse into prose. The Buckingham quotation (of date 1671) follows and arises out of that given under ***transverse***, *v. t.*, 2; and Marvell's title is evidently a fanciful adaptation of the passage in "The Rehearsal." The Dryden quotation is an allusion to Elkanah Settle's giving to his poem upon Dryden's "Absalom and Achitophel" (part i.) the title of "Achitophel ***Transprosed***." The uses of the word are humorous throughout; and, indeed, Marvell's work is prose named from prose, while Settle's is verse named from verse.

Johns. Methinks, Mr. Bayes, that putting Verse into Prose should be call'd ***Transprosing***.
Bayes. By my troth, a very good Notion, and hereafter it shall be so. *Buckingham*, The Rehearsal, i. 1.

The Rehearsal ***transprosed***, or Animadversions upon a late work intituled "A Preface shewing what grounds there are of Fears and Jealousies of Popery," by Dr. Sam. Parker, Bishop of Oxford, 1672. *Marvell* (title of work).

Instinct he follows, and no farther knows,
For to write verse with him is to ***transprose***.
Dryden, Abs. and Achit., ii. 444.

transregionate† (tråns-rē′jọn-āt), *a.* [⟨ ***trans-*** + ***region*** + ***-ate***[1].] Pertaining to a region beyond another; foreign. *Harrison* (Holinshed's Chron., I.).

transrotatory (tråns-rō′tā-tō-ri), *a.* [⟨ ***trans-*** + ***rotatory***.] Passing through a set of objects in regular order from first to last, and then from the last to the first with a reversal of the sign or position, and then through the whole set each being so reversed, until finally from the last reversed passage is made to the first direct.

transsection (tråns′sek″shọn), *n.* Same as *cross-section*.

transsepulchral (tråns-sē-pul′kral), *a.* [⟨ L. *trans*, beyond, + *sepulcrum*, sepulcher, + ***-al***.] Being beyond the tomb; post-mortem; post-humous. [Recent.]

transshape (tråns-shāp′), *v. t.* [Also *transhape*; ⟨ ***trans-*** + ***shape***.] To change into another shape or form; transform.

Thus did she . . . ***trans-shape*** thy particular virtues.
Shak., Much Ado, v. 1. 172.

Suppose him
Trans-shap'd into an angel.
Beau. and Fl., Laws of Candy, iv. 1.

transshift (tråns-shift′), *v. t.* To interchange or transpose. [Rare.]

I sing of times ***trans-shifting***; and I write
How roses first came red, and lilies white.
Herrick, Hesperides, Arg., l. 9.

transship (tråns-ship′), *v. t.* Same as *tranship*.

transshipment (tråns-ship′mẹnt), *n.* Same as *transhipment*.

transtemporal (tråns-tem′pō-rạl), *a.* [⟨ L. *trans*, across, + *tempora*, temples: see *temporal*[2].] Traversing the temporal lobe of the brain: noting an inconstant fissure. *B. G. Wilder.* [Recent.]

transtime† (tråns-tīm′), *v. t.* To change the time of. [Rare.]

To transplace or ***transtime*** a stated Institution of Christ without his direction, I think is to destroy it.
N. Ward, Simple Cobler, p. 16.

transubstantiate (tran-sub-stan′shi-āt), *v. t.*; pret. and pp. *transubstantiated*, ppr. *transubstantiating*. [⟨ ML. *transubstantiatus*, *transsubstantiatus*, pp. of *transubstantiare*, *transsubstantiare* (> It. *transustanziare*, *trasustanziare* = Sp. *transustanciar* = Pg. *transsubstanciar* = Pr. *transsustanciar* = F. *transsubstantier*), change into another substance, ⟨ L. *trans*, over, + *substantia*, substance: see ***substance***.] **1.** To change from one substance to another.

O self-traitor, I do bring
The spider love which ***transubstantiates*** all,
And can convert manna to gall. *Donne.*

Now the Stomach . . . hath a chymical kind of Virtue . . . to ***transubstantiate*** Fish and Fruits into Flesh within and about us. *Howell*, Letters, I. i. 31.

Memory and imagination [in Dante] ***transubstantiated*** the woman of flesh and blood into a holy ideal.
Lowell, Among my Books, 2d ser., p. 26.

2. Specifically, in *theol.*, to change from bread and wine into the body and blood of Christ: said of the elements in the eucharist. See *transubstantiation*.

Expounding "This is my body," that is to say, this is converted and turned into my body, and this bread is ***transubstantiated*** into my body.
Tyndale, Ans. to Sir T. More, etc. (ed. Parker Soc.), p. 244.

There can be little doubt that Queen Elizabeth was a believer in a real, but not in a ***transubstantiated*** presence.
Ellis's Letters, p. 269, note.

transubstantiation (tran-sub-stan-shi-ā′shọn), *n.* [⟨ F. ***transsubstantiation*** = Sp. *transustanciación*, *trasustanciación* = Pg. *transsubstanciação* = It. *transustanziazione*, ⟨ ML. *transubstantiatio(n-)*, *transsubstantiatio(n-)* (used for the first time by Peter Damian, d. 1072; according to Trench, by Hildebert, d. about 1134), ⟨ *transubstantiare*, *transsubstantiare*, change into another substance: see *transubstantiate*.] A change of one substance into another; specifically, in *theol.*, the conversion, in the consecration of the elements of the eucharist, of the whole substance of the bread into the body, and of the whole substance of the wine into the blood, of Christ, only the appearances of the bread and wine remaining. This is the doctrine of the Roman Catholic Church. The Greek Church calls the change μετουσίωσις ('transubstantiation' or 'transessentiation'); but it is a disputed question whether it holds the same doctrine. Transubstantiation is one of several forms in which the doctrine of the real presence is held. See *doctrine of the real presence* (under *presence*), and *consubstantiation*.

These words, "This is my body," . . . must needs be plain, single, and pure, without . . . any subtle ***transubstantiation***.
Tyndale, Ans. to Sir T. More, etc. (ed. Parker Soc.), p. 262.

Why do we vainly trouble ourselves with so fierce contentions whether by consubstantiation, or else by ***transubstantiation*** the sacrament itself be first possessed with Christ, or no? *Hooker*, Eccles. Polity, v. 67.

The change of the whole substance of the bread into the body, of the whole substance of the wine into the blood [of Christ], only the appearances of bread and wine remaining; which change the Catholic Church most fitly calls ***transubstantiation***.
Canons and Decrees of the Council of Trent (trans.), quoted [in Rom. Cath. Dict., p. 314.

transubstantiationalist (tran-sub-stan-shi-ā′-shọn-ạl-ist), *n.* [⟨ ***transubstantiation*** + ***-al-ist***.] Same as *transubstantiator*. [Rare.]

Making it ["An't please the pyx"] equivalent to "Deo volente" in the minds of ***transubstantiationalists***.
N. and Q., 6th ser., IX. 149.

transubstantiator (tran-sub-stan′shi-ā-tọr), *n.* [⟨ ***transubstantiate*** + ***-or***[1].] One who accepts or maintains the doctrine of transubstantiation. [Rare.]

transudate (tran-sū′dāt), *n.* Same as *transudation*, 2 (*b*).

transudation (tran-sū-dā′shọn), *n.* [⟨ ***transude*** + ***-ation***.] The act or process of transuding; the process of oozing through the pores of a substance. Specifically, in *med.*: (*a*) The passage of fluid through the pores of any membrane or wall of a cavity; endosmosis or exosmosis. (*b*) The liquid thus transuded, especially into a cavity. Also *transudate*.

transudatory (tran-sū′dā-tō-ri), *a.* [⟨ ***transude*** + ***-at-or-y***.] Passing by transudation.

transude (tran-sūd′), *v. i.*; pret. and pp. *transuded*, ppr. *transuding*. [⟨ F. ***transsuder*** = Pr. *trassuzar*, *trassuar* = Sp. *trasudar* = Pg. *transsudar* = It. *trasudare*, ⟨ ML. **transsudare*, sweat through, ⟨ L. *trans*, through, + *sudare*, sweat: see *sudation*.] To pass or ooze through the pores or interstices of a membrane or other permeable substance, as a fluid (*transpire* being commonly said of gases or vapors).

The nutritious fluid . . . ***transudes*** through the walls of the alimentary cavity, and passes into the blood contained in the blood-vessels which surround it.
Huxley, Biology, xi.

transume† (tran-sūm′), *v. t.*; pret. and pp. *transumed*, ppr. *transuming*. [⟨ LL. *transumere*, *transsumere*, take over, adopt, assume, ⟨ L. *trans*, over, + *sumere*, take: see *sumpt*. Cf. *assume*, *consume*, *desume*.] **1.** To take from one to another; convert. [Rare.]

That we may live, revive his death,
With a well-blessed bread and wine
Transum'd, and taught to turn divine.
Crashaw, Hymn for the Blessed Sacrament.

2. To copy or transcribe. *Halliwell.*

transumpt[1] (tran-sumpt′), *n.* [⟨ OF. *transumpt*, ⟨ ML. *transumptum*, a copy, neut. of LL. *transumptus*, pp. of *transumere*, take over, assume, ML. transcribe: see *transume*.] A copy of a writing or exemplification of a record. [Obsolete or archaic.]

The pretended original breve was produced, and a ***transumpt*** or copy thereof offered them.
Lord Herbert, Hist. Hen. VIII., p. 225.

The ***transumpt*** of a Papal Breve, three years old, was exhibited by Stokesley.
R. W. Dixon, Hist. Church of Eng., iii.

Action of transumpt, in *Scots law*, an action competent to any one having a partial interest in a writing, or immediate use for it, to support his titles or defenses in other actions, directed against the custodier of the writing, calling upon him to exhibit it, in order that a copy or transumpt of it may be made and delivered to the pursuer. *Imp. Dict.*

transumption (tran-sump′shọn), *n.* [⟨ L. *transumptio(n-)*, a taking of one thing from another (see *transumpt*), ⟨ (LL.) *transumere*, take over: see *transume*.] The act of taking from one place to another. *Imp. Dict.*

transumptive (tran-sump′tiv), *a.* [⟨ L. *transumptivus*, metaphorical, ⟨ (LL.) *transumere*, take over: see *transume*.] Taken from one to another; transferred from one to another; metaphorical.

Hereupon are intricate turnings, by a ***transumptive*** and metonymical kind of speech, called meanders.
Drayton, Rosamond to King Henry, Annotation 2.

The form or mode of treatment is poetic, . . . digressive, ***transumptive***.
Lowell, Among my Books, 2d ser., p. 44.

transvasate (tråns-vā′sāt), *v. t.* [⟨ ML. *transvasatus*, pp. of *transvasare*, pour from one vessel into another: see *transvase*.] Same as *transvase*.

The Father and Son are not, as they suppose, ***transvasated*** and poured out, one into another, as into an empty vessel. *Cudworth*, Intellectual System, p. 619.

transvasation† (tråns-vā-sā′shọn), *n.* [⟨ ML. **transvasation*, ⟨ *transvasare*, transvase: see *transvase*, *transvasate*.] The act or process of transvasing. *Holland.* (*Imp. Dict.*)

transvase (tråns-vās′), *v. t.*; pret. and pp. *transvased*, ppr. *transvasing*. [⟨ F. ***transvaser*** =

It. *travasare*, < ML. *transvasare*, pour from one vessel into another, also remove one's residence, < L. *trans*, over, + *vas*, vessel: see *vase*.] To pour from one vessel into another; transfuse.

The upper and smaller apertures, or the higher ouvreaux, called the lading holes, because they serve for *transvasing* the liquid glass. *Ure*, Dict., II. 663.

transvectant (tråns-vek'tant), *n.* [< L. *transvectus*, pp. of *transvehere*, carry over, + *-ant*.] In *math.*, an invariant produced by the operation of transvection.

transvection (tråns-vek'shon), *n.* [< L. *transvectio(n-)*, a passing or carrying over, < *transvehere*, pp. *transvectus*, carry over, transport, < *trans*, over, + *vehere*, carry, convey: see *vehicle*.] 1. The act of conveying or carrying over.—2. In *math.*, the operation of obtaining a covariant by operating upon one with another.

transverberate (tråns-vėr'bę-rāt), *v. t.*; pret. and pp. *transverberated*, ppr. *transverberating*. [< L. *transverberatus*, pp. of *transverberare*, strike or thrust through, < *trans*, over, + *verberare*, strike: see *verberate*.] To beat or strike through. [Rare.]

The appetencies of matter and the most universal passions (passiones) in either globe are exceedingly potent, and *transverberate* (transverberant) the universal nature of things.

★ *Wats*, tr. of Bacon's Advancement of Learning, iv. 3.

transversal (tråns-vėr'sal), *a.* and *n.* [< ME. *transversal*, < OF. (and F.) *transversal* = Sp. *trasversal* = Pg. *transversal* = It. *traversale*, *trasversale*, < ML. *transversalis*, transverse, < L. *transversus*, transverse: see *transverse*.] **I.** *a.* Transverse; running or lying across: as, a *transversal* line. See II.

A double cours of boording first it have,
Oon *transversal*, another cours directe.
Palladius, Husbondrie (E. E. T. S.), p. 155.

The vibrations of sound are longitudinal, while the vibrations of light are *transversal*.
Tyndall, Light and Elect., p. 61.

II. *n.* 1. In *geom.*, a line drawn across several others so as to cut them all. Transversals are usually understood to be straight, in the absence of any qualification, but circular transversals are also spoken of. 2. In *anat.*, a transversalis or transversus.—**Parallel transversals**, three segments cut off by the sides of a triangle from three lines through one point parallel to those sides. There is for every triangle one point from which the parallel transversals are all equal.

transversalis (tråns-vėr-sā'lis), *n.*; pl. *transversales* (-lēz). [NL. (sc. *musculus*): see *transversal*.] In *anat.*, one of several different muscles, etc., which lie across certain parts.—**Transversalis abdominis**, the innermost of the three flat muscles of each side of the abdomen, whose fibers run mostly horizontally.—**Transversalis cervicis**, a flat fleshy muscle of the back of the neck, usually united with the longissimus dorsi, and thus forming the apparent continuation of the latter in the neck.—**Transversalis colli**, the transverse cervical artery (which see, under *transverse*).—**Transversalis fascia**, the fascia lining the visceral aspect of the anterior abdominal muscles, continuous above, where it is thinnest, with the lining of the diaphragm below, and blending with Poupart's ligament, or prolonged downward, under that ligament, over the femoral vessels.—**Transversalis menti**, an occasional muscle of the chin.—**Transversalis nasi**, a small muscle lying across the nose.—**Transversalis pedis, perinæi**. Same as *transversus pedis*, etc. (which see, under *transversus*).

transversality (tråns-vėr-sal'i-ti), *n.* [< *transversal* + *-ity*.] The state or condition of being transversal.

The condition of *transversality* leads at once to the desired results. *Encyc. Brit.*, XXIV. 450.

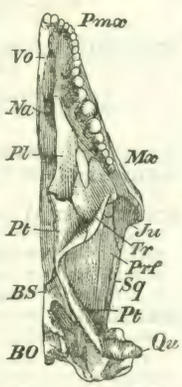
transversally (tråns-vėr'sal-i), *adv.* In a transverse direction; as a transversal.

transversant† (tråns-vėr'sant), *a.* [< ME. *transversant*, < OF. **transversant*, *traversant*, < ML. *transversan(t-)s*, ppr. of *transversare*, go across, transverse, traverse: see *transverse*, *v.*] Running across; transverse.

Make this house wherin thay shal abyde
Light, clene, and playne with perches *transversannte*
To sitte upon. *Palladius*, Husbondrie (E. E. T. S.), p. 21.

transversary (tråns'vėr-sā-ri), *n.*; pl. *transversaries* (-riz). [< L. *transversarium*, a cross-beam, a net stretched across a river, neut. of *transversarius*, cross, transverse: see *transverse*.] See the quotation.

The cross-staff [in the 17th century] was a very simple instrument, consisting of a graduated pole with cross pieces, called *transversaries* (of which there were four used according to the altitude), also graduated, which ★were fitted to work on it. *Encyc. Brit.*, X. 187.



transverse (tråns-vėrs'), *a.* and *n.* [< F. *transverse*, OF. *travers* = Pr. *transvers*, *travers* = Sp. *transverso*, *trasverso* = Pg. *transverso* = It. *trasverso*, < L. *transversus*, *traversus*, lying across, transverse, pp. of *transvertere*, cross, transverse, < *trans*, across, + *vertere*, turn: see *verse*. Cf. *traverse*, *a.*] **I.** *a.* 1. Lying or being across or in a cross direction; cross; thwart.

A kettle, slung
Between two poles upon a stick *transverse*.
Cowper, Task, i. 561.

2. Collateral. [Rare.]

When once it goes to the *transverse* and collateral [line], they not only have no title to the inheritance, but every remove is a step to the losing the cognation and relation to the chief house. *Jer. Taylor*, Rule of Conscience, ii. 3.

3. In *anat.* and *zoöl.*, broader or wider than long; having its major diameter crosswise: noting various parts or organs which lie or are taken to run across other parts, or especially across the long axis of the whole body. See *transversalis* and *transversus*.—4. In *bot.*: (*a*) Right and left or collateral with reference to the median plane. (*b*) Being at right angles to the axial direction: for example, see *transverse partition*, below.—5. In *herpet.*, specifically noting a bone of the skull which usually unites the palatine and the pterygoid bones with the maxilla. It is usually flattened, plate-like, and firmly sutured, making a solid framework of the maxillary and pterygopalatine bars; but in some ophidians, as the venomous snakes, it is a slender rod movably articulated in front with the maxilla, and connected behind with the pterygoid only; it then takes great part in the peculiar movement of the bones of the upper jaw by which the venom-fangs are thrown into position for striking. See also cuts under *Ophidia*, *Pythonidæ*, *Crotalus*, and *acrodont*.

Under View of Left Half of Skull of *Cyclodus*, showing *Tr*, the transverse bone, connecting *Mx*, the maxilla, with *Pl* and *Pt*, the palatine and pterygoid. (Other letters as in *Cyclodus*, which see.)

6. In *her.*, crossing the escutcheon from one side to the opposite one.—**By transverse**†, confusedly; out of the proper order.

Nothing doth firme and permanent appeare,
But all things tost and turned *by transverse*.
Spenser, F. Q., VII. vii. 56.

Hallucal transverse muscle. Same as *transversus pedis* (which see, under *pes*[3]).—**Transverse artery**, one of several small branches of the basilar artery, passing directly outward to be distributed to the pons Varolii.—**Transverse axis.** See *axis*[1].—**Transverse cervical artery**, the third branch of the thyroid axis. It passes outward across the subclavian triangle to the anterior margin of the trapezius, where it divides into the superficial cervical and the posterior scapular. Also called *transversalis colli*.—**Transverse colon**, that portion of the large intestine which extends across the body from right to left, from the end of the ascending colon to the beginning of the descending colon. See cut under *intestine*.—**Transverse coxa.** See *coxa*, 3.—**Transverse diameter** of a conic section. Same as *transverse axis*.—**Transverse facial artery**, a branch of the temporal artery. It passes forward through the parotid gland, and breaks up on the side of the face into numerous branches which supply the parotid gland, masseter muscle, and the integument.—**Transverse fissure.** (*a*) *Of the liver.* See *fissure*. (*b*) *Of the brain*, a fissure beneath the fornix and the hemispheres, above the optic thalami, through which membranes and vessels are continued from the pia mater into the ventricles of the brain.—**Transverse flute.** See *flute*[1], 1.—**Transverse frontal convolution**, the ascending frontal or anterior central gyrus or convolution. See *gyrus*.—**Transverse frontal furrow**, the precentral sulcus. See *precentral*.—**Transverse humeral artery.** Same as *suprascapular artery* (which see, under *suprascapular*).—**Transverse ligament of the atlas.** See *ligament*.—**Transverse ligament of the fingers**, a superficial palmar band stretching across the roots of the four fingers.—**Transverse ligament of the pelvis**, a strong fibrous band stretching across the subpubic angle near its apex.—**Transverse ligament of the toes**, a plantar band similar to the transverse ligament of the fingers.—**Transverse magnet**, a magnet whose poles are not at the ends, but at the sides, formed by a particular combination of bar-magnets.—**Transverse magnetism**, or **transverse magnetization**, magnetization at right angles to the length of the bar.—**Transverse map-projection.** See *projection*.—**Transverse metacarpal ligament**, a band of fibers passing between the palmar ligaments of the metacarpophalangeal joints.—**Transverse metatarsal ligament**, a plantar band similar to the transverse metacarpal ligament.—**Transverse myelitis**, myelitis involving the whole thickness of the cord, but of slight vertical extent.—**Transverse partition**, in *bot.*, a dissepiment, as of a pericarp, at right angles with the valves, in a silique.—**Transverse perineal artery**, an artery usually arising, in common with the superficial perineal artery, from the pudic artery at the fore part of the ischiorectal fossa, and traversing the perineum; the transperineal artery. It is distributed to the parts between the anus and the bulb of the urethra, and anastomoses with the corresponding artery of the opposite side.—**Transverse process of a vertebra**, a lateral process on each side, of different character, morphologically, in different regions of the spine; properly, a transprocess or diapophysis; in the cervical region, usually a diapophysis and pleurapophysis partially united in one, inclosing a vertebrarterial foramen: in this and other regions often including also a parapophysis, or including a parapophysis without a pleurapophysis, or consisting only of a parapophysis: when consisting of a diapophysis and a parapophysis together, the latter is specified as the *inferior transverse process*. See cuts under *axis*[1], 3 (*a*), *dorsal*, *neurocentral*, *vertebra*, *cervical*, *endoskeleton*, *hypapophysis*, and *lumbar*.—**Transverse rib**, in *arch.* See *rib*[1].—**Transverse scapular artery.** Same as *suprascapular artery* (which see, under *suprascapular*).—**Transverse section.** See *section*, 4.—**Transverse shade**, in *entom.*, a shade or band somewhat darker than the general surface, running transversely across the middle of the fore wing, between the reniform and orbicular spots, of many noctuid moths.—**Transverse shaping-machine**, a shaping-machine having a cutter-head carried on a pillar and reciprocating horizontally. *E. H. Knight.*—**Transverse sinus.** See *sinus*.—**Transverse strain**, in *mech.*, the strain produced in a beam by a force at right angles to its length; the bending or flexure of an elastic beam.—**Transverse suture.** See *suture*.—**Transverse thoracic furrow.** See *thoracic*.—**Transverse vein**, in *entom.*, any one of several short veins connecting two longitudinal ones, and running nearly at right angles to them and to the length of the wing. They are found especially in the wings of certain dipters, and are distinguished by special names, as 'he *small* or *middle transverse vein*, between the third and fourth longitudinal veins, near the center of the wing; the *hinder transverse vein*, between the fourth and fifth longitudinals; and the *posterior basal transverse vein*, between the fifth and sixth longitudinals, near the base of the wing.—**Transverse vibration.** Same as *lateral vibration* (which see, under *lateral*).

II. *n.* In *anat.*, a transversalis or transversus: as, the *transverse* of the abdomen, perineum, or sole of the foot.

transverse (tråns-vėrs'), *adv.* [< *transverse*, *a.*] Crosswise; across; transversely.

A violent cross wind from either coast
Blows them *transverse* ten thousand leagues awry.
Milton, P. L., iii. 487.

transverse (tråns-vėrs'), *v.*; pret. and pp. *transversed*, ppr. *transversing*. [< ME. *transversen*, < OF. **transverser*, *traverser*, < ML. *transversare*, go across, transgress, traverse, < L. *transversus*, pp. of *transvertere*, turn across, turn away: see *transverse*, *a.* Cf. *traverse*, *v.*] **I.** *trans.* 1. To overturn; turn topsyturvy.

And though our Monarchy be quite *transverst*,
And we as slaues through the wide world disperst,
'Tis not because we put to heauy doome
The great Messias.
Heywood, Hierarchy of Angels, p. 284.

2. To change; transpose. Compare *transprose*.

If there be any Wit in't, as there is no Book but has some, I *Transverse* it: that is, if it be Prose, put it into Verse, . . . if it be Verse, put it into Prose.
Buckingham, The Rehearsal, i. 1.

II. *intrans.* To transgress; run counter.

Ac treuthe, that trespassede neuere ne *transuersede* agens the lawe,
Bote lyuede as his lawe tauhte.
Piers Plowman (C), xv. 209.

[Rare in all uses.]

transverse-cubital (tråns-vėrs'kū″bi-tal), *a.* Same as *transversocubital*.

transversely (tråns-vėrs'li), *adv.* In a transverse position, direction, or manner; crosswise.

At Stonehenge the stones lie *transversely* upon each other. *Stillingfleet.*

transverse-medial (tråns-vėrs'mē″di-al), *a.* Same as *transversomedial*.

transverse-quadrate (tråns-vėrs'kwod″rāt), *a.* In *entom.*, having approximately the form of a rectangular parallelogram, which is broader than it is long.

transversi, *n.* Plural of *transversus*.

transversion (tråns-vėr'shon), *n.* [< ML. *transversio(n-)*, < L. *transvertere*, turn across: see *transverse*, *a.* and *v.*] The act or process of transversing. See *transverse*, *v.*

My first Rule is the Rule of *Transversion*, or Regula Duplex, changing Verse into Prose, or Prose into Verse.
Buckingham, The Rehearsal, i. 1.

transverso-analis (tråns-vėr″sō-ā-nā'lis), *n.* [NL.: see *transverse* and *anal*.] Same as *transversus perinæi* (which see, under *transversus*).

transversocubital (tråns-vėr-sō-kū'bi-tal), *a.* [As *transverse* + *cubital*.] Running across and dividing the cubital cells of the wings of some insects: noting certain nervures.

transversomedial (tråns-vėr-sō-mē'di-al), *a.* [As *transverse* + *medial*.] Crossing the medial cells of the wings of some insects, as hymenopters: noting certain nervures.

transversospinalis (tråns-vėr″sō-spī-nā'lis), *n.*; pl. *transversospinales* (-lēz). [NL.: see *transverse* and *spinal*.] One of the set or series of spinal muscles which connect the transverse with the spinous processes of vertebræ.

transversovertical (tråns-vėr″sō-vėr'ti-kal), *a.* [As *transverse* + *vertical*.] Relating to what is transverse and vertical.—**Transversovertical index**, the ratio of the greatest height to the greatest breadth of the cranium.

transversum (tråns-vėr'sum), *n.*; pl. *transversa* (-sä). [NL., prop. neut. of L. *transversus*, transverse: see *transverse*.] In *herpet.*, the transverse bone of the skull: more fully called *os transversum*. See *transverse*, *a.*, 5 (with cut).

transversus (tråns-vėr'sus), *n.*; pl. *transversi* (-sī). [NL.: see *transverse.*] In *anat.*, a transverse muscle; a transversalis.—**Transversus auriculæ**, a small muscle on the back of the ear, rudimentary in man.—**Transversus menti**, a portion of the depressor anguli oris.—**Transversus nuchæ**, an anomalous muscle occurring not infrequently in man, arising from the occipital protuberance and inserted into or near the tendon of the sternomastoid. Also called *corrugator posticus, occipitalis teres.*—**Transversus orbitæ**, an occasional muscle of man, traversing the upper part of the orbit.—**Transversus pedis.** See *pes*[3].—**Transversus perinæi**, the transperineal muscle, which traverses the back part of the perineum from the tuberosity of the ischium to the median raphe, or in the female to the sphincter vaginæ.—**Transversus thoracis.** Same as *sternocostalis.*

transvert† (tråns-vėrt'), *v. t.* [< ME. *transverten*, < OF. **transvertir* = Sp. *transverter*, *trasverter* = Pg. *transverter*, < L. *transvertere*, turn across: see *transverse.*] To change by turning; turn about. *Craft of Lovers*, l. 419.

transvertible (tråns-vėr'ti-bl), *a.* [< *transvert* + *-ible.*] Capable of being transverted. *Sir T. Browne.* (*Imp. Dict.*) [Rare.]

transview (tråns-vū'), *v. t.* [< *trans-* + *view.*] To look through. [Rare.]

Let vs with eagles eyes without offence
Transview the obscure things that do remain.
Davies, Mirum in Modum, p. 9. (*Davies.*)

transvolation† (tråns-vō-lā'shọn), *n.* [< L. *transvolare*, pp. *transvolatus*, fly over or across, < *trans*, over, + *volare*, fly: see *volant.*] The act of flying beyond or across.

Such things as these . . . are extraordinary egressions and *transvolations* beyond the ordinary course of an even piety. *Jer. Taylor*, Works (ed. 1835), I. 781.

transvolve† (tråns-volv'), *v. t.* [< LL. *transvolvere*, unroll, < L. *trans*, over, + *volvere*, roll, wrap: see *volute.* Cf. *convolve, evolve, revolve*, etc.] To overturn; break up.

Welcome be the Will of God, who *transvolves* Kingdoms, tumbles down Monarchies as Mole-hills, at his Pleasure. *Howell*, Letters, iii. 22.

transwaft† (tråns-wåft'), *v. t.* [< *trans-* + *waft.*] To waft over or across. [Rare.]

Ioves Trull
Europa he from Sidon into Creet
Transwafted, whilest the waue ne're toucht her feet.
Heywood, Hierarchy of Angels, p. 128.

Transylvanian (tran-sil-vā'ni-ạn), *a.* and *n.* [< *Transylvania* (see def.), lit. 'the land beyond the forest,' namely, the ancient forest separating the country from Hungary, < L. *trans*, beyond, + *sylva, silva*, forest: see *sylva, sylvan.*]

I. *a.* Of or pertaining to Transylvania, formerly a grand principality, since 1868 incorporated with Hungary.

II. *n.* A native or an inhabitant of Transylvania.

trant (tránt), *v. i.* [Formerly also *traunt*; < ME. *tranten*, < MD. D. *tranten*, walk slowly.] **1.** To walk; go about as a peddler. Compare *tranter.* [Prov. Eng.]

And had some *traunting* merchant to his sire,
That traffick'd both by water and by fire.
Hall's Satires, IV. ii. (*Nares.*)

2†. To turn; play a trick.

Quen thay seghe hym [a fox] with syȝt, thay sued hym fast, . . .
& he *trantes* & tornayeez thurȝ mony tene greue [rough grove].
Sir Gawayne and the Green Knight (E. E. T. S.), l. 1707.

trant† (tránt), *n.* [< ME. *trant*, < MD. *trant* = Sw. dial. *trant*, a step; from the verb.] A turn; a trick; a stratagem.

For alle his fare I hym deffie,
I knowe his *trantis* fro toppe to taile,
He leuys with gaudis and with gilery.
York Plays, p. 381.

Summe [hunters] fel in the fute, ther the fox bade,
Traylez ofte a trayteres, bi *traunt* of her wyles.
★ *Sir Gawayne and the Green Knight* (E. E. T. S.), l. 1700.

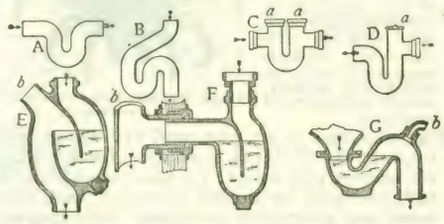
tranter (trân'tėr), *n.* [Formerly also *traunter*; < *trant* + *-er*[1].] An itinerant peddler; a carrier. Formerly also called *ripper.* [Prov. Eng.]

Dick Dewy's father, Reuben, by vocation a *tranter*, or irregular carrier. *T. Hardy*, Under the Greenwood Tree, i. 2.

trap[1] (trap), *n.* [< ME. *trappe*, < AS. *træppe, treppe* = MD. *trappe* = OHG. *trappa, trapa*, a snare, trap; cf. OF. *trappe*, a trap, pitfall, F. *trappe*, a trap-door, a pitfall, = Pr. *trappa* = Sp. *trampa* = Pg. *trapa* = It. dim. *trappola*, < ML. *trappa, trapa*, a trap (< OHG.); connected with MHG. *treppe, trappe*, G. *treppe*, a flight of steps, stair, ladder, = D. *trap*, a stair, etc., MD. D. MLG. G. *trappen*, tread: see *trap*[2], *trape, tramp.* Hence ult. *trapan.*] **1.** A contrivance, as a pitfall or some mechanical device that shuts suddenly, often by means of a spring, used for taking game and other animals.

She wolde weepe if that she sawe a mous
Caught in a *trappe*, if it were deed or bledde.
Chaucer, Gen. Prol. to C. T., l. 145.

We have locks to safeguard necessaries,
And pretty *traps* to catch the petty thieves.
Shak., Hen. V., i. 2. 176.



A sudden sharp and bitter cry,
As of a wild thing taken in the *trap.*
Tennyson, Geraint.

2. A device for confining and suddenly releasing or tossing into the air objects to be shot at, as live pigeons or glass balls.

The *traps* are usually five in number, the sides being hinged so that upon the cord being pulled they collapse entirely, leaving the pigeon in the open.
W. W. Greener, The Gun, p. 501.

3. A kind of fish-net used especially in Narragansett Bay, consisting of an oblong inclosure of netting on three sides and at the bottom, anchored securely by the side of the channel. Into this the fish enter, and, the bottom of the net being lifted to the surface at the open end, they are penned in and driven into a lateral inclosure, where they are kept until needed.

4. A double-curved pipe, or a U-shaped section of a pipe, with or without valves, serving

A, B, common traps; C, D, modifications of A and B—screw-caps, as shown at *a*, being added for cleaning out the traps; E, F, G, ventilating traps with air-pipes at *b* leading to the exterior of a building.

to form a water-seal to prevent the passage of air or gases through a pipe with which it is connected. Traps are made in a great variety of shapes, the aim being in all to cause a portion of liquid to lodge in a depression and form a seal. The most common forms are without valves. Air-pipes used in connection with traps (see the figures) not only conduct away foul gases, but prevent any regurgitation of gas through the water or siphoning out of the water-seal resulting from changes of pressure in the soil-pipe, such as sometimes occurs in unventilated traps, undue pressure in which causes the gas to pass the water-seal, while a very slight fall below atmospheric pressure causes the water to siphon over into the soil-pipe and thus destroy the seal. Various special forms are called *gas-traps, grease-traps*, etc. Also called *trapping.*

5. A piece of wood, somewhat in the shape of a shoe, hollowed at the heel, and moving on a pivot, in which the ball is placed in playing trap-ball; also, the game itself. See *trap-ball.*

Indeed, I have heard you are a precious gentleman,
And in your younger [days] could play at *trap* well.
Shirley, Hyde Park, ii. 4.

6. A trap-door.

With that word he gan undon a *trappe.*
Chaucer, Troilus, iii. 741.

Doun ye scholde fallen there,
In a pyt syxty fadme deep:
Therfore beware, and tak good keep!
At the passyng ovyr the *trappe.*
Richard Coer de Lion (Weber's Metr. Rom., II. 162).

Traps under the stage so convenient that Ophelia could walk from her grave to her dressing-room with perfect ease. *J. Jefferson*, Autobiog., iv.

7. Any small complicated structure, especially one that is out of order; a rickety thing: so called in contempt. Compare *rattletrap.* [Colloq.]—**8.** A carriage. [Colloq.]

Florac's pleasure was to drive his Princess with four horses into Newcome. He called his carriage his *trappe*, his "dragne." *Thackeray*, Newcomes, lvii.

"I think you must make room for me inside the *trap.*" It is remarkable how much men despise close carriages, and what disrespectful epithets they invent for them.
Jean Ingelow, Off the Skelligs, xx.

9. Any device or contrivance to betray one into speech or act, or to catch one unawares; an ambush; a stratagem.

How will men then curse themselves for their own folly in being so easily tempted; and all those who laid *traps* and snares to betray them by? *Stillingfleet*, Sermons, I. xi.

10†. Contrivance; craft.

Some cunning persons that had found out his foible and ignorance of *trap* first put him in great fright.
Roger North, Examen, p. 549. (*Davies.*)

11. A sheriff's officer, or a policeman. [Slang.]

The *traps* have got him [for picking a pocket], and that 's all about it. *Dickens*, Oliver Twist, xiii.

Dick's always in trouble; . . . there 's a couple of *traps* in Belston after him now.
H. Kingsley, Geoffry Hamlyn, vi. (*Davies.*)

Figure-of-four trap. See *figure.*—**Running trap.** See *running-trap.*—**Smart as a steel trap.** See *smart*[1].—**Steel trap**, a trap for catching wild animals, consisting of two iron-toothed jaws, which close by means of a powerful steel spring when the animal disturbs the catch or tongue by which they are kept open.—**To be up to trap**†, **to understand trap**†, to be very knowing or wide-awake. [Slang.]

Crying out, Split my Wind Pipe, Sir, you are a Fool, and don't *understand Trap*, the whole World 's a Cheat.
Tom Brown, Works (ed. 1705). (*Ashton.*)

trap[1] (trap), *v.*; pret. and pp. *trapped*, ppr. *trapping.* [< ME. *trappen* (also in comp. *bitrappen*), < AS. **træppan* (in comp. *betræppan*) = MD. *trappen*, trap; from the noun.] **I.** *trans.* **1.** To catch in a trap: as, to *trap* foxes or beaver.

Mere vermin, worthy to be *trapp'd.*
Cowper, Task, ii. 683.

2. To insnare; take by stratagem: applied to persons.

Nimrod (snatching Fortune by the tresses) . . .
Leaues hunting Beastes, and hunteth Men to *trap.*
Sylvester, tr. of Du Bartas's Weeks, ii., Babylon.

3. To capture (fish) by means of a trap or trap-net.—**4.** To put in a trap and release to be shot at, as pigeons or glass balls.—**5.** In *plumbing*, to furnish with a trap.

To *trap* the soil pipe before its entrance into the drain.
The American, VII. 328.

6. *Theat.*, to furnish (a stage) with the requisite traps for the plays to be performed. *Saturday Rev.*, LXI. 20.—**7.** To stop and hold, as the shuttle of a loom in the warp, or gas, a liquid, heat, etc., by an obstruction or impervious or sealed inclosure, as in the case of liquids or gases, or by insulating substances, as with heat or electricity; specifically, to stop and hold by a trap for the purpose of removing, as air carried forward by or entangled in water flowing through pipes, etc., water deposited from compressed atmospheric air when cooled, or condensed from steam in the passage of the latter through pipes, or air from pipes or receptacles into or through which steam is to be passed.

II. *intrans.* **1.** To set traps for game: as, to *trap* for beaver.

He generally went out alone into the mountains, and would remain there *trapping* by himself for several months together, his lonely camps being often pitched in the vicinity of hostile savages. *The Century*, XLI. 771.

2. To handle or work the trap in a shooting-match.—**3.** To become stopped or impeded, as steam through accumulation of condensed water in a low part of a horizontal pipe, or in a steam-radiator by the presence of air which cannot escape, or the flow of water through a siphon by accumulation of air in the upper part of the bend, etc.

trap[2] (trap), *n.* [< D. *trap*, a step, degree, = MLG. *trappe, treppe*, G. *treppe*, a step, round of a ladder, = Sw. *trappa* = Dan. *trappe*, a stair: see *trap*[1] and *wentletrap.*] A kind of movable ladder or steps; a ladder leading up to a loft.
★ *Simmonds.* [Rare in the singular.]

trap[3] (trap), *n.* [= G. *trapp* = Dan. *trap*, < Sw. *trapp*, trap (rock), so called (by Bergmann, a Swedish mineralogist) with ref. to the terraced or stair-like arrangement which may be observed in many of these rocks, < *trappa*, a stair: see *trap*[2].] In *geol.*, any dark-colored rock having more or less of a columnar structure and apparently volcanic or eruptive in origin. It is the old and more or less metamorphosed eruptive rocks, and especially the various forms of basalt, which are most commonly thus designated. The name is a convenient one for use before the exact nature of the rock in question has been ascertained by microscopic examination.

The term *Trap* is an indefinite, and therefore sometimes a very convenient, term applied to eruptive rocks which cannot be identified in the field.
Woodward, Geol. of Eng. and Wales (2d ed.), p. 562.

Glassy trap. See *sordavalite.*

trap[4] (trap), *n.* [< ME. *trappe*, < OF. **trap, drap*, F. *drap* = Pr. *drap* = Cat. *drap* = Sp. Chaucer, Knight's Tale, l. 2032.

But leave these relicks of his living might
To deck his herce, and *trap* his tomb-blacke steed.
Spenser, F. Q., II. viii. 16.

Trap our shaggy thighs with bells.
B. Jonson, Masque of Oberon.

Their horses *trapped* in blue, with white crosses powdered on their hangings. *Froude*, Sketches, p. 175.

Trapa (trā′pä), *n.* [NL. (Linnæus, 1737), so called with ref. to the four spines of some species; abbr. of ML. *calcitrapa*, a caltrop: see *caltrop*.] A genus of plants, constituting the family *Trapaceæ*. It is characterized by an ovary with two cells, each with an elongated ovule pendulous from the partition; and by a nut-like spinescent fruit. There are 3 species, natives of tropical and subtropical parts of the old world, and extending to central Europe. They are aquatic plants with dimorphous leaves, one kind submerged, opposite, dissected, and root-like, the other a rosette of toothed rhombic leaves with inflated spongy petioles, floating on the surface. They bear axillary solitary whitish flowers with the parts in fours. The species are known as *water-caltrop*, from the horns or spines of the singular fruit, which contains a single large seed with a sweet and edible embryo which abounds in starch and is composed of two unequal cotyledons and a radicle which perforates the apex of the fruit in germinating. *T. natans*, the best-known species, native from central Africa to Germany and central Asia, often cultivated elsewhere, and now naturalized in eastern Massachusetts and New York, is known as *water-chestnut* or *water-nut*, sometimes as *Jesuits' nut*. Its seeds are ground and made into bread in parts of the south of Europe. *T. bicornis* of China, there known as *ling* or *leng*, is cultivated in ponds by the Chinese for its fruit, which resembles a bullock's head with two blunt horns. *T. bispinosa* yields the Singharanut of Cashmere, where it forms a staple food.

1. *Trapa bispinosa*; *a*, a flower. 2. Winged fruit of *T. bicornis*.

trapan (tra-pan′), *n.* [Also, less prop., *trepan*; < OF. *trappan*, **trapan*, a snare, trap, *trapant*, *trapen*, a trap-door; perhaps < **trappant*, ppr. of **trapper*, trap: see *trap*[1], *v.*] 1. A snare; trap. [Obsolete or archaic.]

Nothing but gins and snares and *trapans* for souls.
South, Sermons, III. iv.

2. Same as *trapanner*.

He had been from the beginning a spy and a *trepan*.
Macaulay.

trapan (tra-pan′), *v. t.*; pret. and pp. *trapanned*, ppr. *trapanning*. [Also, less prop., *trepan*; < *trapan*, *n.*] To insnare; catch by stratagem. [Obsolete or archaic.]

My steed 's *trapan'd*, my bridle 's broken.
Fire of Frendraught (Child's Ballads, VI. 179).

Lest I might be *trapan'd* and sold as a Servant after my arrival in Jamaica. *Dampier*, Voyages, II. ii. 4.

'Tis strange, a fellow of his wit to be *trepan'd* into a marriage. *Steele*, Lying Lover, ii. 1.

Cease your Funning;
Force or Cunning
Never shall my Heart *trepan*.
Gay, Beggar's Opera, air xxxvii.

trapanner (tra-pan′ėr), *n.* [Also, less prop., *trepanner*; < *trapan* + *-er*[1].] One who trapans or insnares.

The insinuations of that old pander and *trapanner* of souls. *South*, Sermons, VI. x.

trap-ball (trap′bâl), *n.* 1. An old game played by two or more persons with a ball, bat, and trap (see *trap*[1], *n.*, 5). By striking the end of the pivoted trap with the bat, the ball is driven some distance. The side or players out retire the striker by catching the batted ball on the fly or by bowling it to the trap from the place where it falls.

He that of feeble nerves and joints complains
From nine-pins, coits, and from *trap-ball* abstains.
W. King, Art of Cookery, l. 478.

Trap-ball . . . is anterior to cricket, and probably coeval with most of the early games played with the bat and ball; we trace it as far back as the commencement of the fourteenth century. *Strutt*, Sports and Pastimes, p. 176.

2. The ball used in the game of trap-ball.

He went in and out of Hawk's Gully like a *trapball*, and was in Springfield "in less than no time."
A. B. Longstreet, Georgia Scenes, p. 116.

trap-bat (trap′bat), *n.* A bat used in the game of trap-ball.

trap-bittle (trap′bit′l), *n.* A bat used in trap-ball. [Prov. Eng.]

trap-brilliant (trap′bril′yant), *n.* See *brilliant*.

trap-cellar (trap′sel′ăr), *n.* In a theater, the space immediately under the stage.

trap-cut (trap′kut), *n.* See *cut*.

trap-door (trap′dōr′), *n.* [< ME. *trappe-dore*; < ★*trap*[1] + *door*.] A door in a floor or roof which when shut is flush, or nearly so, with what surrounds it.

"Here at this secre *trappe-dore*," quod he.
Chaucer, Troilus, iii. 759.

Here is the *Trap-door*, the mouth of the rich mine, which We'l make bold to open. *Brome*, Queens Exchange, v.

Trap-door spider, one of several different spiders of large size, mostly of the genus *Cteniza*, whose nest is a tube with hinged lid which opens and shuts like a trap-door. Different spiders of this type construct their holes variously in size and shape, and with variable proportions of mud and cobweb, but the principle is the same with all. The trap-door arrangement is for their own hiding and security, not for the capture of their prey.

Texan Trap-door Spider (*Pachylomerus carolinensis*).

trape[1] (trāp), *v. i.*; pret. and pp. *traped*, ppr. *traping*. [Cf. D. MLG. G. *trappen*, tread, tramp: see *trap*[1], *trap*[2], *tramp*. Cf. also *trapes*.] 1. To trail along in an untidy manner; walk carelessly and sluttishly; run about idly; trapes.

I am to go *traping* with Lady Kerry and Mrs. Pratt to see sights all this day. *Swift*.

2. To trail on the ground. *Halliwell*. [Prov. Eng.]

trape[2] (trāp), *n.* [Cf. *trap*[1].] A pan, platter, or dish. *Halliwell*. [Prov. Eng.]

Trapelus (trap′e-lus), *n.* [NL. (Cuvier), < Gr. τραπελός, easily turned, < τρέπειν, turn: see *trope*.] A genus of agamoid lizards, with the scales small and destitute of spines. They have no pores on the thighs. *T. ægyptius* is of small size, can puff out its body, and is remarkable for its changes of color.

trapes (trāps), *v. i.* [Also *traipse*; an extension of *trape*[1], or from the noun *trapes*.] To gad or flaunt about idly.

The daughter, a tall, *trapesing*, trolloping, talkative maypole. *Goldsmith*, She Stoops to Conquer, i. 2.

How am I to go *trapesing* to Kensington in my yellow satin sack before all the fine company?
Thackeray, Henry Esmond, ii. 15.

trapes (trāps), *n.* [Also *traipse*: see *trapes*, *v.*] 1. A slattern; an idle, sluttish woman; a jade.

From door to door I'd sooner whine and beg . . .
Than marry such a *trapes*.
Gay, What d'ye call it? i. 1.

2. A going about; a tramp.

It's such a toil and a *trapes* up them two pair of stairs.
Mrs. Henry Wood, The Channings, lix.

trapezate (trap′ē-zāt), *a.* [< *trapezium* + *-ate*[1].] Trapeziform.

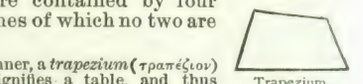
trapeze (trā-pēz′), *n.* [< F. *trapèze* = Sp. *trapecio* = Pg. *trapezio*, < L. *trapezium*, < Gr. τραπέζιον, a trapezium: see *trapezium*.] 1. A trapezium.—2. In *gymnastics*, a swing consisting of one or more cross-bars, each suspended by two cords at some distance from the ground, on which various exercises or feats of strength and agility are performed.

trapezia, *n.* Latin plural of *trapezium*.

trapezial (trā-pē′zi-al), *a.* [< *trapezius* + *-al*.] In *anat.*, pertaining to the trapezius: as, *trapezial* fibers or action.

trapezian (trā-pē′zi-an), *a.* [< *trapezium* + *-an*.] In *crystal.*, having the lateral planes composed of trapeziums situated in two ranges between two bases.

trapeziform (trā-pē′zi-fôrm), *a.* [= F. *trapéziforme*, < L. *trapezium*, trapezium, + *forma*, form.] 1. Having the shape of a trapezium.—2. In *zoöl.*, trapezoidal. [A rare and incorrect use.]



The mentum is *trapeziform*. *Waterhouse*.

Trapeziform map-projection. See *projection*.

trapezihedron (trā-pē-zi-hē′drọn), *n.* Same as *trapezohedron*.

trapezii, *n.* Plural of *trapezius*.

trapezium (trā-pē′zi-um), *n.*; pl. *trapezia*, *trapeziums* (-ä, -umz). [< L. *trapezium*, < Gr. τράπεζιον, a table or counter, a trapezium (so called as being four-sided like such a table), dim. of τράπεζα, a table (so called as having four feet or legs), < τετρα-, four, reduced to τρα-, + πούς (ποδ-) = E. *foot*. Cf. *tripod*.] 1. In *geom.*, a plane figure contained by four straight lines of which no two are parallel.

Trapezium.

In like manner, a *trapezium* (τραπέζιον) originally signifies a table, and thus might denote any form; but as the tables of the Greeks had one side shorter than the opposite one, such a figure was at first called a *trapezium*. Afterwards the term was made to signify any figure with four unequal sides, a name being more needful in geometry for this kind of figure than for the original form.
Whewell, Philos. of Inductive Sciences, I., p. 1.

2. In *anat.*: (*a*) A cross-band of fibers near the lower border of the pons Varolii, passing from the region of the accessory auditory nucleus to the raphe. They may come, in part, down from the cerebellum or up from the restiform body, as well as from the region mentioned, and seem to terminate in the superior olive of the same side, or in the superior olive, the lemniscus, and accessory auditory nucleus of the opposite side. A group of large-sized ganglion-cells among the fibers is called the *nucleus trapezii*. Also called *corpus trapezoides*. (*b*) The bone on the radial side of the distal row of carpal bones, articulating with the metacarpal bone of the thumb; carpale I. of the typical carpus, whatever its actual shape. Also called *multangulum majus*. See cuts under *Perissodactyla*, *scapholunar*, and *hand*. — **Nucleus trapezii.** See def. 2 (*a*). — **Oblique ridge of the trapezium.** See *oblique*.

trapezius (trā-pē′zi-us), *n.*; pl. *trapezii* (-ī). [NL. (sc. *musculus*), < L. *trapezium*, q. v.] A large superficial muscle of the back of the neck and adjacent parts. It arises from the external occipital protuberance, the inner third of the superior curved line of the occipital bone, the ligamentum nuchæ and the spines of the last cervical and of all the thoracic vertebræ, and is inserted into the outer third of the clavicle and the acromion and spine of the scapula. Each trapezius is triangular, and with its fellow of the opposite side forms a somewhat diamond-shaped figure, little like the trapezium of geometry. Also called *cucullaris* and *cowl-muscle* or *shawl-muscle*. See cut under *muscle*[1].

trapezohedral (trā-pē-zō-hē′drạl), *a.* [< *trapezohedr*(*on*) + *-al*.] In *crystal.*, pertaining to or having the form of a trapezohedron. — **Trapezohedral hemihedrism, tetartohedrism.** See the nouns.

trapezohedron (trā-pē-zō-hē′drọn), *n.* [NL., < Gr. τράπεζα, a table, a trapezium base, + ἕδρα, a seat, side.] 1. In *crystal.*, a solid belonging to the isometric system, bounded by twenty-four equal and similar trapezoidal planes; a tetragonal trisoctahedron. — 2. Any solid having trapezoidal faces, as the trigonal trapezohedron of a quartz crystal. See *tetartohedrism*.

Tetragonal Trisoctahedron, or Trapezohedron.

★ Also *trapezihedron*.

trapezoid (trā-pē′zoid), *a.* and *n.* [= F. *trapézoïde* = Sp. *trapezoide* (NL. *trapezoides*, as a noun also *trapezoideum*), < Gr. τραπεζοειδής, < τράπεζα, table, + εἶδος, form.] **I.** *a.* Having the shape of a trapezoid. See II., 1.

Segments much compressed, *trapezoid*.
H. C. Wood, Fresh-Water Algæ, p. 158.

Trapezoid bone. See II., 2. — **Trapezoid ligament.** See *ligament*. — **Trapezoid line.** See *line*[2].

II. *n.* 1. In *geom.*, a four-sided figure having two of its sides parallel. — 2. In *anat.* and *zoöl.*, the trapezoid bone, one of the bones of the wrist, so called from its shape; the second one of the distal row of carpal bones, on the radial or thumb side, between the trapezium and the magnum, in special relation with the head of the second metacarpal bone; carpale II. of the typical carpus. Also called *multangulum minus*, and *trapezoides*, *trapezoideum*. See cuts under *Artiodactyla*, *pisiform*, *hand*, and *scapholunar*.

Trapezoid, 1.

trapezoidal (trap-ē-zoi′dạl), *a.* [< *trapezoid* + *-al*.] 1. Having the form of a trapezoid: as, the *trapezoidal* bone or ligament (in anatomy).

The form of each vaulting compartment of an apsidal aisle is, of course, *trapezoidal*.
C. H. Moore, Gothic Architecture, p. 100.

2. In *crystal.*, having the surface composed of twenty-four trapeziums, all equal and similar. — **Trapezoidal wall.** See *wall*[1].

trapezoides, trapezoideum (trap-ē-zoi′dēz, -dē-um), *n.* [NL.: see *trapezoid*.] In *anat.*, same as *trapezoid*.

trapezoidiform (trap-ē-zoi′di-fôrm), *a.* [< NL. *trapezoides*, trapezoid, + L. *forma*, form.] In *entom.*, noting an extended body, as a joint of

an antenna, the cross-section of which is everywhere a trapezoid.

trapezophoron (trap-ē-zof′ō-ron), *n.* [NL., < Gr. τραπεζα, table, + φέρειν = E. *bear*[1].] In the *Gr. Ch.*, same as *ependytes* (*b*).

trapfall (trap′fâl), *n.* A trap-door so made as to give way beneath the feet, and cause a person to fall through.

For on a Bridge he custometh to fight,
Which is but narrow, but exceeding long;
And in the same are many *trap-fals* pight,
Through which the rider downe doth fall through oversight. *Spenser*, F. Q., V. ii. 7.

trap-fisher (trap′fish″ėr), *n.* One who fishes with a trap or trap-net.

trap-hole (trap′hōl), *n.* 1. A hole closed by a trap-door.—2. *Milit.* See *trous-de-loup*.

trap-hook (trap′hůk), *n.* A kind of fish-hook which works with a spring or snap.

trap-net (trap′net), *n.* Same as *trap*[1], 3.

trappean (trap′ē-an), *a.* [< *trap*[3] (*trapp*) + *-e-an*.] Pertaining to or of the nature of trap or trap-rock.—**Trappean ash**, a scoriaceous fragmental form of the old lava formerly very commonly designated as *trap*, and now by various other names. (See *trap*[3].) The trappean ash of the Lake Superior mining region, somewhat important for the copper which it contains, is frequently designated as the *ash-bed*.

trapped (trapt), *a.* [< *trap*[1] + *-ed*[2].] 1. Fitted or provided with a trap or traps.—2. In *gem-cutting*, having the trap-cut.

trapper[1] (trap′ėr), *n.* [< *trap*[1] + *-er*[1].] 1. One who makes a business of trapping wild animals, usually such as yield fur, as the marten or sable, mink, otter, beaver, and muskrat.

"A hunter, I reckon?" the other continued. . . . "You are mistaken, friend, in calling me a hunter; I am nothing better than a *trapper*." "I see but little difference whether a man gets his peltry by the rifle or by the trap," said the ill-looking companion of the emigrant. *J. F. Cooper*, The Prairie, ii.

2. A trap-fisher. [Rhode Island.]—3. In *mining*, a boy or girl in a coal-mine who opens the air-doors of the galleries for the passage of the coal-wagons.—4. A horse for use in a trap. [Colloq.]

Sound and shapely half-bred horses, ponies, nags, *trappers*, hacks, chargers, harness-horses, and hunters. *St. James's Gazette*, Feb. 2, 1887. (*Encyc. Dict.*)

trapper[2]† (trap′ėr), *n.* [< ME. *trapper*, *trappar*, *trappour*, *trappure*, < OF. **trappeure*, < ML. *trappatura*, trappings, housing, < **trappare*, cover with trappings: see *trap*[4], *v.*] The housing and defensive armor of a horse, especially of a horse caparisoned for a just or tournament: generally in the plural. Compare *bard*[2].

trappings, *n. pl.* See *trapping*.

Trappist (trap′ist), *n.* and *a.* [< F. *Trappiste*, so called from the abbey of *La Trappe* in France: see def.] **I.** *n.* 1. A member of a monastic body, a branch of the Cistercian order. It is named from the village of Soligny-la-Trappe, in the department of Orne, France, where the abbey of La Trappe was founded in 1140 by Rotrou, Count of Perche. The abbey soon fell into decay, and was governed for many years by titular or commendatory abbots. De Rancé (1626–1700), who had been commendatory abbot of La Trappe from his boyhood, became its actual abbot in 1664, and thoroughly reformed and reorganized the order. The rules of the order are noted for their extreme austerity, and inculcate extended fasts, severe manual labor, almost perpetual silence, abstinence from flesh, fish, etc., and rigorous asceticism in general. The order was repressed in France during the Revolutionary and Napoleonic periods. There are branch monasteries in France, Belgium, Great Britain, Italy, etc., and two in the United States (Abbey of Gethsemane, Kentucky, and Melleray, Iowa).

2. [*l. c.*] In *ornith.*, a South American puff-bird or fissirostral barbet of the genus *Monasa* (or *Monacha*). Also called *nun-bird*. Both are book-names, given from the somber plumage, which also suggested *Monasa*. See cut under *nun-bird*.

II. *a.* Of or pertaining to the Trappists.

Trappistine (trap′is-tin), *n.* [< F. *Trappistine*, a nun of the order of La Trappe; as *Trappist* + *-ine*[2].] 1. II. *n.* 1. Anything that traverses or crosses; a bar or barrier. (*a*†) A curtain, usually low, and arranged to be drawn; a sliding screen; in the old theater, a curtain used as a substitute for scenes or scenery.

Men drynken and the *travers* drawe anon.
Chaucer, Merchant's Tale, l. 573.

I will see them:
They are behind the *traverse;* I'll discover
Their superstitious howling.
Webster, White Devil, v. 4.

(*b*†) A railing or lattice of wood or metal.

The Communion Table . . . he injoyned to be placed at the East end, upon a graduated advance of ground, with the ends inverted, and a woodden *traverse* of railes before it, to keep Profanation off.
H. L'Estrange, Reign of K. Charles (ed. 1655), p. 137.

(*c*) A seat or stall in a church with a lattice, curtain, or screen before it. [Scotch.]

James regularly attended his chapel every forenoon in his *traverse* (retired seat with lettice), and Margaret was as formal. *Pinkerton's Hist. Scot.*, II. 83, note. (*Jamieson.*)

(*d*) A strong beam of hard wood laid across several loose pieces of square timber, and having these pieces secured to it so as to form a crib; also, a transverse piece in a timber-framed roof. (*e*) In *weaving*, a skeleton frame to hold the bobbins of yarn, which are wound from it upon the warp-frame. *E. H. Knight.*

2. That which thwarts, crosses, or obstructs; an untoward accident.

If, in the *traverses* of our life, discontents and injuries be done, Jesus teaches how the injured person should demean himself. *Jer. Taylor*, Works (ed. 1835), I. 270.

In all *traverses* of fortune, in every colour of your life, maintaining an inviolable fidelity to your Sovereign.
Dryden, Ded. of Plutarch's Lives.

3†. A dispute; a controversy.

And whanne they were at *travers* of thise thre,
Everiche holdynge his opinioun.
Lydgate, MS. Soc. Antiq. 134, f. 18. (*Halliwell.*)

The olde men of your age ought much to flee brawling with your aduersaries, either *trauerse* in words with your neighbours.
Guevara, Letters (tr. by Hellowes, 1577), p. 183.

4. In *fort.*, an earthen mask, similar to a parapet, thrown across the covered way of a permanent work to protect it from the effects of an enfilading fire. It generally extends from the counterscarp to the passage left between it and the interior slope of the glacis to serve as a communication throughout the covered way.

The *trauerses* were made on ech side with good artillery great and small. *Hakluyt's Voyages*, II. 86.

5. The act of traversing or traveling over; a passage; a crossing.

The Readers . . . could not so well acquiesce in my Description of Places, &c., without knowing the particular *Traverses* I made among them.
Dampier, Voyages, I., Pref.

In the first of those *traverses* we were not able to penetrate so far north by eight or ten leagues as in the second.
Cook, Third Voyage, vi. 4.

6. In *gun.*, the turning of a gun so as to make it point in any required direction.—7. *Naut.*, the crooked or zigzag line or track described by a ship when compelled by contrary winds or currents to sail on different courses. See *traverse sailing*, under *sailing.*—8. In *arch.*, a gallery or loft of communication from one side or part of the building to another, in a church or other large structure.—9. In *law*, a denial; especially, a denial, in pleading, of any allegation of matter of fact made by the adverse party. At common law, when the traverse or denial comes from the defendant the issue is tendered in this manner: "and of this he puts himself on the country." When the traverse lies on the plaintiff, he prays "this may be inquired of by the country." The technical words introducing a traverse at common law after a plea of new matter in avoidance are *absque hoc*, without this—that is, denying this which follows.

Item, I wolde that William Barker shulde send me a copye of the olde *traverse* of Tychewell and Beyton.
Paston Letters, I. 518.

10. In *geom.*, a line lying across a figure or other lines; a transversal.—11†. A turning; a trick; a pretext.

Many shifts and subtile *traverses* were overwrought by this occasion.
Proceedings against Garnet (1606). (*Imp. Dict.*)

Things which could afford such plausible pretenses, such commodious *traverses* for ambition and Avarice to lvrke behind. *Milton*, Prelatical Episcopacy.

12. In *her.*, a bearing resembling a point or pile—that is, a triangle, of which one side corresponds with either the sinister or dexter edge of the escutcheon, and the point of which reaches nearly or quite to the opposite edge. It is, therefore, the same as *point dexter removed* or *point sinister removed.*—13. A sliding screen or barrier. *E. H. Knight.*—14. In the manufacture of playing-cards, one of the eight strips into which each sheet of cardboard is cut. Each traverse makes five cards.—15. Same as *trevis*, 2. *Halliwell.* [Prov. Eng.]—16. A bolster.—**In traverse**†. (*a*) Again; back; around.

As soone as the sauage man hir saugh comynge he turned his heed *in trauerse* and be-gan to laughe as in scorne.
Merlin (E. E. T. S.), iii. 429.

(*b*) Across; in opposition.

Wherein wee sticke and stande *in trauers*, shewyng what we haue to saie in our owne behalfe.
Sir T. Wilson, Art of Rhetoric, p. 7.

On traverse†, **a traverse**†. Same as *in traverse.*

Than Grisandol com toward hym and swetly praide hym to telle wherefore he lough, and he loked proudly *on trauerse.*
Merlin (E. E. T. S.), iii. 425.

To cast a point of traverse. See *cast*[1].—**Tom Cox's traverse** (*naut.*), a slang term formerly used to signify an attempt to shirk or avoid work by pretending to be otherwise busy.—**Traverse of an indictment,** in *law:* (*a*) The denial of an indictment by a plea of not guilty. (*b*) The postponement of the trial of an indictment after a plea of not guilty thereto.—**Traverse of office,** a proceeding to impeach the truth of an inquest of office.—**With traverse**†, in return.

If the dog in pleading would pluk the bear by the throte, the bear *with trauers* would claw him again by the skalp.
Robert Laneham, Letter from Kenilworth (1575), quoted [in Ribton-Turner's Vagrants and Vagrancy, p. 111.

traverse (trav'ėrs or trā-vėrs'), *adv.* [< *traverse, a.*] Athwart; crosswise; transversely.

He . . . swears brave oaths and breaks them bravely, quite *traverse*, athwart the heart of his lover.
Shak., As you Like it, iii. 4. 45.

He through the armed files
Darts his experienced eye, and soon *traverse*
The whole battalion views. *Milton*, P. L., i. 568.

★ **traverse** (trav'ėrs), *v.*; pret. and pp. *traversed*, ppr. *traversing.* [< F. *traverser* = Pr. *traversar* = Sp. *travesar* = It. *traversare*, < ML. *transversare*, go across: see *transverse*, *v.*, and cf. *traverse, a.*] **I.** *trans.* 1. To lay athwart, or in a cross direction; cause to cross.

Myself and such . . .
Have wander'd with our *traversed* arms and breathed
Our sufferance vainly. *Shak.*, T. of A., v. 4. 7.

The parts [of the body] should be often *traversed* (or crossed) by the flowing of the folds.
Dryden, tr. of Dufresnoy's Art of Painting.

Fal. Put me a caliver into Wart's hand, Bardolph.
Bard. Hold, Wart, *traverse;* thus, thus, thus.
Shak., 2 Hen. IV., iii. 2. 291.

They watch'd the motions of some foe,
Who *traversed* on the plain below.
Scott, Marmion, vi. 18.

3. In *fencing*, to use the posture or motions of opposition or counteraction.

To see thee fight, to see thee foin, to see thee *traverse.*
Shak., M. W. of W., ii. 3. 25.

4. To turn, as on a pivot; move round; swivel: as, the needle of a compass *traverses.*—5. To digress in speaking. *Halliwell.*—6. In the *manège*, to move or walk crosswise, as a horse that throws his croup to one side and his head to the other.—**Traversing elevator,** a traveler or traveling crane.—**Traversing jack.** (*a*) A jack adapted for lifting engines or cars and drawing them upon the rails. (*b*) A lifting-jack with a standard movable upon its bed, so that it can be applied to different parts of an object, or can move an object horizontally while the bed remains fixed. *E. H. Knight.*—**Traversing mandrel.** See *mandrel.*—**Traversing plate** (*milit.*), one of two iron plates nailed on the hind part of a truck-carriage of guns where the handspike is used to traverse the gun.—**Traversing platform,** in *artillery*, a platform to support a gun and carriage, which can be easily traversed or turned round a real or imaginary pivot near the muzzle by means of its trucks running on circular iron plates fastened to masonry. There are *common, dwarf,* and *casemate traversing platforms.*—**Traversing pulley,** a pulley which runs over the rod or rope which supports it: applied in many ways for the transportation of weights.—**Traversing sawing-engine,** a three-cylinder metal-sawing engine traveling longitudinally as it cuts the material, which remains stationary. The power is derived from a hydraulic cylinder, and the speed is regulated by a slide-valve. Such saws for cutting cold steel are made of soft iron, and are caused to revolve with such speed as to melt the sparks of steel.—**Traversing screw-jack,** a traversing jack.

traverse-board (trav'ėrs-bōrd), *n. Naut.*, a thin circular piece of board, marked with all the points of the compass, and having eight holes bored for each point, and eight small pegs hanging from the center of the board. It was formerly used to record the different courses run by a ship during the period of a watch (four hours or eight half-hours). This record is kept by putting a peg in that point of the compass whereon the ship has run each half-hour.

traverse-circle (trav'ėrs-sėr″kl), *n.* A circular track on which the chassis traverse-wheels of a barbette carriage, mounted with a center or rear pintle, run while the gun is being pointed. The arrangement enables the gun to be directed to any point of the horizon. In permanent fortifications it is of iron, and is let into the stone-work; in field-works it is frequently made up of pieces of timber mitered together and embedded in the earth. *E. H. Knight.*

traversed (trav'ėrst), *a.* In *her.*, same as *contourné.*

traverse-drill (trav'ėrs-dril), *n.* 1. A drill in which the drill-stock has a traverse motion for adjustment of the distances between holes formed by it.—2. A drill for boring slots. It is so arranged that, when the required depth has been attained, a lateral movement can be given to either the drill or the work. *E. H. Knight.*

traverser (trav'ėr-sėr), *n.* [< *traverse* + *-er*[1].] 1. One who traverses; specifically, in *law*, one who traverses or denies his adversary's allegation.

The *traversers* appealed against the judgment, which was reversed by the House of Lords.
W. S. Gregg, Irish Hist. for Eng. Readers, p. 147.

2. In *rail.*, a traverse-table.

traverse-saw (trav'ėrs-sâ), *n.* A cross-cut saw which moves on ways transversely to the piece. *E. H. Knight.*

traverse-table (trav'ėrs-tā″bl), *n.* 1. In *navig.*, a table containing the difference of latitude and the departure made on each individual course and distance in a traverse, by means of which the difference of latitude and departure made upon the whole, as well as the equivalent single course and distance, may be readily determined. For facilitating the resolving of traverses, tables have been calculated for all units of distance run, from 1 to 300 miles or more, with every angle of the course which is a multiple of 10′, together with the corresponding differences of latitude and departure. Tables in common use by navigators give the course for every quarter-point and for every degree, and the distance up to 300 miles. Such a table is useful for many other purposes.

2. In *rail.*, a platform having one or more tracks, and arranged to move laterally on wheels, for shifting carriages, etc., from one line of rails to another; a traverser.

travertin, travertine (trav'ėr-tin), *n.* [= F. *travertin*, < It. *travertino*, an altered form (due to some interference) of *tiburtino*, < L. *tiburtinus*, sc. *lapis*, travertin, lit. 'stone of Tibur,' so called as being formed by the waters of the Anio at Tibur, < *Tibur*, an ancient town of Latium, now *Tivoli.*] The calcareous deposit from springs which occurs in many localities

in Italy, and is extensively quarried for use in building. It is a soft, porous straw-colored rock, easily wrought when freshly quarried, and afterward hardening, and seeming, under the climate of Italy, to be very durable. The exterior walls of the Colosseum and of St. Peter's are built of this material.

Blackening in the daily candle-smoke,
They molder on the damp wall's *travertine*.
Browning, Pictor Ignotus.

travesst, *n.* Same as *trevis*.

travest, *v. t.* [In pp. *travested*; < F. *travestir*, pp. *travesti*, disguise, travesty, lit. cause a change in clothing, < L. *trans*, over, + *vestire* (> OF. *vestir*, F. *vêtir*), clothe: see *vest*, *v.*] To disguise; travesty. [Rare.]

Travested, shifted in apparel [dressed in the habit of a different sex, ed. 1706], disguised. *E. Phillips*, 1678.

travesty (trav'es-ti), *a.* [< OF. *travesti*, pp. of *travester*, disguise: see *travesty*, *v.*] Disguised; burlesqued.

Scarronides: or Virgil *Travestie*, being the first book of Virgil's Æneis In English Burlesque; London, 1864. By Charles Cotton. [Title.]

travesty (trav'es-ti), *v. t.*; pret. and pp. *travestied*, ppr. *travestying*. [< *travesty*, *a.*; cf. *travest*.] **1†.** To disguise by a change of vesture.

Aristophanes, in the beginning of his comedy called the Knights, . . . introduces the two generals, Demosthenes and Nicias, *travestied* into Valets, and complaining of their master. *Dr. Burney*, Hist. Music, I. 352. (*Jodrell.*)

2. In *lit.*, to give such a literary treatment or setting to (a serious production) as to render it ridiculous or ludicrous; hence, by extension, to burlesque; imitate so as to render absurd or grotesque. See *travesty*, *n.*

Indeed, uncle, if I were as you, I would not have the grave Spanish habit so *travestied*; I shall disgrace it, . . . I vow and swear.
Wycherley, Gentleman Dancing-Master, iv. 1.

travesty (trav'es-ti), *n.*; pl. *travesties* (-tiz). [< *travesty*, *v.*] In *lit.*, a burlesque treatment or setting of a subject which had originally been handled in a serious manner; hence, by extension, any burlesque or ludicrous imitation, whether intentional or not; a grotesque or absurd resemblance. *Travesty* is in strict use to be distinguished from *parody*: in the latter the subject-matter and characters are changed, and the language and style of the original are humorously imitated; in *travesty* the characters and the subject-matter remain substantially the same, the language becoming absurd or grotesque.

The extreme popularity of Montemayor's "Diana" not only caused many imitations to be made of it, . . . but was the occasion of a curious *travesty* of it for religious purposes. *Ticknor*, Span. Lit., III. 84.

He was driven to find food for his appetite for the marvellous in fantastic horrors and violent *travesties* of human passion. *E. Dowden*, Shelley, I. 95.

One of the best of the many amusing *travesties* of Carlyle's style, a *travesty* which may be found in Marmaduke Savage's "Falcon Family," where one of the "Young Ireland" party praises another for having "a deep no-meaning in the great fiery heart of him."
R. H. Hutton, Modern Guides, p. 17.

trawl (trâl), *v.* [< OF. *trauler*, *troller*, *troler*, F. *trôler*, drag about, stroll about, > E. *troll*: see *troll*[1].] **I.** *trans.* **1.** To drag, as a trawl-net.

The net is *trawled* behind and about the herd so as to drive them into the fiord and keep them there.
Fisheries of U. S., V. ii. 306.

2. To catch or take with a trawl-net.

A specimen of Triassic conglomerate, *trawled* seven miles south of the Deadman headland, . . . is described.
Philos. Mag., 5th ser., XXX. 199.

II. *intrans.* To use a trawl-line or trawl-net; fish with a trawl.=**Syn.** *Trawl*, *Troll*. These words and their derivatives are interchangeable in one sense, and not in another. Both are used of surface-fishing, in which the line is trailed along the surface after a boat; *troll* is more frequent than *trawl* in literary use. *Trawl* alone is used of bottom-fishing with a set-line.

trawl (trâl), *n.* [< *trawl*, *v.*] **1.** A buoyed line, often of great length, to which short lines with baited hooks are attached at suitable intervals; a trawl-line. Each section or single length of a trawl is a skate. In England a single trawl is usually forty fathoms in length, with twenty-six hooks attached by snoods. As many of these lines are united as it is thought expedient to join, and are shot across the tide as the vessel sails along, so that the snoods may hang clear. There are usually anchors near the ends at intervals of forty fathoms, to keep the line in position, as well as buoys to float it. The trawl used in America consists of a long line from forty fathoms to several miles in length, which is anchored at each end to the bottom, the position of the ends being shown by buoys; lines about 2 to 6 feet long, with a hook at the end, are attached at intervals of about 3½ to 15 feet. In some cases the hooks on a single line number as many as five thousand; on the coasts of Maine and Massachusetts the usual number is from four hundred to three thousand. Bait of the proper kind is placed upon the hooks, and the lines are allowed to remain down through a part of a tide. If set at half-tide, they are sometimes overhauled at intervals of half an hour or an hour. When taking them up for examination, the fisherman, beginning at one end close to the buoy, lifts the main line to the surface and carries it along over one side of the boat, which is hauled along under the line toward the other end. The fish found upon the hooks are dropped into the boat by the man who pulls up the line, while a companion, as the line passes over the boat, puts new bait, if necessary, upon the hooks and drops them again into the water. The principal fish taken in this way on the United States coast are the cod, hake, haddock, and skate. It is also called *trot-line*, and in Great Britain is known as *long-line*, *spillan*, *spillar*, *spiller*, *spilliard*, or *bultow*; the last is also the Canadian name.

2. A large bag-net, with a wide mouth held open by a frame or other contrivance, and often having net wings on each side of the mouth, designed to be dragged along the bottom by a boat. A beam about 14 feet long, made of stout iron gas-pipe, has fitted to it a net about 40 feet deep, fine toward the end and provided with numerous pockets, for the capture of bottom-fishes, as well as crabs, lobsters, etc. It cannot be used where the bottom is rocky or rough. In Great Britain the trawl-net is a large triangular purse-shaped net, usually about 70 feet long, about 40 feet broad at the mouth, diminishing to 4 or 5 at the cod, which forms the extremity furthest from the boat, and is about 10 feet long, and of nearly uniform breadth. The mouth is kept extended by a wooden beam. The net is furnished with two interior pockets, one on each side, for securing the fish turning back from the cod. Trawl-nets in various forms are also used for submarine exploration in deep water.

It is very desirable that the name *trawl* should be restricted to this net [flattened bag-net, often 100 feet long].
Encyc. Brit., IX. 246.

Beam-trawl, a large net bag with a long beam across its open mouth, which is kept about 2 or 3 feet from the bottom by an iron framework at each end of the beam. As it is dragged along by the fishing-boat the fish pass into the net, and are caught in the pockets at the sides.—**Runner of a trawl**, that part of a trawl which stretches along the bottom, and to which the shorter lines with the hooks are attached.—**To set a trawl**, to put a trawl in working order.—**To strip a trawl**, to remove the hooks from the runner.—**To throw the trawl**, to set a trawl.

trawl-anchor (trâl'ang″kor), *n.* A small anchor used on trawl-lines.

trawl-beam (trâl'bēm), *n.* The beam by means of which the mouth of a trawl-net is held open, usually about 40 or 50 feet long. See *trawl*, 2.

trawl-boat (trâl'bōt), *n.* A small boat used to set or tend the trawl-line or trawl-net.

trawler (trâ'lėr), *n.* [< *trawl* + *-er*[1].] **1.** One who trawls, or fishes with a trawl-line or trawl-net.—**2.** A vessel engaged in trawling. Trawlers for cod average about seventy tons burden.

Gentleman Jan himself, the rightful bully of the quay, . . . owning a tidy *trawler* and two good mackerel-boats.
Kingsley, Two Years Ago, ii.

trawler-man (trâ'lėr-man), *n.* One who takes fish with a trawl; a trawler.

Trawler-Men, a sort of Fisher-Men that us'd unlawful Arts and Engines, to destroy the Fish upon the River Thames; among whom some were styl'd Hebber-men, others Tincker-men, Peter-men, &c. *E. Phillips*, 1706.

trawl-fish (trâl'fish), *n.* See *fish*[1].

trawl-fisherman (trâl'fish″ėr-man), *n.* A trawler.

trawl-head (trâl'hed), *n.* One of two upright iron frames at the ends of a trawl-beam. [Eng.]

trawling (trâl'ing), *n.* [Verbal n. of *trawl*, *v.*] A mode of fishing. (*a*) Same as *trolling*: as, *trawling* for bluefish with a spoon trailed after a sailing-boat. (*b*) In the United States and Canada, the use of the trawl or trawl-line in fishing; the act of fishing with such a trawl. (*c*) In Great Britain, the use of the trawl or trawl-net; the act or occupation of fishing with such a trawl. It is the mode chiefly adopted in deep-sea fishing, and by it most of the fish for the London market are taken, with the exception of herring and mackerel. Cod, whiting, and other white fish are taken by it in large numbers, and some kinds of flatfish, as soles, can scarcely be taken in any other way. Trawling can be practised only on a smooth bottom, as a rough bottom would destroy the net. The term is often incorrectly applied in Scotland to a mode of catching herrings by fishing with the seine. Also called *trailing*.

"Beam-*trawling*" . . . consists in towing, trailing, or trawling a flattened bag-net, often 100 feet long, over the bottom in such a manner as to catch those fish especially which naturally keep close to or upon the ground.
Encyc. Brit., IX. 246.

trawl-keg (trâl'keg), *n.* A keg used to buoy a trawl-line, or to mark its position, as by means of a flag.

trawl-line (trâl'līn), *n.* Same as *trawl*, 1.

trawl-net (trâl'net), *n.* Same as *trawl*, 2.

trawl-roller (trâl'rō″lėr), *n.* The roller used on a dory in hauling the trawl. [New Eng.]

trawl-warp (trâl'wârp), *n.* The warp or rope of a trawl-net, by means of which it is dragged.

trawn (trân), *n.* The name given in the district of St. Ives, Cornwall, to what is called in other parts of that mining region a *cross-course*.

tray[1] (trā), *n.* [Early mod. E. also *treie*; < ME. *treye*, < AS. *treg* (glossed by L. *alveolum*), tray; connection with *trough* is doubtful.] **1.** A trough, open box, or similar vessel used for different domestic and industrial purposes. Specifically—**2.** A flat shallow vessel or utensil with slightly raised edges, employed for holding bread, dishes, glassware, silver, cards, etc., and for other household uses. Trays are made in many shapes of wood, metal, papier-mâché, etc., and have various names according to their use, as *tea-tray*, *bread-tray*, *silver-tray*, etc. Thin trays of veneers are also used to pack butter, lard, and light materials for transport in small quantities. The tray differs from the salver only in size. Trays are used also in mining, as a *washing-tray*, a *picking-tray*.

Various priestly servants, all without shoes, came in, one of them bearing a richly embossed silver *tray*, on which were disposed small spoons filled with a preserve of lemon-peel. *R. Curzon*, Monast. in the Levant, p. 288.

3. A wide shallow coverless box of wood or cardboard, used in museums for packing and displaying specimens of natural history. Trays for small mammals, birds, etc., are usually from 1 to 3 feet long, half as wide, and from 1 to 3 inches deep; they are set in tiers, often in drawers of cabinets, or form such drawers. Trays for eggs are usually of light cardboard, from 1 by 2 to 4 by 8 inches wide and very shallow, fitted in a single layer in larger wooden trays or cabinet-drawers. The drawers or frames for holding eggs in an incubator are usually called trays. These are generally skeleton frames of wood, with bottoms of wire netting, and transverse wooden cleats fixed at intervals corresponding to the diameter of an egg, to prevent the eggs from rolling off.

4. A shallow and usually rectangular dish or pan of crockery ware, gutta-percha, papier-mâché, metal, or other material, used in museums for holding wet (alcoholic) specimens when these are overhauled for study, etc. Similar trays are used for ova in fish-culture, for many chemical operations, in photography, etc.— **5†.** A hod.

A *treie*, or such hollowe vessel . . . that laborers carrie morter in to serue tilers or plasterers. *Baret*, 1580.

6. A hurdle. [Prov. Eng.]

I have heard or read of these "wicker hurdles" being called *trays*, but I do not now recollect in what district. I do, however, remember the phrase "the sheep showed well in the *trays*," which was explained to mean the small square pens of hurdles into which, at auctions or lambing time, small lots of sheep are separated.
The Field, Jan. 23, 1886. (*Encyc. Dict.*)

tray[2]**†**, *n.* [< ME. *traye*, *treie*, *treze*, < AS. *trega*, vexation, annoyance, = OS. *trego* = Icel. *tregi*, grief, woe, = Goth. *trigo*, grief, sorrow; cf. *tray*[2], *v.*] Trouble; annoyance; anger.

treadle (tred′l), *n.* [Also *treddle*; < ME. *tredyl*, < AS. *tredel*, a step, < *tredan*, tread: see *tread.*] **1.** A lever designed to be moved by the foot to impart motion to a machine, as a lathe, sewing-machine, or bicycle. It consists usually of a form of lever connected by a rod with a crank; but other forms employ straps or cords for transmitting the power. In the bicycle the treadle is practically the crank itself. In the organ, particularly the pipe-organ, and many machines, the drop-press, etc., where the treadle does not impart a rotary motion, but only starts, stops, or otherwise controls the machine or instrument, it is more properly a *pedal*, but in the reed-organ the foot-levers by which the feeders are operated are called either *treadles* or *pedals.* See cuts under *pegger*, *potter*, *reed-organ*, *ripple*, *sewing-machine*, and *spring-hammer.*

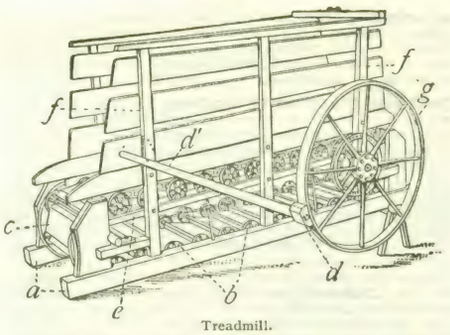
2. The tough ropy or stringy part of the white of an egg: it is so called because formerly supposed to be the male sperm. Compare *tread*, **4.**

treadle (tred′l), *v. i.*; pret. and pp. *treadled*, ppr. *treadling.* [< *treadle*, *n.*] To operate a treadle; specifically, in playing a reed-organ, to operate the feeders by means of the foot-levers or pedals.

treadle-machine (tred′l-ma-shēn″), *n.* A small printing-press worked by the pressure of the foot on a treadle.

treadler (tred′lėr), *n.* [< *treadle* + *-er*[1].] One who works a treadle.—**Treadlers' cramp,** an occupation neurosis affecting sewing-machine operators, scissors-grinders, and others who use treadle-machines: of a similar nature to *writers' cramp* (which see, under *writer*).

A case of *Treadler's Cramp.* *Lancet*, 1891, I. 410.



treadling (tred′ling), *n.* [Verbal n. of *treadle*, *v.*] The act of using the treadles or pedals of a reed-organ.

treadmill (tred′mil), *n.* [< *tread* + *mill*[1].] **1.** An appliance for producing rotary motion by the weight of a man or men, or of an animal, as a horse, stepping on movable steps connected with a revolving cylinder or wheel. The name is now rarely given to industrial appliances of this nature, but chiefly to those used as means of punishment in some prisons. Compare *horse-power*, 3, and see cut in next column.

Hence—**2.** Figuratively, a monotonous and wearisome round, as of occupation or exertion: as, the *treadmill* of business.

The everlasting *tread-mill* of antecedent and consequent goes round and round, but we can neither rest nor make progress. *New Princeton Rev.*, I. 187.

tread-softly (tred′sôft′li), *n.* The spurge-nettle, *Cnidoscolus stimulosus* (*Jatropha stimulosa*

Treadmill.

a, bottom timbers of frame; *b*, rollers attached to the treads, one of which is fully shown at *c*; *d*, *d′*, brake-shoe and brake-lever respectively, used in stopping the machine; *e*, one of the two inclined planes on opposite sides of the machine upon which the rollers *b* run; *f*, inclosure for horse or mule which operates the machine; *g*, driving-wheel, which in use is belted to the machine to be driven.

of Michaux), found from Virginia to Florida and Texas. It is a herbaceous plant with a long perennial root, a low weed armed with white bristles half an inch long, which sting severely. Also called *stinging-bush.*

treadwheel (tred′hwēl), *n.* A contrivance for utilizing the weight of men or animals to produce rotary motion, which can then be applied to various mechanical purposes. It is of two principal forms: (*a*) A hollow cylinder set with the axis horizontal. An animal, as a dog, walks on the inner surface of the cylinder, to which battens are secured as a foothold, and thus revolves it. (*b*) A large flat disk of wood or other material set at an angle of about twenty degrees with the horizon. The animal which moves it stands on the disk at one side of the axis or pivot; its weight causes the disk to turn, and it is thus compelled to continue walking in order to keep its footing.

treague† (trēg), *n.* [< It. *tregua* = Sp. *tregua* = Pg. *tregoa* = Pr. *trega*, *tregua*, *treva*, *trev* = OF. *treve*, *trive*, F. *trêve*, < ML. *treuga* (also, after OF., *treva*), a truce, < Goth. *triggwa* = OHG. *triuwa* = OS. *treuwa* = AS. *treów*, truth, truce: see *true*, *truce.*] A truce.

She them besought, during their quiet *treague*,
Into her lodging to repaire awhile.
Spenser, F. Q., II. ii. 33.

treason (trē′zn), *n.* [< ME. *treson*, *tresun*, *treisun*, *traisoun*, *trayson*, < OF. *trahison*, *traisson*, *traison*, F. *trahison* = Pr. *traicio*, *traazo*, *tracio*, *trassio* = Sp. *traición* = Pg. *traição*, < L. *traditio*(*n*-), a giving up, surrender, delivery, tradition, < *tradere*, pp. *traditus*, give up, deliver over, betray: see *tradition*, of which *treason* is a doublet.] **1.** A betraying; treachery; breach of faith.

The false Genelon,
He that purchased the *treson*
Of [*i. e.*, toward] Rowland and of Olivere.
Chaucer, Death of Blanche, l. 1122.

He that did by *treason* work our fall
By *treason* hath delivered thee to us.
Marlowe, Jew of Malta, v. 4.

Britton . . . more clearly states the idea of "betrayal" as distinct from that of "lese-majesty," and includes in *treason* any mischief done to one to whom the doer represents himself as a friend. *Stubbs*, Const. Hist., § 463.

Specifically—**2.** Violation by a subject of his allegiance to his sovereign or liege lord, or to the chief authority of the state. In old English law it was (*a*) against the king or supreme power of the state, and more specifically called *high treason*, or (*b*) against any other superior, as a master, etc., and called *petit treason* or *petty treason.* Various offenses falling far short of what is now deemed treason, such as counterfeiting money, were so considered. By modern law in England treason, more specifically called *high treason*, includes such offenses as imagining the king's (or queen's) death (that is, proposing to kill, maim, or restrain him), or levying war against him, adhering to his enemies, killing his wife or eldest son or heir, violating his wife or daughter or heir's wife, or killing the chancellor, treasurer, or a justice in office. Treason against the United States consists only in levying war against them, or in adhering to their enemies, or in giving their enemies aid and comfort; treason against a State is generally defined as consisting in hostility to a State only. The former punishment for treason in England was that the condemned should be drawn on a hurdle to the place of execution, and there be hanged and disemboweled alive, and then beheaded and quartered; and a conviction was followed by forfeiture of land and goods, and attainder of blood; but the penalty is now hanging.

Those that care to keep your royal person
From *treason's* secret knife and traitor's rage.
Shak., 2 Hen. VI., iii. 1. 174.

Treason doth never prosper: what 's the reason?
For if it prosper, none dare call it *treason.*
Sir John Harington, Of *Treason.*

Treason is a breach of allegiance, and can be committed by him only who owes allegiance, either perpetual or temporary. *Marshall.*

Constructive treason, anything which, though lacking treasonable intent, is declared by law to be treason and punishable as such. Numerous acts suggestive of disaffection were formerly punished as constructive treason upon the pretext that they were in law equivalent to actual treason. Hence the provision of the Constitution of the United States (Art. III. § 3), according to which "Treason against the United States shall consist only in levying War against them, or in adhering to their Enemies, giving them Aid and Comfort. No Person shall be convicted of Treason unless on the testimony of two Witnesses to the same overt Act, or on Confession in open Court. The Congress shall have power to declare the Punishment of Treason, but no Attainder of Treason shall work Corruption of Blood, or Forfeiture except during the Life of the Person attainted."

Lord George Gordon was thrown into the Tower, and was tried before Lord Mansfield on the charge of high treason for levying war upon the Crown. The charge was what is termed by lawyers *constructive treason.* It rested upon the assertion that the agitation which he had created and led was the originating cause of the outrages that had taken place.

Lecky, Eng. in 18th Cent., xiii.

High treason. See def. 3.—**Misprision of treason.** See *misprision*[1].—**Petit** or **petty treason,** the crime of killing a person to whom the offender owes duty or subjection, as for a servant to kill his master, or a wife her husband. As a name for a specific offense the term is no longer used, such crimes being now deemed murder only.—**Statute of Treasons,** an English statute of 1352 (25 Edw. III., c. 2) declaring, for the first time, what offenses should be adjudged treason.—**Treason Felony Act.** See *felony.*—**Syn.** See *perfidious.*

treasonable (trē′zn-a-bl), *a.* [< *treason* + *-able.*] Of or pertaining to treason; consisting of treason; involving the crime of treason, or partaking of its guilt.

Hark, how the villain would close now, after his *treasonable* abuses! *Shak.*, M. for M., v. 1. 347.

—**Syn.** See *perfidious.*

treasonableness (trē′zn-a-bl-nes), *n.* The character of being treasonable.

treasonably (trē′zn-a-bli), *adv.* In a treasonable manner.

treason-felony (trē′zn-fel″on-i), *n.* In *Eng. law*, the offense of compassing, imagining, devising, or intending to deprive the king or queen of the crown, or to levy war within the realm, in order forcibly to compel the change of royal measures, or to intimidate either house of Parliament, or to excite an invasion in any of the crown's dominions.

treasonous (trē′zn-us), *a.* [< *treason* + *-ous.*] Treasonable.

He had giv'n first his military Oath to Anlas, whom if he had betrai'd, the King might suspect him of like *treasonous* minde towards himself. *Milton*, Hist. Eng., v.

treasonry†, *n.* [< *treason* + *-ry.*] Treason.

I am right rad of *treasonrie.*
Sang of the Outlaw Murray (Child's Ballads, VI. 27).

treasony†, *n.* [< *treason* + *-y*[3].] Treason; treachery.

It is tauld me the day, sir knight,
Ye've done me *treasonie.*
Young Waters (Child's Ballads, III. 303).

treasure (trezh′ūr), *n.* [Early mod. E. also *threasure*, *threasor*, in awkward imitation of the L. spelling *thesaurus*; < ME. *tresure*, *tresur*, *tresor*, *tresore*, *tresour*, < OF. *tresor*, later *thresor*, F. *trésor*, with unorig. *r*, prop. **tesor*, = Pr. *thesaur* = Sp. *tesoro*, OSp. also *tresoro* = Pg. *thesouro* = It. *tesoro* (dial. *trasoro*), < L. *thesaurus*, < Gr. *θησαυρός*, a store laid up, treasure, a treasure-house, store-house, chest, < *τιθέναι*, set, place: see *thesis*, *theme*, *do*[1]. Cf. *thesaurus.*] **1.** Money or jewels in store; wealth accumulated; riches hoarded; particularly, a stock or store of money in reserve.

The value of a mine is a matter for a Kings *Threasor.*
John Dee (Ellis's Lit. Letters, p. 38).

If thou be'st death, I'll give thee England's *treasure*,
Enough to purchase such another island,
So thou wilt let me live, and feel no pain.
Shak., 2 Hen. VI., iii. 3. 2.

2. Specifically, gold or silver, either as it comes from the mine, or in bullion, coin, or plate; especially, coin.

The several parcels of his plate, his *treasure*,
Rich stuffs, and ornaments of household.
Shak., Hen. VIII., iii. 2. 125.

3. A quantity of anything gathered together; a store; a wealth.

We have *treasures* in the field, of wheat and of barley, and of oil and of honey. Jer. xli. 8.

4. Something which is greatly valued; that which is highly prized or very valuable.

O Jephthah, judge of Israel, what a *treasure* hadst thou! . . .
"One fair daughter, and no more,
The which he loved passing well."
Shak., Hamlet, ii. 2. 423.

This gentleman, as humble as you see him,
Is even this kingdom's *treasure.*
Beau. and Fl., Laws of Candy, iii. 1.

As bees flee hame wi' lades o' *treasure.*
Burns, Tam o' Shanter.

5†. A treasure-house; a treasury.

Asa took all the silver and the gold that were left in the *treasures* of the house of the Lord, and the *treasures* of the king's house. 1 Ki. xv. 18.

"Will" will fulfil the *treasure* of thy love.
Shak., Sonnets, cxxxvi.

Treasure of merits, in *Rom. Cath. theol.*, the merits of Christ and the saints treasured up, from which satisfaction is made, as of a debt, for the sins of others.

Indulgence . . . is "a juridical absolution," including a payment of the debt from the *treasure of* the *merits* of Christ and the saints. *Cath. Dict.*, p. 441.

treasure (trezh′ūr), *v. t.*; pret. and pp. *treasured*, ppr. *treasuring*. [< *treasure*, *n.*] 1. To hoard up; lay up in store; collect and lay up, as money or other valuables, for future use or for preservation; accumulate; store: usually with *up*.

And her merchandise and her hire shall be holiness to the Lord; it shall not be *treasured* nor laid up.
Isa. xxiii. 18.

Some thought it mounted to the lunar sphere,
Since all things lost on earth are *treasured* there.
Pope, R. of the L., v. 114.

Prayers uttered in secret, according to God's will, are *treasured up* in God's Book of Life.
J. H. Newman, Parochial Sermons, i. 245.

2. To retain carefully in the mind: often with *up*.

Mem'ry, like the bee, . . .
The quintessence of all he read
Had *treasur'd up* before.
Cowper, Burning of Lord Mansfield's Library.

The patient search and vigil long
Of him who *treasures up* a wrong.
Byron, Mazeppa, x.

3. To regard as precious; prize.

Somewhat did the fresh young day beguile
His *treasured* sorrow when he woke next morn.
William Morris, Earthly Paradise, III. 97.

4†. To furnish or endow with treasures; enrich. [Rare.]

Treasure thou some place
With beauty's treasure, ere it be self-kill'd.
Shak., Sonnets, vi.

treasure-chest (trezh′ūr-chest), *n.* 1. A strong box made to contain gold, silver, jewels, or other articles of value.—2. Figuratively, a treasury.

A mere review, however, of the payments into and out of the national *treasure-chest* only tells part of the truth.
Nineteenth Century, XXII. 6.

treasure-city (trezh′ūr-sit″i), *n.* A city for stores and magazines.

And they built for Pharaoh *treasure cities* [store cities, R. V.], Pithom and Raamses. Ex. i. 11.

treasure-flower (trezh′ūr-flou″ėr), *n.* A plant of the genus *Meridiana*. *M. Pavonia*, distinguished as the *peacock treasure-flower*, has heads nearly 3 inches broad and of an orange color with a dark center, expanding only in sunshine. It is an ornament of the wayside in South Africa, and has long been cultivated in greenhouses.

treasure-house (trezh′ūr-hous), *n.* [< ME. *tresurehous*; < *treasure* + *house*[1].] A house or building where treasures and stores are kept; a place where hoarded riches or precious things are kept; a treasury.

So in the Italian language the first that made it aspire to be a *Treasure-house* of Science were the Poets Dante, Boccace, and Petrarch.
Sir P. Sidney, Apol. for Poetrie, p. 21.

treasurer (trezh′ūr-ėr), *n.* [Early mod. E. also *threasurer*; < ME. *tresurer*, *tresurere*, *tresorer*, *tresorere*, *tresourer*, *treserour*, < OF. *tresorer*, *tresorier*, *thresorier*, F. *trésorier* = Pr. *thesaurier* = Sp. *tesorero* = Pg. *thesoureiro* = It. *tesoriere*, < ML. *thesaurarius*, a treasurer, < *thesaurus*, a treasure: see *treasure*.] 1. One who or that which treasures or stores up; one who has charge of treasure.

Out of this toune help me through your might,
Sin that ye wole nat ben my *tresorere*.
Chaucer, Purse, l. 18.

And when thy ruins shall disclaim
To be the *treasurer* of his name,
His name, that cannot die, shall be
An everlasting monument to thee.
B. Jonson, Epitaph on Drayton (Underwoods, xvii.).

2. Specifically, one who has the care of a treasure or treasury; an officer who receives the public money arising from taxes and duties or other sources of revenue, takes charge of the same, and disburses it upon orders drawn by the proper authority; also, one who has the charge of collected funds, such as those belonging to incorporated companies or private societies.

Now speke y wylle of *tresurere* [of a lord's household].
Husbonde and housewyf he is in fere;
Of the resayuer he halle resayue, . . .
The *tresurer* schalle gyfe alkyn wage.
Babees Book (E. E. T. S.), p. 318.

Lord high treasurer, formerly, a great officer of the British crown, who had under his charge and government all the sovereign's revenue. The duties of the lord high treasurer are now discharged by commissioners entitled *Lords of the Treasury*. See *treasury*.

Originally the chief financial minister of the Crown was the *Lord High Treasurer*, with whom was associated at an early date a Chancellor of the Exchequer. But in the reign of George I. the great office of *Lord High Treasurer* was, in English phrase, put permanently "into commission": its duties, that is, were intrusted to a board instead of to a single individual. *W. Wilson*, State, § 696.

Lord high treasurer of Scotland, formerly, an officer whose duty it was to examine and pass the accounts of the sheriffs and others concerned in levying the revenues of the kingdom, to receive resignations of lands and other subjects, and to revise, compound, and pass signatures, gifts of tutory, etc. In 1663 the lord high treasurer was declared president of the court of exchequer.—**Treasurer of a county**, in England, an official who keeps the county stock, which is raised by rating every parish yearly, and is disposed to charitable uses. There are two treasurers in each county, chosen by the majority of the justices of the peace, etc., at Easter sessions.—**Treasurer of the household**, an official in the lord steward's department of the royal household of the United Kingdom, who bears a white staff, and ranks next to the lord steward. He is a member of the privy council and of the ministry, and is a peer or a peer's son.—**Treasurer of the poor**, in Delaware, a State officer having charge of certain departments of the administration of State charities.—**Treasurer of the United States**, an officer of the Treasury Department who receives and keeps the moneys of the United States, disbursing them only upon warrants drawn by the Secretary of the Treasury, and duly recorded and countersigned. The payment of interest on the public debt, and the issue and redemption of notes, are in his charge. States, cities, boroughs, and towns also have treasurers; in some cases the State treasurer has the title of *treasurer and receiver-general*.

treasurership (trezh′ūr-ėr-ship), *n.* [< *treasurer* + *-ship*.] The office of treasurer.

The king landed on the 9th of February, 1432; on the 26th Hungerford had to resign the *treasurership* to John lord le Scrope of Masham. *Stubbs*, Const. Hist., § 336.

treasuress (trezh′ūr-es), *n.* [< *treasurer* + *-ess*.] A woman who has charge of a treasure; a female treasurer. [Rare.]

You, Lady Muse, whom Jove the counsellor
Begot of Memory, wisdom's *treasuress*.
Sir J. Davies, Dancing.

treasure-trove (trezh′ūr-trōv′), *n.* [Early mod. E. also *thresor trouve*; < MF. *trcsor trove*, < OF. **tresor trove*, a treasure found: *tresor*, treasure; *trove*, pp. of *trover*, *trouver*, find: see *trover*.] Treasure found and appropriated; specifically, in *Eng. law*, any money or coin, gold, silver plate, or bullion, of unknown ownership, found hidden in the earth or in any private place. In this case, in English law, the treasure belongs to the crown; but if the owner is known, or is ascertained after the treasure is found, the owner and not the crown is entitled to it. It is, however, the practice of the crown to pay the finder the full value of the property on its being delivered up. On the other hand, should the finder conceal or appropriate it, he is guilty of an indictable offense punishable by fine and imprisonment. In the United States the term is not often used, and has no technical legal meaning. The finder of a thing upon land is, if the owner be unknown, its lawful custodian, and if he cannot be found becomes its owner. If the former owner is found, the finder cannot withhold the thing to exact a reward, unless such reward has been offered.

Your honor knoweth that *Thresor trouve* is a very casuall thing; and of which, althowgh the Prerogative of the Queens Majestie do entitle to her a proprietie, yet how seldome her Grace hath hitherto receyved any commodity therby, it is to your honor better known than unto me.
John Dee (Ellis's Lit. Letters, p. 37)

treasurous† (trezh′ūr-us), *a.* [< *treasure* + *-ous*.] Worthy of being treasured, prized, or regarded as a treasure. [Rare.]

Goddess full of grace,
And *treasurous* angel t' all the human race.
Chapman, tr. of Homer's Hymn to Earth, l. 29.

treasury (trezh′ūr-i), *n.*; pl. *treasuries* (-iz). [< ME. *tresorie*, *iresorye*, *thresorye*, *tresoure*, < OF. *tresorie*, contr. of *tresorerie*, *thresorerie*, F. *trésorerie* = Pr. *thezauraria* = Sp. *tesorería* = It. *tesoreria* = Pg. *thesouraria*, *thesouria*, < ML. *thesauraria*, a treasury, < L. *thesaurus*, treasure: see *treasure*.] 1. A house, room, or chest where treasure is laid up.

And zet is the Plate of Gold in the *Thresorye* of the Chirche. *Mandeville*, Travels, p. 18.

And Jesus sat over against the *treasury*, and beheld how the people cast money into the *treasury*. Mark xii. 41.

2. Figuratively, that wherein something precious is stored or secured; a repository.

O Glastonbury, Glastonbury, the *treasurie* of the carcases of so famous and so many persons!
Hakluyt's Voyages, p. 7.

Canon law as a code, and the civil law of Rome as a *treasury* of procedure, working together in the hands of ecclesiastical lawyers, may be for the moment looked at together. *Stubbs*, Medieval and Modern Hist., p. 313.

3. Specifically, a place where the public revenues are deposited and kept, and where money is disbursed to defray the expenses of government; also, a place where the funds of an incorporated company or private society are deposited and disbursed.

The *treasury* was well filled, and, as against France and Scotland, England was of one mind.
Stubbs, Const. Hist., § 360.

4. A department of government which has control over the collection, management, and expenditure of the public revenue. See *Department of the Treasury*, under *department*. The duties of this department of the British government are now performed by a board of five lords commissioners instead of a lord high treasurer, as formerly. The chief of these commissioners, or first lord of the treasury, is usually prime minister, and may be a member of either house of Parliament. The virtual head of the treasury is the chancellor of the exchequer. (See *chancellor*, 3 (c).) The duties of the three remaining members of the board, the junior lords, are merely formal, the heaviest part of the executive functions devolving on the two joint secretaries of the department (the *patronage secretary* and the *financial secretary*), who are also members of the lower house, and on a permanent secretary. The custody of the public revenue is vested in the exchequer, but the function of payment belongs to the treasury, consequently all sums withdrawn from the exchequer must be vouched for by a treasury warrant. The treasury has the appointment of all officers engaged in the collection of the public revenue; the army, navy, and civil-service supplies are issued under its authority; and all exceptional cases and disputes relating to the public revenue are referred to its decision. Several important state departments are under the general authority or regulation of the treasury.

5. The officers of the British treasury department.—6. A name given to a class of subterranean monuments consisting usually of a solid structure of masonry, of domical form, often with pseudo-vaulting in horizontal courses, either wholly underground or covered with a tumulus. Familiar examples are the structures of this type at Mycenæ and at Orchomenus, in Greece. The name is erroneous, as these structures are now recognized as tombs.

7†. Treasure.

Thy sumptuous buildings and thy wife's attire
Have cost a mass of public *treasury*.
Shak., 2 Hen. VI., i. 3. 134.

Independent Treasury system, or **Subtreasury system**, the present system of fiscal administration of the United States government, whereby certain officers, under bonds, receive, disburse, transfer, and account to the Secretary of the Treasury for the moneys of the government. Formerly the public moneys were deposited with the State banks, or, during their existence, with the first and second United States banks. In 1840 a law was enacted which directed that rooms, vaults, and safes be procured in which to keep the public money, that four receivers-general be appointed, and that the United States mint and the branch mint at New Orleans be places of deposit. The treasurers of the United States and of the mints, the receivers-general, and all other officers charged with the custody of public money, were required to give bonds for its care and transfer when ordered by the Secretary of the Treasury or Postmaster-General, and after June 30th, 1843, payments to or by the United States were to be exclusively in gold and silver. The next year the law was repealed, but in 1846 it was reënacted substantially, and has been continued ever since, with some changes. In 1863 the national banks were authorized to receive deposits of the public money, except receipts from customers, after furnishing proper security therefor.—**Lords commissioners of the Treasury**. See def. 5.—**Register of the Treasury**. See *register*[2].—**Solicitor of the Treasury**. See *solicitor*.—**Treasury bench**, the front bench or row of seats on the right hand of the Speaker in the British House of Commons: so called because occupied by the first lord of the treasury (when a commoner), the chancellor of the exchequer, and other members of the ministry.—**Treasury bill**, an instrument of credit issued by the British government to the highest bidder when money is needed by the Commissioners of the Treasury. These bills are drawn for three or six months, and as they bear no interest are tendered for at a discount, which varies with the rate current in the money-market.—**Treasury board**, the five lords commissioners of the British Treasury.—**Treasury note**, a note or bill issued by the Treasury Department, on the authority of the government, and receivable for government dues.—**Treasury warrant**, a warrant or voucher issued by the treasury for sums disbursed by the exchequer.

★**treat** (trēt), *v.* [Early mod. E. also sometimes *traict*; < ME. *treten*, < OF. *treter*, *traiter*, *traicter* F. *traiter* = Pr. *tractar* = Sp. 3. Disposed; inclined.

Tretable to alle gode.
Chaucer, Death of Blanche, l. 923.

4. Moderate; not violent or excessive.

Yet somewhat there is why a virtuous mind should rather wish to depart this world with a kind of *treatable* dissolution than to be suddenly cut off in a moment.
Hooker, Eccles. Polity, v. 46.

His [the country parson's] voice is humble, his words *treatable* and slow. *G. Herbert*, Country Parson, vi.

treatably† (trē'ta-bli), *adv.* [ME. *tretably;* < *treatable* + *-ly*2.] Tractably; smoothly; with ease or moderation.

So *treatablie* speakyng as possible thou can,
That the hearers therof may thee vnderstan.
Babees Book (E. E. T. S.), p. 342.

There will be always some skilful persons which can teach a way how to grind *treatably* the Church with jaws that shall scarce move. *Hooker*, Eccles. Polity, v. 79.

But lest my liking might too sudden seem,
I would have salved it with a longer *treatise.*
Shak., Much Ado, i. 1. 317.

2. A written composition in which the principles of a particular subject are discussed or explained. A treatise is of an indefinite length; but the word ordinarily implies more form and method than an essay, and less fullness or copiousness than a system: yet the phrase *systematic treatise* is a very common designation of some classes of scientific writings.

And amonges alle, I schewed hym this *Tretys* that I had made aftre informacioun of men that knewen of thinges that I had not seen my self.
Mandeville, Travels, p. 314.

The former *treatise* have I made, O Theophilus, of all that Jesus began both to do and teach. Acts i. 1.

Host. They call me Goodstock.
Lov. Sir, and you confess it,
Both in your language, *treaty*, and your bearing.
B. Jonson, New Inn, i. 1.

3. An agreement; a compact; specifically, a league or contract between two or more nations or sovereigns, in modern usage formally signed by commissioners properly authorized, and solemnly ratified by the several sovereigns or the supreme power of each state. The term *treaty* includes all the various transactions into which states enter between themselves, such as treaties of peace or of alliance, truces, and conventions. Treaties may be for political or for commercial purposes, in which latter form they are usually temporary. In most monarchies the power of making and ratifying treaties is vested in the sovereign; in the United States of America it is vested in the President, by and with the consent of the Senate. Treaties may be concluded and signed by diplomatic agents, but these, of course, must be furnished with full powers by the sovereign authority of their respective states.

Treaties, allowed under the law of nations, are unconstrained acts of independent powers, placing them under an obligation to do something which is not wrong.
Woolsey, Introd. to Inter. Law, § 98.

In the language of modern diplomacy the term *treaty* is restricted to the more important international agreements, especially to those which are the work of a congress, while agreements dealing with subordinate questions are described by the more general term "convention." *Encyc. Brit.*, XXIII. 530.

4†. An entreaty.

Now I must
To the young man send humble *treaties,* dodge
And palter in the shifts of lowness.
Shak., A. and C., iii. 11. 62.

Barrier, convention, extradition, fishery, reciprocity treaty. See the qualifying words.—**Treaties of guaranty.** See *guaranty.*—**Treaty-making power,** that power of sovereignty which is exercised in the making of treaties with foreign nations. Although it extends to all classes of treaties, including commercial treaties, a treaty made by virtue of it does not have the effect to override the revenue laws of the country when in conflict with them; nor does a treaty itself operate as equivalent to an act of the legislature in a case where the act of the legislature would be otherwise essential. In such case the treaty is regarded as a stipulation for legislative action, which must be had before the courts can enforce the treaty provision; for, except so far as the treaty is extraterritorial, it does not dispense with the necessity of legislation to carry its stipulations into effect.—**Treaty of Adrianople,** a treaty between Russia and Turkey in 1829, favorable to the former.—**Treaty of Aix-la-Chapelle.** (*a*) A treaty in 1668, ending the war between France and Spain. (*b*) A treaty in 1748, terminating the War of the Austrian Succession.—**Treaty of Amiens,** a treaty between France and its allies and Great Britain in 1802, ending temporarily the contest between these nations.—**Treaty of Augsburg,** a treaty in 1555 by which religious liberties were secured to the Catholics and Lutherans of Germany.—**Treaty of Belgrade,** a treaty between Turkey and Aus-

tria in 1739, advantageous for the former.—**Treaty of Berlin**, a treaty, concluded by the European powers in 1878, for the settlement of the Eastern question. By it concessions of territory were made to Russia, Rumania, Servia, and Montenegro, the principality of Bulgaria and the province of Eastern Rumelia were created, Austria-Hungary received the administration of Bosnia and Herzegovina, etc. —**Treaty of Breslau**, a treaty in 1742, ending the first Silesian war.—**Treaty of Bretigny**, a treaty between England and France in 1360, generally favorable to the former. —**Treaty of Bucharest**, a treaty between Russia and Turkey in 1812.—**Treaty of Cambrai**, a treaty between Francis I. of France and the emperor Charles V. in 1529, generally favorable to the latter.—**Treaty of Campo Formio**, a treaty between France and Austria in 1797, by which Austria lost Belgium and Lombardy, receiving the greater part of the Venetian territories in indemnification. —**Treaty of Carlowitz**, a treaty concluded by Turkey with Austria, Venice, and Poland in 1699, unfavorable to the former.—**Treaty of Dresden**, a treaty in 1745, ending the second Silesian war.—**Treaty of Frankfort**, a treaty between France and Germany, May 10th, 1871, ending the Franco-German war.—**Treaty of Ghent**, a treaty between Great Britain and the United States in December, 1814, ending the war of 1812.—**Treaty of Guadalupe-Hidalgo**, a treaty between the United States and Mexico in 1848, terminating the Mexican war in favor of the United States.—**Treaty of Hubertsburg**, a treaty in 1763, ending the Seven Years' War.—**Treaty of Jassy**, a treaty between Russia and Turkey in 1792, favorable to the former.—**Treaty of Kutchuk-Kainardji**, a treaty between Russia and Turkey in 1774, favorable to the former. —**Treaty of London.** Among the principal so-called treaties of London were those in the nineteenth century, concluded by various European powers, as (*a*) in 1827, for the pacification of Greece; (*b*) in 1831, for the settlement of the Belgian question; (*c*) in 1840, for the settlement of the relations between Turkey and Egypt; (*d*) in 1871, abrogating the neutrality of the Black Sea.—**Treaty of Lunéville**, a treaty concluded by France with Austria and Germany in 1801, by which France received considerable territory at the expense of Germany.—**Treaty of Nimwegen**, a series of treaties concluded by France with the Netherlands, the empire, Sweden, etc., in 1678–9, generally favorable to France.—**Treaty of Nystad**, a treaty between Russia and Sweden in 1721, favorable to Russia.—**Treaty of Oliva**, a treaty in 1660, ending the war between Sweden, Poland, Brandenburg, and the emperor.—**Treaty of Paris.** Among the principal treaties of Paris were—(*a*) that of 1763, concluded by Great Britain with France, Spain, etc., by which Canada and other territories in America were acquired by Great Britain; (*b*) that of 1814, between France and the allies; (*c*) that of 1815, between France and the allies, by which France was reduced nearly to its boundaries of 1790; (*d*) that of 1856, ending the Crimean war.—**Treaty of Passarowitz**, a treaty concluded by Turkey with Austria and Venice in 1718, generally unfavorable to Turkey.—**Treaty of Passau**, a treaty in 1552 by which the emperor Charles V. granted religious liberties to the Lutherans. —**Treaty of peace**, a treaty the purport of which is to establish or continue a condition of peace between the parties, usually to put an end to a state of war.—**Treaty of Prague.** (*a*) A treaty between the emperor Ferdinand II. and Saxony in 1635. (*b*) A treaty between Prussia and Austria in 1866, by which the former power succeeded the latter in the hegemony of Germany.—**Treaty of Pressburg**, a treaty between France and Austria in 1805, by which large concessions were made to France and its allies. —**Treaty of Ryswick**, a series of treaties concluded by France with England, the Netherlands, Spain, and the empire in 1697.—**Treaty of San Stefano**, a treaty between Russia and Turkey, March, 1878. As its provisions were considered too favorable to Russia, it was superseded by the treaty of Berlin.—**Treaty of the Pruth**, a treaty between Turkey and Russia in 1711, favorable to the former.—**Treaty of the Pyrenees**, a treaty between France and Spain in 1659, favorable to the former.—**Treaty of Tilsit**, a series of treaties concluded by France with Russia and Prussia in 1807. Prussia lost a large part of its territory.—**Treaty of Troyes**, a treaty between France and England in 1420, by which Henry V. of England became heir to the French crown.—**Treaty of Utrecht**, a treaty in 1713 which, with the treaties of Rastatt and Baden in 1714, terminated the War of the Spanish Succession.—**Treaty of Versailles**, a treaty concluded in 1783 by Great Britain with France, Spain, and the United States, by which the independence of the United States was recognized.—**Treaty of Vienna.** The principal treaties of Vienna were—(*a*) that of 1738, between France, Austria, etc., terminating the War of the Polish Succession; (*b*) that of 1809, between France and Austria, in favor of the former; (*c*) that of 1815, by the congress of the European states, reorganizing the affairs of Europe; (*d*) that of 1864, between Denmark and allied Austria and Prussia, ending the Schleswig-Holstein war; (*e*) that of 1866, between Austria and Italy, by which Venetia was ceded to the latter. —**Treaty of Washington**, a treaty between Great Britain and the United States in 1871, which provided for the settlement of the Alabama claims by the Geneva tribunal, and for the settlement of the boundary and fisheries disputes. —**Treaty of Westphalia**, a treaty or series of treaties in 1648, ending the Thirty Years' War.—**Treaty of Zürich**, a treaty concluded by France and Sardinia with Austria in 1859, by which Austria ceded Lombardy to Sardinia. (See *Crimean, Silesian, succession, war*, etc.)

It was used especially by besiegers, for making a breach or for casting

Trebuchet as described and figured in the Album of Villard de Honnecourt, 13th century. (From Viollet-le-Duc's "Dict. du Mobilier français.")

The weight C (a box filled with stones or earth) acted to keep the lever in a vertical position, AB. The lever was drawn backward to the position A′B′ by a tackle acting on the pulley F, which was hooked at E to the traveling pulley I. A pin at E kept these hooks in place, and when knocked out released the lever. The cords of the tackle passed over the windlasses D, which were worked by the handspikes *a, a*, acting in the directions *b, b*. The projectile was held in the pocket or bag M. As the lever flew up to the vertical, this pocket was whirled around like a sling. It is supposed that a cord P checked this rotary motion and released the projectile suddenly, the length of the cord determining the angle of the projectile's flight.

stones and other missiles into beleaguered towns and castles. It consisted of a beam called the *verge*, turning on a horizontal axis supported upon uprights. At one end of the verge was fixed a heavy weight, and at the other a sort of sling to contain the projectile—a device which greatly increased its force. To discharge the engine, the loaded end of the verge was drawn back by means of a windlass, and suddenly let go. It was possible to attain with the trebuchet great accuracy of fire. Prince Louis Napoleon, afterward Napoleon III., caused to be constructed in 1850 a model trebuchet which gave remarkable results.

Antonio Cesari (died in 1828) was the chief of the *Trecentists*, a school which carried its love of the Italian authors of the 14th century to affectation.
Amer. Cyc., IX. 464.

trecento (trā-chen'tō), *n.* [It., three hundred, used for 'thirteen hundred' (cf. *cinque-cento*), < L. *tres*, three, + *centum*, hundred: see *three* and *cent.*] The fourteenth century in Italian art and literature: used with reference to the distinguishing styles or characteristics of the productions of Italian artists or writers of that period.

trechometer (tre-kom'e-tėr), *n.* [Irreg. < Gr. τρέχειν, run, + μέτρον, measure.] An odometer, or contrivance for reckoning the distance run, especially by vehicles.

trechourt, *n.* Same as *treacher*.

treck[1] (trek), *v. t.* See *track*[1].

treck[2], *v.* and *n.* See *trek.*

treck-pot (trek'pot), *n.* Same as *track-pot.*

treckschuyt (trek'skoit), *n.* Same as *trekschuit.*

tre corde (trā kôr'de). [It., three strings: *tre,* < L. *tres,* three; *corde,* pl. of *corda,* string: see *chord, cord*[1].] In *pianoforte music,* three strings: used as a direction to discontinue the use of the soft pedal and counteract a previous *una corda.*

treddle[1], *n.* See *treadle.*

treddle[2] (tred'l), *n.* [< ME. *tridel, tyrdel,* < AS. *tyrdel,* dim. of *tord:* see *turd.*] 1. Dung of sheep or of hares. *Holland.* [Prov. Eng.]—2. A prostitute; a strumpet. *Ford.* [Slang.]

tredefowlet, *n.* A variant of *tread-fowl. Chaucer.*

tredille, tredrille (tre-dil', -dril'), *n.* [Also *tradrille;* appar. formed in imitation of *quadrille,* < L. *tres,* three, + *-dille, -drille.*] A game at cards for three persons.

I was playing at eighteen-penny *tredrille* with the Duchess of Newcastle and Lady Browne.
Walpole, To H. S. Conway, Sept. 27, 1774.

★ **tree** (trē), *n.*; pl. *trees,* formerly also *treen.* [< ME. *tree, tre, treo, treou, trew, trow,* < AS. *treó, treów, triów* (pl. *treówu, treów, tréo*) = ONorth. *treó, trē, trēw* = OS. *trio, treo* (*trew-*) = OFries. *trē* = MD. *tree* = Icel. *trē* = Sw. *trä,* wood, *träd,* tree, = Norw. *tre* = Dan. *træ* = Goth. *triu* (*triw-*), a tree, also wood, a piece of wood (both senses appar. existing in all the languages cited); not in HG. except as in the derived word cognate with E. *tar*[1] (for the ordinary G. word, see *holt*[1]) (Teut. √ *trew* = Indo-Eur. *derw-, dorw-, dru-*); = W. *derw,* also *dâr* (pl. *deri*) = OIr. *dair* (gen. *darach*), *daur* (gen. *daro, dara*), later Ir. *darog, darag* = OGael. *dair,* an oak; = (*a*) OBulg. *drievo* = Serv. *drijevo* = Bohem. *drzhevo* = Pol. *drzewo,* a tree, = Upper Sorbian *drevo,* wood, = Little Russ. *derevo, drevo* = White Russ. *drevo* = Russ. *derevo, drevo,* a tree, = Lith. *derva,* resinous wood (see *tar*[1]); (*b*) OBulg. *drŭva,* wood, = Slovenian *drva,* wood, = Bulg. *drŭvo,* tree, *drŭva,* wood, = Serv. *drvo,* tree, *drva,* wood, = Bohem. *drva,* wood, = Pol. *drwa,* wood, = Little Russ. *dryva, dyrva* = White Russ. *drovy* = Russ. *drova,* wood (orig. Slavic **dervo,* tree, **drŭvo,* chiefly in plural, wood); = Gr. *δρῦς,* a tree, esp. an oak-tree, *δόρυ* (orig. **δέρυ*), wood, timber, a spear, = Skt. *dāru,* wood, a species of pine, *dru,* wood, = Zend *dru,* wood. By some explained as orig. 'a piece of wood peeled' or stripped of the bark; but the connection with Gr. *δέρειν,* skin, flay (= E. *tear*[1]), is phonetically impossible and notionally improbable, as the sense 'tree' is equally early in the records, and must have been earlier in fact; a standing tree would hardly derive its name from a name first given to a tree cut down and cut to pieces. Hence ult. *tar*[1] and prob. *trough*[1.] **1.** A perennial plant which grows from the ground with a single permanent woody self-supporting trunk or stem, ordinarily to a height of at least 25 or 30 feet. The line which divides trees from shrubs is largely arbitrary, and dependent upon habit rather than size, the tree having a single trunk usually unbranched for some distance above the ground, while a shrub has usually several stems from the same root and each without a proper trunk. (See *shrub*[1].) Certain trees are anomalous or ambiguous in various respects. One is the giant cactus, with its columnar woody stem (see *saguaro*); another is the tree-fern. Some vines are of such dimensions as to form climbing trees—as, for example, species of *Metrosideros* in New Zealand, which at length destroy the supporting tree and stand in its place. The banana and plantain, though transient and somewhat herbaceous, are called trees from their size. In a special use a low plant (as a rose) trained into tree-form is called a tree. A large trained vine is also sometimes so called. In general, trees are either *endogenous* or *exogenous,* by far the greater number both of individuals and of species belonging to the latter class. Those of which the whole foliage falls off periodically, leaving them bare in winter, are called *deciduous;* those of which the foliage falls only partially, a fresh crop of leaves being always supplied before the mature leaves are exhausted, are called *evergreen.* Trees are also distinguished as *nuciferous,* or nut-bearing; *bacciferous,* or berry-bearing; *coniferous,* or cone-bearing, etc. Some are forest-trees, and useful for timber or fuel; others are fruit-trees, and cultivated in gardens and orchards; others serve chiefly for shade and ornament.

Be it by ensample in somer-tyme on *trowes,*
There somme bowes ben leued and somme bereth none.
Piers Plowman (B), xv. 94.

Then in the Forests should huge boughes be seen
Born with the bodies of vnplanted *Treen.*
Sylvester, tr. of Du Bartas's Weeks, i. 2.

2. A figure resembling a tree. Specifically—(*a*) A figure drawn in the outline form of a tree, to receive the record of the root or source, main stem, and branches of a family: specifically called a *genealogical* or *family tree.*

In whose capacious hall,
Hung with a hundred shields, the *family tree*
Sprang from the midriff of a prostrate king.
Tennyson, Aylmer's Field.

(*b*) A natural figuration having more or less resemblance to a tree, assumed by or appearing on the surface of some substances under certain conditions. (*c*) In *math.,* a diagram composed of branching lines. (*d*) In electrolytic cells, a formation of tree-like groups of crystals projecting from the plates. In some forms of storage batteries these tree-formations are apt to give trouble by short-circuiting the cells.

3. A gallows or gibbet; especially, the cross on which Christ was crucified.

Whom they slew and hanged on a *tree.* Acts x. 39.

But give to me your daughter dear,
And, by the Holy *Tree,*
Be she on sea or on the land,
I'll bring her back to thee. *Whittier.*

4. The material of a tree; wood; timber.

In a greet hous ben not oneli vessels of gold and of siluer, but also of *tree* and of erthe. *Wyclif,* 2 Tim. ii. 20.

For wel ye knowe a lord in his houshold
Ne hath nat every vessel al of gold:
Somme been of *tree* and doon hir lord servyse.
Chaucer, Prol. to Wife of Bath's Tale, l. 101.

No stone worke is in vse, their roofes of rafters bee,
One linked in another fast, their wals are all of *tree.*
Hakluyt's Voyages, I. 386.

5†. A piece of wood; a stick; specifically, a staff or cudgel.

Lytell Johan toke none other mesure
But his bowe *tre.*
Lytell Geste of Robyn Hode (Child's Ballads, V. 57).

Anes I slew his sisters son,
And on his breist-bane brak a *tree.*
Johnie Armstrang (Child's Ballads, VI. 49).

6. In *mech.,* one of numerous pieces or framings of wood technically so called: generally in composition, but sometimes used separately in connection with an explanatory context. For those used in vehicles, see *axletree, doubletree, swingletree, whiffletree,* etc.; for those in ships, *chess-tree, crosstree, trestletree,* etc.; for others, *boot-tree, saddletree,* etc.

They vse sadles made of wood & sinewes, with the *tree* gilded. *Hakluyt's Voyages,* I. 314.

All gloves are better and more shapely if dried on glove-*trees* or wooden hands. *Workshop Receipts,* 2d ser., p. 123.

Abba-tree, species of the fig in western Africa, to which attention has recently been called as sources of india-rubber.—**Barrel-tree.** Same as *bottle-tree.*—**Big tree.** See *big*[1] and *Sequoia.*—**Blueberry-tree.** See *Myoporum.*—**Christmas tree.** See *Christmas.*—**Dominant branch of a tree,** in *math.* See *dominant.*—**Genealogical tree.** See def. 2 (*a*) and *genealogic.*—**Geometrical tree,** a diagram like a graph.—**Holy tree.** See *holy.*—**Mammoth tree.** Same as *big tree.*—**Nephritic tree.** See *nephritic.*—**Respiratory tree.** See *respiratory.*—**St. Thomas tree.** See *saint*[1].—**Santa Maria tree,** the calaba-tree, *Calophyllum Galba,* of tropical America. It affords a reddish straight-grained timber, thought to be a suitable substitute for the plainer kinds of mahogany.—**Stinging tree.** Same as *nettle-tree,* 2.—**Three trees!** See *three.*—**To bark up the wrong tree.** See *bark*[1].—**Top of the tree.** See *top*[1].—**Tree calf.** See *calf*[1].—**Tree-felling engine,** a portable engine with saws, employed in felling trees.—**Tree of Buddha,** the bo-tree.—**Tree of chastity,** *Vitex Agnus-castus.* See *agnus castus,* under *agnus.*—**Tree of heaven.** See *Ailanthus.*—**Tree of Jesse.** See *Jesse*[1].—**Tree of Liberty,** a tree planted or transplanted to commemorate the gaining of political liberty, as in France at the time of the Revolution.—**Tree of life.** (*a*) According to the account in Genesis ii. 9, etc., a tree growing in the midst of the garden of Eden, as a provision for the unending life of man so long as he remained in a state of innocence, and hence as a symbol of the source of heavenly immortality in a future existence.

Lest he . . . take also of the *tree of life,* and eat, and live for ever. Gen. iii. 22.

(*b*) Same as *arbor-vitæ,* 1. (*c*) In *anat.,* the arbor-vitæ of the cerebellum.—**Tree of long life,** *Leptospermum nitidum,* a small tree in the high mountains of the Eastern Archipelago, whose leaves furnish Bencoolen or Malay tea: thus called by the natives, apparently in allusion to its hardiness.—**Tree of Porphyry,** a logical diagram illustrating the relations of subordinate genera.—**Tree of the gods.** Same as *tree of heaven.* See above.—**Tree of the knowledge of good and evil,** according to the account in Genesis, a tree placed, with the tree of life, in the midst of the garden of Eden, and bearing the forbidden fruit the eating of which by Adam and Eve, under the persuasion of the serpent, destroyed their primal innocence and caused their expulsion from the earthly paradise.—**Tree of the magicians,** a solanaceous tree of Chile, *Latua pubiflora. Treas. of Bot.*—**Tree of the universe.** See *Yggdrasil.*—**Trembling tree.** See *tremble.*—**Triple tree.** See *triple.*—**Tyburn tree,** the gallows; a gibbet.—**Up a tree,** cut off from escape; obliged to surrender; cornered; entrapped; nonplussed. [Colloq.]

He was deploring the dreadful predicament in which he found himself, in a house full of old women. . . . "Reg'larly *up a tree,* by jingo!" exclaimed the modest boy, who could not face the gentlest of her sex.
Thackeray, Vanity Fair, xxxiv.

Weeping tree, a tree of a weeping habit. See *weeping.*

=Syn. 1. *Shrub, Bush,* etc. See *vegetable.*

tree (trē), *v.* [< *tree, n.*] **I.** *trans.* **1.** To drive into a tree, as a hunted animal fitted for climbing, such as animals of the cat kind, racoons, opossums, and squirrels; compel to take refuge in a tree, as a man fleeing from wolves.

Polly . . . told us how . . . once her mother . . . had *treed* a painter, and kept him up in his perch for hours by threatening him whenever he offered to come down, until her husband came home and shot him.
H. B. Stowe, Oldtown, p. 357.

2. Hence, figuratively, to deprive of the power of resistance; place at the mercy of an opponent; corner. [Colloq.]

You are *treed,* and you can't help yourself.
H. Kingsley, Geoffry Hamlyn, v.

3. To form or shape on a tree made for the particular use: as, to *tree* a boot.

The process of crimping, *treeing,* etc., in the manufacturing of leather into boots and shoes.
C. T. Davis, Leather, p. 418.

II. *intrans.* **1.** To take refuge in a tree, as a hunted animal. [Rare.]

Besides *treeing,* the [wild] cat will take advantage of some hole in the ground, and disappear, as suddenly as ghosts at cock-crowing.
T. B. Thorpe, Backwoods, p. 180. (*Bartlett.*)

2†. To grow to the size of a tree. *Fuller.*—**3.** To take the form of a tree, or a tree-like shape, as a metal deposited from a solution of one of its salts under the action of an electric current.

It will not prevent *treeing;* and therefore it will not cure that defect, which is one of the most serious defects of the Faure battery. *Science,* IV. 392.

tree-agate (trē'ag″āt), *n.* A variety of agate with red, brown, or black dendritic or tree-like markings, found in India and Brazil. An artificial product so named is made by staining chalcedony or natural agate with tree-like markings.

tree-aloe (trē'al″ō), *n.* An aloe-plant, *Aloë dichotoma,* of southwestern Africa. The hollowed stem serves as a quiver for poisoned arrows, whence it is also called *quiver-tree.*

tree-asp (trē'asp), *n.* A venomous serpent of the family *Dendraspididæ.* See cut under *Dendraspis.*

tree-azalea (trē'a-zā″lē-ā), *n.* A shrub or small tree, *Azalea arborescens,* found in the mountains from Pennsylvania to North Carolina and Tennessee. It has very fragrant rose-colored flowers. Also *smooth azalea.*

tree-bear (trē'bâr), *n.* The racoon. [Local, ★U. S.]

tree-beard (trē'bērd), *n.* A South American name of the long-moss, *Dendropogon usneoides.* See *long-moss,* and cut under *Tillandsia.*

tree-beetle (trē'bē″tl), *n.* One of various beetles which feed on trees and shrubs: not specific.

tree-boa (trē'bō″ä), *n.* An arboricole boa or anaconda; a large tree-climbing serpent of the family *Boidæ.*

tree-bug (trē'bug), *n.* One of numerous different hemipterous insects which feed on trees and shrubs by sucking the juices, especially of the family *Pentatomidæ. Rhaphigaster pennsylvanicus* is the large green tree-bug; *Arma modesta* is the modest tree-bug; and *Pentatoma ligata* is the bound tree-bug. Compare *tree-hopper.*

tree-cabbage (trē'kab″āj), *n.* See *cabbage*[1], 1.

tree-cactus (trē'kak″tus), *n.* The saguaro, and perhaps other large cacti.

tree-calf (trē'käf), *n.* See *tree calf,* under *calf*[1].

tree-cat (trē'kat), *n.* A palm-cat or paradoxure.

tree-celandine (trē'sel″an-dīn), *n.* See *celandine.*

tree-climber (trē'klī″mėr), *n.* Any animal, etc., which habitually climbs trees. (*a*) A tree-creeper. (*b*) The climbing-perch, *Anabas scandens.* See *Anabas.*

tree-clipper (trē'klip″ėr), *n.* A tree-creeper. [Local, Eng.]

tree-clover (trē'klō″vėr), *n.* The sweet clover, *Melilotus alba,* and perhaps other species.

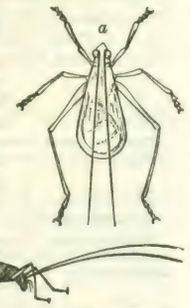
tree-coffin (trē'kof″in), *n.* A coffin made by hollowing out a section of a tree-trunk.

At Stowborough, Dorsetshire, where a body was discovered in 1767 in a *tree-coffin,* it appeared to have been wrapped in skins. *Greenwell,* British Barrows, p. 32, note 1.

tree-copal (trē'kō″pal), *n.* Same as *anime,* 2.

tree-coral (trē'kor″al), *n.* An arborescent polypidom, as madrepore.

tree-cotton (trē'kot″n), *n.* A perennial cotton-plant, *Gossypium arboreum,* becoming a shrub or low tree, widely cultivated in East Indian gardens, but scarcely grown for fiber. Beneath the white wool the seeds are covered with a dense green down.



tree-coupling (trē'kup″ling), *n.* In a vehicle, a piece uniting a swingletree to a doubletree. *E. H. Knight.*

tree-crab (trē'krab), *n.* A certain land-crab, *Birgus latro.* See cut under *palm-crab.*

tree-creeper (trē'krē″pėr), *n.* One of many different birds which creep up and down or about

in trees. (*a*) The true creepers. See *Certhiidæ*. (*b*) The South American birds of the family *Anabatidæ* or *Dendrocolaptidæ*. See the technical words, and cut under *Dendrocolaptes*.

tree-cricket (trē′krik″et), *n.* A cricket of the genus *Œcanthus*. The snowy tree-cricket, *Œ. niveus*, of a delicate greenish-white color, often injures the raspberry by laying its eggs in the young shoots. See *Œcanthus*.

Snowy Tree-cricket (*Œcanthus niveus*). *a*, male, dorsal view; *b*, female, lateral view.

tree-crow (trē′krō), *n.* One of various corvine birds of China, India, etc., of a character intermediate between jays and crows, and belonging to such genera as *Crypsirhina*, *Cissa* (or *Kitta*), and *Dendrocitta*. The temia, *Crypsirhina varians*, is 13 inches long, mainly of a bottle-green color with black face and bill and bright-blue eyes. It inhabits the Burmese countries, Cochin-China, and Java. *C. cucullata*, of Burma and Upper Pegu, is quite different. There are at least 8 species of *Dendrocitta*. See *Crypsirhina*, *tree-pie*, and cuts under *sirgang* and *temia*.—**Wattled tree-crow**, a wattle-crow. See *Callœatinæ*, *Glaucopinæ*, and cut under *wattle-crow*.

tree-cuckoo (trē′kůk″ō), *n.* An arboricole cuckoo; especially, such an American cuckoo, of the genus *Coccyzus* or a related form, as the common yellow-billed (*C. americanus*) or black-billed (*C. erythrophthalmus*) of the United States. Most cuckoos are in fact arboricole; but the name distinguishes those above mentioned from the American ground-cuckoos, as members of the genus *Geococcyx* and others of terrestrial habits. See cut under *Coccyzus*.

tree-digger (trē′dig″ėr), *n.* An agricultural implement for taking up trees that have been planted in rows, as in nurseries. It is a form of double plow with a single bent cutting-share between the parts, and cuts through the earth at a certain distance on each side of the rows, and also at the required depth beneath the roots. *E. H. Knight.*

tree-dove (trē′duv), *n.* One of numerous large arboricole pigeons of the Indian and Australian regions, belonging to the genus *Macropygia* in a broad sense, as *M. reinwardti*, from the Moluccan and Papuan islands. This is about 20 inches long, with a long broad tail, red feet, and ashy plumage varied in some parts with white, black, and chestnut. There are 24 or more species of this group.

Tree-dove (*Macropygia reinwardti*).

tree-duck (trē′duk), *n.* See *duck*[2] and *Dendrocygna* (with ★cut).

tree-fern (trē′fėrn), *n.* One of several species of ferns that attain to the size of trees. They belong mostly to the *Cyatheaceæ*, and are confined to the tropics, where they form a striking feature of the landscape, sending up a straight trunk to a height of 25 feet or more, crowned at the summit with a cluster of large drooping fronds. Several species are successfully cultivated in greenhouses. See *Cyathea* and *fern*[1].

Tree-fern (*Cibotium regale*).

tree-finch (trē′finch), *n.* See *finch*[1].

tree-fish (trē′fish), *n.* One of the Californian rock-fishes, *Sebastichthys serriceps*.

tree-fly (trē′flī), *n.* A dipterous insect of the family *Xylophagidæ*.

tree-frog (trē′frog), *n.* Any batrachian which lives in trees. (*a*) A tree-toad. (*b*) More properly, a true frog (belonging to the family *Ranidæ*) of arboreal habits. There are many species, of different genera, in the Old World. Some have suckers on their toes and some have webbed hind toes. See cut under *flying-frog*.—**Spurred tree-frog.** See *spurred*.

tree-fuchsia (trē′fū″shiȧ), *n.* A fuchsia trained in tree form.

tree-germander (trē′jėr-man″dėr), *n.* A shrub, *Teucrium fruticans*, of the Mediterranean region, also cultivated in gardens.

tree-goldenrod (trē′gōl″dn-rod), *n.* An amarantaceous plant, *Bosea Yervamora*, of the Canaries, a robust ill-smelling shrub with virgate branches, bearing nearly spicate axillary and terminal racemes of small flowers.

tree-goose (trē′gös), *n.* **1.** A cirriped of the genus *Lepas* or *Anatifa*; a barnacle; a goose-mussel. See *Anatifa*, *Lepas*, and cut under *barnacle*[1], 2.—**2.** The barnacle-goose, *Bernicla leucopsis*: from the old fable that they grow on trees from barnacles. See cut under *barnacle*.

Whereas those scattered trees, which naturally partake
The fatness of the soil (in many a slimy lake
Their roots so deeply soak'd), send from their stocky bough
A soft and sappy gum, from which those *tree-geese* grow
Call'd barnacles by us. *Drayton*, Polyolbion, xxvii. 304.

tree-hair (trē′hâr), *n.* Same as *horsetail-lichen*.

tree-heath (trē′hēth), *n.* See *heath*, 2, and *bruyère*.

tree-hoopoe (trē′hö″pō), *n.* A bird of the genus *Irrisor* (which see, with cut). Also called *wood-★hoopoe*.

tree-hopper (trē′hop″ėr), *n.* Any one of a number of homopterous insects of the families *Membracidæ*, *Tettigoniidæ*, and *Jassidæ*, which frequent trees or arborescent plants. *Ceresa bubalus* is the buffalo tree-hopper, so called from its bison-like hump and horns. It punctures the twigs of various trees in oviposition, and injures their vitality.

Buffalo Tree-hopper (*Ceresa bubalus*). *a*, lateral view; *b*, dorsal view.

tree-houseleek (trē′hous″lēk), *n.* Same as *houseleek-tree*.

tree-iron (trē′ī″ėrn), *n.* In a vehicle: (*a*) A reinforcing piece of wrought-iron used to connect a swingletree to a doubletree or a doubletree to the tongue. (*b*) One of the hooks or clips by which the traces are attached to the whiffletrees. *E. H. Knight.*

tree-jobber (trē′job″ėr), *n.* A woodpecker. [Local, Eng.]

tree-kangaroo (trē′kang-ga-rö″), *n.* An arboreal kangaroo of the genus *Dendrolagus*. See cut under *Dendrolagus*.

tree-lark (trē′lärk), *n.* The tree-pipit, *Anthus trivialis*.

treeless (trē′les), *a.* [< *tree* + *-less*.] Destitute of trees: as, a *treeless* desert. *Wordsworth*, Excursion, ii.

treelessness (trē′les-nes), *n.* The state of being treeless. *St. Nicholas*, XVIII. 472.

tree-lily (trē′lil″i), *n.* A plant of the genus ★*Vellozia*.

tree-lizard (trē′liz″ärd), *n.* A dendrosaurian; a lizard of the group *Dendrosaura*.

tree-lobster (trē′lob″stėr), *n.* The tree-crab.

tree-lotus (trē′lō″tus), *n.* Same as *lotus-tree*, 2.

tree-louse (trē′lous), *n.* A plant-louse; any aphid. [A dictionary word.]

tree-lungwort (trē′lung″wėrt), *n.* A lichen, *Sticta pulmonaria*. See *lungwort*, 3.

tree-lupine (trē′lū″pin), *n.* See *lupine*[2].

tree-mallow (trē′mal″ō), *n.* See *Lavatera*.

tree-marbling (trē′mär″bling), *n.* The staining or marbling on the edges of a book or for the lining of a book in imitation of the pattern used for a binding in tree-calf.

tree-medic (trē′med″ik), *n.* Same as *moon-trefoil*.

tree-mignonette (trē′min-yo̤-net″), *n.* See *mignonette*.

tree-milk (trē′milk), *n.* The juice of an asclepiadaceous plant, *Gymnema lactiferum*, a stout climber found in Ceylon and other parts of the East Indies. The milk is erroneously supposed to be used as an article of food. The name is applicable to the product of any of the cow- or milk-trees.

tree-moss (trē′môs), *n.* **1.** Any moss or lichen living on trees, especially a species of *Usnea*. See *necklace-moss*.—**2.** A club-moss or lycopod having the form of a miniature tree. See *moss*[1] and *Lycopodium*.

tree-mouse (trē′mous), *n.* A mouse of the family *Muridæ* and subfamily *Dendromyinæ*, of arboreal habits.

treen[1]† (trēn), *a.* [< ME. *treen*, < AS. *treówen*, *trīwen*, wooden, of wood, < *treó*, *treów*, tree, wood: see *tree* and *-en*[2].] **1.** Wooden: especially noting plates and dishes. See *trencher*[2].

Wrie hem quycly with a *treen* rake.
Palladius, Husbondrie (E. E. T. S.), p. 140.

Presenting of that meate to the Idoll, and then carrie it to the King on a great Leafe, in a *treene* Platter.
Purchas, Pilgrimage, p. 492.

2. Pertaining to or derived from trees.

A large Tract of the World almost altogether subsists on these *Treen* Liquors, especially that of the Date.
Evelyn, Sylva, p. 73.

treen[2]† (trēn), *n.* An old plural of *tree*.

treen[3] (trēn), *n.* [Manx: see quot.] In the Isle of Man, a territorial division, of uncertain origin and purpose, subdivided into estates called *quarterlands*.

The number of *treens* are 180, and usually contain from three to four quarterlands. . . . In the Manx language, the word *treen* is defined to be a township dividing tithe into three. In this respect it corresponds with the arrangement made by Olave I., who divided tithes into three parts: one for the clergy, another for the bishop, and a third for the abbey of Rushen.
N. and Q., 3d ser., VIII. 310.

treenail (trē′nāl, technically, in sense 1, tren′l or trun′l), *n.* [Also corruptly *trenail*, *trennel*, *trunnel*; < *tree* + *nail*. For the corruption, cf. the nautical *gunnel* for *gunwale*, *tops'l* for *topsail*, etc.] **1.** A cylindrical pin of hard wood used for fastening planks or timbers in ships and similar constructions. Treenails are made of oak- and teak-wood, but the best material for them is the wood of the American locust, from its great durability and toughness and its freedom from shrinkage.

2. In *arch.*, same as *gutta*[1], 1.

tree-nettle (trē′net″l), *n.* Same as *nettle-tree*, 2.

tree-nymph (trē′nimf), *n.* In *Gr. myth.*, a wood-nymph residing in or attached to a tree, and existing only during its life; a hamadryad.

The Homeric Hymn to Aphrodite tells of the *tree-nymph*, long-lived, yet not immortal.
E. B. Tylor, Prim. Culture (ed. 1877), II. 219.

tree-of-sadness (trē′o̤v-sad′nes), *n.* See *Nyctanthes*.

tree-of-the-sun (trē′o̤v-ᵺē-sun′), *n.* See *Retinospora*.

tree-oil (trē′oil), *n.* Same as *tung-oil*.

tree-onion (trē′un″yon), *n.* See *onion*.

tree-orchis (trē′ôr″kis), *n.* An orchid of the epiphytic genus *Epidendrum*.

tree-oyster (trē′ois″tėr), *n.* A kind of oyster, of the genus *Dendrostræa*, which grows on the ★roots of the mangrove.

tree-partridge (trē′pär″trij), *n.* A partridge or quail of the genus *Dendrortyx*, of the warmer parts of America. See cut under *Odontophorinæ*.

tree-peony (trē′pē″o̤-ni), *n.* See *peony*.

tree-pie (trē′pī), *n.* A tree-crow of the genus *Dendrocitta*, of which there are eight Indian and Chinese species, among them *D. leucogastra* of southern India, type of the genus. The best-known is *D. rufa*, the rufous crow and gray-tailed roller of the older writers, ranging through India, Assam, and the Burmese regions to Tenasserim. This is 16 inches long, of orange-brown and sooty-brown shades, varied with black and pale gray, and with blood-red iris.

tree-pigeon (trē′pij″on), *n.* An arboricole pigeon; one of many kinds inhabiting Asia, Africa, and Australia, belonging to the group *Carpophaginæ*. See *fruit-pigeon*, and cuts under *tree-dove* and *Treron*.

tree-pipit (trē′pip″it), *n.* A pipit, *Anthus trivialis* (or *arboreus*), one of the several species which are common in the British Islands and elsewhere; a tree-lark. See *pipit* and *Anthus*.

tree-poke (trē′pōk), *n.* See *Phytolacca*.

tree-poppy (trē′pop″i), *n.* See *poppy*.

tree-porcupine (trē′pôr″kū-pīn), *n.* An arboreal porcupine, especially a South American porcupine of the genus *Sphingurus*. See *coendoo*, and cut under *prehensile*.

tree-primrose (trē′prim″rōz), *n.* See *Œnothera*.

tree-protector (trē′prō-tek″tor), *n.* Any device placed about a tree-trunk to prevent insects from crawling up the bark. It may be a circular trough kept filled with water or other fluid, or a band of paper or fabric coated with tar, etc.

tree-pruner (trē′prö″nėr), *n.* Any apparatus or implement for pruning trees. In one form it consists of a long pole or staff whereby pruning-shears may be placed in position to cut off small branches which cannot be reached by the hands while the operator is standing on the ground, and an iron shaft turning in bearings attached to the pole, screw-threaded at the upper end, and having the threaded part fitted into a nut swiveled to a lazy-tongs movement that forcibly closes the shears to ★sever the branch. See cuts under *aberuncator*.

tree-rat (trē′rat), *n.* A West Indian arboreal rodent of either of the genera *Capromys* and *Plagiodon*. See cuts under *pilori-rat* and *Plagiodon*.

tree-remover (trē′rē-mö″vėr), *n.* Same as *transplanter*, 3.

treescape (trē′skāp), *n.* A landscape abounding in trees. [Rare.]

> The *treescapes*, the wood and water peeps, are fine just before you reach Darlington.
> *Dr. Gordon Stables*, quoted in N. and Q., 7th ser., I. 206.

tree-scraper (trē′skrā″pėr), *n.* A tool, consisting of a triangular blade attached flatwise to a handle, for scraping old bark and moss from trees, and also for gathering turpentine.

tree-serpent (trē′sėr″pent), *n.* Any snake of the family *Dendrophidæ*; a tree-snake.

treeship (trē′ship), *n.* [< *tree* + *-ship*.] Existence as a tree; the condition of being or becoming a tree. [Rare.]

> While thus through all the stages thou hast push'd
> Of *treeship* — first a seedling, hid in grass;
> Then twig; then sapling. *Cowper*, Yardley Oak.

tree-shrew (trē′shrö), *n.* An animal of the genus *Tupaia* (which see, with cut); a squirrel-shrew. The Peguan tree-shrew is a Burmese species, *T. peguana*.

tree-shrike (trē′shrīk), *n.* A bush-shrike; a bird of the subfamily *Thamnophilinæ*. See cut under *Thamnophilinæ*.

tree-snake (trē′snāk), *n.* A serpent of the family *Dendrophidæ*. See cut under *Dendrophis*.

tree-sorrel (trē′sor″el), *n.* An arborescent shrub, *Rumex Lunaria*, of the Canaries.

tree-soul (trē′sōl), *n.* A vivifying sentient spirit imagined by tree-worshipers to exist in every tree.

> Orthodox Buddhism decided against the *tree-souls*, and consequently against the scruple to harm them, declaring trees to have no mind nor sentient principle.
> *E. B. Tylor*, Prim. Culture, I. 475.

tree-sparrow (trē′spar″ō), *n.* 1. In Great Britain, *Passer montanus*, a near relative of the house-sparrow. It has been naturalized to some extent in the United States. See *Passer*[2] and *sparrow*. — 2. In the United States, *Spizella monticola*. This is a very common sparrow, belonging to the same genus as the chipping-sparrow, and much resembling it, but larger and more northerly in habitat, being chiefly seen in the United States in the late fall, winter, and early spring months. It is at least 6 inches long and 9 in extent. The under mandible is in part yellow, the toes are quite blackish, and there is a dark spot in the middle of the breast, as in the song-sparrow, but no streaks on the under parts. The cap is chestnut, much like the chip-bird's, and the back is streaked with brown, bay, and flaxen. It chiefly haunts shrubbery and undergrowth. The name perpetuates the original mistake of J. R. Forster (1772), who took it for the bird of def. 1.

tree-squirrel (trē′skwur″el), *n.* A true or typical squirrel; one of the arboreal species of the genus *Sciurus* proper, as distinguished from any of the ground-squirrels, prairie-squirrels, marmot-squirrels, flying-squirrels, etc. See cuts under *chickaree*, *fox-squirrel*, *Sciurus*, and *squirrel*.

tree-swallow (trē′swol″ō), *n.* 1. An Australian swallow of the genus *Hylochelidon*, called in that country *martin*, and laying in holes in trees. — 2. The white-bellied swallow, *Tachycineta* (or *Iridoprocne*) *bicolor*, which still nests in trees even in populous districts of the United States.

tree-swift (trē′swift), *n.* An Oriental swift of the genus *Dendrochelidon*, of which the species are several, wide-ranging in India and eastward.

treet (trēt), *n.* [Prob. ult. < L. *triticum*, wheat.] 1†. Ground wheat unsifted; flour of whole wheat. — 2. A kind of bran. *Halliwell*. [Prov. Eng.]

tree-tiger (trē′tī″gėr), *n.* The leopard. See cuts under *leopard* and *panther*.

tree-toad (trē′tōd), *n.* Any arboreal toad, usually of the family *Hylidæ*. They are true toads (in the sense of being bufoniform batrachians), though often miscalled *tree-frogs*. They are provided with adhesive suckers on the ends of the toes with which to cling, and many are noted for their chameleon-like changes of color. There is only one European tree-toad, *Hyla arborea*. The corresponding species in the United States is *H. versicolor*, about two inches long, and of variegated as well as changeable colors. The shrill piping heard in spring and summer in many parts of the United States is made by tree-toads, as *Acris gryllus*, *A. crepitans*, *Hyla pickeringi*, and *H. versicolor*, as well as by some of the small *Hylidæ* which are aquatic, as *Helœcetes triseriatus*. The species of tree-

American Tree-toad (*Hyla versicolor*).

toads are very numerous, about 175 in number, of which by far the greater part inhabit tropical America. Those of the genus *Phyllomedusa* are usually included among the *Hylidæ*. The lichened tree-toad is *Trachycephalus lichenatus*, of the same family. Members of the genus *Amphignathodon* (of a different family) are of arboreal habits, and resemble the *Hylidæ*. Some true frogs (raniform batrachians) are also of arboreal habits, and to these the name *tree-frog* should be, though it is not, restricted. See *tree-frog* (*b*), and cut under *Phyllomedusa*.

> The *tree-toad* chimed in with his loud trilling chirrup.
> *S. Judd*, Margaret, i. 14.

Glandless tree-toads, the members of a supposed family *Polypedetidæ*, mostly arboreal *Ranidæ*, with dilated toes and no parotoids. — **Spurred tree-toad**. See *spurred*.

tree-tomato (trē′tō-mā″tō), *n.* 1. See *tomato*. — 2. See *Cyphomandra*.

tree-top (trē′top), *n.* The top or uppermost part of a tree.

> How peaceful sleep
> The *tree-tops* altogether!
> *Browning*, Paracelsus, iii.

tree-violet (trē′vī″ō-let), *n.* See *violet*.

tree-warbler (trē′wâr″blėr), *n.* Any Old World warbler of the genus (or section of *Sylvia*) *Hypolais*, as the icterine, *H. icterina*; the melodious, *H. polyglotta*; the olive, *H. olivetorum*; the olivaceous, *H. pallida*; the booted, *H. caligata*. They are a small group, connecting the willow-warblers (*Phylloscopus*) with the reed-warblers (*Acrocephalus*), having the nearly even tail of the former and the large bill of the latter. They lay eggs of a French-gray or salmon ground-color. Compare parallel use of *wood-warbler* for a certain group of American warblers.

tree-wax (trē′waks), *n.* One of several wax-like substances produced from trees in various ways; specifically, the Japan wax. See *wax*[2].

> *Tree-wax* (probably that secreted by Coccus Pe-la on the branches of Fraxinus Chinensis).
> *Workshop Receipts*, 2d ser., p. 336.

tree-wool (trē′wůl), *n.* Same as *pine-needle wool*. See *pine-needle*.

tree-worm† (trē′wėrm), *n.* [< ME. *treworm*; < *tree*, wood, + *worm*.] The ship-worm or teredo. *Halliwell*.

tree-wormwood (trē′wėrm″wůd), *n.* See *wormwood*.

tree-worship (trē′wėr″ship), *n.* Worship or religious veneration paid to trees by primitive races of men, from the belief that they were the fixed abode or a favorite resort of spirits capable of influencing human destiny. Many different kinds of trees have been specific objects of worship, but particularly the oak, as among the Druids. In Greek mythology some special tree was in many cases sacred to an individual deity, as the oak to Zeus (Jupiter) and to Cybele, the laurel to Apollo, the ash to Ares (Mars), the olive to Athena (Minerva), the myrtle to Aphrodite (Venus), etc. Tree-worship was practised by the early Buddhists, though not enjoined by their scriptures, and traces of it remain among them, as among many other pagan peoples; and it existed throughout Europe before the introduction of Christianity. The Old Testament has many indications of its existence among the peoples surrounding the Jews, and of lapses into the practice of it by the Jews themselves.

tree-worshiper (trē′wėr″ship-ėr), *n.* One who pays religious worship or veneration to trees; a heathen who worships trees or a particular tree.

tref (tref), *a.* [Heb.] Unlawful; unclean: opposed to *kosher* as used by Hebrews.

trefallow†, *v. t.* Same as *thrifallow*.

treffled (tref′ld), *a.* In *her.*, same as *bottony*.

trefle (tref′l), *n.* [< OF. **trefle*, *treffle*, F. *trèfle*, the plant trefoil: see *trefoil*.] 1. A trefoil; any object forming or representing a trefoil. — 2. In *fort.*, a species of mine in the form of a trefoil. — 3. In *her.*, same as *trefoil*, 4.

treflé (tref-lā′), *a.* [< F. *tréflé*, < *trèfle*, trefoil: see *trefle*.] In *her.*: (*a*) Ending in a three-lobed figure or trefoil: said especially of a cross of which each branch is so finished. (*b*) Decorated with triple leaves or flowers elsewhere than at the end: thus, a bend *treflé* has such flowers along one side, usually the upper or sinister side, the trefoil flowers often resembling the upper parts of fleurs-de-lis.

Cross Treflé.

treflee (tref-lē′), *a.* [< F. *tréflé*: see *treflé*.] ★Same as *treflé*.

trefoil (trē′foil), *n.* and *a.* [< ME. *trefoil*, < OF. *trifoil*, *trefeul*, **trefle*, *treffle*, F. *trèfle* = Pr. *trefueil* = Sp. Pg. *trifolio* = It. *trifoglio*, < L. *trifolium*, trefoil, lit. three-leaved (sc. *gramen*, grass), < *tres*, three, + *folium*, a leaf: see *foil*[1].] I. *n.* 1. A plant of the genus *Trifolium*; clover. The name is given to various other plants with trifoliolate leaves, in England somewhat specifically to the black medic, *Medicago lupulina*, grown for pasture. See *clover*, *Stylosanthes*, and specific names below.

Trefoils.

3. An ornamental feathering or foliation used in mediæval Pointed architecture in the heads of window-lights, tracery, panelings, etc., in which the spaces between the cusps represent a three-lobed figure.

Trefoil.—Detail of tracery from Lincoln Cathedral, England.

> In the triforium string-course . . . of the Cathedral of Amiens, the compound *trefoil* ornament is noticeable for its beauty of outline.
> *C. H. Moore*, Gothic Architecture, p. 277.

4. In *her.*, a bearing supposed to represent a clover-leaf. It consists usually of three rounded and slightly pointed leaves set in a formal way at the three upper extremities of a small cross, the lower extremity of which terminates in different ways. Also *trefle*.

5. A bombycoid moth, *Lasiocampa trifolii*, whose larva feeds on grass and clover in Europe. Also called *grass-egger* and *clover-egger*. — **Bird's-foot trefoil**. See *bird's-foot* and *Lotus*, 2. — **Bitumen-trefoil**. See *Psoralea*. — **Bog-trefoil**. Same as *bog-bean*. — **Hare's-foot trefoil**. See *hare's-foot*, 1. — **Marsh-trefoil**, the bog-bean, *Menyanthes*. — **Melilot trefoil**, the black medic, *Medicago lupulina*. Also *trefoil-melilot*. — **Shrubby trefoil**. Same as *hop-tree*. See *Ptelea*. — **Snail-trefoil**. Same as *snail-clover*. — **Spanish trefoil**. Same as *lucerne*. — **Thorny trefoil**, a thorny shrub of the genus *Fagonia*, family *Zygophyllaceæ*, especially *F. Cretica* of the Mediterranean region. — **Tree-trefoil**, the laburnum. — **Trefoil of the diaphragm**. See *diaphragm*. — **Water-trefoil**. Same as *bog-bean*. (See also *bean-trefoil*, *heart-trefoil*, *hop-trefoil*).

II. *a.* Characterized by the presence or prominence of a trefoil or trefoils; consisting of trefoils; thrice foliated.

> The smaller Benedictine church, . . . whose bell-tower groups so well with Saint Nicolas, employs in that bell-tower a *trefoil* arch. *E. A. Freeman*, Venice, p. 21.

trefoiled (trē′foild), *a.* [< *trefoil* + *-ed*[2].] 1. Formed like or having the outlines of a trefoil; clover-leafed; three-lobed: as, a *trefoiled* arch.

> It seems by no means improbable that these pointed domes, gablets, and *trefoiled* arches may have strongly affected the architecture of the Saracens.
> *Encyc. Brit.*, II. 396.

2. In *her.*, same as *bottony*.

trefoilwise (trē′foil-wīz), *adv.* In the manner of a triple foliation, or of a combination of trefoils.

> Groups of three globulites massed *trefoilwise* . . . are not uncommon. *Quart. Jour. Geol. Soc.*, XLV. 64.

trefoliated (trē-fō′li-ā-ted), *a.* [< L. *trifolium* (see *trefoil*) + *-ate*[1] + *-ed*[2].] Same as *trefoiled*.

> On the south side of the window is the piscina, with its *trefoliated* and cusped arch.

Rom. of the Rose, l. 6382.

trehala (trē-hä′lä), *n.* A kind of manna excreted in Persia and Turkey by an insect, *Larinus maculatus*, in the form of cocoons, consisting chiefly of starch, sugar, and gum derived from the species of globe-thistle (*Echinops Persica*) on which it feeds. Also called *Turkish manna*.

trehalose (trē′hä-lōs), *n.* [< *trehala* + *-ose*.] A sugar first extracted from trehala, since proved to be identical with mycose.

treie†, *n.* See *tray*[2].

treillage† (trel′äj; F. pron. trā-yäzh′), *n.* [F., < *treille*, a trellis: see *trail*[2], *trellis*.] In *hort.*, a structure of light posts and rails for supporting wall-trees, etc.; a lattice; a trellis.

Makers of flower-gardens: . . . contrivers of bowers, grottos, *treillages*. *Spectator*.

treille (trey), *n.* [F., a lattice, trellis: see *trail*[2], *trellis*.] 1. In *her.*, a lattice. [Rare.]—2. In *lace-making*, a réseau or net ground.

trek (trek), *v. i.* [Also *treck*; < D. *trekken*, draw, draw a wagon, journey: see *track*[1].] In South Africa: (*a*) To draw a vehicle, as oxen; pull a load along.

Bullocks can not *trek* with wet yokes, or their shoulders become galled. *Pop. Sci. Mo.*, XXIX. 618.

(*b*) To travel by ox-wagon; hence, to travel in general; go from place to place; migrate.

Thus the early Cape "boers" adopted the nomad habit of *trekking*, which simply meant enlarging the range of their occupation of new land and a further advance into
★ the interior. *Westminster Rev.*, CXXVI. 166.

trek (trek), *n.* [D., pull, tug, draft: see *trek*, *v.*, *track*[1], *n.*] In South Africa, the action of drawing, as a vehicle or a load; draft; traction; hence, a journey or migration; the distance between one stopping-place and the next; travel: as, that was short *trek*.

After the rain the *trek* was heavy.
Pop. Sci. Mo., XXIX. 619.

When it first became known that the *trek* was projected, 5,000 Boers were calculated to be upon the point of form-
★ ing the army of invasion. *New York Tribune*, May 8, 1891.

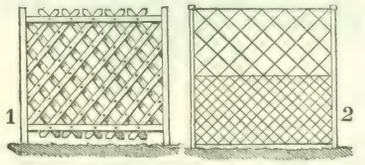
trekker (trek′ėr), *n.* [< D. *trekker*, < *trekken*, draw: see *trek*, *v.*] One who treks; a traveler; a wanderer; a migrator. [South Africa.]

Quiet people nowadays are no lovers of . . . the carpet-bagging colonists, the beach-comber, the *trekker*, the belligerent missionary. *Contemporary Rev.*, LIII. 534.

trek-oxen (trek′ok″sn), *n. pl.* Oxen used for drawing wagons; draft-oxen. [South Africa.]

Trek-oxen are, without exception, obstinate, perverse creatures. *Pop. Sci. Mo.*, XXIX. 620.

trek-rope (trek′rōp), *n.* A rope used as a trek-tow. [South Africa.]



trekschuit (trek′skoit), *n.* [Also *trekschuyt*; D. *trekschuit*, < *trekken*, draw, + *schuit*, a boat: see *trek*, *track*[1], and *scout*[4].] A track-boat or canal-boat, such as is in common use in Holland.

trek-tow (trek′tō), *n.* [< D. *trek* + E. *tow*[1].] In South Africa, an iron chain or rawhide cable connecting a wagon-pole with the line of yokes to which the bullocks are attached.

trelawny (trē-lâ′ni), *n.* [Appar. from the surname *Trelawney*.] A thin mess, made of barley-meal, water, and salt. *Halliwell*. [Prov. Eng.]

trellice† (trel′is), *n.* An obsolete spelling of *trellis*.

trellis (trel′is), *n.* [Formerly also *trellice*; < ME. *trelys*, < OF. *treillis*, a trellis, < *treille*, *trelle*, F. *treille* = Pr. *treilla*, *trelha*, *trilla*, < L. *trichila*, also *tricla*, bower, arbor, summer-house: see *trail*[2].] 1. A structure of light cross-bars,

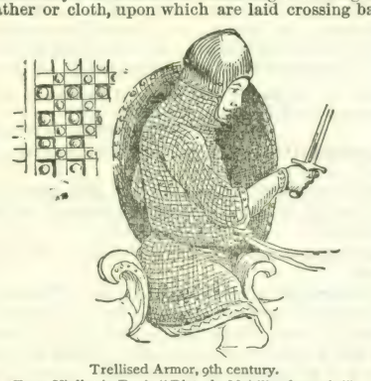
Trellises: 1, wooden; 2, wire.

as of wood, nailed together where they cross one another, or of thin ribbons of metal, or of wire imitating this.

Through the *trellis* of the woodwork and the leaves of the flowering shrub, he just caught a glimpse of some form within. *Bulwer*, What will he Do with it? vii. 21.

2. A shed, canopy, summer-house, or the like composed, or partly composed, of trellis-work. Such buildings are utilized especially for the support of growing vines.—3. In *her.*, same as *treille* or *lattice*, 3.

trellis (trel′is), *v. t.* [< *trellis*, *n.*] 1. To furnish with trellises or trellis-work; especially, to support or train on trellises: as, to *trellis* a vine. *Bailey*, 1727.



The rich moulding of masques and flowers and fruit . . . shone out amid the *trellised* trees.
J. H. Shorthouse, Countess Eve, ix.

2. To form into trellis-work; interlace; interweave.

The red and golden vines,
Piercing with their *trellised* lines
The rough, dark-skirted wilderness.
Shelley, Lines Written among the Euganean Hills.

We passed out of a *trellised* door on to the black lacquered floor of a veranda. *The Century*, XL. 196.

apparently in relief, and bosses in the square or lozenge-shaped intervals. Another variety of it shows rivets or studs also at the intersection of the crossing bands. It is generally assumed that the bands are of leather.

trellis-work (trel′is-wėrk), *n.* 1. Same as *latticework*.

The pillars support a *trellis-work*, which is covered with vines. *Pococke*, Description of the East, II. ii. 3.

Birds
Of sunny plume in gilded *trellis-work*.
Tennyson, Geraint.

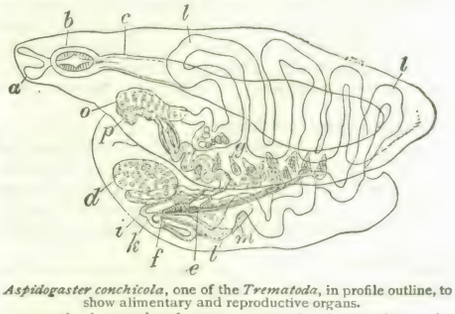
2. A modern kind of fancy work made by cutting out patterns in different materials and applying them upon a background with needle-work edging, etc. The name is derived from the common use of a pattern of vines and climbing plants supported on a trellis.

treloobing (tre-lō′bing), *n.* [Cf. *loobs*.] Stirring and working the loobs, or slimy earth of tin, in a slime-pit, that the mud may partly wash off with the water and the ore settle at the bottom (*R. Hunt*); as used by some writers, the same as *tossing*. [Cornwall, Eng.]

Trema (trē′mä), *n.* [NL. (Loureiro, 1790), from the small external pits in the endocarp of many species; < Gr. τρῆμα, a hole, < τετραίνειν (√ τρα), bore, pierce.] 1. A genus of dicotyledonous plants, family *Ulmaceæ* and tribe *Celtideæ*. It is characterized by lateral free stipules, polygamous flowers, and narrow cotyledons. There are about 30 species, perhaps to be reduced to 20, widely dispersed through tropical and subtropical regions, often described under the names *Sponia* and *Celtis*. They are trees or tall shrubs, bearing alternate serrate leaves three-nerved at the base and usually two-ranked. The flowers are borne in cymes nearly sessile in the axils, followed by small drupes often with the perianth and the involute style-branches persistent. *T. micrantha*, known in Jamaica as *nettle-tree*, is a rough-leaved shrub or small tree, widely diffused from Cuba to Brazil. Three species occur in Australia, and are known as *hoop-ash*; of these *T. orientalis*, a tree about 40 feet high with evergreen leaves silvery beneath, extends also to Ceylon, and is known as *charcoal-tree* in India, where it springs up profusely in deserted grounds.

2. [*l. c.*] In *anat.*: (*a*) A foramen. (*b*) The vulva. [Rare.]

Tremadoc slate (tre-mad′ok slāt). A division of the Cambrian formation: so named by Sedgwick because occurring near Tremadoc in Carnarvonshire. It is at the top of this subdivision of the older rocks of this region, in regard to whose nomenclature there has been so much dispute, that the line between Cambrian and Silurian is now drawn in England by Geikie and other British geologists. See *Silurian*.



tremando (trā-män′dō), *adv.* [It., trembling.] In *music*, same as *tremolando*.

Tremandra (trē-man′drä), *n.* [NL. (R. Brown, 1814), named from the remarkably tremulous anthers; < L. *tremere*, tremble, + Gr. ἀνήρ (ἀνδρ-), male (taken for 'anther').] A genus of plants, type of the family *Tremandraceæ*, distinguished by its jointed anthers and opposite leaves. The 2 species are natives of southwestern Australia. They are shrubs, more or less downy with stellate hairs, and bear ovate dentate leaves and axillary purple flowers. The former *T. verticillata* of greenhouse cultivation is now separated as *Platytheca galioides*, on account of its whorled leaves and biseriate unjointed anthers. It is known as *purple heath-flower*.

Tremandraceæ (trē-man-drā′sē-ē), *n. pl.* [NL. (R. Brown, 1814), < *Tremandra* + *-aceæ*.] A family of dicotyledonous choripetalous plants of the order *Geraniales*. It is characterized by regular flowers with three, four, or five sepals, as many petals, and twice as many free stamens. It includes 17 species, belonging to the three genera *Tremandra* (the type), *Platytheca*, and *Tetratheca*, the last including all but three of the species in the family. They are all natives of Australia south of the tropics, and are small heath-like shrubs with alternate, opposite or whorled leaves, and solitary axillary flowers, usually red or purple, often with purple anthers.

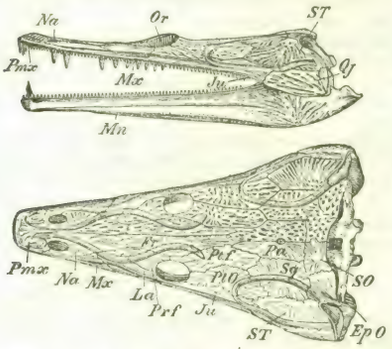
Tremarctos (trē-märk′tos), *n.* [NL., < Gr. τρῆμα, hole, + ἄρκτος, bear.] The only South American genus of *Ursidæ*, containing the spectacled bear, *T. ornatus*. See cut under *spectacled*.

Trematoda (trem-a-tō′dä), *n. pl.* [NL., < Gr. τρηματώδης, having many holes, porous: see *trematoid*.] 1†. In Cuvier's system of classification, the second family of parenchymatous entozoa, containing the flukes proper, the hectocotyls of cephalopods, and the planarian larvæ of turbellarians. See cuts under *Cercaria*, *Bucephalus*, and *water-vascular*.—2. An extensive order of parasitic and chiefly entoparasitic worms, which may be found inside the bodies of almost any animal, and sometimes on the gills or skin of fishes; the flukes or fluke-worms.

Aspidogaster conchicola, one of the *Trematoda*, in profile outline, to show alimentary and reproductive organs.

a, mouth; *b*, muscular pharynx; *c*, stomach; *d*, germarium; *e*, internal vas deferens; *f*, common vitellarian duct; *g*, vitellarium; *i*, *k*, oviduct; *l*, uterus; *m*, testis; *o*, vagina; *p*, penis, continuous posteriorly with external vas deferens.

They mostly have a flattened and more or less chitinized body, and a pair or more of suckers for adhering to the tissues of the host. Most trematoids are hermaphrodite or monœcious, but some are dioecious. The endoparasitic forms usually undergo a series of transformations comparable to those of tapes. The well-known liver-fluke of man, *Distoma hepaticum*, is a characteristic example. (See *cercaria*, *Distoma*, *fluke*[2], and *sporocyst*.) When the order is raised to the rank of a class, as is done by some, the monogeneous and digeneous suborders become subclasses, and the current families are regarded as orders, as *Tristoma* and *Polystoma* of the former division, and of the latter *Monostoma*, *Distoma*, *Gasterostoma*, and *Holostoma*. Also *Trematoidea*, *Trematodea*, and *Trematoida*.



trematode (trem′a-tōd), *a.* and *n.* [< Gr. τρηματώδης, having many holes: see *trematoid*.] Same as *trematoid*.

trematoid (trem′a-toid), *a.* and *n.* [< Gr. *τρηματοειδής, contr. τρηματώδης, having many holes, < τρῆμα(τ-), hole: see *Trema*.] **I.** *a.* Having many holes; suctorial, as an entoparasite worm; of the nature of or resembling a fluke; of or pertaining to the *Trematoda*.

II. *n.* A trematoid worm, or fluke; a member of the *Trematoda*.

Trematoidea (trem-a-toi′dē-ä), *n. pl.* [NL.: see *trematoid*.] Same as *Trematoda*, 2.

Trematosaurus (trem″a-tō-sâ′rus), *n.* [NL. (Braun, 1841), < Gr. τρῆμα(τ-), hole, + σαῦρος, lizard.] A genus of Triassic labyrinthodont amphibians, having the skull mailed and sculptured.

Side and Top Views of Skull of *Trematosaurus*: cranial sculpture omitted from lower half of latter, to show sutures more distinctly.

EpO, distinct pointed epiotic; *Fr*, frontal; *Ju*, jugal; *La*, lacrymal; *Mn*, mandible; *Mx*, maxilla; *Na*, nasal; *Or*, orbit; *Pa*, parietal; *Pmx*, premaxilla; *Prf*, prefrontal; *Ptf*, postfrontal; *PtO*, postorbital; *Qj*, quadratojugal; *SO*, one of a pair of bones taking the place of supra-occipitals; *Sq*, squamosal; *ST*, supratemporal.

tremblable† (trem′bla-bl), *a.* [< *tremble* + *-able*.] Calculated to cause fear or trembling.

But, what is *tremblable* and monstrous, there be some who, when God smites them, they fly unto a witch or an inchauntresse, and call for succour.
Dr. G. Benson. (*Imp. Dict.*)

To tremble for, to be in fear on account of: as, to *tremble for* one's safety.

I *tremble for* the cause of liberty, from such an example to kings. I *tremble for* the cause of humanity, in the unpunished outrages of the most wicked of mankind.
Burke, Rev. in France.

Trembling palsy. Same as *paralysis agitans* (which see, under *paralysis*).—**Trembling poplar.** See *poplar*.—**Trembling prairie.** [Tr. F. *prairie tremblante*: limited in use to parts of Louisiana: also called *shaking prairie*.] See the quotation.

Also, in the vicinity of the numerous lakes of the parish [La Fourche, Louisiana] exist immense tracts called *trembling prairies*. These seem to be a surface composed of the matted roots and decayed stalks of the marsh vegetation, floating upon water in some instances, and upon very soft mud in others. Over these prairies it is practicable to walk, and cattle graze upon them, although they vibrate at every tread, and a cut of a few feet in depth will always discover a substratum of water.
S. H. Lockett, Sec. Ann. Rep. Topog. Surv. of Louisiana, [1871, p. 10.

Trembling tree, the trembling poplar, or more often the American aspen, *Populus tremuloides*.

trencher[2] (tren′chėr), *n.* [< ME. *trenchere, trenchor, trenchour*, < OF. *trenchoir, trencheoir*, a trencher, lit. a cutting-place, < *trencher*, cut: see *trench, v.*] **1.** A wooden plate or platter (originally a square piece of board or slice of wood) for the table or the kitchen. Trenchers of some form were used at table till a late period, at first by all classes and afterward by the common people, either to be eaten from or for the cutting up of food; and the number of changes of them during a meal in early times was regulated by personal rank. Trenchers and plates are sometimes mentioned together in later writings, the food being probably served from the former to the latter.

Thus ye shall serue your soueravne: laye [six or eight] *trenchours*, & yf he be of a lower degre [or] estate, laye fyue *trenchours*, & yf he be of lower degre, foure *trenchours*, & of an other degre, thre *trenchours*.
Babees Book (E. E. T. S.), p. 274.

Pepys, Diary, Oct. 29, 1663.

To heap the *trencher* and to fill the caup of an idle blackguard ne'er-do-weel. *Scott*, Pirate, iv.

2†. A slice of bread used as a platter to lay food upon, as thin cakes of bread still are in some countries. Such slices of bread were either eaten after the meat placed upon them, or, as commonly among the rich, thrown into an alms-basket, with other leavings, for the poor.

Loaves at this period [the 14th century] were made of a secondary quality of flour, and these were first pared, and then cut into thick slices, which were called in French tranchoirs, and in English *trenchers*, because they were to be carved upon. *Wright*, Homes of Other Days, xi.

3. That which trenchers contain; food; hence, the pleasures of the table: often used attributively.

Those *trencher* philosophers which in the later age of the Roman state were usually in the houses of great persons. *Bacon*, Advancement of Learning, i.

having rows of processes on its body, and others radiated about the mouth. It varies in length from 6 to 24 inches. Much skill and care are required in the operation of curing, which is performed by gutting and boiling these sea-slugs, and spreading them out on a perforated platform over a wood-fire (or sometimes in the sun) to dry. Sun-dried trepangs are in special request in China for making soups. The fishery is carried on in numerous localities in the Indian Ocean, in the Eastern Archipelago, and on the shores of Australia.

trepanize (trep'an-īz), *v. t.*; pret. and pp. *trepanized*, ppr. *trepanizing*. [< *trepan*[1] + *-ize*.] To trepan.

trepget†, *n.* Same as *trebuchet*.

trephine (tre-fēn′ or tre-fīn′), *n.* [< F. *tréphine;* appar. intended for **trépine*, an arbitrary dim. of *trépan*, trepan: see *trepan*[1].] An improved form of the trepan, consisting of a cylindrical saw with a handle placed transversely, like that of a gimlet, and having a sharp steel point called the *center-pin*. This pin may be fixed and removed at pleasure, and stands in the center of the circle formed by the saw, projecting a little below its edge. The center-pin is fixed in the skull, and forms an axis round which the circular edge of the saw rotates, and as soon as the teeth of the saw have made a circular groove in which they can work steadily the center-pin is removed. The saw is made to cut through the bone, not by a series of complete rotations such as are made by the trepan, but by rapid half-rotations alternately to the right and left. The trephine is used especially in injuries of the head, and in cases, chiefly of abscess, resulting from injuries, in which the removal of the morbid material or of a new growth is necessary. The use of the trephine, which was gradually being abandoned, has of late years come into prominence again, in consequence of the discoveries made in cerebral localization.

Trephine.
A, crown or spherical saw; *a*, center-pin for guiding the saw; *b*, screw for attachment of the shank to a working handle.

trephine (tre-fēn′ or tre-fīn′), *v. t.*; pret. and pp. *trephined*, ppr. *trephining*. [< *trephine*, *n.*] To operate upon with a trephine; trepan.

trephine-saw (tre-fēn′sâ), *n.* Broadly, a crown-saw; more specifically, a small crown-saw used by surgeons in trephining; a trephine.

tresaylet (tres′āl), *n.* [< OF. *tresayle* (F. *trisaïeul*), < *tres* (< L. *tres*, *tri-*), three, + *aïeul*, *ayle*, etc., grandfather: see *ayle*.] In *law*, an old writ which lay for a man claiming as heir to his grandfather's grandfather, to recover lands of which he had been deprived by an abatement happening on the ancestor's death.

tresont, *n.* An obsolete form of *treason*.

tresort, **tresouret**, *n.* Middle English forms of *treasure*.

tresorert, **tresourert**, *n.* Middle English forms of *treasurer*.

tresouriet, **tresoury**†, *n.* Middle English forms of *treasury*.

trespacet, *v. i.* An old spelling of *trespass*.

trespass (tres′pas), *v. i.* [< ME. *trespassen*, *trespacen*, < OF. *trespasser*, pass over, depart, die, F. *trépasser*, die, = Pr. *traspassar*, *trespassar*, *trapassar* = Sp. *traspasar* = Pg. *traspassar*, *trespassar* = It. *trapassare*, < ML. *transpassare*, pass over, trespass, < L. *trans*, over, + *passare*, pass: see *trans-* and *pass*, *v.*, and cf. *transpass*.] 1†. To pass beyond a limit or boundary; hence, to depart from life; die.

Robert de Bruse . . . *trespassed* out of this vncertayne worlde. *Berners*, tr. of Froissart's Chron., I. xx.

2. To make entry or passage without right or permission; go unlawfully or unwarrantably; encroach by bodily presence: with *on* or *upon:* as, to *trespass upon* another's land or premises.

Go out of the sanctuary; for thou hast *trespassed*.
2 Chron. xxvi. 18.

3. To make an improper inroad upon a person's presence or rights; intrude aggressively or offensively in relation to something: with *on* or *upon*.

Nothing that *trespasses upon* the modesty of the company, and the decency of conversation, can become the mouth of a wise and virtuous person.
Tillotson, Sermons, ccxiv.

4. To commit an aggressive offense; transgress in some active manner; offend; sin: with *against:* as, to *trespass against* the laws of God and man. See *trespass*, *n.*

A dere God, what Love hadde he to us his Subjettes, whan he thal nevere *trespaced* wolde for Trespassours suffre Dethe! *Mandeville*, Travels, p. 3.

If thy brother *trespass against* thee, rebuke him.

5†. To give offense: with *to*.

And if that any neighebore of myne . . .
. . . be so hardy *to* hir to *trespace*.
Chaucer, Prol. to Monk's Tale, l. 15.

=Syn. 2 and 3. *Trespass upon*, *Encroach upon*, *Intrench upon*, *Trench upon*, *Infringe upon*, *Intrude upon*, *Transgress*. *Trespass upon*, though figurative, expresses generally the idea common to these words, that of unauthorized, improper, or undesirable coming upon ground not one's own. The order is essentially that of strength, and there is a corresponding increase in the presumption that the offense is committed knowingly. To *trespass upon* another's rights is literally to step or pass across the line of demarcation between his rights and ours. To *encroach upon* anything is to creep upon it to some extent, and often implies moving by stealth or by imperceptible degrees and occupying or keeping what one thus takes: the ocean may thus be said to *encroach upon* the land by wearing it away. To *intrench upon*, or latterly more often *trench upon*, is to cut into as a trench is lengthened or widened; it does not especially suggest, as does *encroach upon*, either slowness or stealth. *Infringe* or *infringe upon* means a breaking into; hence it is a much stronger word than those that precede it. *Transgress* is stronger and plainer still, meaning to walk across the boundary, as of another's rights. *Intrude upon* suggests especially that one is unwelcome, and goes where regard for others' rights, as of privacy, or the sense of shame, should forbid him to press in.

trespass (tres′pas), *n.* [< ME. *trespas*, < OF. *trespas*, departure, F. *trépas*, decease, = Pr. *traspas*, *trespas* = Sp. *traspaso* = Pg. *traspasso*, *trespasso* = It. *trapasso*, departure, decease, digression, trespass; from the verb.] 1. Unlawful or forbidden entrance or passage; offensive intrusion of bodily presence. See 3 (*b*).

"There is neither knight or squire," said the pinder, . . .
"Dare make a *trespass* to the town of Wakefield."
Jolly Pinder of Wakefield (Child's Ballads, V. 205).

2. An aggressive or active offense against law or morality; the commission of any wrongful or improper act; an offense; a sin: as, a *trespass* against propriety.

You hath he quickened, who were dead in *trespasses* and sins. Eph. ii. 1.

Be plainer with me, let me know my *trespass*
By its own visage. *Shak.*, W. T., i. 2. 265.

In 1404 . . . Northumberland's treason was condoned as a *trespass* only. *Stubbs*, Const. Hist., § 372.

3. In *law*, in a general sense, any transgression not amounting to felony or misprision of felony. Specifically—(*a*) An injury to the person, property, or rights of another, with force, either actual or implied: technically called *trespass vi et armis*. In this sense it includes wrongs immediately injurious even when the force is only constructive, as in the enticing away of a servant. (*b*) A wrongful entry upon land of another: specifically called *trespass to real property*. Setting foot on another's land without right or license is technically considered a forcible trespass. Casting things upon it, suffering one's cattle to go upon it, or otherwise interfering with its possession is equally so.

Every unwarrantable entry on another's soil the law entitles a *trespass* by breaking his close. . . . For every man's land is, in the eye of the law, enclosed and set apart from his neighbour's. *Blackstone*, Com., III. xii.

(*c*) An injury to property by one who has no right whatever to its possession or use: technically called *trespass to property*. In this sense it equally implies force, but relates to property only, and contradistinguishes the wrong from a conversion or embezzlement by a bailee or other person having already a rightful possession.—**Action of trespass**, an action to recover damages for trespass.—**Forcible trespass**, in *criminal law*, the offense of committing trespass to personal property with such display of force as to terrify or overawe. The similar offense respecting real property is called *forcible entry*.—**Trespass for mesne profits.** See *action of mesne profits*, under *profit*.—**Trespass on the case**, an action for a wrong which is not technically a trespass, because the injury is not in the strictest sense the direct result of the act, but where the transgressive character of the transaction appears from the circumstances of the case, as in the case of libel, malicious prosecution, and the like.

In the 16th century a special form of *trespass on the case* became, under the name of assumpsit, the common and normal method of enforcing contracts not made by deed, and remained so till the middle of the present century. *Encyc. Brit.*, XXIII. 454.

=Syn. 2 and 3. *Transgression*, *Wrong*, etc. (see *crime*), breach, infringement, infraction, encroachment.

trespasser (tres′pas-ėr), *n.* [< ME. *trespassour*, *trespasoure*, < OF. **trespassour*, < *trespasser*, trespass: see *trespass*.] One who trespasses, or commits a trespass; one who invades another's property or rights, or who does a wrongful act.

trespass-offering (tres′pas-of″ėr-ing), *n.* Among the ancient Jews, a sacrifice presented in expiation for such a sin or offense as admitted of compensation or satisfaction. The ceremonial is described in Lev. xiv. 12–18. See *offering*.

tress[1] (tres), *n.* [< ME. *tresse*, *trisse*, < OF. *tresse*, *tresce*, F. *tresse* = Pr. *tressa*, *treza* = Sp. *trenza* = Pg. *trança* = It. *treccia*, < ML. **trichea*, *tricia*, also *trica*, a tress, hair interwoven, prob. < Gr. τρίχα, in three parts, < τρεῖς (τρι-), three: see *three*.] A plait, braid, lock, or curl of hair; any distinct portion of the hair of the head, especially when long; in the plural, the hair of the head, especially when growing abundantly.

Hir yelow heer was broyded in a *tresse*
Bihinde hir bak, a yerde long, I gesse.

★**tressure** (tresh'ūr), *n.* [< heraldic F. *tressure*, < *tresser*, weave, plait: see *tress*[1].] In *her.*, a modification of the orle, generally considered as being of half its width, and double. According to some writers, the tressure is a double orle — that is, two narrow bands separated by a space about equal to the width of each of them, and both together occupying the same space as an orle or nearly so. Also called *tract.*

Double Tressure Fleury-counter-fleury.

The Scottish arms are a lion with a border, or *tressure*, adorned with flower-de-luces.
T. Warton, Hist. Eng. Poetry, II. 269.

tressured (tresh'ūrd), *a.* [< *tressure* + *-ed*[2].] Emblazoned with a tressure, as an escutcheon. [The use of the word in the following quotation is erroneous, because the fleurs-de-lis are not tressured, but the tressure is flowered with fleurs-de-lis.

The *tressured* fleur-de-luce he claims
To wreathe his shield. *Scott*, L. of. L. M., iv. 8.]

tressy (tres'i), *a.* [< *tress*[1] + *-y*[1].] Of or pertaining to tresses; also, having the appearance of tresses or locks of hair.

trest[1]†, *n.* An obsolete form of *trust*[1].

trest[2] (trest), *n.* [Also Sc. *traist, trast*, also E. dial. *tress;* < ME. *treste*, a trestle, < OF. *traste* = OIt. *trasto;* prob. = Bret. *treust* = W. *trawst*, a beam, trestle, < L. *transtrum*, a beam: see *transom*, and cf. *trestle*[1].] **1.** A beam.—**2.** A trestle.—**3.** A strong large stool. [Prov. Eng. or ★Scotch in all uses.]

trestle[1] (tres'l), *n.* [Early mod. E. also *tressel* (still sometimes used), *trestyll, threstle;* also dial. *trussel;* < ME. *trestel* (pl. *trestlis*), < OF. *trestel*, later *tresteau*, F. *tréteau* = Bret. *trenstel* = W. *trestyl* (Celtic from L.; the W. perhaps through E. ?) (ML. *trestellus*), < ML. **transtillum*, dim. of L. *transtrum*, a beam, cross-bar: see *trest*[2] and *transom.*] **1.** A frame, consisting of a beam or bar fixed at each end to a pair of spreading legs, for use as a support. A single trestle is often used by mechanics to rest work against; two or more trestles serve as a support for a board or other object laid upon them horizontally for some temporary purpose. Early household tables commonly consisted of boards laid upon movable trestles, the board in this case being the table proper; and *trestle*, in the singular, is sometimes used for the whole support of a table when the parts are joined into a framework.

"The *trestle* that stands under this Round Table," she said, . . .
"It is worth thy Round Table, thou worthy king."
Ballad of King Arthur (Child's Ballads, I. 232).

He looks in that deep ruff like a head in a platter,
Served in by a short cloak upon two *trestles*.
B. Jonson, Alchemist, iv. 1.

2. Same as *puncheon*[1].—**3.** In *her.*, a low stool or bench used as a bearing: usually represented with three legs.—**4.** In *civil engin.*, a framework for supporting string-pieces, as of a railway, a bridge, or other elevated structure, composed of vertical or inclined posts at proper intervals under each rail or stringer, with or without diagonal braces which are mortised into a horizontal head timber and a longer horizontal foot-piece or sill. A single such frame is called a *bent.* The whole structure is the trestle. When made of steel and of considerable height the bents are of structural shapes braced to form skeleton towers which carry the railway at their top.

5. *pl.* The shores or props of a ship under construction. *Longfellow*, Wayside Inn, Musician's Tale, xiii.—**6.** Same as *trestletree.*—**7.** In *leather-manuf.*, the sloping plank on which skins are laid while being curried.

A triæne with recurved arms like a grapnel is an *anatriæne;* with porrect arms, a *protriæne;* with arms at right angles with the shaft, an *orthotriæne;* with bifurcate arms, a *dichotriæne;* with trifurcate, a *trichotriæne.* When the cladome, or set of cladi, arises from the center of the rhabdome, a *centrotriæne* results; when from both ends of the rhabdome, an *amphitriæne.*

triage (trī′āj; F. pron. trē-äzh′), *n.* [< F. *triage,* < *trier,* sort out, try: see *try.*] That which is culled, picked, or thrown out; specifically, in English use, the refuse of whole coffee; broken coffee-beans and chaff.

The broken beans [of coffee], or *triage,* must also be separated by hand from the dust. *Spons' Encyc. Manuf.*, I. 705.

triakisicosahedral (trī″a-kis-ī″kō-sa-hē′dral), *a.* [< *triakisicosahedron* + *-al.*] Pertaining or related to a triakisicosahedron.

triakisicosahedron (trī″a-kis-ī″kō-sa-hē′dron), *n.* [< Gr. τριάκις, three times (< τρεῖς (τρι-), three), + εἴκοσι, twenty, + ἕδρα, seat, base.] A solid formed by erecting on each face of a Platonic icosahedron a pyramid of such an altitude as to make all the summits regular. It is reciprocally related to the Archimedean truncated dodecahedron. See *solid,* II., 2, fig. 20.

triakisoctahedral (trī″a-kis-ok-ta-hē′dral), *a.* [< *triakisoctahedron* + *-al.*] Pertaining or closely related to the triakisoctahedron.

triakisoctahedron (trī″a-kis-ok-ta-hē′dron), *n.* [< Gr. τριάκις, three times (< τρεῖς (τρι-), three), + ὀκτώ, eight, + ἕδρα, seat, base.] A solid formed by erecting on each face of the regular octahedron a pyramid of such an altitude as to render all the summits regular. It is reciprocally related to the Archimedean truncated cube. See *solid,* II., 2, fig. 14.

triakistetrahedral (trī″a-kis-tet-ra-hē′dral), *a.* [< *triakistetrahedron* + *-al.*] Pertaining or closely related to the triakistetrahedron.

triakistetrahedron (trī a-kis-tet-ra-hē′dron), *n.* [< Gr. τριάκις, three times (< τρεῖς (τρι-), three), + τέτρα- (for τέτορα, τέσσαρα), four, + ἕδρα, seat, base.] A solid formed by erecting on each face of a regular tetrahedron a pyramid of such altitude that all the summits become regular. It is reciprocally related to the Archimedean ★truncated tetrahedron. See *solid,* II., 2, fig. 12.

trial (trī′al), *n.* [Formerly also *tryal;* < OF. *trial,* trial, < *trier,* try: see *try.*] 1. The act of trying or making a test of something; a putting to proof by examination, experiment, use, exercise, or other means.

All thy vexations
Were but my *trials* of thy love, and thou
Hast strangely stood the test.
Shak., Tempest, iv. 1. 6.

2. The act of trying or making an effort; a seeking to do or effect something; a determining essay or attempt.

Thy fear, said Zephon bold,
Will save us *trial* what the least can do
Single against thee. *Milton,* P. L., iv. 855.

3. A test of superiority; a contest; a competition.

But let your fair eyes and gentle wishes go with me to my *trial.* *Shak.*, As you Like it, i. 2. 199.

4. The state of being tried; probation by the experience or suffering of something; subjection to or endurance of affliction.

Others had *trial* of cruel mockings and scourgings. Heb. xi. 36.

That which purifies us is *trial,* and *trial* is by what is contrary. *Milton,* Areopagitica.

5. That which tries or afflicts; a trying circumstance or condition; a hardship; an affliction.

O, but he was a conspicuous *trial* in our lot—a source of manifold woe to us all! *J. T. Fields,* Underbrush, p. 69.

6. In *law,* the judicial investigation and determination of the issues between parties; that part of a litigation which consists in the examination by the court of the point in controversy, the hearing of the evidence, if any, and the determination of the controversy, or final submission of the cause for such determination. Whether the word includes the preliminary steps of the hearing, such as the impaneling of the jury, and the conclusion reached or the rendering of the decision, depends on the connection in which it is used. "When used of a criminal cause, *trial* commonly means the proceedings in open court after the pleadings are finished and it is otherwise ready, down to and including the rendition of the verdict. Not extending, on the one hand, to such preliminary steps as the arraignment and giving in of the pleas, it does not comprehend, on the other hand, a hearing on appeal." (*Bishop.*) The modes of trial now in use in the United States and England are—by a judge with a jury, by a judge without a jury, or by a referee or similar officer appointed for the purpose. In England assessors or assistants sometimes sit with the judge or referee. See *issue, judgment, jury, summary, verdict,* etc.

7. Something upon or by means of which a test is made; an experimental sample or indicator; a trial-piece.

Captaine Newport being dispatched, with the *tryals* of Pitch, Tarre, Glasse, Frankincense, Sope ashes.
Quoted in *Capt. John Smith's* Works, I. 200.

And who would to Liberty e'er prove disloyal,
May his son be a hangman, and he his first *trial.*
Burns, The Toast.

Certain "pyrometrical beads" or *trials* . . . indicated the temperature by their tint. *Encyc. Brit.*, XX. 132.

8. In *ceram.*, one of the pieces of ware which are used to try the heat of the kiln and the progress of the firing of its contents. In the firing of painted porcelain the trials are often painted in carmine, a color which responds delicately to the degree of heat to which it is subjected. The progress of the trials is observed through small openings in the kiln.—**General Court of Trials.** See *general.*—**New trial,** a second or subsequent trial allowed to a party unsuccessful on the original trial, on the ground of error or injustice.—**On** or **upon trial,** on probation; as an experiment, in order to more lasting arrangements.

If my husband had been alive when you'd come to preach *upon trial,* he'd have been as good a judge of your gifts as Mr. Nuttwood. *George Eliot,* Felix Holt, iv.

Rule of trial and error, the rule of false. See *position*, 7. —**State trials**, the name given to several collections of reports of public prosecutions, especially for offenses against government and public peace and order.—**To put to trial** or **on trial**. (*a*) To bring before a court and jury for examination and decision. (*b*) To bring to a test; try.—**Trial at bar, trial at nisi prius, trial by battle**. See *bar*[1], *nisi prius*, *battle*[1].—**Trial balance**, in *double-entry bookkeeping*, a method of testing the correctness of the posting of the ledger (1) as regards the sums posted, and (2) as regards the side to which they are posted. This is effected by summing the debit and credit balances respectively of the personal accounts, and then adding to the credit side of this summation the difference between the two sides of a similar summation of the merchandise accounts. Should the two sides of this final summation exactly balance each other, the presumption is that the ledger has been correctly posted as regards the particulars already mentioned, but not as regards the individual items being posted to the right account.—**Trial by certificate**, an old mode of determining a cause according to the written declaration of some person, usually a public officer, who was deemed best informed on the point, and whose certificate was accordingly treated as final.—**Trial by ordeal**. See *ordeal*, 1.—**Trial by proviso, by record, by tanghin**, etc. See *proviso*, etc.—**Trial judge, jury, justice**. See *judge*, etc.—**Trial of the pyx**. See *pyx*. (See also *coursing-trial*, *field-trial*). =**Syn. 1.** *Trial*, *Test*, proof. *Trial* is the more general; *test* is the stronger. *Test* more often than *trial* represents that which is final and decisive: as, the guns, after a severe public *test*, were accepted.—**2.** Attempt, endeavor, effort, essay, exertion.—**5.** Trouble, affliction, distress, tribulation.—**7.** Touchstone, ordeal.

trialate (trī-ā′lāt), *a.* [< L. *tres* (*tri-*), three, + *alatus*, winged: see *alate*[2].] In *bot.*, three-winged; having three wings.

trial-case (trī′al-kās), *n.* Same as *trial-sight*.

trial-day (trī′al-dā), *n.* The day of trial.

> Brought against me at my *trial-day*.
> *Shak.*, 2 Hen. VI., iii. 1. 114.

trial-fire (trī′al-fīr), *n.* A fire for trying or proving; an ordeal-fire.

> With *trial-fire* touch me his finger-end.
> *Shak.*, M. W. of W., v. 5. 88.

trial-glasses (trī′al-glas′ez), *n. pl.* A graduated set of concave and convex lenses and prisms used for testing the vision.

trial-ground (trī′al-ground), *n.* A locality for the trying or testing of anything.

> The Mont Cenis tunnel formed the greatest *trial-ground* ever brought to the attention of inventors and makers of either rock-drills or air-compressors. *Ure*, Dict., IV. 323.

trial-heat (trī′al-hēt), *n.* In *racing*, a preliminary trial of speed between competitors.

trialism (trī′a-lizm), *n.* [< **trial*[2] (see *triality*) + *-ism*.] The doctrine that man consists of body, soul, and spirit, or other three essentially different modes of substance.

triality (trī-al′i-ti), *n.* [< **trial*[2] (< L. *tri-*, three, + *-al*) + *-ity*.] A union or junction of three; threeness: a word invented after the model of *duality*. [Rare.]

> There may be found very many dispensations of *triality* of benefices. *H. Wharton.*

trial-jar (trī′al-jär), *n.* A tall glass vessel for holding liquids to be tested by a hydrometer, or a jar in which mixed liquids are allowed to stand that they may separate by gravity.

trialogue (trī′a-log), *n.* [< ML. *trialogus*, a colloquy of three persons: a blundering formation, based on the erroneous notion that *dialogue* (L. *dialogus*) means 'a discourse between two' (as if < Gr. δύο, two, + λόγος, discourse), and intended to represent a compound of Gr. τρεῖς (τρι-), three, + λόγος, discourse (cf. *trilogy*).] Discourse by three speakers; a colloquy of three persons. *Wood*, Athenæ Oxon., I. 24. [Rare.]

trial-piece (trī′al-pēs), *n.* **1.** A specimen of any aggregate; a sample taken from a mass, or one of the first productions of some process, by which to determine the quality or character of the rest.

> Thomas Simon most humbly prays your Majesty to compare this his *tryall-piece* with the Dutch.
> *Inscription on Simon's Petition Crown*, 1663.

2. A production from which to determine the capacity or ability of the producer.

trial-plate (trī′al-plāt), *n.* In *coinage*, a plate of gold or silver of the fineness to which all coins are to be conformed.

> The coins selected for trial are compared with pieces cut from *trial plates* of standard fineness.
> *Encyc. Brit.*, XVI. 484.

trial-proof (trī′al-prōf), *n.* In *engraving*, an impression taken while an engraved or etched plate is in progress of making, to test the condition of the work.

trial-sight (trī′al-sīt), *n.* A case of lenses used by an oculist to test the sight of his patients. *E. H. Knight.*

trial-square (trī′al-skwār), *n.* A carpenters' square.

trial-trip (trī′al-trip), *n.* An experimental trip; especially, a trip made by a new vessel to test her sailing qualities, rate of speed, the working of her machinery, etc.

trian† (trī′an), *a.* Same as *trine*[3].—**In trian aspect**. See *aspect* and *three-quartered*.

triander (trī-an′dėr), *n.* [< Gr. τρεῖς (τρι-), three, + ἀνήρ (ἀνδρ-), a male (in mod. bot. a stamen).] A monoclinous or hermaphrodite plant having three free, distinct, and equal stamens.

Triandria (trī-an′dri-ä), *n. pl.* [NL.: see *triander*.] The third class of plants in the sexual system of Linnæus. It comprises plants which have hermaphrodite flowers with three free, distinct, and equal stamens, as the crocus, the valerian, and almost all the grasses. It comprehends three orders, *Monogynia*, *Digynia*, and *Trigynia*. *Triandria* is also the name of several orders in other classes of the Linnean system, the plants of which orders have three stamens.

triandrian (trī-an′dri-an), *a.* [< *Triandria* + *-an*.] Belonging to the Linnean class *Triandria*.

triandrous (trī-an′drus), *a.* [< *Triandria* + *-ous*.] **1.** Having three stamens: as, a *triandrous* flower.—**2.** Same as *triandrian*.

triangle (trī′ang-gl), *a.* and *n.* [Early mod. E. also *tryangle*; < OF. (and F.) *triangle* = Pr. *triangle* = Sp. *triángulo* = Pg. *triangulo* = It. *triangolo*, three-cornered, as a noun a triangle, < L. *triangulus*, three-cornered, having three angles, neut. *triangulum*, a triangle, < *tres* (*tri-*), three, + *angulus*, angle: see *angle*[3].] **I.** *a.* Three-cornered; three-angled; triangular.

> No Artificer but can tell which things are *triangle*, which round, which square. *Heywood*, Hierarchy of Angels, p. 158.

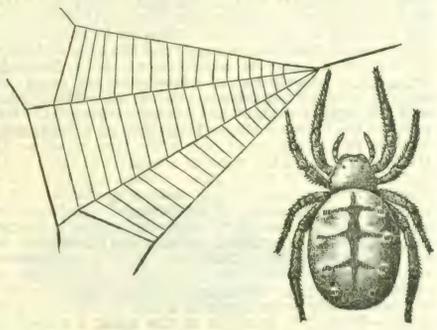
> I sent to my house, by my Lord's order, his shipp and *triangle* virginall. *Pepys*, Diary, I. 195.

Triangle-counter-triangle, in *her.*, divided into triangles which correspond to one another, base to base, and are two alternating tinctures; the same as *barry bendy lozengy counterchanged*, or *barry bendy dexter and sinis er counterchanged*, the two tinctures being always mentioned.

II. *n.* **1.** In *geom.*, a figure composed of three lines which meet two by two in three points, called the *vertices* of the triangle; especially, a rectilinear figure of this description. The lines measured in the shortest way from vertex to vertex are called the *sides* of the triangle. The angles between the sides at the vertices measured so that each subtends a side are called the *angles* of the triangle.

2. Any three-cornered or three-sided figure, body, or arrangement; anything having a triangular form or bounding a three-sided space.

> *Triangle* — space between the Lines of Head, Life, and Fate, or Health. *K. St. Hill*, Grammar of Palmistry, vii.



> The older "vowel *triangles*" from which the trigram is adopted. *Encyc. Brit.*, XXII. 385.

3. A musical instrument of percussion, made of a rod of polished steel bent into the form of a triangle, and open at one of its angles. It is sounded by being struck with a small steel rod. It is frequently used in modern orchestral music for brilliant and sparkling effects.

4. [*cap.*] In *astron*, same as *Triangulum*.—**5.** *Eccles.*, a symbol of the Trinity. The equilateral triangle, as symbolizing the Trinity, is of frequent occurrence, in various combinations, in Christian ornament.

6. A chest made in triangular form to hold a priest's cope. [Archaic.]—**7.** A three-cornered straight-edge, with one right angle and the other angles more or less acute, used in conjunction with the T-square for drawing parallel, perpendicular, or diagonal lines.—**8.** A kind of gin for raising heavy weights, formed by three spars joined at top. See *gin*[4], 2 (*c*).—**9.** *Milit.*, formerly, in the British army, a sort of frame formed of three halberds stuck in the ground and united at the top, to which soldiers were bound to be flogged: generally in the plural.—**10.** In *ceram.*, a form of the stilt consisting of three clay pins held together in the form of a triangle. See *stilt*, 5.—**11.** One of certain tortricid moths: an English collectors' name. *Tortrix rufana* is the red triangle. *Samouelle.*—**12.** In *entom.*, a large three-sided cell found in the wings of many dragon-flies. It lies near the middle of the basal half of the wing, and its form and relations to the other cells, both of the anterior and posterior wings, are used in classification. It is called the *discoidal* triangle, to distinguish it from the *internal* triangle, which adjoins it on the inner side, and the *anal* triangle, which lies close to the anal border of the wing.—**Altitude of a triangle**, a perpendicular from any vertex to the straight line of the opposite side considered as the base.—**Annex triangle**, one of three triangles derived from a primitive triangle ABC. Three points L, M, N are so taken that the triangles LBC, AMC, ABN are all perverted equals of ABC; then, taking A′ at the intersection of BN and MC, B′ at the intersection of CL and NA, and C′ at the intersection of AM and LB, the triangles A′BC, AB′C, ABC′ are annex triangles.—**Anterior triangle of the neck**, a triangle on the surface of the neck bounded by the ventral midline, the sternoclidomastoid, and the lower margin of the mandible. It is divided into the submaxillary and superior and inferior carotid triangles. See cut under *muscle*[1].—**Arithmetical triangle**. See *arithmetical*, and *figurate number* (under *figurate*).—**Characteristic triangle**, a spherical triangle having two angles of 90° and the third an aliquot part of 180°, considered in its relation to the spherical net each face of which is composed of two or four such triangles.—**Circular triangle**, a plane figure formed by three arcs of circles intersecting two by two in three angles.—**Conjugate triangle**. (*a*) A triangle whose sides are mean proportionals between the three pairs of opposite edges of a tetrahedron. (*b*) See *conjugate triangles*, under *conjugate*.—**Copolar triangles, diagonal triangle**. See the adjectives.—**Digastric triangle**. Same as *submaxillary triangle*.—**Equiangular triangle**, a triangle all whose angles are equal: it is also equilateral.—**Equilateral triangle**, a triangle all whose sides are equal: it is also equiangular.—**Fundamental triangle**, the triangle which serves to define homogeneous coördinates in a plane.—**Harmonic triangle**, a triangular table of the reciprocals of successive numbers and their successive differences.—**Hesselbachian triangle**. See *Hesselbachian*.—**Homologous triangles**, triangles placed projectively, so that the lines through corresponding angles meet in a point, and the intersections of corresponding sides (produced when necessary) lie on a straight line. When two triangles ABC and UVW are homologous when A is considered as corresponding to U, B to V, and C to W, and also when A is considered as corresponding to V, B to W, and C to U, they are said to be *doubly homologous;* and they are then homologous also when A is considered as corresponding to W, B to U, and C to V.—**In-and-circumscribed triangle**, a triangle whose angles lie on a given curve or curves, and whose sides are tangent to a given curve or curves.—**Inferior carotid triangle**, a triangle on the surface of the neck bounded by the median line, the sternomastoid, and the anterior belly of the omohyoid. Also called the *triangle of necessity*, as the place for tying the carotid, if it cannot be tied in the superior carotid triangle. See cut under *muscle*[1].—**Inflexional triangle**, an imaginary triangle upon whose sides lie, three by three, the nine points of inflexion of a plane cubic curve.—**Infraclavicular, internal triangle**. See the adjectives.—**In triangle**, in *her.*, arranged in the form of a triangle: said of bearings usually more than three in number. When three in number, they are generally blazoned as two and one; when six in number, they are blazoned three, two and one; and the term *in triangle* is used for a larger or indefinite number.—**Isosceles triangle**, a triangle two of whose sides are equal: the angles opposite those sides are also equal.—**Medial line of a triangle**, a straight line joining a vertex to the mid-point of the opposite side.—**Null-line of a triangle**, a straight line the locus of points the sum of whose distances from two of the sides of a triangle is equal to the distance from the third side. Every null-line passes through three intersections of sides with bisectors of internal or external angles of the triangle.—**Oblique triangle**, a triangle having no angle equal to 90°.—**Occipital, ocellar, Pythagorean, quadrantal triangle**. See the adjectives.—**Plane triangle**. (*a*) A triangle whose sides lie in one plane. (*b*) A triangle whose sides are rectilinear.—**Polar triangle**, a triangle each vertex of which is in any sense a pole of a side of a primitive triangle.—**Posterior triangle of the neck**, a triangle on the surface of the neck bounded by the anterior border of the trapezius, the sternoclidomastoid, and the clavicle. It is divided into the suboccipital and subclavian triangles by the omohyoid. See cut under *muscle*[1].—**Rational prime triangle**, a triangle whose sides are relatively prime multiples of a linear unit, while its area is commensurable with the square of that unit: thus, the sides may measure 10, 17, 21, this giving the area 84.—**Remarkable circle of a triangle**, a circle having a peculiar relation to any triangle. Such circles are particularly—(1) the *circumscribed circle;* (2) the *inscribed* and the three *escribed circles;* (3) the *Feuerbach* or *nine-point circle;* (4) the *Brocard* or *seven-point circle;* (5) the *Tucker* or *triplicate-ratio circle;* (6) the *sine triple-angle circle* (constructed as follows: on the sides of the triangle ABC take D and D′ on BC, E and E′ on AC, F and F′ on AB such that the angle AEF = AF′E′ = A, BFD = BD′F′ = B, CDE = CE′D′ = C; then the circle in question passes through D, D′, E, E′, F, F′, and DD′ : EE′ : FF′ = sin 3A : sin 3B : sin 3C); (7) the *Taylor* or *six-point circle*, which passes through the six feet of perpendiculars drawn to the sides from feet of perpendiculars on the sides from the vertices of the triangle; (8) the *Spieker circle*, or circle inscribed in the triangle whose vertices are the mid-points of the sides of the primitive triangle. See *circle*.—**Remarkable point of a triangle**, a point having unique metrical relations to the triangle. The remarkable points usually considered are—(1) the *centroid*, or intersection of median lines; (2) the *orthocenter*, or intersection of perpendiculars from the angles upon the opposite sides; (3) the *circumcenter*, or center of the circumscribed circle; (4) the *center of the Feuerbach circle;* (5) the *incenter*, or center of the inscribed circle; (6) the *radical center of the escribed circles;* (7) the *symmedian, Grebe*, or *Lemoine point*, the intersection of the three lines each bisecting a side and bisecting a perpendicular from an angle upon a side; (8) the *Spieker point*, or mid-point between the circumcenter and incenter; (9) the *Brocard points*, two points of the Brocard circle (which see, under *circle*) (through the symmedian point S of any triangle ABC lines are drawn parallel to the sides of the latter, meeting these sides in D and D′ on BC, E and E′ on AC, F and F′ on AB, so that D, S, E′ are collinear, as well as E, S, F′ and F, S, D′; then the three lines through A parallel to FD, through B parallel to DE, and through C parallel to EF meet in one Brocard point P, while the lines through A parallel to D′E′, through B parallel to E′F′, and through C parallel to F′D′ meet in the other Brocard point P′); (10) the *center of the triplicate-ratio circle;* besides others.—**Respectant in triangle**. See *respectant*.—**Scarpa's triangle**, a space on the anterior and inner aspect of the thigh just below the groin, through which the femoral artery passes.—**Self-conjugate triangle**. See *self-conjugate*.—**Sibiconjugate triangle**. See *sibiconjugate*.—**Spherical triangle**, a triangle formed on the surface of a sphere by the mutual intersection of three great circles. Spherical triangles are divided into *right-angled, oblique-angled, equilateral, isosceles*, etc., as plane triangles are.—**Subclavian triangle**, a triangle of the neck bounded by the omohyoid, sternoclidomastoid, and clavicle.—**Submaxillary triangle**, a triangle on the surface of the neck

bounded above by the lower margin of the lower jaw, and on its other two sides by the digastric muscle. See cut under *muscle*[1].—**Suboccipital triangle**, a triangle on the surface of the neck bounded by the anterior border of the trapezius, the sternoclidomastoid, and the omohyoid muscle. See cut under *muscle*[1].—**Superior carotid triangle**, a triangle on the surface of the neck bounded by the sternoclidomastoid, omohyoid, and digastric muscles. Also called *triangle of election*, with reference to facilities afforded for tying the carotid. See cut under *muscle*[1].—**Supplemental triangle**, a spherical triangle formed by joining the poles of three great circles.—**Surgical triangle**, a triangular space, area, or region containing important vessels and nerves which may require to be operated upon: chiefly said of several such regions of the neck.—**Triangle of election**, in *surg.*, same as *superior carotid triangle*.—**Triangle of forces**, a name given to the proposition in statics which asserts that, if three forces meeting at a point in one plane be in equilibrium, and if on that plane any three mutually intersecting lines be drawn parallel to the directions of the three forces, a triangle will be formed the lengths of whose sides will be proportional to the magnitudes of the forces.—**Triangle of Hesselbach.** See *Hesselbachian triangle*.—**Triangle of necessity**, in *surg.*, the inferior carotid triangle, where the artery must be tied, if there be no room for choice or election.—**Triangle of Petit**, a triangular space in the lateral wall of the abdomen, bounded below by the crest of the ilium and laterally by the obliquus externus and latissimus dorsi muscles.—**Triangle of reference.** Same as *fundamental triangle*.—**Triangles in cross**, in *her.*, a bearing consisting of a number of triangles arranged in a cross, the number being specified in the blazon. Also called *cross of triangles*.—**Triangles of the neck**, certain triangular spaces or areas on each side of the neck, bounded by several muscles, notably the sternoclidomastoid, omohyoid, and digastricus, and by the collar-bone and lower jaw-bone, and containing important vessels and nerves which may require to be operated upon. The sides of all these triangles are the natural landmarks in the topographical anatomy of the neck.—**Triangle spider**, a spider, as *Hyptiotes cavatus*, which spins a triangular web in trees, which it sets like a net, capable of being sprung upon its prey by letting go one of the elastic threads which the spider holds.—**Vertical triangle**, in *entom.*, a triangular space on the vertex, formed by the eyes when they meet in front, as in many *Diptera*.—**Vesical triangle**, the trigonum of the bladder.

Triangle Spider (*Hyptiotes cavatus*).
(Spider five times natural size, web one third natural size.)

triangled (trī'ang-gld), *a.* [< *triangle* + *-ed*[2].] 1. Having three angles; having the form of a triangle; also, belonging to or situated in a triangle.

> The forme or situation of this Citty is like vnto a Triangle. . . . In one of these *triangled* points . . . standeth the Pallace of the Great Turke, called Seralia.
> *W. Lithgow*, Travels, iv.

2. In *her.*, divided into triangles: noting the field, and equivalent to *barry bendy dexter and sinister*, or *paly bendy dexter and sinister*.

triangular (trī-ang'gū-lär), *a.* [= F. *triangulaire* = Pr. *triangular* = Sp. Pg. *triangular* = It. *triangolare*, < LL. *triangularis*, < L. *triangulus*, three-cornered, *triangulum*, a triangle: see *triangle*.] 1. Of or pertaining to a triangle; consisting of a triangle.—2. Three-cornered and three-sided; included within three sides and angles: as, a *triangular* plot of ground; a *triangular* building. Specifically, in *bot.* and *zoöl.*: (*a*) Flat or lamellar and having three sides: as, a *triangular* leaf. (*b*) Having three lateral faces and edges; triangular in cross-section; trihedral: as, a *triangular* stem, seed, or column.

3. Hence, of or pertaining to three independent things; three-sided as regards elements, interests, or parties: as, a *triangular* treaty.

> The same *triangular* contest between the three Henrys and their partizans.
> *Motley*, Hist. Netherlands, II. 135.

4. In *her.*, represented as solid and three-sided: thus, a *triangular* pyramid or a *triangular* pyramid reversed is a point or a pile which is divided by a line indicating a projecting edge, and is treated as if a solid seen in perspective.—**Triangular compass**, a compass having three legs, two opening in the usual manner, and the third turning round an extension of the central pin of the other two, besides having a motion on its own central joint. By means of this instrument any triangle or any three points may be taken off at once.—**Triangular coördinates.** See *coördinate*.—**Triangular crab**, any maioid, whose carapace is more or less triangular. See *Triangulares*.—**Triangular fascia**, a thin triangular fibrous band reflected upward and inward beneath the spermatic cord from the attachment of Gimbernat's ligament on the linea iliopectinæa to the linea alba. Also called *triangular ligament*.—**Triangular fibrocartilage, file, fret.** See the nouns.—**Triangular level**, a light frame in the shape of the letter A, and having a plumb-line which determines verticality.—**Triangular ligament.** (*a*) Same as *triangular fascia*. (*b*) A dense fibrous membrane stretched across the subpubic arch on the deep surface of the crura of the penis and the bulb of the urethra. Also called *deep perineal* or *subpubic fascia*.—**Triangular numbers**, the series of figurate numbers which consists of the successive sums of the terms of an arithmetical series whose first term is 1 and the common difference 1. Thus, 1, 3, 6, 10, 15, 21, 28, etc., are triangular numbers. They are so called because the number of points expressed by any one of them may be arranged in the form of an equilateral triangle.—**Triangular plexus.** See *plexus*.—**Triangular pyramid**, a pyramid whose base is a triangle, its sides consisting of three triangles which meet in a point called its apex.—**Triangular scale.** See *scale*[3].

Triangular Level.

Triangular Compass.

triangulare (trī-ang-gū-lā'rē), *n.*; pl. *triangularia* (-ri-ä). [NL. (sc. *os*, bone), neut. of L. *triangularis*: see *triangular*.] A peculiar bone of the tarsus of some animals, as *Cryptoprocta ferox*: more fully called *triangulare tarsi*. *Bardeleben*.

Triangulares (trī-ang-gū-lā'rēz), *n. pl.* [NL., pl. of L. *triangularis*: see *triangular*.] A group of crabs, the maioids or spider-crabs, of more or less triangular figure. See cuts under *Oxyrhyncha*, *Leptopodius*, and *spider-crab*.

triangularis (trī-ang-gū-lā'ris), *n.*; pl. *triangulares* (-rēz). [NL. (sc. *musculus*, muscle): see *triangular*.] In *anat.*: (*a*) A triangular muscle of the thorax, on the inner surface of the front of the chest, under the sternum and parts of several ribs: more fully called *triangularis sterni*. Also *sternocostalis*. (*b*) The triangular muscle of the chin; the depressor anguli oris: more fully called *triangularis menti*. See cut under *muscle*[1].

triangularity (trī-ang-gū-lar'i-ti), *n.* [< *triangular* + *-ity*.] The state or condition of being triangular; triangular form.

triangularly (trī-ang'gū-lär-li), *adv.* In a triangular manner; after the form of a triangle.

triangulary† (trī-ang'gū-lā-ri), *a.* [< L. *triangularis*, three-cornered: see *triangular*.] Triangular.

> Lifting up in the upper part of the skull the two *triangulary* bones called sincipital.
> *Urquhart*, tr. of Rabelais, i. 45.

triangulate (trī-ang'gū-lāt), *v. t.*; pret. and pp. *triangulated*, ppr. *triangulating*. [< NL. **triangulatus*, pp. of **triangulare*, < L. *triangulus*, three-cornered, triangular: see *triangle*.] 1. To make three-cornered or triangular. *Imp. Dict.*—2. In *surv.*, to divide into triangles; survey by dividing into triangles of which the sides and angles are measured.—3. To determine or observe trigonometrically; study by means of triangulation: as, to *triangulate* the height of a mountain.

> Before each shot flag signals were exchanged with observers on shore, who *triangulated* the range.
> *Sci. Amer.*, N. S., LVII. 214.

triangulate (trī-ang'gū-lāt), *a.* [< NL. **triangulatus*: see the verb.] In *zoöl.*, composed of or marked with triangles. A *triangulate bar* is generally formed of triangles with their bases together, so that the angles touch and sometimes coalesce; it is a form of ornamentation common on the wings of *Lepidoptera*.

triangulately (trī-ang'gū-lāt-li), *adv.* In *zoöl.*, so as to form triangles: as, a margin or surface marked *triangulately* with black—that is, having triangular black marks.

triangulation (trī-ang-gū-lā'shon), *n.* [= F. *triangulation*; as *triangulate* + *-ion*.] 1. A making triangular; formation into triangles.—2. The operation and immediate result of measuring (ordinarily with a theodolite) the angles of a network of triangles laid out on the earth's surface by marking their vertices. The triangulation usually proceeds from a base-line, the measurement of which is necessary, though no part of the triangulation proper. The geographical positions of the extremities of this base having been ascertained, and the triangulation, or operation of measuring the angles, having been completed, by trigonometrical calculations called the *reduction of the triangulation* (commonly involving a process of distributing the errors by least squares, called the *adjustment of the triangulation*) the geographical positions of all the other vertices are calculated, assuming the figure of the earth to be known. By the combination of the triangulations of different countries the figure of the earth is ascertained. See cut under *base-line*.

triangulator (trī-ang'gū-lā-tor), *n.* [< *triangulate* + *-or*[1].] One who performs the work of triangulation in a trigonometrical survey.

trianguloid (trī-ang'gū-loid), *a.* [< L. *triangulum*, a triangle, + Gr. *εἶδος*, form.] Somewhat triangular in shape.

> A *trianguloid* space. *H. Spencer.* (*Imp. Dict.*)

Triangulum (trī-ang'gū-lum), *n.* [L.: see *triangle*.] An ancient northern constellation in the form of the letter delta (Δ). It has one star of the third magnitude.—**Triangulum Australe** (the Southern Triangle), a southern constellation, added by Petrus Theodori in the fifteenth century, south of Ara. It contains one star of the second and two of the third magnitude.—**Triangulum Minus** (the Lesser Triangle), a constellation introduced by Hevelius in 1690, immediately south of Triangulum. It is no longer in use.

triantelope, triantulope (trī-an'tē-lōp, -tū-lōp), *n.* [A corruption of *tarantula*, simulating *antelope*.] A tarantula. [Australia.]

> Tarantulas, or large spiders (as the bushmen call them, *triantulopes*), . . . come crawling down the sides of the tent in wet weather.
> *Bush Wanderings of a Naturalist*, p. 208.

Trianthema (trī-an-thē'mą), *n.* [NL. (Linnæus, 1753), < Gr. *τρεῖς* (*τρι-*), three, + *ἄνθημα*, a flowering, < *ἀνθεῖν*, flower, < *ἄνθος*, a flower.] A genus of plants, of the family *Aizoaceæ* and tribe *Sesuvieæ*. It is distinguished from the related genus *Sesuvium* by its stipulate leaves, and ovary with one or two cells. There are 15 species, scattered through warm parts of Asia, Africa, and Australia, with one American species, *T. monogynum*, native from Cuba to Venezuela and the Galapagos Islands. They are usually diffuse prostrate herbs, with opposite, unequal, entire leaves, and two-bracted flowers without petals, but with the five calyx-lobes colored within. *T. monogynum* is known in Jamaica as *horse-purslane*.

trianthous (trī-an'thus), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *ἄνθος*, a flower.] In *bot.*, three-flowered.

triantulope, *n.* See *triantelope*.

triapsal (trī-ap'sal), *a.* [< L. *tres* (*tri-*), three, + *apsis*, apse, + *-al*.] Same as *triapsidal*.

> There is, so far as I know, only one *triapsal* church, that of St. Croix at Mont Majour near Arles.
> *J. Fergusson*, Hist. Arch., I. 462.

triapsidal (trī-ap'si-dal), *a.* [< L. *tres* (*tri-*), three, + *apsis* (*apsid-*), apse, + *-al*.] Having three apses; subdivided into three apses; characterized by a triple arrangement of the apse, as most Greek churches.

> The arrangement of the *triapsidal* basilica is perfect.
> *E. A. Freeman*, Venice, p. 131.

★**triarch** (trī'ärk), *a.* [< Gr. *τριάρχος*, having three branches, as a horn, < *τρεῖς* (*τρι-*), three, + *ἀρχή*, beginning.] In *bot.*, noting radial fibro-vascular bundles having three rays. *Bastin*.

triarchée (trī-är'chē), *a.* [Heraldic F., as *tri-* + *arch* + *-ee*[1].] In *her.*, treble-arched; having three arches: noting a bridge or the like.

triarchy (trī'är-ki), *n.*; pl. *triarchies* (-kiz). [< Gr. *τριαρχία*, government by three, a triumvirate, < *τρεῖς* (*τρι-*), three, + *ἄρχειν*, rule.] Rule by three persons; a three-headed government.

> She [the rational soul] issueth forth her commands, and, dividing her empire into a *triarchy*, she governs by three viceroys, the three faculties.
> *Howell*, Parly of Beasts, p. 143. (*Davies.*)

triarian (trī-ā'ri-an), *a.* [< L. *triarii*, soldiers of the third rank or class (< *tres*, *tri-*, three), + *-an*.] Occupying the third post or place in an array.

> Let the brave Second and *Triarian* band
> Firm against all impression stand.
> *Cowley*, Restoration of K. Charles II.

triarticulate (trī-är-tik'ū-lāt), *a.* [< L. *tres* (*tri-*), three, + *articulatus*, jointed: see *articulate*.] In *zoöl.* and *anat.*, composed of three joints or articles: as, a *triarticulate* palpus; our fingers are *triarticulate*. Also *triarticulated*.

trias (trī'as), *n.* [NL., < LL. *trias*, < Gr. *τριάς*, the number three: see *triad*.] 1. In *music*, same as *triad*, 3.—2. [*cap.*] In *geol.*, same as *Triassic*.—3. [*cap.*] In *German hist.*, a name sometimes given to the old German empire, reckoned as consisting of three coördinate parts—Austria, Prussia, and the group of smaller states.

Triassic (trī-as'ik), *a.* and *n.* [= F. *triasique* = Sp. *triásico*; as *trias* + *-ic*.] In *geol.*, the lower of the three great divisions of the entire system of fossiliferous rocks (Triassic, Jurassic, Cretaceous) which together make up the Mesozoic or Secondary series. The Triassic lies above the Permian, and beneath the Jurassic. The threefold subdivision from which the Triassic derives its name is best seen in central Europe, and especially in northern Germany, where the bunter-sandstein, muschelkalk, and

Keuper (see those words) are well-marked features of the geology. In the Alps, especially toward the eastern end of the range, the Triassic is developed to very great thickness and in great complexity of subgroups, each characterized by its own peculiar assemblage of fossils. This complexity is specially characteristic of the upper portion of the series. In England the line separating the Triassic from the Permian is much less distinctly marked than it is on the Continent. What was formerly called the "New Red Sandstone" is now divided, in accordance with paleontological and not lithological characters, into Permian and Triassic. In the United States the Triassic plays an important part, but varies greatly in character in different parts of the country. The sandstones of the Connecticut river valley and the continuation of the same formation to the south, through Pennsylvania and Virginia into North Carolina, constitute a very marked feature of the geology of the Atlantic belt of States, containing various fossil plants resembling those found in Europe on the same horizon, and especially characterized by tracks of vertebrates, while remains of their bony skeletons are extremely rare. The Triassic of the Rocky Mountain region is also an important formation (see *Red beds*, under *red*[1]); and that of the western region of the Great Basin, of the Sierra Nevada, and of the ranges further north near the coast is also extremely interesting, resembling very closely in the character of its fossils the Triassic of the eastern Alps. The most striking feature of the flora of the Triassic is the predominance of the cycads, hence the period of deposition of this division of the series has sometimes been called the "age of cycads." The earliest remains of mammalian life are found in the Triassic, in the form of small marsupials. In the Alpine Triassic, both in the Alps and on the western coast of North America, there is a most remarkable commingling of Paleozoic and Mesozoic types of cephalopods.

triatic (trī-at′ik), *a.* [< L. *tres* (*tri-*), three, + *-atic*[1].] Forming three angles: only in the phrase *triatic stay*. See *stay*[1].

triatomic (trī-a-tom′ik), *a.* [< Gr. τρεῖς (τρι-), three, + ἄτομον, atom: see *atom*, *atomic*.] In *chem.*: (*a*) Consisting of three atoms: applied to the molecules of elements where the atoms are of the same kind: as, a *triatomic* element; or to compounds where the atoms are unlike: as, *triatomic* molecules. (*b*) Same as *trivalent*. (*c*) Having three hydroxyl groups in place of which other atoms or radicals may be attached without altering the structure of the rest of the molecule: thus, glycerin is a *triatomic* alcohol.

triaxal (trī-ak′sal), *a.* [< L. *tres* (*tri-*), three, + *axis*, axis, + *-al*.] Having three axes: as, *triaxal* coördinates.

triaxial (trī-ak′si-al), *a.* [< L. *tres* (*tri-*), three, + *axis*, axis, + *-al*.] Having three axes, as some sponge-spicules.

> Although they [spicules] are quadriradiate, they are still only *triaxial*. *Micros. Science*, N. S., XXXII. 7.

triaxon (trī-ak′son), *a.* and *n.* [< Gr. τρεῖς (τρι-), three, + ἄξων, axis.] **I.** *a.* Triaxial, as a sponge-spicule; having three axes diverging from a common center, resulting from linear growth from a center in three directions at an inclination of 120° to one another. See cut under *sponge-spicule*.

II. *n.* A regular figure of three axes diverging from a common center, as a sponge-spicule with three such axes.

Triaxonia (trī-ak-sō′ni-ạ), *n. pl.* [NL.: see *triaxon*.] Triaxon sponges as a subclass of calcareous sponges with simple canal-system and triaxon spicules.

triaxonian (trī-ak-sō′ni-an), *a.* Same as *triaxon*.

> A *triaxonian* star with five or six rays. *Amer. Nat.*, XXI. 938.

tribal (trī′bal), *a.* [< *tribe* + *-al*.] 1. Of or pertaining to a tribe; characteristic of a tribe: as, *tribal* organization; *tribal* customs; a *tribal* community.

> The old *tribal* divisions, which had never been really extinguished by Roman rule, rose from their hiding-places. *Stubbs*, Const. Hist., § 28.

2. In *biol.*, of or pertaining to phyla or other broad divisions of the animal kingdom: as, *tribal* history (that is, phylogeny, as distinguished from germ-history or ontogeny). *Haeckel*.

tribalism (trī′bal-izm), *n.* [< *tribal* + *-ism*.] The state of existing in separate tribes; tribal relation or feeling.

> No national life, much less civilisation, was possible under the system of Celtic *tribalism*, as it existed at least till the time of the Tudors. *Edinburgh Rev.*, CLXIII. 443.

> The period of the Judges was one of entire *tribalism*, with little national union and continuous relapses into idolatry. *The American*, XVII. 104.

tribally (trī′bal-i), *adv.* In a tribal manner; as or with reference to a tribe.

> It is probable that Professor Putnam is not justified in concluding that the people of the two sections were *tribally* identical. *Science*, XV. 383.

tribasic (trī-bā′sik), *a.* [< Gr. τρεῖς (τρι-), three, + βάσις, base, + *-ic*.] In *chem.*, having three hydrogen atoms replaceable by equivalents of a base: noting some acids.

tribble (trib′l), *n.* [Perhaps a corruption of *cribble*, a sieve.] In *paper-manuf.*, a large horizontal frame in the loft or drying-room, with hairs or wires stretched across it, on which ★ sheets of paper are hung to dry. *E. H. Knight*.

tribe (trīb), *n.* [< ME. *tribu* (in pl. *tribus*), < OF. *tribu*, F. *tribu* = Sp. *tribu* = Pg. *tribu* = It. *tribo*, *tribu*, < L. *tribus*, a division of the people, a tribe, in general the common people, the populace; traditionally explained as orig. a 'third part' of the people (one of the three divisions into which the Roman people were divided), and referred to *tres* (*tri-*), three (cf. dat. pl. *tribus*; Gr. dial. τριπτύς for τριττύς, a third part). Cf. W. *tref*, village; E. *thorp*, a village.] 1. In *Rom. hist.*, one of the three patrician orders, or original political divisions of the people of ancient Rome, the Ramnes, Tities, and Luceres, representing respectively, according to tradition, the separate Latin, Sabine, and Etruscan settlements, having at their union equal representation in the senate, and retaining their distinctive names for several centuries. Hence—2. Any one of the similar divisions of a race or nation common in antiquity, whether of natural or of political origin: as, the *tribes* (φυλαί) of Athens. Ethnical tribes among the ancients regarded themselves as enlarged families, and generally bore the name of some real or supposed common progenitor. Such were the twelve tribes of the Israelites, the tribes of the Dorians and other Greek races, etc. The thirty (and afterward more) tribes into which the plebeians in and around Rome were divided, after the formation of the patrician tribes, were based on locality; and tribes nearly corresponding to castes have in some instances been determined by occupation.

> Have you collected them by *tribes*? *Shak.*, Cor., iii. 3. 11.

3. Specifically, a local division of a primitive or barbarous people, united into a social or political community. A tribe may be subdivided into social groups, or into minor local subdivisions. In general, tribes, as they still exist among the American Indians and many African and Asiatic races, are an early form of political organization, nations being ultimately constituted by their gradual amalgamation and loss of identity in the progress of civilization.

> The characteristic of all these races [Uralian], when in the tribal state, is that the *tribes* themselves, and all subdivisions of them, are conceived by the men who compose them as descended from a single male ancestor. . . . In some cases the *Tribe* can hardly be otherwise described than as the group of men subject to some one chieftain. *Maine*, Early Hist. of Institutions, pp. 65, 69.

4. Any class or body of persons taken collectively; any aggregate of individuals of a kind, either as a united body or as distinguished by some common characteristic or occupation. [Chiefly colloq.]

> Folly and vice are easy to describe,
> The common subjects of our scribbling *tribe*.
> *Roscommon*, A Prologue, spoken to the Duke of York at [Edinburgh.

> And then there flutter'd in,
> Half-bold, half-frightened, with dilated eyes,
> A *tribe* of women, dress'd in many hues.
> *Tennyson*, Geraint.

5. A family of cattle having a common female ancestor. Tribes of cattle are particular strains, taking their names usually from some particular cow appearing in the pedigrees, as the Princess or Duchess tribes of shorthorns. There is no absolute rule for naming a tribe, but it descends through the female line.

6. In *zoöl.* and *bot.*, a classificatory group of taxonomic rank, above a genus, and below a family; loosely, any group or series of animals: as, the furry, feathery, or finny *tribes*; the cat *tribe*. Linnæus distributed the vegetable kingdom into three *tribes*, namely, monocotyledonous, dicotyledonous, and acotyledonous plants, and these he subdivided into gentes or nations. By other naturalists *tribe* has been used for a division of animals or plants intermediate between family and genus. In botany this is the current and a very common use, the tribe standing below the subfamily where that division is present. Cuvier divided his orders into families, and his families into tribes, including under the latter one or more genera. = Syn. 1-3. *Race*, *Clan*, etc. See *people*.

tribe (trīb), *v. t.*; pret. and pp. *tribed*, ppr. *tribing*. [< *tribe*, *n.*] To distribute into tribes or classes. [Rare.]

> Our fowl, fish, and quadrupeds are well *tribed* by Mr. Willughby and Mr. Ray. *Bp. Nicolson*, Eng. Hist. Lib., i. 1.

tribelet (trīb′let), *n.* [< *tribe* + *-let*.] A little tribe; a subordinate division or offset of a tribe. [Rare.]

> When a man marries a woman from a distant locality, he goes to her *tribelet* and identifies himself with her people. *Jour. Anthrop. Inst.*, XVIII. 250.

tribesman (trībz′man), *n.*; pl. *tribesmen* (-men). [< *tribe's*, poss. of *tribe*, + *man*.] A man belonging to a tribe; a member of a particular tribe, or of the same tribe as the person speaking or referred to.

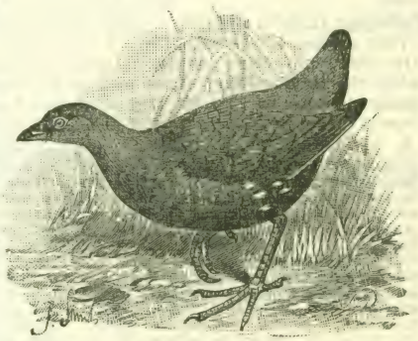
> It was by taking a grant, not as elsewhere of land, but of cattle, that the free *tribesman* became the man or vassal of an Irish chief. *J. R. Green*, Making of England, p. 271.

tribespeople (trībz′pē″pl), *n. pl.* Persons constituting a tribe; the members of a tribe. [Rare.]

> He sent me a list of the number of *tribespeople*, *Jour. Anthrop. Inst.*, XIX. 90.

triblet (trib′let), *n.* [Also *triboulet*, *tribolet*, *treblet*; < OF. *triboulet*, a triblet, a dim. form, prob. < L. *tribulus*, < Gr. τρίβολος, a three-pointed instrument, a caltrop: see *Tribulus*.] 1. A mandrel used in forging tubes, nuts, and rings, and for other purposes.—2. The mandrel in a machine for making lead pipe. *E. H. Knight*.

triblet-tubes (trib′let-tūbz), *n. pl.* In *brass-fitting*, thin tubes fitted to slide in and upon other tubes, usually of the same thickness of metal, as the tubes of microscopes, telescopes, and other optical instruments.



Triboloceratidæ (trib″ō-lō-se-rat′i-dē), *n. pl.* [NL., < Gr. τρίβολος, three-pointed (see *Tribulus*), + κέρας (κερατ-), horn, + *-idæ*.] A family of nautiloid cephalopods, having depressed whorls, fluted or hollow abdomen, the sides and the abdomen ridged lengthwise and the ridges often spinose, and the sutures with ventral, lateral, and dorsal lobes. *Hyatt*, Proc. Bost. Soc. Nat. Hist., 1883, p. 293.

triboluminescence (trib-ō-lū-mi-nes′ens), *n.* [Irreg. < Gr. τρίβειν, rub, + E. *luminescence*.] Luminescence due to friction; the emission of light under the excitation of rubbing.

> According to the mode of excitation I distinguish Photo-, Electro-, Chemi-, and *Tribo-luminescence*. *Philos. Mag.*, 5th ser., XXVIII. 151.

tribometer (trī-bom′e-tėr), *n.* [< Gr. τρίβειν, rub, + μέτρον, a measure.] An apparatus, resembling a sled, for measuring the force of friction in rubbing surfaces.

Tribonyx (trib′ō-niks), *n.* [NL. (Du Bus, 1837), < Gr. τρίβειν, rub, + ὄνυξ, claw.] A remarkable

Tribonyx ventralis.

genus of Australian and Tasmanian gallinules, allied to *Notornis*; also called *Brachyptrallus*. The leading species is *T. ventralis*.

triboulet (trib′ō-let), *n.* Same as *triblet*.

tribrach[1] (trī′brak), *n.* [Formerly, as L., *tribrachys*, also *tribrachus*; = F. *tribraque* = Sp. *tribraquio* = Pg. *tribraco*, < L. *tribrachys*, < Gr. τρίβραχυς, a tribrach, < τρεῖς (τρι-), three, + βραχύς, short: see *brief*.] In *anc. pros.*, a foot consisting of three short times or syllables, two of which belong to the thesis and one to the arsis, or vice versa. It is accordingly trisemic and diplasic. The tribrach was not used in continuous composition, but as a substitute for a trochee (the *trochaic tribrach*, ◡◡ | ◡ for ⏑ | ◡) or for an iambus (the *iambic tribrach*, ◡ | ◡◡ for ◡ | ⏑). The name *trochee* or *choree* (*trochæus*, *choreus*) was given by some ancient authorities to the tribrach. Also *tribrachys*.

> Never take an iambus as a Christian name. A trochee or *tribrach* will do very well. *Coleridge*, Table-Talk, Oct. 8, 1832.

tribrach[2] (trī′brak), *n.* [< Gr. τρεῖς (τρι-), three, + βραχίων, arm.] Same as *tribrachial*.

tribrachial (trī-brā′ki-al), *n.* [< *tribrach*[2] + *-ial*.] A three-armed figure or utensil; specifically, a three-branched flint implement occasionally found.

tribrachic (trī-brak′ik), *a.* [< *tribrach*[1] + *-ic*.] In *anc. pros.*: (*a*) Consisting of three short times or syllables; constituting a tribrach. (*b*) Pertaining to a tribrach or tribrachs; consisting of tribrachs.

tribracteate (trī-brak′tē-āt), *a.* [< L. *tres* (*tri-*), three, + *bractea*, a thin plate (bract): see *bract*.] In *bot.*, having three bracts.

tribromphenol (trī-brom-fē′nol), *n.* [< *tri-* + *brom*(*ine*) + *phenol*.] A substance formed

by the action of a solution of carbolic acid on bromine-water, and possessing antiseptic properties.

tribual (trib'ū-al), *a.* [< L. *tribus*, tribe (see *tribe*), + *-al*.] Of or pertaining to a tribe; tribal.

Surely this proceedeth not from any natural imperfection in the parents (whence probably the *Tribual* lisping of the Ephraimites did arise). *Fuller*, Worthies, II. 225.

tribular (trib'ū-lär), *a.* [< L. *tribulis*, one of the same tribe as another, < *tribus*, tribe: see *tribe*.] Of or relating to a tribe; tribal: as, *tribular* worship. *Imp. Dict.*

tribulation (trib-ū-lā'shon), *n.* [< ME. *tribulacion*, *tribulaciun*, < OF. (and F.) *tribulation* = Pr. *trebulatio*, *tribolacio* = Sp. *tribulacion* = Pg. *tribulação* = It. *tribulazione*, *tribolazione*, < LL. *tribulatio(n-)*, distress, trouble, tribulation, affliction, < *tribulare*, oppress, afflict, a fig. use of L. *tribulare*, press, prob. also thresh out grain, < *tribulum*, also *trībula*, also *trīvolum* (Gr. *τρίβολος*, appar. after the L.), a sledge consisting of a wooden block studded with sharp pieces of flint or with iron teeth, used for threshing grain, < *terere*, pp. *tritus*, rub (cf. Gr. *τρίβειν*, rub, thresh): see *trite*, *try*.] **1.** A state of affliction or oppression; suffering; distress.

That it may please thee to succour, help, and comfort all who are in danger, necessity, and *tribulation*.
Book of Common Prayer, Litany.

He added that poor Will was at present under great *tribulation*, for that Tom Touchy had taken the law of him.
Addison, Spectator, No. 269.

2. A cause or occasion of suffering; a trouble or trial.

Death and bloodshed, strife and sword, calamities, famine, *tribulation*, and the scourge. Ecclus. xl. 9.

3. A troublesome or lawless person; also, such persons collectively; colloquially, a trial; a terror.

These are the youths that thunder at a playhouse, . . . that no audience, but the *tribulation* of Tower-hill, or the limbs of Limehouse, their dear brothers, are able to endure. *Shak.*, Hen. VIII., v. 4. 65.

Tribulus (trib'ū-lus), *n.* [NL. (Tournefort, 1700; earlier by Lobel, 1576), < L. *tribulus*, < Gr. *τρίβολος*, a caltrop, water-caltrop, and probably the land-caltrop, *T. terrestris*, lit. three-pointed, equiv. to *τριβελής*, three-pointed, < *τρεῖς* (*τρι-*), three, + *βέλος*, a dart, < *βάλλειν*, throw.] A genus of dicotyledonous choripetalous plants, of the family *Zygophyllaceæ*. It is characterized by abruptly pinnate leaves, a fruit of from five to twelve indehiscent carpels, and an embryo without albumen. There are about fifteen species, natives of warm regions almost throughout the world. They are herbs with loose prostrate branches, commonly silky, and bearing opposite stipulate leaves, one of each pair smaller than the other, or sometimes absent. The yellow or white flowers are solitary in the axils of the stipules. The five-angled flattened fruit bears one or more spines or tubercles on each carpel. The species are known in general as *caltrop*. *T. terrestris*, sometimes known as *land-caltrop*, occurs in southern Europe, the Mediterranean region, southern Asia, and in tropical and South Africa. The entire plant, but especially the fruit, is used medicinally throughout India. It is used in Cochin China as an astringent. *T. cistoides* (see cut under *stigma*), a prostrate perennial species with large yellow flowers, widely distributed along tropical shores of India, Africa, and America, is known as *turkey-blossom* in Jamaica, where it is common in salt-pastures; it also occurs in Florida, on Key West.

★ **tribunal** (trī-bū'nal), *n.* [= F. *tribunal* = Pr. *tribunale* = Sp. Pg. *tribunal* = It. *tribunale*, < L. *tribunal*, a semicircular or square platform on which the seats of magistrates were placed, a judgment-seat, etc., in general an elevation, embankment, < *tribunus*, a tribune, magistrate: see *tribune*[1]. Cf. *tribune*[2].] **1.** The seat of a magistrate or judge; the bench on which a judge and his associates sit to administer justice.

I' the market-place, on a *tribunal* silver'd,
Cleopatra and himself in chairs of gold
Were publicly enthroned. *Shak.*, A. and C., iii. 6. 3.

Hence — **2.** A court of justice.

Fenwick . . . eluded the justice of the ordinary *tribunals*. *Macaulay*, Hist. Eng., xxii.

3. *Eccles.*, the confessional. — **Revolutionary tribunal**, in *French hist.*, an extraordinary court constituted in Paris by the Convention in March, 1793, ostensibly to take cognizance of attempts against the republic, the principles of the Revolution, and the public security. There was no appeal from its decisions; many persons, innocent as well as guilty, eminent and obscure, high and low, were condemned to death, and their property confiscated to the state. It was reorganized after the fall of Robespierre in 1794, and suppressed in June, 1795. There were also revolutionary tribunals in the departments. — **Tribunal of Penitentiaries.** See *penitentiary*, 2 (c).

tribunal-seat (trī-bū'nal-sēt), *n.* Same as *tribunal*, 1.

That little piece of work I commend unto you, as a thing whereof I doubt not to answer to my comfort before the *tribunal-seat* of Jesus Christ.
J. Bradford, Letters (Parker Soc., 1853), II. 195.

tribunary (trib'ū-nā-ri), *a.* [< *tribune*[1] + *-ary*.] Of or pertaining to tribunes.

tribunate (trib'ū-nāt), *n.* [= F. *tribunat* = Sp. Pg. *tribunado* = It. *tribunato*, < L. *tribunatus*, the office and dignity of a tribune, < *tribunus*, a tribune: see *tribune*[1].] Tribuneship.

Such was the origin of the *tribunate* — which, in process of time, opened all the honors of the government to the plebeians. *Calhoun*, Works, I. 94.

The creation of the *tribunate* did, nevertheless, transform the constitution. *W. Wilson*, State, § 154.

tribune[1] (trib'ūn), *n.* [< ME. *tribun* (pl. *tribunes*), < OF. *tribun*, F. *tribun* = Sp. Pg. It. *tribuno* = D. *tribuun* = G. Sw. Dan. *tribun*, < L. *tribunus*, a commander, tribune, magistrate (see def.), orig. the chief of a tribe, or the representative of a tribe, < *tribus*, a tribe: see *tribe*.] **1.** In *Rom. hist.*, originally, a magistrate presiding over a tribe, or representing a tribe for certain purposes; specifically, a tribune of the people (*tribunus plebis*), an officer or magistrate chosen by the people, from the time of the secession (probably in 494 B. C.), to protect them from the oppression of the patricians or nobles, and to defend their liberties against any attempts upon them by the senate and consuls. Their persons were inviolable, and any one who transgressed in regard to the respect due them was outlawed. These magistrates were at first two, but their number was increased to five and ultimately to ten, which last number appears to have remained unaltered down to the end of the empire. The tribunes figured especially in the assembly of the tribes (*comitia tributa*); they could inflict no direct punishment, but could propose the imposition of fines, and from their personal inviolability could afford protection to any person. With the advance of time, they could bring an offending patrician before the comitia, could sit in the senate, could stop summarily proceedings instituted before any magistrate, could propose measures of state to the comitia or the senate, and finally could even issue peremptory edicts and suspend decrees of the senate. Their powers were greatly curtailed by the emperors. The name *tribune* was also given to any one of general officers of the legions (*tribunus militaris*), and to certain other officers, as the *tribunus voluptatum*, or superintendent of public amusements, of Diocletian and later.

2. Hence, one who upholds or defends popular rights; a champion of the people. In this sense the word is used as the name of various newspapers.

That great *tribune*, Mr. Bright.
Nineteenth Century, XXVI. 735.

tribune[1] (trib'ūn), *v. t.*; pret. and pp. *tribuned*, ppr. *tribuning*. [< *tribune*[1], *n.*] To regulate or manage by the authority of a tribune. [Rare.]

These Essentialls must not be Ephorized or *Tribuned* by one or a few Mens discretion, but lineally sanctioned by Supreame Councels. *N. Ward*, Simple Cobler, p. 54.

tribune[2] (trib'ūn), *n.* [< F. *tribune* = Sp. Pg. It. *tribuna*, < ML. *tribuna*, a late form, equiv. to L. *tribunal*, a platform: see *tribunal*, and cf. *tribune*[1].] **1.** In a Roman basilica, the raised platform at one end of the auditorium, frequently in a small addition of semicircular plan to the main structure, which formed the official station of the pretor; the tribunal; hence, in Christian churches of basilican plan, the throne of the bishop (which originally occupied the place of the pretor's seat), and the part of the church containing it; hence, again, in Italian churches generally, any apse or structure of apsidal form. See cut under *basilica*.

A nave of four enormous bays is stopped upon a vast octagonal space, from which, at the east, the north, and the south, are built out three pentagonal *tribunes* or apses, which, as seen from the outside, give to the church [Duomo of Florence] the common cruciform shape.
C. E. Norton, Church-building in Middle Ages, p. 228.

2. A raised seat or stand; a platform; a dais.

Mr. Lyon was seated on the school *tribune* or dais at his particular round table. *George Eliot*, Felix Holt, xxiv.

The brave Geraint, a knight of Arthur's court,
A *tributary* prince of Devon. *Tennyson*, Geraint.

2. Of the nature of tribute; paid or due as tribute.

Your *tributary* drops belong to woe,
Which you, mistaking, offer up to joy.
Shak., R. and J., iii. 2. 103.

Yea, so greatly are we indebted to this kinsman of death that we owe the better *tributary* half of our life to him; . . . for sleep is the golden chain that ties health and our bodies together. *Dekker*, Gull's Hornbook, p. 61.

3. Bringing accretions, supplies, aid, or the like; contributory; auxiliary; subsidiary; specifically, of streams, affluent.

The imperious seas breed monsters, for the dish
Poor *tributary* rivers as sweet fish.
Shak., Cymbeline, iv. 2. 36.

Conciseness has been already considered as *tributary* to perspicuity and to precision; it is more conducive to energy than to either. *A. Phelps*, English Style, p. 245.

II. *n.*; pl. *tributaries* (-riz). **1.** A person or a state that pays tribute; one who or that which pays a stated sum to a conquering power, in acknowledgment of submission, or for the purchase of peace, security, and protection.

They have brought him to be a *tributary* to them: viz., to pay a certain rate of elephants per annum.
R. Knox (Arber's Eng. Garner, I. 434).

England was his faithful *tributary*.
Shak., Hamlet, v. 2. 38.

2. In *geog.*, an affluent; a river or other body of water which contributes its stream to another river, etc.

A bayou emptying into the Red river is a *tributary* of the Mississippi, within the meaning of an insurance policy.
Miller v. *Insurance Co.*, 12 W. Va. 116.

tribute (trib'ūt), *n.* [< ME. *tribute*, *trybute*, *tribut*, *trybut*, < OF. *tribut* (also vernacularly *treü*, > ME. *trew*: see *trew*[3]), F. *tribut* = Pr. *trebut*, *trabug*, *trabus*, *trabut*, *traut*, *treu* = Sp. 2. The state of being liable for such a payment; the obligation of contributing.

Undre it there is a Town that hight Sobache; and there alle abowte dwellen Cristene men undre *Trybute*.
Mandeville, Travels, p. 104.

His [Burke's] imperial fancy has laid all nature under *tribute*, and has collected riches from every scene of the creation and every walk of art.
R. Hall, Apology for the Freedom of the Press, iv.

3. Formerly, that which was paid by a subject or a tenant to a sovereign or lord; a tax; rental.

The distinction which we should draw between *tribute* and rent was seldom if ever marked in early times. The receiver of *tribute* was regarded as the landlord, and he who paid *tribute* was regarded as a tenant, paying rent.
D. W. Ross, German Land-Holding, notes, p. 243.

4. See the quotation.

"In some of the southern parts of Ireland," said Grattan, in one of the tithe debates, "the peasantry are made tributary to the tithe-farmer, draw home his corn, his hay, and his turf for nothing; give him their labour, their cars, and their horses at certain times of the year for nothing. These oppressions not only exist, but have acquired a formal and distinct appellation — *tributes*."
Lecky, Eng. in 18th Cent., xvi.

5. A contribution; an accretion.

From his side two rivers flow'd, . . .
Then meeting join'd their *tribute* to the sea.

trichidium (trī-kid′i-um), *n.*; pl. *trichidia* (-ä). [NL., < Gr. θρίξ (τριχ-), hair, + dim. *-ίδιον*.] In *bot.*, a tender simple or sometimes branched hair, which supports the sporules of some fungi, as *Geastrum*. *Lindley*. [Obsolete.]

Trichilia (trī-kil′i-ä), *n.* [NL. (Patrick Brown, 1756), < Gr. τρίχειλος, three-lipped, < τρεῖς (τρι-), three, + χεῖλος, lip: prob. from the three-lobed stigma.] A genus of dicotyledonous plants, of the family *Meliaceæ*, type of the tribe *Trichilieæ*. It is characterized by flowers usually with four or five free valvate petals, erect exserted anthers, and a three-celled ovary, which becomes a loculicidal capsule in fruit. There are about 200 species, natives of tropical Africa and America. They are trees or shrubs with axillary panicles of numerous and rather large flowers. The leaves are alternate, odd-pinnate, and commonly pellucid-dotted. The leaflets are entire, and usually numerous, sometimes three, or only two, or very rarely replaced by an undivided leaf. The stamens are more or less monadelphous; in the 60 species of the section *Moschoxylum*, formerly separated as a distinct genus (Adrien de Jussieu, 1830), they are united nearly to the anthers; but in 50 others, the typical section *Eutrichilia*, they are not united above the middle. The first group is entirely American, except *T. Prieureana*, which is African; its best-known species is *T. moschata*, often called *Moschoxylum Swartzii*, a low fragrant resinous tree with loose panicles of yellowish flowers, a native of Jamaica, where it is known as *muskwood*, *incense-tree*, and *pameroon-bark tree*. (Compare *juribali*.) To the typical group belongs *T. emetica* of Arabia and Africa, a large tree with densely panicled whitish flowers. (See *roka*, *elcaja*, and *mafurra-tree*.) Several South American species are reputed purgatives, as *T. cathartica* and *T. trifolia*. *T. hirta* is known as *bastard ironwood* and *T. spondioides* as *white bitterwood* in Jamaica. *T. Trinitensis*, the naranjillo blanco of Trinidad and Guiana, a small tree with capsules densely covered with soft prickles, yields a dark wood of close and even grain. *T. Catigna* of Brazil is said to stain leather a bright yellow. The petals are downy or densely velvety in many species, especially in *T. grandifolia* of St. Thomas. *Synoum glandulosum* of New South Wales, called *turnip-wood* (which see) and also *Australian rosewood*, was formerly referred to this genus by some authors.

Trichilieæ (trik-i-lī′ē-ē), *n. pl.* [NL. (A. P. de Candolle, 1824), < *Trichilia* + *-eæ*.] A tribe of dicotyledonous choripetalous plants, of the family *Meliaceæ*. It is characterized by monadelphous stamens, ovary-cells with only one or two ovules, and wingless seeds with thick cotyledons and without albumen. It includes 24 genera, of which *Trichilia* is the type. They are mostly trees or shrubs of tropical Asia, bearing pinnate leaves with entire leaflets.

Trichina (tri-kī′nä), *n.* [NL. (Owen, 1835), < Gr. θρίξ (τριχ-), a hair, + *-ina*[1].] 1. An important genus of nematoid worms, typical of the *Trichinidæ*. *T. spiralis* is a hair-like nematoid worm, which in the larval state is occasionally found encysted in large numbers in the muscular tissue of man and certain lower animals. In the adult state it may inhabit the intestinal tract of the same animal. It is the cause of trichinosis. The adult male is 1.5 millimeters, the female from 3 to 4 millimeters long. The female gives birth to immense numbers of embryos, about one tenth of a millimeter long. These pierce the walls of the intestine, and either enter the peritoneal cavity and thence find their way into the various muscles, or else enter blood-vessels or lymph-spaces and are carried passively into remote parts of the body. Having reached the muscular tissue, they at first travel a short distance between the fibers and become encysted, or they may pierce the sarcolemma of some one fiber and enter its substance. At a certain maturity (from .6 to 1 millimeter long) they coil up in the form of a spiral and become inclosed in elongated or lemon-shaped cysts about 4 millimeters long, the cyst rarely containing more than one worm. After a variable length of time, the cyst or capsule may become filled with lime-salts. The worm is thereby more or less obscured, but the cyst becomes visible to the naked eye as a minute white speck. The inclosed trichina may remain alive ten years and even longer, although it undergoes no further development until the muscular tissue containing it is consumed raw by man or some susceptible animal. It then becomes sexually mature in the intestines within two or three days, to give birth to embryos in five or six days more, thus completing the life-cycle. *T. spiralis* has been found in the muscular tissue of man, swine, cats, rats, hedgehogs, racoons, badgers, martens, marmots, and polecats, and in almost every part of the globe.

Trichina spiralis, highly magnified. (♀, female; ♂, male.)

a, single cyst in which the worm is coiled (enlarged 35 times); *b*, human muscle long infected (magnified); *c*, human muscle recently infected (magnified).

2. [*l. c.*; pl. *trichinæ* (-nē), sometimes *trichinas* (-näz).] A worm of this genus.

trichiniasis (trik-i-nī′a-sis), *n.* [NL., < *Trichina* + *-iasis*.] Same as *trichinosis*.

Trichinidæ (trī-kin′i-dē), *n. pl.* [NL., < *Trichina* + *-idæ*.] A family of nematoid worms, of which the genus *Trichina* is the type.

trichiniferous (trik-i-nif′e-rus), *a.* [< NL. *Trichina* + L. *ferre* = E. *bear*[1].] Containing trichinæ, as muscular or other tissue.

trichinization (trik″i-ni-zā′shon), *n.* [< *trichinize* + *-ation*.] Infection with trichinæ; the state of being trichinized; trichinosis. It is sometimes practised upon animals for the purpose of studying the parasite or the disease. Also spelled *trichinisation*.

trichinize (trik′i-nīz), *v. t.*; pret. and pp. *trichinized*, ppr. *trichinizing*. [< NL. *Trichina* + *-ize*.] To infect with trichinæ; produce trichinosis in. Also spelled *trichinise*.

The ingestion of badly *trichinized* meat, insufficiently cooked, is followed after a few hours by symptoms of indigestion. *Quain*, Med. Dict., p. 1657.

trichinoscope (tri-kī′nō-skōp), *n.* [< NL. *Trichina* + Gr. σκοπεῖν, view.] An instrument for the examination of meat in order to determine the presence or absence of trichinæ.

trichinosed (trik′i-nōzd), *a.* [< *trichinosis* + *-ed*[2].] Affected with trichinosis; infested with trichinæ; trichinous; measly, as pork.

On examining *trichinosed* pork, the parasites are seen as small white specks dotting the lean parts. *Lancet*, 1889, II. 730.

trichinosis (trik-i-nō′sis), *n.* [NL., < *Trichina* + *-osis*.] A disease caused by the presence of *Trichina spiralis* in large numbers in the intestines, and by the migration of embryos of the same worm from the intestines into the muscular tissue. See *Trichina*. The worms are introduced into the human body in raw meat from infected swine. Since many persons may eat meat or sausage from the same animal, the disease has generally prevailed in epidemics. The severity of the disease depends largely on the number of parasites consumed. It may begin with chilly sensations or a distinct chill, and there may be a slight fever of varying intensity in the course of the disease. Digestive disturbances are very common. They consist in sensations of discomfort, nausea, vomiting, and diarrhea. These may appear several hours or days after the eating of infected meat, or they may be entirely absent. They are referable to the irritation caused by the worms in the intestine. Next to these symptoms, those affecting the muscular system are the most important. In all cases they begin with a sensation of general lameness of the muscles. This is followed by swelling, firmness, and great tenderness of the invaded muscles. Mastication, deglutition, and respiration are rendered difficult. Muscular pains are frequent, especially on moving. Swelling of the eyelids and of the face, appearing usually on the seventh day, is quite characteristic. Edema of the limbs is not uncommon. The disease, which terminates when the muscle-trichinæ have come to rest, lasts from five weeks to four months. The mortality varies in different epidemics, and has been as high as thirty per cent. The presence of encysted trichinæ in the muscles does not lead to permanent disability. Trichinosis of swine is of great economic and hygienic importance, and has received much attention. In order to detect it, muscular fibers from the diaphragm, and from the intercostal, abdominal, laryngeal, and lingual muscles, are examined, because the worms are most abundant in these localities. Very small, slender strips are cut from these muscles parallel to the course of the fibers, crushed between two glass slides and examined under a microscope. Meat infected with trichinæ is made harmless by thorough cooking. Many authorities refer the source of trichinosis in swine to trichinized rats eaten by them. Some incline to the view that the disease is propagated by allowing swine to feed upon the infected viscera of slaughtered swine. Also *trichiniasis*.

trichinotic (trik-i-not′ik), *a.* [< *trichinosis* (*-ot-*) + *-ic*.] Of or pertaining to trichinosis.

However, trichinæ cannot be found in the muscles, and the very long duration of the disease is a slight argument also against the *trichinotic* view. *Lancet*, 1889, I. 901

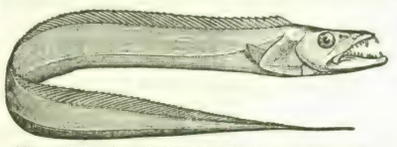
trichinous (trik′i-nus), *a.* [< *Trichina* + *-ous*.] Infested with trichinæ; affected with trichinosis; trichinosed.

Two out of three hundred and thirty swine were discovered to be *trichinous*. *The American*, VI. 45.

trichite (trī′kīt), *n.* and *a.* [< Gr. θρίξ (τριχ-), hair, + *-ite*[2].] I. *n.* 1. A kind of flesh-spicule or microsclere of some sponges; a fibrillate spicule, in which the silica, instead of being deposited in concentric coatings around an axis, forms within the scleroblast a sheaf of exceedingly fine fibrillæ which may be straight or twisted; also, one of these fibrillæ: as, "fine fibrillæ or *trichites*," *Sollas*.—2. In *lithol.*, one of various dark-colored, opaque, hairlike microliths, having more or less of a curved and twisted form: frequently seen in thin sections of vitreous rocks, especially in obsidian.

II. *a.* Same as *trichitic*.

Trichite sheaves form in some sponges . . . a dense accumulation within the cortex. *Encyc. Brit.*, XXII. 418.



trichitic (trī-kit′ik), *a.* [< *trichite* + *-ic*.] 1. Finely fibrous or fibrillar, as a trichite; of or pertaining to trichites.—2. In *lithol.*, having the character of or containing trichites.

Trichiuridæ (trik-i-ū′ri-dē), *n. pl.* [NL., < *Trichiurus* + *-idæ*.] A family of acanthopterygian teleost fishes, whose type genus is *Trichiurus* and whose limits vary. (*a*) In Günther's system, it covered fishes having the body elongate, the mouth deeply cleft, strong teeth, and the spinous and soft parts of the fins of nearly equal extent. It thus included the typical *Trichiuridæ* and others more like *Scombridæ*. (*b*) By later writers it has been restricted to forms having numerous small anal spines. See cut under *Trichiurus*.

trichiuriform (trik-i-ū′ri-fôrm), *a.* [< NL. *Trichiurus*, q. v., + L. *forma*, form.] Having that form which is characteristic of the hairtails; resembling or belonging to the *Trichiuridæ*.

trichiuroid (trik-i-ū′roid), *a.* [< NL. *Trichiurus*, q. v., + Gr. εἶδος, form.] Same as *trichiuriform*.

Trichiurus (trik-i-ū′rus), *n.* [NL. (Linnæus, 1766) (not *Trichurus*), < Gr. τρίχιον, a little hair, + οὐρά, a tail.] In *ichth.*, the typical genus of *Trichiuridæ*; the hairtails: so called from the long filament in which the tail ends. The species are also called *ribbon-fish*. *T. lepturus*, the type species, is the silvery hairtail, or cutlas-fish.

Silvery Hairtail, or Cutlas-fish (*Trichiurus lepturus*).

trichloracetic (trī-klō-ra-set′ik), *a.* [< Gr. τρεῖς (τρι-), three, + *chlor(in)* + *acetic*.] Used only in the following phrase.—**Trichloracetic acid**, acetic acid in which the three hydrogen atoms of the methyl radical are replaced by chlorin. The formula of acetic acid being $CH_3.CO_2H$, that of trichloracetic acid is $CCl_3.CO_2H$. Trichloracetic acid is a crystalline solid, easily decomposed.

trichoblast (trik′ō-blâst), *n.* [< Gr. θρίξ (τριχ-), hair, + βλαστός, germ.] In *bot.*, an internal hair, as one of those which project into the intercellular spaces of certain water-plants. See cut under *mangrove*.

trichobranchia (trik-ō-brang′ki-ä), *n.*; pl. *trichobranchiæ* (-ē). [NL., < Gr. θρίξ (τριχ-), hair, + βράγχια, gills.] A filamentous gill characteristic of most long-tailed ten-footed crustaceans, consisting of a stem beset with many cylindrical filaments, as distinguished from the lamellar gills, or phyllobranchiæ, of many other crustaceans. The developed arthrobranchiæ, pleurobranchiæ, and podobranchiæ of crawfishes are all of the trichobranchial type.

The whole of the Macrurous Podophthalmia, excepting the genera Gebia and Callianassa, the Prawns, the Shrimps, and the Mysidæ, have *trichobranchiæ*. *Huxley*, Proc. Zoöl. Soc., 1878, p. 777.

trichobranchial (trik-ō-brang′ki-al), *a.* [< *trichobranchia* + *-al*.] Thready or filamentous, as gills; of or pertaining to trichobranchiæ: as, a *trichobranchial* gill.

Trichobranchiata (trik-ō-brang-ki-ā′tä), *n. pl.* [NL.: see *trichobranchia*.] Those macrurous crustaceans which have trichobranchiæ.

trichobranchiate (trik-ō-brang′ki-āt), *a.* [< *trichobranchia* + *-ate*.] Having trichobranchiæ, as a crawfish.

trichocarpous (trik-ō-kär′pus), *a.* [< Gr. θρίξ (τριχ-), a hair, + καρπός, fruit.] In *bot.*, having hairy fruit; hairy-fruited.

Trichocephalidæ (trik″ō-se-fal′i-dē), *n. pl.* [NL., < *Trichocephalus* + *-idæ*.] A family of nematoid worms, typified by the genus *Trichocephalus*.

Trichocephalus (trik-ō-sef′a-lus), *n.* [NL. (Goeze, 1782), < Gr. θρίξ (τριχ-), a hair, + κεφαλή, head.] 1. A genus of nematoid worms, typical of the family *Trichocephalidæ*. The best-known species is *T. dispar*, found sometimes in the human intestine, 1 to 2 inches long, with the head and anterior part of the body filamentous. *T. affinis* is the cæcum-worm of sheep.

2. [*l. c.*] The detached hectocotylized third left arm of the male argonaut, deposited in the pallial cavity of the female, and regarded as a parasite by Delle Chiaje, who called it *Trichocephalus acetabularis*, making the word a pseudogeneric name. See cut under *Argonautidæ*.

trichocladose (trī-kok'la-dōs), *a.* [< Gr. *τρίχα*, in three (< *τρεῖς* (*τρι-*), three), + *κλάδος*, branch.] Trifid or trichotomous, as the cladi or branches of a cladome. See *triæne*. *Sollas*.

Trichocladus (trī-kok'la-dus), *n.* [NL. (Persoon, 1807), so called with ref. to the woolly branches, < Gr. *θρίξ* (*τριχ-*), hair, + *κλάδος*, branch.] **1.** A genus of dicotyledonous shrubs, of the family *Hamamelidaceæ*, distinguished from the type genus *Hamamelis* by mucronate anthers, and flowers with the parts in fives. The 3 species are natives of South Africa, evergreen shrubs with opposite or alternate entire leaves, and white flowers densely aggregated into small terminal heads, bearing long narrow petals with revolute margins, the pistillate flowers apetalous. *T. ellipticus* is remarkable for the reddish wool clothing the under surface of the leaves; and *T. crinitus*, the hairbranch-tree, for its branchlets and petioles, which are hirsute with blackish hairs.

2. [*l. c.*] In *zoöl.*, a trichocladose sponge-spicule.

trichoclasia (trik-ō-klā'si-ä), *n.* [< Gr. *θρίξ* (*τριχ-*), hair, + *κλασις*, a fracture.] A brittle condition of the hair. Also *trichoclasis*.

trichocryptosis (trik″ō-krip-tō'sis), *n.* [NL., < Gr. *θρίξ* (*τριχ-*), hair, + *κρυπτός*, hidden, + *-osis*.] Inflammation of the hair-follicles.

trichocyst (trik'ō-sist), *n.* [< Gr. *θρίξ* (*τριχ-*), hair, + *κύστις*, bladder: see *cyst*.] A hair-cell; one of the minute rod-like or hair-like bodies developed in the subcuticular layer of many infusorians: so named by G. J. Allman in 1855. They represent or resemble the cnidæ or thread-cells of cœlenterates.

trichocystic (trik-ō-sis'tik), *a.* [< *trichocyst* + *-ic*.] Pertaining to or having the character of trichocysts: as, a *trichocystic* formation.

Trichoda (trī-kō'dä), *n.* [NL., < Gr. *τριχώδης*, contr. of *τριχοειδής*, like a hair, < *θρίξ* (*τριχ-*), hair, + *εἶδος*, form.] A genus of ciliate infusorians, established by O. F. Müller in 1786, giving name to the former family *Trichodidæ* (or *Trichodina*). Many animalcules have been referred to this genus which are now excluded from it. It is now placed in the family *Ophryoglenidæ*, and retained for such species as *T. carnium*, found in putrid infusions, and *T. pirum*, of pond-water. These closely resemble forms of *Enchelys*, but have a minute vibratile membrane inclosed in the oral fossa. They are free-swimming, elastic, but of somewhat persistent ovate or pyriform figure, with the mouth at the obliquely truncated anterior end, approached by an oval peristome; the general cuticular surface is finely ciliated throughout, and a circlet of longer cilia surrounds the oral fossa.

Trichodectes (trik-ō-dek'tēz), *n.* [NL. (Nitzsch), < Gr. *θρίξ* (*τριχ-*), hair, + *δέκτης*, taker, < *δέκεσθαι*, *δέχεσθαι*, receive, take.] A genus of mallophagous insects. *T. sphærocephalus* is the red-headed sheep-louse, found in the wool of sheep in Europe and America. See *sheep-louse*, 2.

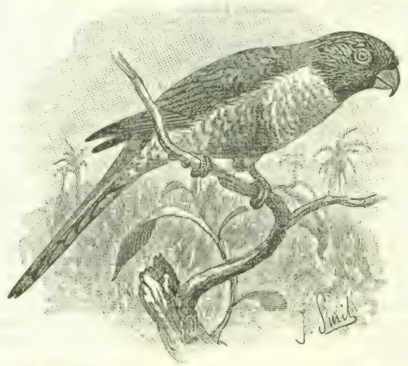
Trichodon (trik'ō-don), *n.* [NL. (Cuvier, 1829, after Steller), < Gr. *θρίξ* (*τριχ-*), hair, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] The typical genus of the family *Trichodontidæ*. *T. trichodon*, the sand-fish, is found in Alaska and south to California. See cut under *sand-fish*.

Trichodontidæ (trik-ō-don'ti-dē), *n. pl.* [NL., < *Trichodon*(*t-*) + *-idæ*.] A family of acanthopterygian fishes, typified by the genus *Trichodon;* the sand-fishes.

trichodontoid (trik-ō-don'toid), *n.* and *a.* **I.** *n.* A fish of the family *Trichodontidæ*.

II. *a.* Of, or having characters of, the *Trichodontidæ*.

trichogen (trik'ō-jen), *n.* [< Gr. *θρίξ* (*τριχ-*), hair, + *-γενής*, producing: see *-gen*.] A substance or preparation used for promoting the growth of the hair.

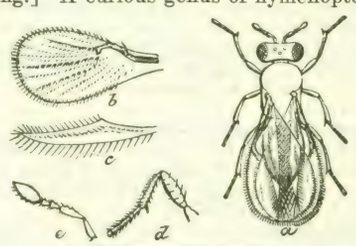


trichogenous (trī-koj'e-nus), *a.* [As *trichogen* + *-ous*.] Encouraging the growth of hair.

Trichoglossidæ (trik-ō-glos'i-dē), *n. pl.* [NL., < *Trichoglossus* + *-idæ*.] The *Trichoglossinæ* ranked as a family.

Trichoglossinæ (trik″ō-glo-sī'nē), *n. pl.* [NL., < *Trichoglossus* + *-inæ*.] A subfamily of *Psittacidæ*, typified by the genus *Trichoglossus*, and inexactly synonymous with *Loriinæ*, or including the latter; the brush-tongued parrakeets, among the small parrots called *lories* and *lorikeets*. With the exception of the genus *Coryllis* or *Loriculus* (usually put here, but probably belonging elsewhere), these parrakeets have the tongue brushy, beset with papillæ or filaments, and used for licking the nectar of flowers and the soft pulp of fruits. There are more than 80 species, characteristic of the Australian regions and Polynesia, but also extending into the Malay countries. They are among the smaller parrots, and of chiefly green or red colors. One set of species has a short broad tail; these are the broad-tailed lories, as of the genera *Domicella* and *Coriphilus* (see cut under *domicella*); but the most characteristic representatives are wedge-tailed.

trichoglossine (trik-ō-glos'in), *a.* Of or pertaining to the *Trichoglossinæ*.



Trichoglossus (trik-ō-glos'us), *n.* [NL. (Vigors and Horsfield, 1826), < Gr. *θρίξ* (*τριχ-*), hair, + *γλῶσσα*, tongue.] The leading genus of *Trichoglossinæ*, used with varying limits; the lories most properly so called. All are brush-tongued and wedge-tailed; they are of moderate or small size, and

Swainson's Lory (*Trichoglossus novæ-hollandiæ*).

chiefly green and red. The genus in a usual acceptation contains about 40 species, or half of the *Trichoglossinæ*. Swainson's lory of Australia is a characteristic example, mostly green, beautifully varied with red, blue, and yellow.

Trichogramma (trik-ō-gram'ä), *n.* [NL. (Westwood, 1833), < *θρίξ* (*τριχ-*), hair, + *γράμμα*, a writing.] A curious genus of hymenopterous

Trichogramma minuta.
a, fly with wings folded; *b*, front wing; *c*, hind wing; *d*, leg; *e*, antenna. (All enlarged.)

parasites, of the family *Chalcididæ*, and typical of the subfamily *Trichogramminæ*. One rare species is known in Europe, but several are found in North America, where the individuals are extremely abundant, as of *T. minuta*. They are all parasitic in the eggs of lepidopterous insects and of sawflies.

Trichogramminæ (trik″ō-gra-mī'nē), *n. pl.* [NL. (L. O. Howard, 1885), < *Trichogramma* + *-inæ*.] A subfamily of parasitic hymenopters, of the family *Chalcididæ*, containing the smallest species of the family, characterized by their three-jointed tarsi (thus forming the section *Trimera*) and the regular fringe of minute bristles on the wings. They vary in color from bright yellow to reddish brown, and are all parasitic in the eggs of other insects. Also *Trichogrammatoidæ* (Förster, 1856). See cut under *Trichogramma*.

trichogyne (trik'ō-jin), *n.* [NL., < Gr. *θρίξ* (*τριχ-*), hair, + *γυνή*, a female.] In *bot.*, a long thin hair-like sac springing from the trichophoric part of the procarp of certain cryptogams, and serving as a receptive organ of reproduction. See *procarp*, *Florideæ*.

trichogynic (trik-ō-jin'ik), *a.* [< *trichogyne* + *-ic*.] In *bot.*, of or pertaining to the trichogyne.

trichologia (trik-ō-lō'ji-ä), *n.* [NL., < Gr. as if **τριχολογία*, < *τριχολογεῖν*, pluck hairs (as a symptom), < *θρίξ* (*τριχ-*), hair, + *λέγειν*, gather, pick.] Carphologia.

trichology (trī-kol'ō-ji), *n.* [< Gr. *θρίξ* (*τριχ-*), hair, + *-λογία*, < *λέγειν*, speak: see *-ology*.] The science treating of the anatomy, diseases, function, etc., of the hair.

trichoma (trī-kō'mä), *n.* [NL., < Gr. *τρίχωμα*, a growth of hair, < *τριχοῦν*, furnish or cover with hair, < *θρίξ* (*τριχ-*), hair.] **1.** In *pathol.*, an affection of the hair, otherwise called *plica*.—**2.** In *bot.*, one of the cellular filaments which constitute a plant in certain of the blue-green algæ or *Schizophyceæ*.

Trichomanes (trī-kom'a-nēz), *n.* [NL. (Tournefort, 1700), < Gr. *τριχομανές*, a kind of fern (cf. *τριχομανία*, a passion for long hair, *τριχομανεῖν*, have a passion for long hair), < *θρίξ* (*τριχ-*), hair, + *μαίνεσθαι*, be mad. Cf. the E. names *bristle-fern* and *maidenhair*.] A large genus of hymenophyllaceous ferns, having the sori marginal, terminating a vein, and more or less sunken in the frond. The sporangia are sessile on the lower part of a cylindrical, filiform, usually elongated receptacle, and

Bristle-fern (*Trichomanes radicans*).

the indusia are tubular or funnel-shaped, and entire or two-lipped at the mouth. About 100 species are known, natives of tropical and temperate countries, including four in the southern United States. All are popularly called *bristle-ferns*. See *bristle-fern*, and cut (*e*) under *sorus*.

trichomaphyte (trī-kom'a-fīt), *n.* [< Gr. *τρίχωμα*, a growth of hair (see *trichoma*), + *φυτόν*, a plant.] A cryptogamic growth of doubtful character, thought to be the cause of trichoma.

trichomatose (trī-kom'a-tōs), *a.* [< *trichoma*(*t-*) + *-ose*.] Matted or agglutinated together; affected with trichoma: said of hair.

trichome (trī'kōm), *n.* [< NL. *trichoma*, q. v.] An outgrowth from the epidermis of plants, as a hair, scale, bristle, or prickle. These may be very various in form and function, but morphologically they have a common origin.

Trichomonadidæ (trik″ō-mō-nad'i-dē), *n. pl.* [NL., < *Trichomonas* (*-monad-*) + *-idæ*.] A family of flagellate protozoans, characterized by the tapering form posteriorly, and the development of several flagella and bodies like trichocysts at the anterior extremity.

Trichomonas (trī-kom ō-nas), *n.* [NL. (Ehrenberg, 1838), < Gr. *θρίξ* (*τριχ-*), hair, + *μονάς*, single.] The typical genus of *Trichomonadidæ*. *T. melolonthæ* infests the cockchafer. *T. vaginalis* is found in the secretions of the human vagina.

trichomycosis (trik″ō-mī-kō'sis), *n.* [NL., < Gr. *θρίξ* (*τριχ-*), hair, + *μύκης*, fungus, + *-osis*.] Same as *tinea*[1].

Trichomycteridæ (trik″ō-mik-ter'i-dē), *n. pl.* [NL., < *Trichomycterus* + *-idæ*.] A family of fishes: same as *Pygidiidæ*.

Trichomycterinæ (trik-ō-mik-te-rī'nē), *n. pl.* [NL., < *Trichomycterus* + *-inæ*.] A subfamily of trichomycteroid fishes, with the dorsal fin posterior, and behind the ventrals when the latter are present. It includes most species of the family. Also *Trichomycterina* and *Pygidiinæ*.

trichomycterine (trik-ō-mik'te-rin), *a.* and *n.* **I.** *a.* Of, or having characters of, the *Trichomycterinæ*.

II. *n.* A fish of the subfamily *Trichomycterinæ*.

trichomycteroid (trik-ō-mik'te-roid), *a.* and *n.* **I.** *a.* Of, or having characters of, the *Trichomycteridæ*.

II. *n.* A fish of the family *Trichomycteridæ*.

Trichomycterus (trik″ō-mik-tē'rus), *n.* [NL. (Cuvier and Valenciennes, 1846), < Gr. *θρίξ* (*τριχ-*), hair, + *μυκτήρ*, nostril.] Same as *Pygidium*, 2.

Trichonotidæ (trik-ō-not'i-dē), *n. pl.* [NL., < *Trichonotus* + *-idæ*.] A family of acanthopterygian fishes, represented by the genus *Trichonotus*.

trichonotoid (trik-ō-nō'toid), *a.* and *n.* **I.** *a.* Of or relating to the *Trichonotidæ*.

II. *n.* A fish of the family *Trichonotidæ*.

Trichonotus (trik-ō-nō'tus), *n.* [NL. (Bloch and Schneider, 1801), < Gr. *θρίξ* (*τριχ-*), hair, + *νῶτος*, back.] **1.** In *ichth.*, the typical genus of *Trichonotidæ:* so called from the long filamentous anterior dorsal ray of *T. setigerus*, the original species. The body is long and subcylindrical, with

cycloid scales of moderate size; the eyes look upward; the teeth are in villiform bands on the jaws; the long dorsal fin is spineless; the anal is also long; the ventrals are jugular, with one spine and five rays; and the caudal vertebræ are very numerous.

2. In *entom.*, a generic name which has been used for certain beetles and flies, but is in each case preoccupied in ichthyology.

trichopathic (trik-ō-path'ik), *a.* [< *trichopath-y* + *-ic.*] Relating to disease of the hair.

trichopathy (trī-kop'a-thi), *n.* [< Gr. θρίξ (τριχ-), hair, + -παθία, < πάθος, suffering.] Treatment of diseases of the hair.

Trichophocinæ (trik″ō-fō-sī'nē), *n. pl.* [NL., < Gr. θρίξ (τριχ-), hair, + φώκη, a seal, + *-inæ.*] A subfamily of the *Otariidæ*, or eared seals, including the hair-seals as distinguished from the fur-seals (*Ulophocinæ*). There is no type genus.

trichophocine (trik-ō-fō'sin), *a.* Pertaining to the *Trichophocinæ*, or having their characters.

trichophore (trik'ō-fōr), *n.* [< Gr. θρίξ (τριχ-), hair, + -φορος, < φέρειν = E. *bear*[1].] 1. In *bot.*, the special cell or chain of cells in certain algæ which bears the trichogyne. See *Florideæ*. *Bennett and Murray*, Cryptog. Bot., p. 199.—2. In *zoöl.*, a process of the integument of certain annelids, as *Polychæta*, within which are developed the peculiar chitinous setæ of the parapodia, and which incloses the bases of the pencil-like bundles of setæ (whence the name). See cut under *pygidium*.

trichophoric (trik-ō-for'ik), *a.* [< *trichophore* + *-ic.*] In *bot.*: (*a*) Of or pertaining to the trichophore: as, the *trichophoric* apparatus. (*b*) Of the nature of a trichophore: as, the *trichophoric* part of the procarp of certain red algæ.

trichophorous (trī-kof'ō-rus), *a.* [As *trichophore* + *-ous.*] In *zoöl.*, bearing hairs or hair-like parts, as setæ; of the nature of a trichophore.

Trichophyton (trī-kof'i-ton), *n.* [NL., < Gr. θρίξ (τριχ-), hair, + φυτόν, a plant.] A genus of minute fungi, parasitic on the skin of man, where they grow luxuriantly in and beneath the epidermis. *T. tonsurans* produces the skin-disease known as tinea or ringworm. It is referred to *Oöspora* by recent authors. See *dermatophyte*, *tinea*[1].

Trichoplax (trik'ō-plaks), *n.* [NL., < Gr. θρίξ (τριχ-), hair, + πλάξ, a plate.] A supposed generic type of animal, of wholly undetermined affinities, so called from the ciliated plate-like surface. The species is *T. adherens*.

trichopter (trī-kop'tėr), *n.* [< *Trichoptera*, q. v.] A member of the *Trichoptera*; a caddis-fly.

Trichoptera (trī-kop'tę-rā), *n. pl.* [NL., neut. pl. of *trichopterus*: see *trichopterous*.] An order of insects, comprising the forms known as caddis-flies: so called because the wings are generally hairy to an extent not found in other neuropteroids. The posterior wings are folded in rest; the mandibles are rudimentary. The group is approximately the same as *Phryganeida*, being composed of the families *Phryganeidæ*, *Limnophilidæ*, and sundry others. See cut under *caddis-worm*.

trichopteran (trī-kop'tę-ran), *a.* and *n.* [< *Trichoptera* + *-an.*] I. *a.* Same as *trichopterous*.

II. *n.* A member of the *Trichoptera*; any caddis-fly or phryganeid.

trichopterous (trī-kop'tę-rus), *a.* [< NL. *trichopterus*, hairy-winged, < Gr. θρίξ (τριχ-), hair, + πτερόν, wing.] Belonging to the *Trichoptera*.

trichopterygid (trik-op-ter'i-jid), *a.* and *n.* I. *a.* Pertaining to the *Trichopterygidæ*; relating to or resembling a trichopterygid.

II. *n.* A beetle of the family *Trichopterygidæ*.

Trichopterygidæ (trī-kop-tę-rij'i-dē), *n. pl.* [NL. (Burmeister, 1845), < *Trichopteryx* + *-idæ.*] A family of clavicorn beetles, including the smallest beetles known. The antennæ are verticillate with long hairs, and the wings are fringed with hair. A few species are apterous. The larvæ are active and carnivorous; some of them feed on podurans. Some are myrmecophilous; others live under bark. In the genera *Aderces*, *Astatopteryx*, and *Neuglenes* the phenomenon of alternate generation has been noticed, a blind apterous generation alternating with one in which the individuals have eyes and wings. About 150 species are known, of which about 60 inhabit the United States.

Trichopteryx (trī-kop'tę-riks), *n.* [NL. (Hübner, 1816), < Gr. θρίξ (τριχ-), hair, + πτέρυξ, wing.] 1. A genus of geometrid moths.—2. A genus of clavicorn beetles, typical of the family *Trichopterygidæ*. *Kirby*, 1826. They have the antennæ elongate, eleven-jointed, the prothorax not constricted behind, the abdomen with six ventral segments, the hind coxæ distant, and the mesosternum carinate. The species are found on dung and vegetable debris. Over 60 species are known, and the genus is represented in Europe, Asia, and North and South America.

trichort, *n.* A Middle English form of *treacher*.

trichord (trī'kôrd), *n.* and *a.* [< Gr. τρίχορδος, having three strings, < τρεῖς (τρι-), three, + χορδή, string: see *cord*[1], *chord*.] I. *n.* In *music*, any instrument with three strings, especially the three-stringed lute.

II. *a.* Having three strings; characterized by three strings.—**Trichord pianoforte**, a pianoforte in which most of the digitals have each three strings tuned in unison.

trichorexis (trik-ō-rek'sis), *n.* [NL., < Gr. θρίξ (τριχ-), hair, + ῥῆξις, a breaking, < ῥηγνύναι, break.] Brittleness of the hair.—**Trichorexis nodosa**, a disease of the hair characterized by brittleness and the formation of swellings on the shaft.

trichorrhea, trichorrhœa (trik-ō-rē'ä), *n.* [NL., < Gr. θρίξ (τριχ-), hair, + ῥοία, a flowing, < ῥεῖν, flow.] Falling of the hair; alopecia.

Trichosanthes (trik-ō-san'thēz), *n.* [NL. (Linnæus, 1737), named from the fringed petals; < Gr. θρίξ (τριχ-), hair, + ἄνθος, flower.] A genus of plants, of the family *Cucurbitaceæ* and tribe *Cucurbiteæ*. It is characterized by entire calyx-lobes, a five-parted wheel-shaped fringed corolla, conduplicate anther-cells, and numerous polymorphous seeds. There are about 42 species, natives of tropical Asia, northern Australia, and Polynesia. They are annual or perennial climbers, sometimes with a tuberous root, bearing entire or lobed and cordate leaves and unbranched or forking tendrils. The flowers are white and monœcious — the male racemed, the female solitary — and followed by a fleshy smooth or furrowed fruit, often large and globose, oblong, or conical, sometimes elongated, slender, striped, and serpent-like. *T. Anguina* is known as *snake-gourd* or *viper-gourd*, also as *snake-cucumber* (which see, under *cucumber*).

trichoschisis (trik-os-kī'sis), *n.* [NL., < Gr. θρίξ (τριχ-), hair, + σχίσις, a cleaving, < σχίζειν, cleave: see *schism*.] Splitting of the hair.

Trichoscolices (trik″ō-skō-lī'sēz), *n. pl.* [NL., < Gr. θρίξ (τριχ-), hair, + σκώληξ, a worm.] A superordinal division, proposed in 1877 by Huxley to be established to include the *Trematoda*, *Cestoidea*, *Turbellaria*, and *Rotifera*, in order to discriminate the morphological type which they exemplify from that of the *Nematoscolices*, containing the *Nematoidea*. See *Nematoscolices*.

trichosis (trī-kō'sis), *n.* [NL., < Gr. θρίξ (τριχ-), hair, + *-osis.*] Any disease of the hair: same as *plica*, 1.

Trichosomata (trik-ō-sō'ma-tä), *n. pl.* [NL. (Diesing), < Gr. θρίξ (τριχ-), hair, + σῶμα(τ-), the body.] The *Peridinidæ* and allied protozoans, corresponding to the *Choanoflagellata* of H. J. Clark and W. S. Kent.

trichosomatous (trik-ō-som'a-tus), *a.* Pertaining to the *Trichosomata*, or having their characters; having the body flagellate, as a protozoan.

trichosporange (trik-ō-spō'ranj), *n.* [< NL. *trichosporangium*, q. v.] In *bot.*, same as *trichosporangium*.

trichosporangium (trik″ō-spō-ran'ji-um), *n.*; pl. *trichosporangia* (-ä). [NL. (Thuret), < Gr. θρίξ (τριχ-), hair, + NL. *sporangium*, q. v.] In *bot.*, the plurilocular sporangium, or zoösporangium, of the fucoid algæ, consisting of an aggregation of small cells, each one of which contains a single zoöspore. Compare *oösporangium*.

trichospore (trik'ō-spōr), *n.* [< Gr. θρίξ (τριχ-), hair, + σπορά, seed: see *spore*[2].] In *bot.*, one of the peculiar spores of the *Hyphomycetes*: same, or nearly the same, as *conidium*.

Trichostema (trik-ō-stē'mä), *n.* [NL. (Gronovius, 1737), named from the capillary filaments; < Gr. θρίξ (τριχ-), hair, + στήμα, stamen.] A genus of plants of the family *Menthaceæ* and tribe *Ajugeæ*. It is characterized by the four long-exserted stamens with divaricate anther-cells, and by the deeply lobed ovary. The 8 species are all natives of North America. They are clammy glandular herbs with a strong balsamic odor. They bear entire leaves, and axillary whorls of numerous mostly blue flowers, the corolla with a slender tube and nearly equally five-toothed spreading border, from which the conspicuous arching stamens project, suggesting the popular name *blue-curls* (which see). The species of the eastern United States have a very strongly two-lipped and depressed calyx, and loose flower-clusters, as *T. dichotomum*, the bastard pennyroyal. The western have the calyx normal and the flower-clusters dense. *T. lanatum*, with a striking purple-woolly spike, is known in California as *black sage*.

trichosyphilis (trik-ō-sif'i-lis), *n.* [NL., < Gr. θρίξ (τριχ-), hair, + NL. *syphilis*.] A syphilitic disease of the hair.

trichosyphilosis (trik-ō-sif-i-lō'sis), *n.* [NL., as *trichosyphilis* + *-osis.*] Same as *trichosyphilis*.

trichothallic (trik-ō-thal'ik), *a.* [< Gr. θρίξ (τριχ-), hair, + θαλλός, a green shoot: see *thallus*.] In *bot.*, having a filamentous or hair-like thallus, as certain algæ.

trichotomic (trik-ō-tom'ik), *n.* Pertaining to trichotomy; influenced by or practising trichotomy.

trichotomous (trī-kot'ō-mus), *a.* [< Gr. τρίχα, in three, + -τομος, < τέμνειν, ταμεῖν, cut.] Divided into three parts, or divided by threes; branching or giving off shoots by threes; trifurcate; also, dividing a genus into three species.

trichotomously (trī-kot'ō-mus-li), *adv.* In a trichotomous manner; in three parts.

trichotomy (trī-kot'ō-mi), *n.* [< Gr. τρίχα, in three, + τομία, < τέμνειν, ταμεῖν, cut.] Division into three parts; specifically, in *theol.*, division of human nature into body (*soma*), soul (*psyche*), and spirit (*pneuma*).

His [Aristotle's] *trichotomy* into hypotheses, definitions, and axioms. *Barrow*, Math. Lects., viii.

trichotriæne (trik-ō-trī'ēn), *n.* [< Gr. τρίχα, in three (< τρεις (τρι-), three), + τρίαινα, a trident: see *triæne*.] Of sponge-spicules, a trichotomous triæne; a cladose rhabdus the three cladi of which trifurcate. See *triæne*. *Sollas*.

trichroic (trī-krō'ik), *a.* [< Gr. τρίχροος, τρίχρους, also τρίχρως, three-colored (< τρεῖς (τρι-), three, + χρόα, χρώς, color), + *-ic.*] Possessing the property of trichroism. *E. W. Streeter*, Precious Stones, p. 167.

trichroism (trī'krō-izm), *n.* [< *trichro-ic* + *-ism.*] The property possessed by some crystals of exhibiting different colors in three different directions when viewed by transmitted light. It is due to the different degrees of absorption in the three directions. The more general term *pleochroism* is often employed.

trichromatic (trī-krō-mat'ik), *a.* [< Gr. τριχρώματος, three-colored: see *trichromic*.] Characterized by three colors; in a specific sense, having the three fundamental color-sensations of red, green, and violet, as the normal eye, in distinction from a color-blind eye, which can perceive only two of the fundamental colors.

trichromic (trī-krō'mik), *a.* [< Gr. τρεῖς (τρι-), three, + χρῶμα, color.] Pertaining to three colors; trichromatic.

trichronous (trī'krō-nus), *a.* [< Gr. τρίχρονος, of three times or measures, < τρεῖς (τρι-), three, + χρόνος, time.] In *anc. pros.*, consisting of or containing three times or moræ; trisemic.

trichurt, *n.* A Middle English form of *treacher*.

tricing-line (trī'sing-līn), *n.* *Naut.*, a line used to trice up any object, either to stow it or to get it out of the way.

tricinium (trī-sin'i-um), *n.* [LL., < L. *tres* (*tri-*), three, + *canere*, sing.] A musical composition for three voices; a trio.

tricipital (trī-sip'i-tal), *a.* [< L. *triceps* (*tricipit-*), three-headed (see *triceps*), + *-al.*] In *anat.*, three-headed; having three origins: as, a *tricipital* muscle. See *triceps*.

tricircular (trī-sėr'kū-lär), *a.* Referring to three circles.—**Tricircular coördinates**, homogeneous point-coördinates for a plane, each of which is equal to the power of the point relatively to a fixed coordinate circle divided by the radius of the circle. A linear equation in such coördinates expresses a circle orthogonal to the "radical circle" which is orthogonal to the three coördinate circles; a quadric equation expresses a bicircular quartic; etc.—**Tricircular geometry**, geometry treated by means of tricircular coördinates.

trick[1] (trik), *v.* [(*a*) Prob. an altered form, reverting to the orig. unassibilated form, of *trich* (mod. E. prop. spelled **tritch*), < ME. *trichen*, *tricchen* (also perhaps unassibilated **tricken*), < OF. *tricher*, *trichier*, *trechier* (also perhaps unassibilated **triquer*, **tricquer*), deceive, trick (cf. Pr. *tric*, deceit), = It. *treccare*, cheat, < L. *tricari*, ML. also *tricare*, trifle, act deceitfully, < *tricæ*, trifles, toys (see *trich*, *treacher*, *treachery*; cf. *trick*[1], *n.*, in the sense of 'trifle, toy'); (*b*) the word, as a noun, being appar. influenced by, if not in part derived from, MD. *treck*, D. *trek*, a trick (*een slimme trek*, a cunning trick, *jemand eenen trek speelen*, play one a trick, etc.), a word not having the orig. meaning of 'trick' or 'deceit,' but a particular use of MD. *treck*, D. *trek*, a pull, draft, tug, line, < MD. *trecken*, D. *trekken*, draw: see *trick*[3], and cf. *track*[1]. Cf. F. *trigaud*, crafty, artful, cunning, *trigauderie*, a sly trick. The words spelled *trick* have been confused in popular apprehension and in the dictionaries, and the senses are entangled. See *trick*[2], *trick*[3], *trick*[4].] I. *trans.* 1. To deceive by trickery; cozen; cheat.

To be wrapt soft and warm in fortune's smock
When she . . . is pleased to *trick* or tromp mankind.
B. Jonson, New Inn, i. 1.

He was *tricked* out of the money while he was writing a receipt for it, and sent away without a farthing.
Vanbrugh, Journey to London, iv. 1.

2. To bring, render, or induce by trickery; beguile; inveigle; cajole.

They were thus *tricked* of their present.
Bacon, Physical Fables, ii.

Several members of Congress had previously complained that the demonetization scheme of 1873 had been pushed surreptitiously through the courses of its passage, Congress having been *tricked* into accepting it, doing it scarcely knew what. *W. Wilson*, Cong. Gov., iii.

II. *intrans.* **1.** To use trickery, deception, or imposture.

Thus they jog on, still *tricking*, never thriving,
And murdering plays, which still they call reviving.
Dryden, To Granville.

2. To juggle; play.

We may *trick* with the word life in its dozen senses until we are weary of *tricking*, . . . but one fact remains true throughout, . . . that we do not, properly speaking, love life at all, but living. *R. L. Stevenson*, Æs Triplex.

3†. To toy; handle idly.

The muses forbid that I should restrain your meddling, whom I see already busy with the title and *tricking* over the leaves. *B. Jonson*, Catiline, To the Reader.

trick[1] (trik), *n.* [< *trick*[1], *v.*; prob. in part < MD. *treck*, D. *trek*, a trick, a pull, draft, etc.: see *trick*[1], *v.*, and cf. *track*[1].] **1.** A crafty or fraudulent device; a deceitful expedient; an artifice; a stratagem.

There is some *trick* in this, and you must know it,
And be an agent too.
Fletcher, Humorous Lieutenant, iv. 2.

But you see they haue some *trickes* to cousin God, as before to cousin the Diuell. *Purchas*, Pilgrimage, p. 213.

O, the rare *tricks* of a Machiavelian!
Webster, White Devil, v. 1.

2. A feat or an exhibition of skill or dexterity, as in juggling or sleight of hand.

He can do *tricks* with his toes, wind silk and thread pearl with them. *B. Jonson*, Pan's Anniversary.

Entertain any puppy that comes, like a tumbler, with the same *tricks* over and over.
Congreve, Old Batchelor, i. 4.

3. A roguish or mischievous performance; a prank; a practical joke; a hoax.

If I be served such another *trick*, I'll have my brains ta'en out and buttered, and give them to a dog for a new-year's gift. *Shak.*, M. W. of W., iii. 5. 7.

To play a *trick* and make some one or other look foolish was held the most pointed form of wit throughout the back regions of the manor. *George Eliot*, Felix Holt, xii.

4. A foolish, vicious, or disgraceful act: with disparaging or contemptuous force.

Didst thou ever see me do such a *trick*?
Shak., T. G. of V., iv. 4. 43.

I hope you don't mean to forsake it; that will be but a kind of a mongrel cur's *trick*.
Congreve, Old Batchelor, iv. 5.

5. A peculiar art; skill; adroitness; knack.

Here's fine revolution, an we had the *trick* to see't.
Shak., Hamlet, v. 1. 99.

In a little while the *trick* of walking on the edge of the water close to the side wall had been learned.
The Century, XXXIX. 220.

6. A peculiar trait, manner, habit, or practice; a characteristic; a peculiarity; a mannerism.

In you a wildness is a noble *trick*,
And cherish'd in ye, and all men must love it.
Fletcher and Rowley, Maid in the Mill, iii. 2.

What shall I say of the manifold and strange fashions of the garments that are used now-a-days? . . . Sometime we follow the fashion of the Frenchmen. Another time we will have a *trick* of the Spaniards.
Becon, Early Writings (ed. Parker Soc.), p. 204.

We've a *trick*, we young fellows, you may have been told,
Of talking (in public) as if we were old.
O. W. Holmes, The Boys.

7. A trace; a suggestion; a reminder.

He hath a *trick* of Cœur-de-lion's face.
Shak., K. John, i. 1. 85.

8. Something pretended or unreal; a semblance; an illusion.

Truth itself is in her head as dull
And useless as a candle in a scull,
And all her love of God a groundless claim,
A *trick* upon the canvas, painted flame.
Cowper, Conversation, l. 782.

In this poor *trick* of paint
You see the semblance, incomplete and faint,
Of the two-fronted Future.
Whittier, The Panorama.

9. Any small article; a toy; a knickknack; a trifle; a trap; a mere nothing: sometimes applied to a child. [Obsolete or provincial U. S.]

Why, 'tis a cockle or a walnut-shell,
A knack, a toy, a *trick*, a baby's cap.
Shak., T. of the S., iv. 3. 67.

The women of this countrey weare aboue an hundreth *tricks* and trifles about them. *Hakluyt's Voyages*, II. 64.

Camp *tricks* should be kept in their places, not thrown helter skelter, or left lying where last used.
Sportsman's Gazetteer, p. 640.

Vainly the mother tried to hush the child; the prisoner called out, "Gimme the little *trick*, Sis; she jes wants to get tuh me." *The Century*, XL. 219.

10. In *card-playing*, the cards collectively which are played in one round. In whist and many other card-games the number of tricks taken makes up the score on which the winning or losing of the game depends. A whist trick is complete when the cards are turned and quitted.

Here's a *trick* of discarded cards of us! we were rank'd with coats as long as old master lived.
Middleton, Massinger, and Rowley, Old Law, iii. 1.

When in doubt, win the *trick*.
Hoyle, Twenty-four Rules for Beginners, xii.

11. *Naut.*, a spell; a turn; the time allotted to a man to stand at the helm, generally two hours.

This night it was my turn to steer, or, as the sailors say, my *trick* at the helm, for two hours.
R. H. Dana, Jr., Before the Mast, p. 29.

12. A watch. *Tuft's Glossary of Thieves' Jargon* (1798). [Thieves' slang.]—**The odd trick.** See *odd*.—**To know a trick worth two of that,** to know of some better contrivance or expedient.

Nay, by God, soft; I *know a trick worth two of that*, i' faith. *Shak.*, 1 Hen. IV., ii. 1. 41.

Hear what he says of you, sir? Clive, best be off to bed, my boy—ho, ho! No, no. We *know a trick worth two of that*. *Thackeray*, Newcomes, i.

To serve one a trick. See *serve*[1].—**Tricks of the trade,** the expedients, artifices, and dodges of a craft or business; devices or stratagems intended to attract custom or to gain some advantage over one's customers or one's rivals.—**Syn. 1.** *Manœuver, Stratagem*, etc. (see *artifice*), fraud, imposition, imposture, deception, fetch.

trick[2] (trik), *v. t.* [Prob. another use of *trick*[1], *v.*, as derived from the noun in the sense 'a dexterous artifice,' or 'a touch.' Cf. also *trick*[4]. According to some, < W. *trociaw*, furnish or harness, trick out, < *trec*, an implement, harness, gear.] To dress; trim; deck; prank; specifically, to arrange, dress, or decorate, especially in a fanciful way, as the person or the hair: often followed by *out* or *up*.

For he [Cato] found not his Country . . . utterly destroyed, but tossed in a dangerous tempest; and being not of authority like the Pilot to take the sterne in hand, and governe the ship, he took himself to *tricking* the sailes, and preparing the tackle, so to assist men of greater power. *North*, tr. of Plutarch, p. 624.

The Canari put their wiues to the drudgery abroad, whiles themselues spin, weaue, *tricke vp* themselues, and performe other womanish functions at home.
Purchas, Pilgrimage, p. 885.

The women celebrated of old for their beauties yet carry that fame. . . . They have their head *trickt* with tassels and flowers. *Sandys*, Travailes, p. 12.

A country playhouse, some rude barn
Tricked out for that proud use.
Wordsworth, Prelude, vii.

trick[3] (trik), *v. t.* [< MD. *trecken*, D. *trekken*, pull, draw lines, delineate, sketch, = OFries. *trekka*, *tregga*, North Fries. *trecke*, *tracke* = LG. *trekken* = MHG. *trecken* = Dan. *trække*, draw; a causal form of OHG. *trehhan*, MHG. *trechen*, pull, push, shove. From the same source are ult. E. *track*[1], and *tricker*, now *trigger*. Cf. also *trek* and *trick*[1]. This verb seems to have been confused with *trick*[2], deck; cf. *trickment*.] In *her.*: (*a*) To draw, as a bearing or a collection of bearings, or a whole escutcheon or achievement of arms. The word implies the representation graphically of armorial bearings in any sense, and should be used instead of *blazon*, which properly means to describe in words.

They are blazoned there; there they are *tricked*, they and their pedigrees. *B. Jonson*, Poetaster, i. 1.

(*b*) Especially, to draw in black and white only, without color, or to sketch slightly, whether a bearing or a whole achievement.

This seal was exhibited to the Heralds at their Visitation of Northants, 1618, "antiquum Sigillum argenteum," and is *tricked* in their original MS.
Trans. Hist. Soc. of Lancashire and Cheshire, N. S., V. 33.

trick[4]†, *a.* and *n.* An obsolete form of *trig*[1].

In two bows that I have, . . . the one is quick of cast, *trick*, and trim both for pleasure and profit; the other is a lug, slow of cast, following the string, more sure for to last than pleasant for to use.
Ascham, Toxophilus (ed. 1864), p. 14.

But tell me, wench, hast done 't so *trick* indeed
That heaven itself may wonder at the deed?
Peele, Arraignment of Paris, i. 3.

trick-dagger (trik'dag″ėr), *n.* A dagger the blade of which slips back into the hilt.

tricker[1] (trik'ėr), *n.* [< *trick*[1] + *-er*[1]. Cf. *treacher*.] One who tricks; a cheat; a trickster.

tricker[2]†, *n.* An obsolete form of *trigger*.—**Tricker firelock,** a hand-firearm of the close of the reign of Charles I., so called because discharged by pulling a trigger or tricker. See *tricker-lock*. *Jour. Brit. Archæol. Ass.*, XI. 255.

tricker-lock (trik'ėr-lok), *n.* A gun-lock arranged with a tricker or trigger of any description. Match-tricker locks and wheel-tricker locks were in use in the seventeenth century.

trickery (trik'ėr-i), *n.* [< *trick*[1] + *-ery*[1]. Cf. *treachery* (ME. *tricherie*, < OF. *tricherie*, etc.).] The practice of tricks or deceits; artifice; imposture.

The nomination-day was a great epoch of successful *trickery*, or, to speak in a more Parliamentary manner, of war stratagem, on the part of skilful agents.
George Eliot, Felix Holt, xxx.

trickily (trik'i-li), *adv.* In a tricky manner; trickishly.

trickiness (trik'i-nes), *n.* The quality of being tricky or trickish; trickishness.

The right of the blind to ask charity lapses if it becomes a mere business and with all the *trickiness* by which a street business is sometimes characterised.
Mayhew, London Labour and London Poor, I. 396.

tricking[1] (trik'ing), *p. a.* [Ppr. of *trick*[1], *v.*] Practising or playing tricks; tricky; deceitful; artful.

Go get thee gone, and by thyself
Devise some *tricking* game.
Robin Hood and the Golden Arrow (Child's Ballads, V. 383).

We presently discovered that they were as expert thieves, and as *tricking* in their exchanges, as any people we had yet met with. *Cook*, Second Voyage, ii. 7.

Triclada (trik'lā-dä), *n. pl.* [NL., < Gr. *τρι-*, three, + *κλάδος*, a young shoot.] An order of dendrocœlous turbellarians or planarians: distinguished from *Polyclada.*

triclinate (trik'li-nāt), *a.* [< Gr. *τρι-*, three, + *κλίνειν*, bend, + *-ate*[1].] Same as *triclinic.* *Imp. Dict.*

triclinet, *n.* [ME. *triclyne*, < L. *triclinium*, a dining-room: see *triclinium.*] Same as *triclinium.*

Half as high thy chambre and *triclyne*
Thou make as it is mesure long in lyne.
Palladius, Husbondrie (E. E. T. S.), p. 15.

tricliniary (trī-klin'i-ā-ri), *a.* [< L. *triclinium*, < *triclinium*, a dining-room: see *triclinium.*] Pertaining to a triclinium, or to the ancient mode of reclining at table.

triclinic (trī-klin'ik), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *κλίνειν*, incline, bend, + *-ic.*] In *crystal.*, pertaining to the inclination of three intersecting axes to each other; specifically, appellative of a system of crystallization in which the three axes are unequal and their intersections oblique, as in the oblique rhomboidal prism. Also *triclinohedric*, *triclinate*, *anorthic*, *asymmetric*, *tetartoprismatic.* See cuts under *crystallography*, *rhombohedron.*

triclinium (trī-klin'i-um), *n.* [< L. *triclinium*, < Gr. *τρικλίνιον*, also *τρίκλινος*, a dining-room with three couches, < *τρίκλινος*, with three couches, < *τρεῖς* (*τρι-*), three, + *κλίνη*, a couch: see *clinic.*] Among the Romans, the dining-room where guests were received, furnished with three couches, which occupied three sides of the dinner-table, the fourth side being left open for the free ingress and egress of servants. On these couches, which also received the name of *triclinium*, the guests reclined at dinner or supper. Each couch usually accommodated three persons, and thus nine were as many as could take a meal together. The persons while taking their food lay very nearly flat on their breasts. See *accubation.*

triclinohedric (trī-klī-nō-hed'rik), *a.* [< Gr. *τρίκλινος*, with three couches (see *triclinium*), + *ἕδρα*, a seat, side.] Same as *triclinic.*

tricoccous (trī-kok'us), *a.* [< Gr. *τρίκοκκος*, with three grains or berries, < *τρεῖς* (*τρι-*), three, + *κόκκος*, a berry.] In *bot.*, having or consisting of three cocci or carpels.

tricolic (trī-kol'ik), *a.* [< *tricolon* + *-ic.*] In *anc. pros.* and *rhet.*, consisting of three cola.

tricolon (trī-kō'lon), *n.*; pl. *tricola* (-lä). [NL., < Gr. *τρίκωλος*, having three members, < *τρεῖς* (*τρι-*), three, + *κῶλον*, member.] In *anc. pros.* and *rhet.*, a period consisting of three cola.

tricolor, tricolour (trī'kul-ọr), *a.* and *n.* [< F. *tricolore* = Sp. *tricolor* (cf. Pg. *tricoloreo*), < L. **tricolor*, three-colored, < *tres* (*tri-*), three, + *color*, color.] **I.** *a.* Three-colored; tricolored: in zoölogy correlated with *bicolor* and *unicolor.*

The Militia . . . added to the two colours of the Parisian cockade — red and blue — white, the colour which was that of the king. This was the *tricolour* cockade adopted on July 26, 1789. *N. and Q.*, 7th ser., X. 157.

II. *n.* A flag composed of three colors in large masses equal or nearly equal, as the national flags of Italy and Mexico; especially, the flag of France adopted during the Revolution, consisting of three equal parts — blue next the mast, red at the fly, and white between, or, in heraldic language, palewise of three pieces, azure, argent, and gules. The red and blue represented the colors of the city of Paris.

We talk of . . . the lilies and *tricolor* of France.
Preble, Hist. Flag, p. 3.

tricolored, tricoloured (trī'kul-ọrd), *a.* [< *tricolor* + *-ed*[2].] Having three colors: as, a *tricolored* flag. — **Tricolored violet**, the pansy.

tricolorous (trī-kul'ọr-us), *a.* [< *tricolor* + *-ous.*] Same as *tricolor.*

Triconodon (trī-kon'ō-don), *n.* [NL.: see *triconodont.*] A genus of mammals of the Purbeck beds in England, typical of the family *Triconodontidæ*. *T. mordax* is a species founded on a mandibular ramus about 1¼ inches long.

triconodont (trī-kon'ō-dont), *a.* [< Gr. *τρι-*, three, + *κῶνος*, a cone, + *ὀδούς* (*ὀδοντ-*) = E. *tooth.*] Having three conical cusps, as molars; having such molars, as mammals of the genus *Triconodon* and related forms.

Triconodontidæ (trī-kon-ō-don'ti-dē), *n. pl.* [NL. (Marsh, 1887), < *Triconodon*(*t-*) + *-idæ.*] A family of supposed marsupials of the Jurassic period, typified by the genus *Triconodon.* They have molars with three stout erect cusps each, and a strong internal cingulum, stout canines, and semiprocumbent or erect incisors.

triconsonantal (trī-kon'sō-nan-tal), *a.* [< L. *tres* (*tri-*), three, + *consonan*(*t-*)*s*, consonant, + *-al.*] Composed of or containing three consonants.

The *triconsonantal* has been evolved out of a biconsonantal root. *Smith's Bible Dict.*, Confusion of Tongues.

triconsonantic (trī-kon-sō-nan'tik), *a.* [< L. *tres* (*tri-*), three, + *consonan*(*t-*)*s*, consonant, + *-ic.*] Same as *triconsonantal.*

The root of the Semitic verb is always triliteral, or rather *triconsonantic*. *Farrar*, Families of Speech, iii.

tricorn (trī'kôrn), *a.* and *n.* [< F. *tricorne* = Sp. Pg. *tricorne*, < L. *tricornis*, three-horned, < *tres* (*tri-*), three, + *cornu*, horn.] **I.** *a.* Having three horns or horn-like processes.

II. *n.* A hat with three points or horns; a cocked hat having the brim folded upward against the crown on three sides, producing three angles; hence, by popular misapplication, the hat worn by the French gendarmes, which has only two points: usually written as French, *tricorne.* See cut 13 under *hat.*

tricornered (trī-kôr'nėrd), *a.* [< L. *tres* (*tri-*), three, + E. *cornered.*] Three-cornered. [Rare.]

The staggering stalks of the Buckwheat grow red with ripeness, and tip their tops with clustering *tricornered* kernels. *D. G. Mitchell*, Dream Life, Autumn.

tricornigerous (trī-kôr-nij'e-rus), *a.* [< LL. *tricorniger*, bearing three horns or points, < L. *tres* (*tri-*), three, + *cornu*, horn, + *gerere*, bear.] Having three horns.

tricornute (trī-kôr'nūt), *a.* [< L. *tres* (*tri-*), three, + *cornutus*, horned: see *cornute.* Cf. *tricorn.*] In *entom.*, having three horn-like processes; tricornigerous. *Westwood.*

tricornuted (trī-kôr'nū-ted), *a.* [< *tricornute* + *-ed*[2].] Same as *tricornute.*

tricorporal (trī-kôr'pō-ral), *a.* [< L. **tricorporalis*, < *tricorpor*, having three bodies, < *tres* (*tri-*), three, + *corpus* (*corpor-*), body: see *corporal*[1].] In *her.*, same as *tricorporate.*

tricorporate (trī-kôr'pō-rāt), *a.* [< L. *tricorpor*, having three bodies, + *-ate*[1].] In *her.*, having three bodies with only one head common to the three: as, a lion *tricorporate.* The head is usually in the center of the field, and the bodies radiate, two toward the dexter and sinister chiefs, the third toward the base.

Lion Tricorporate.

tricorporated (trī-kôr'pō-rā-ted), *a.* [< *tricorporate* + *-ed*[2].] In *her.*, same as *tricorporate.*

tricostate (trī-kos'tāt), *a.* [< L. *tres* (*tri-*), three, + *costatus*, ribbed: see *costate.*] **1.** In *bot.*, having three ribs from the base; three-ribbed. — **2.** In *zoöl.*, having three costæ or raised lines.

tricot (trē-kō', trē'kō), *n.* [F., knitting, < *tricoter*, OF. *tricoter*, knit, < G. *stricken*, knit, < *strick*, a cord, string.] **1.** A fabric made of yarn or woolen thread, knitted by hand; also, a similar material made by machines in which the hand-knitting is imitated. Compare *jersey.* — **2.** A cloth used for women's garments.

tricot-stitch (trē'kō-stich), *n.* One of the stitches of crochet: a simple stitch producing a plain rectilinear pattern. Also called *railway-stitch.*

tricotyledonous (trī-kot-i-lē'don-us), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *κοτυληδών*, a hollow: see *cotyledon.*] In *bot.*, having three cotyledons or seed-leaves.

tricrotic (trī-krot'ik), *a.* [< Gr. *τρίκροτος*, with three strokes (see *tricrotous*), + *-ic.*] Having three beats: used with reference to the normal pulse-tracing. — **Tricrotic pulse**, a pulse showing three marked elevations on the descending limb of the curve traced from it.

tricrotism (trī'krō-tizm), *n.* [< *tricrot*(*ic*) + *-ism.*] The state of being tricrotic: used of the pulse. See cut under *sphygmogram.*

tricrotous (trī'krō-tus), *a.* [< Gr. *τρίκροτος*, with three strokes, < *τρεῖς* (*τρι-*), three, + *κρότος*, stroke, beat.] Same as *tricrotic.*

tricrural (trī-krö'ral), *a.* [< L. *tres* (*tri-*), three, + *crus* (*crur-*), leg: see *crural.*] Having three branches or legs from a common center.

The macrospores are marked on one hemisphere with a *tricrural* line.
Le Maout and Decaisne, Botany (trans.), p. 915.

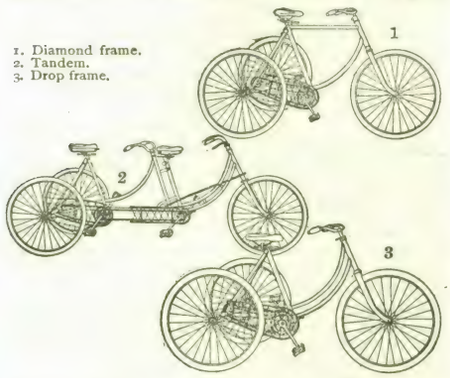
tric-trac, *n.* See *trick-track.*

tricuspid (trī-kus'pid), *a.* and *n.* [= F. *tricuspide*, < L. *tricuspis* (*tricuspid-*), having three points, < *tres* (*tri-*), three, + *cuspis*, point: see *cusp.*] **I.** *a.* Having three cusps or points: specifically noting the valvular arrangement in the right ventricle of the heart, guarding the auriculoventricular orifice, in distinction from the *bicuspid* (or mitral) valves in the left ventricle. This valve consists of three segments, or there are three valves, of a triangular or trapezoidal shape, each formed by a fold of the lining membrane of the heart, and strengthened by a layer of fibrous tissue which may also contain contractile fibers. See cut II. under *heart.* — **Tricuspid murmur**, in *pathol.*, a murmur heard in tricuspid valvular disease. — **Tricuspid teeth.** See *tooth.* — **Tricuspid valvular disease**, disease of the tricuspid valve.

II. *n.* **1.** A tricuspid valve of the heart. — **2.** A tricuspid tooth: correlated with *bicuspid* and *multicuspid.*

tricuspidal (trī-kus'pi-dal), *a.* [< *tricuspid* + *-al.*] **1.** Same as *tricuspid.* — **2.** Having three geometrical cusps.

tricuspidate (trī-kus'pi-dāt), *a.* [< *tricuspid* + *-ate*[1].] Three-pointed; ending in three points: as, a *tricuspidate* glume; *tricuspidate* teeth.



tricuspidated (trī-kus'pi-dā-ted), *a.* [< *tricuspidate* + *-ed*2.] Same as *tricuspidate*.

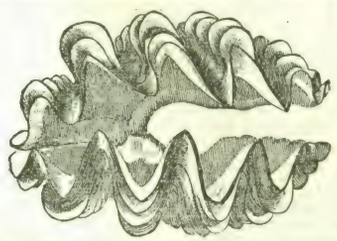
Over each door is a lofty *tricuspidated* arch.
W. Howitt, Visits to Remarkable Places, p. 402.

tricycle (trī'si-kl), *n.* [< F. *tricycle*, < Gr. τρεῖς (τρι-), three, + κύκλος, circle, wheel.] A three-wheeled vehicle. Specifically—(*a*†) A three-wheeled coach. See the quotation.

Tricycles.—Christmas Day was rendered memorable to the Parisians by the starting of this new species of carriage for public accommodation. The *tricycle* is a kind of coach, mounted on three wheels; it is drawn by two horses only. It moves very lightly, although there is an appearance of weight about it. One wheel is placed exactly as the leading wheel of the steam coach; it is capable of containing twenty persons, whom it conveys distances of at least three miles for five sous each.
Annual Register for 1828 ("Chronicle," p. 185), quoted [in N. and Q., 7th ser., X. 148.

(*b*) A modification of the velocipede or bicycle, having three wheels. The wheels are variously arranged, as two

in front and one behind, or the reverse. Tricycles are made for one or two persons; in the latter case the riders sit either side by side or one before the other. Compare *bicycle*.



tricycle (trī'si-kl), *v. i.*; pret. and pp. *tricycled*, ppr. *tricycling*. [< *tricycle*, *n.*] To ride on a tricycle. [Recent.]

I have heard the uninitiated say that *tricycling* must be so easy, just like working the velocipedes of our childhood.
J. and E. R. Pennell, Canterbury Pilgrimage on a Tricycle.

tricycler (trī'si-klėr), *n.* [< *tricycle* + *-er*1.] One who rides on a tricycle. *Harper's Mag.*, LXXVII. 491. [Recent.]

tricyclist (trī'si-klist), *n.* [< *tricycle* + *-ist*.] A tricycler. *Bury and Hillier*, Cycling, p. 200.

Tridacna (trī-dak'nä), *n.* [NL. (Da Costa, 1776), also erroneously *Tridachia*, *Tridachna*, *Tridachnes*; < Gr. τρίδακνος, eaten at three bites, < τρεῖς (τρι-), three, + δάκνειν, bite.] A genus of inequilateral equivalve bivalve mollusks, forming the type of the family *Tridacnidæ*. The margin is deeply waved and indented, the opposite sides fitting

into each other. *T. gigas*, the largest bivalve shell known, attains a length of 2 or 3 feet and a weight of 500 pounds or more. The animal may weigh 20 pounds or more. It is a native of the East Indian seas, and is edible. The great valves are used for various purposes, as for baptismal fonts, as receptacles for holy water, and, it is alleged, as babies' bath-tubs. The substance of the shell is extremely hard, and calcification progresses until almost every trace of organic structure is obliterated. Pieces of the shell weighing 7 or 8 pounds are used by the natives of the Caroline Islands for axes. The other species of the genus, as *T. squamosa* and *T. crocea*, are much smaller. Also called *Pelex*. See also cut under *Tridacnidæ*.

Tridacnacea (trī-dak-nā'sē-ä), *n. pl.* [NL., < *Tridacna* + *-acea*.] A superfamily of bivalves, represented by the *Tridacnidæ* alone.

tridacnacean (trī-dak-nā'sē-an), *a.* and *n.* [< *Tridacnacea* + *-an*.] **I.** *a.* Of or pertaining to the *Tridacnacea* or *Tridacnidæ*.

II. *n.* A giant clam; any member of the *Tridacnidæ*.

Tridacnidæ (trī-dak'ni-dē), *n. pl.* [NL., < *Tridacna* + *-idæ*.] A family of bivalves, named from the genus *Tridacna*. The mantle-lobes are extensively united, with a large pedal opening in front of the umbones of the shell; the siphonal orifices, surrounded by a thickened pallial border, are at the lower margin of the shell; the gills are double, narrow, the outer pair composed of a single lamina, the inner thick, with conspicu-

ously grooved margins; the palpi are slender and pointed; the foot is finger-like with a byssal groove; the valves are regular and truncate in front, with an external ligament and blended subcentral muscular impression formed by the large adductor with the smaller pedal retractor muscle close behind it. It is a remarkable group, including the genera *Tridacna* and *Hippopus* (*Tridacna gigas* being the largest member of the *Mollusca*), and is the basis of the suborder *Metarrhiptæ* (which see). See also cuts under *Hippopus* and *Tridacna*.

tridacnoid (trī-dak'noid), *a.* and *n.* Same as *tridacnacean*.

tridactyl, tridactyle (trī-dak'til), *a.* [< F. *tridactyle*, < Gr. τριδάκτυλος, three-fingered, three fingers long, < τρεῖς (τρι-), three, + δάκτυλος, finger, toe.] 1. Having three digits, whether fingers or toes; tridigitate.—2. Having three digital parts or processes.

Also *tridactylous*.

Tridactyla (trī-dak'ti-lä), *n.* [NL., < Gr. τριδάκτυλος, three-fingered (three-toed): see *tridactyl*.] In *ornith.*, same as *Picoides*1.

tridactylous (trī-dak'ti-lus), *a.* [< *tridactyl* + *-ous*.] Same as *tridactyl*.

tridaily (trī-dā'li), *a.* [< L. *tres* (*tri-*), three, + E. *daily*.] Made, done, or occurring thrice a day. *Science*, IX. 79. [Rare.]

triddler (trid'lėr), *n.* [Origin obscure.] The pectoral sandpiper, *Tringa maculata*: a gunners' name. *G. Trumbull*, 1808. [New Jersey.]

tride (trīd), *a.* [< F. *tride*, lively, cadenced; origin obscure.] In *hunting*, short and swift; fleet: as, a *tride* pace.

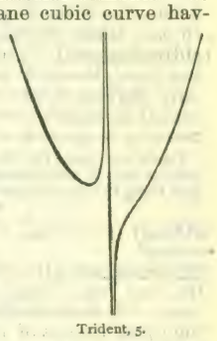
Tride, a word signifying short and swift. A *tride*-pace is a going of short and swift motions. A horse is said to work *tride* upon volts when the times he makes with his haunches are short and ready. Some apply the word only to the motion of the haunches.
Osbaldiston, Sportsman's Dict., p. 635.

tridens (trī'denz), *n.* [L.: see *trident*.] A three-toothed or three-bladed implement or weapon.

In the latter example [a halberd] the axe-blade being balanced by a *tridens*. *J. Hewitt*, Anc. Armour, II. 269.

trident (trī'dent), *n.* [= F. *trident* = Sp. Pg. It. *tridente*, < L. *triden(t-)s*, three-toothed, three-pronged; as a noun, a three-pronged spear, a trident as an attribute of Neptune; < *tres* (*tri-*), three, + *den(t-)s* = E. *tooth*: see *tooth*.] 1. Any instrument of the form of a fork with three prongs; specifically, a three-pronged fish-spear.—2. A spear with three prongs, usually barb-pointed, forming a characteristic attribute of Poseidon (Neptune), the sea-god. See also cut under *Poseidon*.

His nature is too noble for the world:
He would not flatter Neptune for his *trident*,
Or Jove for 's power to thunder.
Shak., Cor., iii. 1. 256.



Trident.—Archaistic relief of Neptune, in the Vatican.

3. Hence, marine sovereignty; rule over the ocean or sea.

To Worlds remote she wide extends her Reign,
And wields the *Trident* of the stormy Main.
Congreve, Birth of the Muse.

Tridentine (trī-den'tin), *a.* and *n.* [< NL. *Tridentinus*, < ML. *Tridentum*, Trent (see def.).] **I.** *a.* 1. Pertaining to Trent, a city of Tyrol, or to the Council of Trent (1545–63): as, *Tridentine* decrees (that is, the decrees of the Council of Trent, the authoritative symbol of the Roman Catholic Church); *Tridentine* theology (that is, theology in accordance with those decrees, Roman Catholic theology).

The King [Henry VIII.] remained a believer in Roman Catholic forms of doctrine; but . . . those forms had not yet, by the *Tridentine* decrees, been hardened into their later inflexibility.
Stubbs, Medieval and Modern Hist., p. 261.

2. Conforming to the Council of Trent, or its decrees and doctrine.

Her [Elizabeth's] explanation of her supreme governorship might have satisfied every one but the most *Tridentine* papist, but she re-enacted the most stringent part of her father's act of supremacy.
Stubbs, Medieval and Modern Hist., p. 324.

Tridentine catechism. See *catechism*, 2.

II. *n.* A Roman Catholic: a name implying that the present system of Roman Catholic doctrine and practice dates from the Council of Trent (1545). The creeds of the Roman Catholic Church are four in number—the Apostles', the Nicene, the Athanasian, and the Creed of Pope Pius IV. The last named is also called the *Profession of the Tridentine Faith*. It was formulated in 1564, and includes the Nicene Creed, a summary of the doctrines defined by the Council of Trent, a recognition of the Roman Church as mother and teacher of all churches, and an oath of obedience to the Pope as successor of St. Peter and vicar of Christ. With the addition of the doctrines of the immaculate conception (promulgated in 1854) and the papal infallibility (defined in 1870), this creed is that which must be accepted by converts to the Roman Church, except those from the Greek Church (for whom special forms are provided), and is incumbent on all Roman Catholic priests and teachers.

They called the council of Chalcedon a "council of fools," and styled the Catholics Chalcedonians, just as Anglicans have styled Catholics of the present day *Tridentines*.
Dublin Rev. (*Imp. Dict.*)

Tridentipes (trī-den'ti-pēz), *n.* [NL. trifacial (trī-fā'shal), *a.* and *n.* [< L. *tres* (*tri-*), three, + *facies*, face.] I. *a.* 1. Of or pertaining to the face in a threefold manner: specifically applied to the fifth cranial nerve, or trigeminus, which divides into three main branches to supply the face and some other parts, and has the threefold function of a nerve of motion, of common sensation, and of special sense (gustatory). Also called *trigeminal*, upon other considerations. The term *trifacial* is contrasted with *facial*, applied to the seventh cranial nerve, the main motor nerve of the muscles of the face. See *facial*.

2. Of or pertaining to the trifacial nerve.—**Trifacial neuralgia**, neuralgia of some portion of the face in the distribution of the trifacial nerve.

II. *n.* The trigeminal nerve. In man this is the largest cranial nerve, and resembles a spinal nerve in some respects, arising by two roots, a small anterior simple motor root and a large posterior ganglionated sensory root. The superficial or apparent origin from the brain is from the side of the pons Varolii, where the two roots come off together. It passes to a depression upon the end of the petrosal bone, where the sensory fibers form the large semilunar ganglion known as the *Gasserian*; the motor fibers accompany but do not enter into the formation of this ganglion. Beyond the ganglion the nerve immediately divides into three main branches, the ophthalmic, supramaxillary, and inframaxillary, which leave the cranial cavity separately, respectively by the foramen lacerum anterius, foramen rotundum, and foramen ovale of the sphenoid bone. The motor fibers supply the muscles of mastication. The character of the nerve varies much in the vertebrate series. See cuts under *brain*, *Cyclodus*, *Esox*, and *Petromyzontidæ*.

E. Eggleston, The Graysons, xii.

triflingly (trī′fling-li), *adv.* In a trifling manner; with levity; without seriousness or dignity.

triflingness (trī′fling-nes), *n.* The state or character of being trifling.

The *triflingness* and petulancy of this scruple I have represented upon its own proper principles.
Bp. Parker, Rehears. Transp., p. 39. (*Richardson.*)

trifloral (trī-flō′ral), *a.* [< L. *tres* (*tri-*), three, + *flos* (*flor-*), flower, + *-al*.] In *bot.*, same as *triflorous*.

triflorous (trī-flō′rus), *a.* [< L. *tres* (*tri-*), three, + *flos* (*flor-*), flower, + *-ous*.] Three-flowered; bearing three flowers: as, a *triflorous* peduncle.

trifluctuation† (trī-fluk-tū-ā′shon), *n.* [< L. *tres* (*tri-*), three, + *fluctuatio*(*n-*), fluctuation.] A concurrence of three waves.

The Greeks, to express the greatest wave, do use the number of three, that is, the word τρικυμία, which is a concurrence of three waves in one, whence arose the proverb τρικυμία κακῶν, or a *trifluctuation* of evils, which Erasmus doth render malorum fluctus decumanus.
Sir T. Browne, Vulg. Err., vii. 17.

trifold (trī′fōld), *a.* [< L. *tres* (*tri-*), three, + *-fold*.] Threefold; triple; triune.

trifolia (trī-fō′li-ą), *n.* [< L. *tres* (*tri-*), three, + *folium*, leaf.] A curve of the eighth order whose equation is $Cr^3 = (\sin \frac{3}{2}\theta)^2$.

trifoliate (trī-fō′li-āt), *a.* [< L. *tres* (*tri-*), three, + *foliatus*, leaved, < *folium*, a leaf. Cf. *trefoil*.] Having three leaves; trefoil; specifically, in *bot.*, having three leaves or leaflets: used chiefly, in the latter sense, of compound leaves, as a shortened form of *trifoliolate*. See cut *d* under *leaf*.

trifoliated (trī-fō′li-ā-ted), *a.* [< *trifoliate* + *-ed*[2].] Same as *trifoliate*.

Silver beaker, the base *trifoliated*.
South Kensington Cat. Spec. Ex., No. 4803.

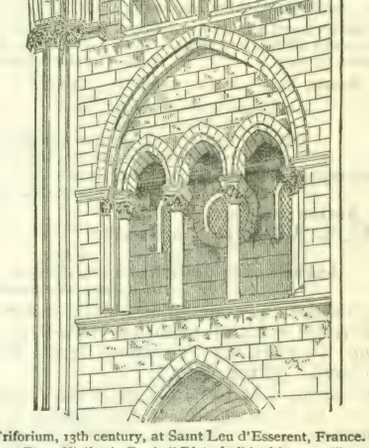
Trifolieæ (trī-fō-lī′ē-ē), *n. pl.* [NL. (Bronn, 1822), < *Trifolium* + *-eæ*.] A tribe of leguminous plants, of the family *Fabaceæ*. It is characterized by usually trifoliate leaves minutely toothed by the projection of their straight excurrent veins, by flowers usually borne in a head or raceme on an axillary peduncle, and by an ovary with two or more ovules, forming in fruit an unjointed two-valved or small and indehiscent pod. The 6 genera are chiefly herbs of north temperate regions, *Trifolium* (the type) including the clovers. See also *Melilotus*, *Medicago*, *Trigonella*, *Ononis*, and *Parochetus*.

trifoliolate (trī-fō′li-ō-lāt), *a.* [< L. *tres* (*tri-*), three, + NL. *foliolatus*, foliolate.] In *bot.*, having three leaflets: more commonly *trifoliate*.

Trifolium (trī-fō′li-um), *n.* [NL. (Rivinus, 1691; earlier in Brunfels, 1530), < L. *trifolium*, trefoil, < *tres* (*tri-*), three, + *folium*, leaf: see *foil*[1]. Cf. *trifoly*, *trefoil*, *trefle*.] A genus of leguminous plants, type of the tribe *Trifolieæ*, and including most of the plants commonly known as clover. It is characterized by usually withering-persistent petals, all, or the lower ones, adnate at the base, or higher, to the stamen-tube, and by a usually indehiscent membranous legume included within the persistent keel-petals or calyx. About 250 species are recognized by recent authors. They are abundant in north temperate and subtropical regions; a few occur on mountains within the tropics in America, or beyond in Africa and South America. They are herbs, usually with digitate leaves of three leaflets, or rarely more; in 3 perennial species of the Sierra Nevada, with five to seven leaflets; in 13 or more species, the section *Chronosemium*, the arrangement of the three leaflets is pinnate. Their stipules are conspicuous, adnate to the petioles, and often large and veiny, especially in *T. pratense* and in the Californian native fodder-plant *T. fucatum*. The flowers are red, purplish, white, or yellow; sometimes the same flower combines two colors, as white and rose-color in *T. hybridum*. They commonly change to brown in fading; in brown clover, *T. spadiceum*, they are brown from the first. They form a head or dense spike or raceme—rarely umbellate, as in *T. Lupinaster*, or solitary, as in *T. uniflorum*. A group peculiar to western parts of North and South America, with 11 species in California, is remarkable for its involucrate heads. Many species are among the most valuable of fodder-plants, especially *T. pratense*, red clover, and *T. repens*, white clover. Among more locally cultivated species, *T. agrarium*, yellow clover, is valued for sandy soils; *T. hybridum*, the alsike, for wet places; *T. reflexum*, the buffalo-clover of the central United States, for alluvial land; and *T. incarnatum*, the carnation, crimson, or Italian clover, for gypsum regions. *T. Alexandrinum* is the bersin clover, much grown in Egypt, producing three crops a season, and furnishing the principal fodder. *T. subrotundum* is the mayad clover, cultivated in northern and central parts of Africa. For the species in general, see *clover*, *trefoil*, and *shamrock*; for others, see *stone-clover*, *strawberry-clover*, *hop-trefoil*, *lupinaster*, *mountain-licorice*, *purple-grass*, *cow-grass*, and *running buffalo-clover* (under *running*).

trifoly (trī′fō-li), *n.* [< L. *trifolium*, three-leaved grass: see *trefoil*.] Trefoil. [Obsolete or archaic.]

She was crowned with a chaplet of *trifoly*.
B. Jonson, King James's Coronation Entertainment.



Braid moonfern now with mystic *trifoly*.
Browning, Sordello, iii.

Sea-trifoly†, the sea-milkwort, *Glaux maritima*.—**Sour trifoly**†, the wood-sorrel, *Oxalis Acetosella*. *Britten and Holland*.

Triforidæ (trī-for′i-dē), *n. pl.* [NL., < *Triforis* + *-idæ*.] A family of tænioglossate gastropods, typified by the genus *Triforis*, and characterized by the radular teeth, the central and lateral being very short, wide, and multicuspid, and the marginal small. The shell is like that of the *Cerithiidæ*, but is almost always sinistral, and has peculiarities of the aperture. The numerous species are of small size.

Triforis (trī′fō-ris), *n.* [NL. (Deshayes, 1824), < *tres* (*tri-*), three, + *foris*, a door, opening.] A genus of gastropods, typical of the family *Triforidæ*, with the siphonal canal closed except at the end, and with a small subsutural tubular opening—these, together with the mouth, forming three apertures.

triforium (trī-fō′ri-um), *n.*; pl. *triforia* (-ą). [< ML. *triforium*, < L. *tres* (*tri-*), three, + *foris*, a door, opening: see *door*.] In *medieval arch.*, a gallery above the arches of the nave and choir,

Triforium, 13th century, at Saint Leu d'Esserent, France.
(From Viollet-le-Duc's "Dict. de l'Architecture.")

and often of the transepts, of a church, generally in the form of an arcade. Galleries of the same kind existed in several of the ancient basilicas. The name is often inappropriate, as the triple opening which it implies is far from being a general characteristic of the triforium. In many churches built after the middle of the thirteenth century the triforium appears merely as a narrow passage for communication, with broad windows behind it, and is so treated that it forms practically a continuation of the clearstory above; but in large churches built earlier than that date, as the Cathedral of Paris, it is very frequently spacious, and affords additional room for the assembled people. See also cuts under *bay*, *blind-story*, and *clearstory*.

triform (trī′fôrm), *a.* [= F. *triforme* = Sp. Pg. It. *triforme*, < L. *triformis*, having three forms,

< *tres* (*tri-*), three, + *forma*, form.] Same as *triformed*.

The . . . moon
With borrow'd light her countenance *triform*
Hence fills and empties. *Milton*, P. L., iii. 730.

Goddess *Triform*, I own thy triple spell.
Lowell, Endymion, vii.

triformed (trī'fôrmd), *a.* [< *triform* + *-ed*[2].] 1. Formed of three parts, or in three divisions or lobes: as, a *triformed* wreath of laurel to indicate England, Scotland, and Ireland.—2. Having three shapes, or having three bodies, as the "triple Hecate."

triformity (trī-fôr'mi-ti), *n.* [< *triform* + *-ity*.] The state of being triform. *Bailey*, 1727.

triformous (trī-fôr'mus), *a.* [< *triform* + *-ous*.] Same as *triformed*. *Wilkinson*, Manners of the Egyptians (ed. Birch), II. 514. (*Encyc. Dict.*) [Rare.]

triforoid (trī'fō-roid), *a.* and *n.* [< NL. *Triforis*, q. v., + *-oid*.] **I.** *a.* Of or related to the *Triforidæ*.

II. *n.* One of the *Triforidæ*.

trifoveolate (trī-fō'vē-ō-lāt), *a.* [< L. *tres* (*tri-*), three, + NL. *foveola* + *-ate*[1].] In *entom.*, having three round shallow pits or foveæ.

trifurcate (trī-fėr'kāt), *a.* [< L. *trifurcus*, having three forks, < *tres* (*tri-*), three, + *furca*, a fork: see *furcate*.] 1. Forking or forked into three parts; three-pronged; trichotomous.—2. In *bot.*, three-forked; divided into three branches or forks.

trifurcate (trī-fėr'kāt), *v. i.*; pret. and pp. *trifurcated*, ppr. *trifurcating*. [< *trifurcate*, *a.*] To divide into three parts.

The arms of a triæne may bifurcate (dichotriæne) once, twice, or oftener, or they may *trifurcate*.
Encyc. Brit., XXII. 417.

trifurcated (trī-fėr'kā-ted), *a.* [< *trifurcate* + *-ed*[2].] Same as *trifurcate:* specific in the phrase *trifurcated hake*, a gadoid fish otherwise known as *tadpole-hake*. See *Raniceps*.

trifurcation (trī-fėr-kā'shọn), *n.* [< *trifurcate* + *-ion*.] The state of being trifurcate; a trifurcate shape, formation, or arrangement. *Quart. Jour. Geol. Soc.*, XLV. 657.

trig[1] (trig), *a.* and *n.* [< ME. *trig*, *tryg*, < Icel. *tryggr* = Sw. *trygg*, trusty, faithful, true, = Dan. *tryg*, secure, safe, = Goth. *triggws*, true, faithful: see *true*, of which *trig* is a doublet. Cf. *trick*[4], *a.*] **I.** *a.* 1. True; trusty; trustworthy; faithful. *Halliwell.*

Thin laferrd birrth the buhsumm beon
& hold & *trigg* & trowwe. *Ormulum*, l. 6177.

2. Safe; secure.

In lesuris and on leyis litill lammes
Full tait and *trig* socht bletand to thare dammes.
Gavin Douglas, tr. of Virgil, p. 402.

3. Tight; firm; sound; in good condition or health.

Some o' them will be sent back to fling the earth into the hole, and make a' thing *trig* again. *Scott*, Antiquary, xxiv.

I never heard a more devilish pother. I wish I was in mid-ocean all *trig* and tight. Then I would enjoy such a passion of wind. *A. E. Barr*, Friend Olivia, xvii.

4. Neat; tidy; trim; spruce; smart.

Auld Reekie aye he keepit tight,
An' *trig* an' braw;
But now they'll busk her like a fright—
Willie 's awa'! *Burns*, To W. Creech.

The stylish gait and air of the *trig* little body.
The Century, XXVIII. 541.

5. Active; clever. *Halliwell.*

II. *n.* A dandy; a coxcomb.

You are . . . a *trig*,
And an Amadis de Gaul, or a Don Quixote.
B. Jonson, Alchemist, iv. 4.

[Obsolete, provincial, or colloq. in all uses.]

trig[1] (trig), *v. t.*; pret. and pp. *trigged*, ppr. *trigging*. [< *trig*[1], *a.*] To dress; trick: with *up*. *Halliwell.* [Prov. Eng.]

trig[2] (trig), *v. t.*; pret. and pp. *trigged*, ppr. *trigging*. [< Dan. *trykke* = Sw. *trycka* = OHG. *drucchen*, MHG. *drücken*, *drucken*, G. *drücken*, *drucken* = AS. *thryccan*, press.] To fill; stuff; cram. *Grose; Brockett.* [Obsolete or prov. Eng.]

By how much the more a man's skin is full *trig'd* with flesh, blood, and natural spirits.
Dr. H. More, Mystery of Godliness, p. 105. (*Latham.*)

trig[2] (trig), *a.* [See *trig*[2], *v.*] Full. *Brockett.* [Prov. Eng.]

trig[3] (trig), *v. t.*; pret. and pp. *trigged*, ppr. *trigging*. [Perhaps a particular use of *trig*[2], cram. Some compare W. *trigo*, stay, tarry, Pr. *trigar*, stop, ML. *trigare*, *tricare*, delay.] 1. To stop; obstruct; specifically, to skid; stop (a wheel) by putting a stone, log, or other obstacle in the way.

Never *trig'd* his way.
John Taylor, Works (1630). (*Nares.*)

If any Demiurgic Teamster is disposed to drive the Cart of Peace and Good Will over the Earth, I stand ready to *trig* the wheels in all the steep places. *S. Judd*, Margaret, iii.

2. To prop; hold up. *Halliwell.* [Prov. Eng.]—3. To set a mark on, as a standing-place for the player in the game of ninepins.

Trigged, having a Mark set to stand in playing at Nine Pins. *Bailey*, 1727.

trig[3] (trig), *n.* [< *trig*[3], *v.*] 1. An obstacle; a prop; a skid; a brake-shoe for a wheel to ride upon in descending steep hills; a small wedge or block used to prevent a cask from rolling.

Nor is his suite in danger to be stopt,
Or with the *trigges* of long demurrers propt.
Sir R. Stapylton, tr. of Juvenal, xvi. 62. (*Davies.*)

2. The mark at which the player stands in the game of ninepins or bowls. *Halliwell.* See *trig*[3], *v.*, 3.

trig[4] (trig), *v. i.*; pret. and pp. *trigged*, ppr. *trigging*. [Cf. *tridge*, *trudge*.] To trudge; trundle along.

There's many of my own Sex
With that Holborn Equipage *trig* to
Gray's-Inn-Walks;
And now and then Travel hither on a Sunday.
Etherege, The Man of Mode, iii. 3.

As they rode on the road,
And as fast as they could *trig*,
Strike up your hearts, says Johnston,
We'll have a merry jig.
The Three Merry Butchers. (*Nares.*)

trigamist (trig'a-mist), *n.* [< *trigam-y* + *-ist*.] One who has been thrice married; especially, one who has three wives or three husbands at the same time. Sometimes used attributively.

Trigamist (trigamus), he that hath had three wives.
Blount, Glossographia, 1670.

trigamous (trig'a-mus), *a.* [= F. *trigame* = Sp. *trígamo* = Pg. *trigamo*, < LL. *trigamus*, < Gr. *τρίγαμος*, thrice married, < *τρεῖς* (*τρι-*), three, + *γάμος*, marriage.] 1. Of or pertaining to trigamy.—2. In *bot.*, having three sorts of flowers in the same head—male, female, and hermaphrodite.

trigamy (trig'a-mi), *n.* [< F. *trigamie* = Sp. Pg. *trigamia*, < LL. *trigamia*, < Gr. *τριγαμία*, < *τρίγαμος*, thrice married: see *trigamous*.] Triple marriage; the state of one who has been thrice married; especially, the state or offense of having three wives or husbands at the same time.

Some few of their Priests are learned. For them it is lawfull to marry; but bigamy is forbidden them, and *trigamy* detested in the Laiety. *Sandys*, Travailes, p. 64.

It is what he calls *trigamy*, Madam, or the marrying of three wives, so that good old men may be solaced at once by the companionship of the wisdom of maturity, and of those less perfected but hardly less engaging qualities which are found at an earlier period of life.
O. W. Holmes, Professor, i.

trigastric (trī-gas'trik), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *γαστήρ* (*γαστρ-*), belly.] In *anat.*, having three fleshy bellies, as a muscle.

trigeminal (trī-jem'i-nal), *a.* and *n.* [< L. *trigeminus*, three at a birth (see *trigeminous*), + *-al*.] **I.** *a.* 1. In *anat.* and *zoöl.*, triple, triune, or threefold: specifically noting the trifacial or fifth cranial nerve (which see, under *trifacial*). Also *trigeminous*.—2. Of or pertaining to the trigeminal nerve: as, a *trigeminal* foramen.

A preliminary stage of *trigeminal* neuralgia.
Buck's Handbook of Med. Sciences, III. 16.

II. *n.* The trigeminal nerve; the trigeminus. See *trifacial*.

trigemini, *n.* Plural of *trigeminus*.

trigeminous (trī-jem'i-nus), *a.* [< L. *trigeminus*, three at a birth, triple, < *tres* (*tri-*), three, + *geminus*, a twin: see *geminous*.] 1. Being one of three born together; born three at a time.—2. In *anat.* and *zoöl.*, same as *trigeminal*.

trigeminus (trī-jem'i-nus), *n.*; pl. *trigemini* (-nī). [NL., < L. *trigeminus*, three at a birth: see *trigeminous*.] In *zoöl.* and *anat.*, the trifacial nerve. See *trifacial*.

trigent, *n.* Same as *trigon*[2]. *Kersey*, 1708; *Bailey*, 1731.

trigesimo-secundo (trī-jes'i-mō-sē-kun'dō), *a.* [L.: see *thirtytwo-mo*.] Same as *thirtytwo-mo*.

trigger (trig'ėr), *n.* [Formerly *tricker*; < MD. *trecker*, D. *trekker* (= Dan. *trækker*, a trigger), lit. a drawer, puller, < MD. *trecken*, D. *trekken*, pull: see *trick*[3]. The G. is *drücker*, a trigger, < *drücken*, press: see *trig*[2].] 1. Any device by means of which a catch or spring is released and a trap sprung or other mechanism set in action; specifically, in firearms, a small projecting tongue of steel which, when pressed, liberates the hammer of the lock; by extension, in crossbows and similar arms, the lever which, when pressed, liberates the string of the bow. See *hair-trigger*, and cuts under *gun*, *revolver*, and *rifle*.

As a goose
In death contracts his talons close,
So did the knight, and with one claw
The *tricker* of his pistol draw.
S. Butler, Hudibras, I. iii. 528.

2. A catch to hold the wheel of a carriage on a declivity.—3. In *ship-building*, a wooden piece employed to hold up a dogshore. It is removed just before launching, when the dogshore is knocked away.—**Hair trigger.** See *hair-trigger*.—**Set trigger**, a form of trigger which can be set as a hair-trigger by being pushed into a certain position; also, a second trigger which, when pressed, converts another into a hair-trigger, and so serves to set the latter. Each of these devices is or has been a common attachment of sporting-rifles.—**Trigger area**, or **trigger point**, in *med.*, a sensitive region of the body, irritation of which may give rise to certain phenomena, either physiological or pathological, in some other part.

triggered (trig'ėrd), *a.* [< *trigger* + *-ed*[2].] Having a trigger: generally used in composition: as, a double-*triggered* gun.

trigger-finger (trig'ėr-fing^{n}gėr), *n.* An affection of the finger in which a movement of flexion or extension is arrested for a moment in one of the joints and then resumed with a jerk, sometimes accompanied with an audible snap.

trigger-fish (trig'ėr-fish), *n.* A fish of the genus *Balistes*.—**Pig-faced trigger-fish**, the file-fish, *Balistes carolinensis*. See cut under *Balistes*.

trigger-guard (trig'ėr-gärd), *n.* Same as *guard*, 5 (*b*).

trigger-hair (trig'ėr-hâr), *n.* A minute tactile filament or palpicil set at the mouth of the cnida or thread-cell in some cœlenterates, serving to cause the cell to discharge the cnidocil or stinging-hair; a kind of hair-trigger attached to a nematocyst.

trigger-line (trig'ėr-līn), *n.* In *ordnance*, the cord by which a gun-lock is operated.

trigger-plant (trig'ėr-plant), *n.* A plant of the genus *Candollea*. See *Stylidium*.

trigintal (trī-jin'tal), *n.* [< ML. *trigintale*, < L. *triginta*, thirty: see *thirty*. Cf. *trental*.] Same as *trental*. [Rare.]

Trentals or *trigintals* were a number of masses to the tale of thirty, instituted by Saint Gregory.
Ayliffe, Parergon.

Trigla (trig'lä), *n.* [NL. (Linnæus, 1758), < Gr. *τρίγλα*, *τρίγλη*, a mullet.] The typical genus of *Triglidæ;* the gurnards. See *gurnard*.

Gurnard (*Trigla gurnardus*).

triglandular (trī-glan'dū-lär), *a.* [< L. *tres* (*tri-*), three, + **glandula*, dim. of *glans* (*gland-*), acorn (see *glandule*), + *-ar*[2].] In *bot.*, having three nuts or nutlets in one involucre.

triglans (trī'glanz), *a.* [< L. *tres* (*tri-*), three, + *glans*, acorn, nut: see *gland*.] In *bot.*, containing three nuts within an involucre, as the Spanish chestnut. *Lindley.*

Triglidæ (trig'li-dē), *n. pl.* [NL., < *Trigla* + *-idæ*.] A family of acanthopterygian fishes, whose typical genus is *Trigla:* used with widely varying limits. It has included all the mail-cheeked fishes, being gradually restricted, and is now by some authors limited to the gurnards and closely related forms, having a parallelepiped head, entirely mailed cheeks, and three free pectoral rays. See *Trigloidea*, and cut under *Trigla*.

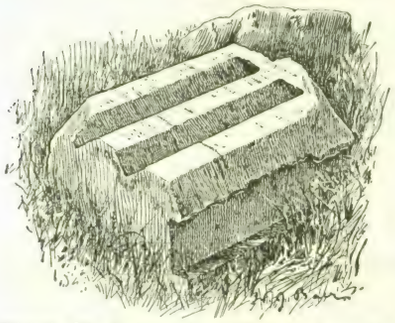
Triglochin (trī-glō'kin), *n.* [NL. (Rivinus, 1691), so called in allusion to the three angles of the capsule; < Gr. *τρεῖς* (*τρι-*), three, + *γλωχίν*, *γλωχίς*, any projecting point.] A genus of monocotyledonous plants, also known as *Juncago* (Tournefort, 1700). It belongs to a family of 3 or 4 small genera of bog-plants, the *Scheuchzeriaceæ*, by many long made a subfamily of the family *Alismaceæ*. The genus is characterized by bisexual bractless flowers with three to six carpels, each with one ovule. It includes about nine species, natives of salt-marshes and fresh-water bogs of the colder parts of both hemispheres. They are erect scape-bearing plants, usually from a tuberous rootstock, their roots sometimes also tuber-bearing. They produce elongated flat or somewhat cylindrical leaves, sometimes floating, and rather small greenish flowers in an erect spike or raceme. They are known as *arrow-grass;* three species occur in the northeastern United States.

trigloid (trig'loid), *a.* and *n.* [< *Trigla* + *-oid.*] **I.** *a.* Resembling or related to the gurnards; belonging to the *Triglidæ* in a broad sense; of or pertaining to the *Trigloidea*. *Proc. U. S. Nat. Museum*, XI. 588.

II. *n.* A gurnard or related fish; any member of the *Trigloidea*.

Trigloidea (trig-loi'dē-ạ), *n. pl.* [NL., < *Trigla* + Gr. εἶδος, form.] A superfamily of acanthopterygian fishes, represented by the *Triglidæ* and related families. The post-temporal forms an integral part of the cranium; the posterotemporal is contiguous to the proscapula; and the third suborbital is greatly enlarged and covers the cheek, articulating behind with the anterior wall of the preoperculum.

triglot (trī'glot), *a.* [< Gr. τρεῖς (τρι-), three, + γλῶσσα, γλῶττα, tongue.] Containing, composed in, or relating to three languages: as, a *triglot* dictionary.



trigly (trig'li), *adv.* [< *trig*[1] + *-ly*[2].] In a trig manner; neatly; trimly; finely. [Provincial or colloq.]

> So he that hathe a consciens cleere
> May stand to hys takkell *tryklye*.
> *Elderton*, Lenten Stuffe (1570). (*Halliwell.*)

> O busk yir locks *trigly*, an' kilt up yir coaties.
> *Tarras*, Poems, p. 124. (*Jamieson.*)

triglyceride (trī-glis'e-rid or -rīd), *n.* [< Gr. τρεῖς (τρι-), three, + E. *glycer-in* + *-ide*[1].] In *chem.*, a substitution product formed by the replacement of three hydrogen atoms in glycerol by acid radicals. The triglycerides formed by stearic, palmitic, oleic, and butyric acids make up the larger part of most animal and vegetable fats.

triglyph (trī'glif), *n.* [= F. *triglyphe*, < L. *triglyphus*, < Gr. τρίγλυφος, a three-grooved block in the Doric frieze, prop. adj., three-grooved, < τρεῖς (τρι-), three, + γλύφειν, carve, groove, γλυφή, a cutting, a channel: see *glyph.*] In *arch.*, a structural member in the frieze of the Doric order, repeated at equal intervals, usually over every column and over the middle of every intercolumniation. The typical Greek triglyph is a mas-

A Triglyph of the Parthenon, showing the groove in one side of the block into which the metope was slid.

sive block incised with two entire vertical grooves cut to a right angle, called *glyphs*, framed between three fillets, and with a semi-groove at each side. The block is grooved on both sides to receive the adjoining metopes, which are thin slabs slid into their places from above. The triglyphs represent the ends of the ceiling-beams of the primitive wooden construction. In Greek use the exterior triglyphs of a range are always slightly displaced, so as to occupy the angles of the frieze instead of coming, like the others, over the centers of the columns; in Roman and affiliated architectures this refinement does not occur; and in Roman and even some of the later Greek examples the triglyphs are merely carved in relief in the face of the frieze-blocks, instead of being, as properly, independent blocks. See also cuts under *entablature* and *monotriglyph*.

> All round between the *triglyphs* in the frieze there are most exquisite alt-reliefs of combats with centaurs, lions, and many on horses.
> *Pococke*, Description of the East, II. ii. 163.

triglyphal (trī'glif-al), *a.* [< *triglyph* + *-al.*] Same as *triglyphic*. *Amer. Jour. Archæol.*, VI. 54.

triglyphic (trī-glif'ik), *a.* [< *triglyph* + *-ic.*] 1. Consisting of or pertaining to triglyphs.—2. Containing three sets of characters or sculptures.

triglyphical (trī-glif'i-kal), *a.* [< *triglyphic* + *-al.*] Same as *triglyphic*.

trigness (trig'nes), *n.* The state of being trig or trim; neatness. [Provincial or colloq.]

> The lassies who had been at Nanse Bank's school were always well spoken of . . . for the *trigness* of their houses, when they were afterwards married.
> *Galt*, Annals of the Parish, p. 29.

★**trigon**[1] (trī'gon), *n.* [< F. *trigone* = Sp. *trígono*, also *trigón* = Pg. It. *trigono*, < L. *trigonum*, also *trigonium*, < Gr. τρίγωνον, a triangle, a musical instrument so called, neut. of τρίγωνος, three-cornered, triangled, < τρεῖς (τρι-), three, + γωνία, angle.] 1. A triangle.

> As when the cranes direct their flight on high,
> To cut their way, they in a *trigon* flie;
> Which pointed figure may with ease diuide
> Opposing blasts, through which they swiftly glide.
> *Sir J. Beaumont*, Bosworth Field.

2. In *astrol.*: (*a*) The junction of three signs, the zodiac being divided into four trigons: the *watery trigon*, which includes Cancer, Scorpio, and Pisces; the *earthy trigon*, Taurus, Virgo, and Capricornus; the *airy trigon*, Gemini, Libra, and Aquarius; and the *fiery trigon*, Aries, Leo, and Sagittarius.

> Look [in the almanac] whether the *fiery Trigon*, his man, be not lisping to his master's old tables, his note-book, his counsel-keeper. *Shak.*, 2 Hen. IV., ii. 4. 288.

(*b*) Trine: an aspect of two planets distant 120 degrees from each other.—3. In *antiq.*: (*a*) A kind of triangular lyre or harp. Also called *trigonon*. (*b*) A game at ball played by three persons standing so as to be at the angles of a triangle.—4. An instrument of a triangular form, used in dialing. *Kersey*, 1708.—5. In *conch.*, a shell of the genus *Trigonia*.

trigon[2]† (trig'on), *n.* [Also *trigen;* appar. for **triggin*, a dial. form of **trigging*, < *trig*[3] + *-ing*[1].] A trig; a skid.

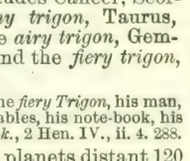
> And stoppeth the wheel with a *Trigen* [Sufflamine] in a steep descent. *Hoole*, tr. of The Visible World, lxxxvi.

> *Trigon*, a Pole to stop the Wheel of a Cart, where it goes too fast down a steep Place. *Bailey*, 1731.

trigonal (trig'ō-nal), *a.* and *n.* [< *trigon*[1] + *-al.*] **I.** *a.* 1. Pertaining to a trigon; having the form of a trigon; triangular.—2. In *entom.*, triangular in cross-section; having three long edges; trihedral; prismatic: as, *trigonal* antennæ; *trigonal* joints.—3. In *bot.*, same as *trigonous*.—4. In *anat.*, noting a triangular space at the base of the bladder. See *trigonum* (*a*). —**Trigonal coördinate**, one of a set of three coördinates of a point in a plane, which are related to trilinear coördinates as follows. Let $x_{n+1}=y_n/z_n$, $y_{n+1}=z_n/x_n$, $z_{n+1}=x_n/y_n$, and let x_0, y_0, z_0 be trilinear coördinates. Then x_n, y_n, z_n are called trigonal coördinates of the *n*th class. Trigonal coördinates are subject to the equation $x_n y_n z_n = 1$, which does not vary with the triangle of reference. They are valuable for studying higher plane curves. Thus, a linear equation in trigonal coördinates of the first class represents a cubic. They were invented by S. Levi in 1876, and must not be confounded with Walton's trigonic coördinates.—**Trigonal residue.** See *residue.*—**Trigonal trapezohedron.** See *tetartohedrism.*—**Trigonal trisoctahedron.** See *trisoctahedron.*

II. *n.* In *anat.*, the triangular space at the base of the bladder; the trigonum.

Trigonalidæ (trig-ō-nal'i-dē), *n. pl.* [NL., < *Trigonalys* + *-idæ.*] A family of parasitic hymenopters, having the single genus *Trigonalys*.



trigonally (trig'ō-nal-i), *adv.* Triangularly.

Trigonalys (trī-gon'ạ-lis), *n.* [NL. (Westwood, 1835), < Gr. τρίγωνος, three-cornered, + (irreg.) ἅλως, a threshing-floor, a disk: see *halo.*] An anomalous genus of hymenopterous insects, formerly placed in the family *Evaniidæ*, now considered as forming a family by itself. The abdomen is attached to the extremity of the thorax, the fore wings have two recurrent nervures, and the first submarginal and first discoidal cells are distinct. Two European and five North American species are known.

trigonate (trig'ō-nāt), *a.* [< *trigon*[1] + *-ate*[1].] In *entom.*, same as *trigonal*, 2.

trigone (trī'gōn), *n.* [= F. *trigone*, < NL. *trigonum*, < Gr. τρίγωνος, three-cornered.] Same as *trigonum*, in any sense.

Trigonella (trig-ō-nel'ạ), *n.* [NL. (Linnæus, 1737), so called with ref. to the three-cornered appearance of the flower; < Gr. τρίγωνος, three-cornered (see *trigon*[1]), + dim. *-ella.*] A genus of leguminous plants, of the tribe *Trifolieæ*, characterized by obtuse keel-petals, numerous ovules, and a pod which is straight, falcate, or arcuate, but not spiral. There are about 70 species, natives of Europe, Asia, and North Africa, with one in South Africa, and one, *T. suavissima*, in the interior of Australia. They are usually strong-smelling herbs, having pinnately trifoliate leaves with adnate stipules. Most of the species bear yellow or white flowers in a head or short raceme. The pod is linear, its veins being reticulated in the subsection *Buceras;* in the subsection *Falcatulæ* it is broad and compressed, and its veins are straight. In a few similar species, the section *Pocockia*, the pod bears winged or fringed sutures. In certain subsections, as the *Uncinatæ*, with beaked pods, the flowers are usually pendulous,

Plant with Flowers and Fruits of Fenugreek (*Trigonella Fœnum-græcum*). *a*, a fruit.

in *Fœnum-græcum* solitary, in *Grammocarpus* blue. Several of the species, especially *T. Fœnum-græcum*, are known as *fenugreek* (which see). *T. cærulea* is the Swiss melilot. *T. ornithopodioides* is the bird's-foot fenugreek, a reddish-flowered prostrate species growing on British heaths. *T. calliceras* is the bird's-bill fenugreek, a yellow Russian species with fleshy leaves, spiny peduncles, and pods with a recurving beak. *T. suavissima* has been found valuable for pasturage in Australia.

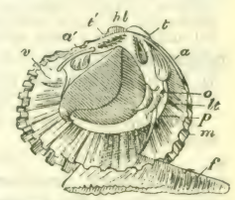
trigonellite (trig-ō-nel'īt), *n.* [As *Trigonella* + *-ite*[2].] A fossil shelly substance. See *aptychus*.

trigoneutic (trī-gō-nū'tik), *a.* [< Gr. τρεῖς (τρι-), three, + γονεύειν, beget.] In *entom.*, triple-brooded; having three broods in a single year. See *trivoltine*.

trigoneutism (trī-gō-nū'tizm), *n.* [< *trigoneut(ic)* + *-ism.*] The state or character of being trigoneutic or triple-brooded.

Trigonia (trī-gō'ni-ạ), *n.* [NL. (Bruguière, 1791), < Gr. τρίγωνος, three-cornered: see *trigon*[1].] 1. The typical genus of the family *Trigoniidæ*. *T. margaritacea* is the pearly trigon. See also cut under *Trigoniidæ*.—2. [*l. c.*] A shell of the genus *Trigonia* or family *Trigoniidæ;* a trigon: also used attributively: as, the *trigonia* beds or grits.—**Trigonia beds,** a subdivision of the Corallian division of the Jurassic, especially well developed at Osmington near Weymouth, England.—**Trigonia grits,** subdivisions of the Oölite in England. The Upper and Lower Trigonia grits are subdivisions of the Upper and Lower Ragstones, which are themselves divisions of the Inferior Oölite in Gloucestershire.

A Trigon (*Trigonia costata*).



Trigoniacea (trī-gō-ni-ā'sē-ạ), *n. pl.* [NL., < *Trigonia* + *-acea.*] A superfamily of integripalliate isomyarian bivalve mollusks, represented by the family *Trigoniidæ*.

trigoniacean (trī-gō-ni-ā'sē-an), *a.* and *n.* **I.** *a.* Of or pertaining to the *Trigoniacea*.

II. *n.* A member of the *Trigoniacea*.

trigonic (trī-gon'ik), *a.* [< *trigon*[1] + *-ic.*] Pertaining to a trigon or triangle.—**Trigonic coördinate,** one of a set of three coördinates determining the position of a point in a plane, these being the three angles subtended between three points of reference as seen from the point whose position is in question: invented by William Walton in 1868, and not to be confounded with trilinear or with trigonal coördinates.

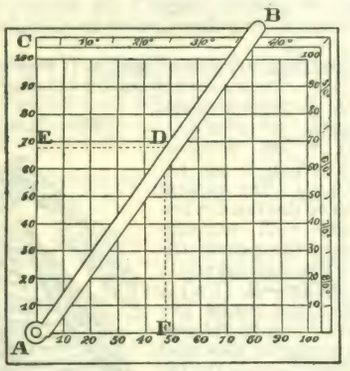
Trigoniidæ (trig-ō-nī'i-dē), *n. pl.* [NL., < *Trigonia* + *-idæ.*] A family of dimyarian bivalves. The mantle-margins are free and without siphons; the branchiæ are ample and unequal; the foot is long and angulated behind; the palpi are small and pointed; the shell is equivalve and nacreous within; the umbones are antemedian; the ligament is external; the cardinal teeth are divergent, and more or less transversely striated; and the pallial impression is entire. It is a group of mollusks whose living species are few and confined to the Australian seas, but which had an extensive range from the Triassic to the Cretaceous epoch. The typical genus is *Trigonia*. Also *Trigoniadæ*, *Trigonidæ*. See also cut under *Trigonia*.

Structure of *Trigoniidæ* (*Trigonia pectinata*).

a, *a'*, adductors; *f*, foot; *hl*, hinge-ligament; *ll*, labial tentacles or palpi; *m*, margin; *o*, mouth; *p*, pallial line; *t*, *t'*, dental sockets; *v*, cloaca.

Trigonocarpum (trig″ō-nō-kär'pum), *n.* [NL., < Gr. τρίγωνος, three-cornered, + καρπός, fruit.] The generic name given by Brongniart (1828) to certain fossil fruits, very abundant in the coal-measures of both the old and the new world, and regarded as gymnospermous or pteridospermous. These fruits are ovoid in shape, with either three or six strongly marked ribs, which are more distinct toward the base, and sometimes disappear above; at the apex is a small round or triangular pollinic chamber.

trigonocephalous (trig″ō-nō-sef'ạ-lus), *a.* [< Gr. τρίγωνος, three-cornered, + κεφαλή, head.] Having a flattened and somewhat triangular head, as a venomous serpent of the genus *Trigonocephalus*.



★**Trigonocephalus** (trig″ō-nō-sef'ạ-lus), *n.* [NL. (Oppel, 1811), < Gr. τρίγωνος, three-cornered, + κεφαλή, head.] A genus of venomous serpents, of the family *Crotalidæ:* used with various applications. See *Ancistrodon*, *Craspedocephalus*, *Toxicophis*, *copperhead*, *fer-de-lance*, and *moccasin*[2].

trigonocerous (trig-ō-nos'e-rus), *a.* [< Gr. τρίγωνος, three-cornered, + κέρας, horn.] Having horns with three angles, edges, or ridges—that is, triangular in cross-section.

trigonoid (trig'ō-noid), *n.* [< *trigon*[1] + *-oid.*] A plane figure composed of three arcs of circles of equal radius, especially when two of these arcs subtend 60° and one 120°.

trigonoidal (trig-ō-noi'dal), *a.* Like a trigonoid.

trigonometer (trig-ō-nom'e-tėr), *n.* [< Gr. *τρίγωνον*, triangle, + *μέτρον*, measure.] An instrument for solving plane right-angled triangles by inspection. In the form shown in the figure, a graduated arm turns about one of the corners of a square

Trigonometer.

graduated linearly parallel to adjacent sides, so as to form squares, and having outside of it a protractor. If the arm is not nicely centered, however, a detached rule would be preferable.

trigonometric (trig″ō-nō-met'rik), *a.* [= F. *trigonométrique* = Sp. *trigonométrico* = Pg. It. *trigonometrico*, < NL. **trigonometricus*, < **trigonometria*, trigonometry: see *trigonometry.*] Same as *trigonometrical.*—**Trigonometric series.** See *series.*

trigonometrical (trig″ō-nō-met'ri-kal), *a.* [< *trigonometric* + *-al.*] Of or pertaining to trigonometry; performed by or according to the rules of trigonometry.—**Trigonometrical canon,** a table of the numerical values of trigonometrical functions; especially, a very extensive and fundamental table, from which smaller tables are extracted.—**Trigonometrical curve,** a curve whose equation involves trigonometrical and no higher functions.—**Trigonometrical function,** a singly periodic function with a real period; especially, the sine, cosine, tangent, or their reciprocals.—**Trigonometrical survey,** a survey by triangulation, the measurement of base-lines, and astronomical observations of latitude, longitude, and azimuth. A trigonometrical survey should be followed by a plane-table or other topographical survey; it is also an important basis of or adjunct to hydrographical, magnetical, meteorological, geological, biological, political, anthropological, sociological, military, and other surveys.

trigonometrically (trig″ō-nō-met'ri-kal-i), *adv.* In a trigonometrical manner; according to the rules or principles of trigonometry.

An exact Map of all the Province of Attica, *trigonometrically* surveyed.
J. Stuart and N. Revett (Ellis's Lit. Letters, p. 383).

★**trigonometry** (trig-ō-nom'e-tri), *n.* [= F. *trigonométrie* = Sp. *trigonometría* = Pg. It. *trigonometria*, < NL. **trigonometria*, < Gr. *τρίγωνον*, a triangle, + *-μετρία*, < *μέτρον*, measure.] The mathematical doctrine of the calculation of the angles, sides, and areas of triangles, plane and spherical, together with that of other quantities intimately related to those. Trigonometry embraces also goniometry, or the elementary theory of singly periodic functions.

trigonon (tri-gō'non), *n.* [< Gr. *τρίγωνον*, a triangle, a musical instrument so called: see *trigon*[1].] Same as *trigon*[1], 3 (*a*).

Female players on the flute, the cithern, and the *trigonon*. *C. O. Müller*, Manual of Archæol. (trans.), § 425.

trigonotype (trig'ō-nō-tīp), *n.* [< Gr. *τρίγωνον*, a triangle, + *τύπος*, type.] A trigonal trapezohedron. See *tetartohedrism.*

trigonous (trig'ō-nus), *a.* [< LL. *trigonus*, < Gr. *τρίγωνος*, three-cornered, triangular: see *trigon*[1].] 1. Same as *trigonal.*—2. In *bot.*, three-angled; having three prominent longitudinal ★angles, as a stem or an ovary. Also *trigonal.*

trigonum (tri-gō'num), *n.* [NL., < L. *trigonum*, < Gr. *τρίγωνον*, a triangle: see *trigon*[1].] In *anat.*, a triangular space or area. Specifically—(*a*) The trigonal space or area at the base of the urinary bladder, whose apex is at the beginning of the urethra, and whose other two angles are at the points of entrance of the ureters into the bladder: more fully called *trigonum vesicæ.* (*b*) A triangular depressed space between the pulvinar and the peduncle of the pineal body: more fully called *trigonum habenulæ.*—**Trigonum acustici,** a triangular area on the floor of the fourth ventricle, just laterad of the ala cinerea, and inside the restiform tract: the striæ acusticæ form the base.—**Trigonum habenulæ.** See def. (*b*).—**Trigonum hypoglossi,** a triangular area on either side of the middle line of the floor of the fourth ventricle, the base being formed by the striæ acusticæ, and the hypotenuse by the inner margin of the ala cinerea. Also called *tuberculum hypoglossi.*—**Trigonum Lieutaudi,** the trigonum of the bladder.—**Trigonum vagi.** Same as *ala cinerea* (which see, under *ala*).—**Trigonum vesicæ.** See def. (*a*).

trigony† (trig'ō-ni), *n.* [Cf. Gr. *τριγονία*, the third generation, < Gr. *τρεῖς* (*τρι-*), three, + *-γονία*, production: see *-gony.*] A threefold birth or product.

Man is that great Amphybium in whom be
Three distinct souls by way of *trigony.*
Howell, Parly of Beasts, p. 140. (*Davies.*)

★**trigram** (trī'gram), *n.* [= F. *trigramme*, < Gr. *τρεῖς* (*τρι-*), three, + *γράμμα*, a letter.] Same as *trigraph.*

trigrammatic (trī-gra-mat'ik), *a.* [< Gr. *τριγράμματος*, consisting of three letters, < *τρεῖς* (*τρι-*), three, + *γράμμα*(*τ-*), a letter.] Consisting of three letters or of three sets of letters.

trigrammic (trī-gram'ik), *n.* [As *trigram* + *-ic.*] Same as *trigrammatic.*

trigraph (trī'grȧf), *n.* [< Gr. *τρεῖς* (*τρι-*), three, + *γραφή*, a writing, < *γράφειν*, write.] A combination of three letters to represent one sound; a triphthong, as *eau* in *beau.*

trigyn (trī'jin), *n.* [< Gr. *τρεῖς* (*τρι-*), three, + *γυνή*, a female (in mod. bot. a pistil).] In *bot.*, a plant having three styles; a plant of the Linnean order *Trigynia.*

Trigynia (trī-jin'i-ạ), *n. pl.* [NL.: see *trigyn.*] An order of plants in the Linnean system, distinguished by the fact that the flowers have three styles or stigmas, as in the bladder-nut.

trigynian (trī-jin'i-an), *a.* [< *Trigynia* + *-an.*] Belonging or relating to the *Trigynia;* trigynous.

trigynous (trij'i-nus), *a.* [As *trigyn* + *-ous.*] ★In *bot.*, three-styled; having three styles.

trihedral (trī-hē'dral), *a.* [Also *triedral;* < Gr. *τρεῖς* (*τρι-*), three, + *ἕδρα*, a seat, + *-al.*] Having three faces; three-faced.

The upper face of the *trihedral*, proximal, and largest joint of the antennule presents an oval space.
Huxley, Anat. Invert., p. 287.

Trihedral angle, a solid angle formed by the concurrence of three planes.

trihilate (trī-hī'lāt), *a.* [< L. *tres* (*tri-*), three, + NL. *hilum* + *-ate*[1].] In *bot.*, having three hila or scars, as a seed (*Imp. Dict.*); having three apertures, as a pollen-grain. [Rare.]

trihoral (trī-hō'ral), *a.* [< L. *tres* (*tri-*), three, + *hora*, hour: see *hour.*] Happening once in every three hours. *Lord Ellesmere.* (*Worcester.*)

trijugate (trī-jö'gāt), *a.* [< L. *trijugus*, three-fold (< *tres* (*tri-*), three, + *jugum*, yoke), + *-ate*[1].] In *bot.*, having three pairs of leaflets or pinnæ (said of a leaf or frond); arranged in three pairs (said of the parts themselves).

trijugous (trij'ö-gus or trī-jö'gus), *a.* [< L. *trijugus*, triple-yoked, threefold, < *tres* (*tri-*), three, + *jugum*, yoke.] In *bot.*, same as *trijugate.*

trijunction (trī-jungk'shon), *n.* [< L. *tres* (*tri-*), three, + *junctio*(*n-*), junction.] The junction of three things.

It is a great convenience to have the *trijunction* of Tibet, India, and Burma focussed within the four corners of a map. *Athenæum*, Jan. 29, 1887, p. 164.

trilabe (trī'lāb), *n.* [< Gr. *τρεῖς* (*τρι-*), three, + *λαβή*, hold, handle, < *λαμβάνειν* (√ *λαβ*), take.] A three-pronged surgical instrument for taking foreign bodies and small calculi from the bladder. It is so made that the prongs can be moved as desired after the instrument is in position.

trilabiate (trī-lā'bi-āt), *a.* [< L. *tres* (*tri-*), three, + *labium*, lip.] Three-lipped; having three lips: used in zoölogy and in botany.

trilaminar (trī-lam'i-när), *a.* [< L. *tres* (*tri-*), three, + *lamina*, plate: see *laminar.*] In *zoöl.* and *anat.*, having three laminæ, lamellæ, or layers; three-layered, as a germ—that is, consisting of endoderm, mesoderm, and ectoderm.

trilaminate (trī-lam'i-nāt), *a.* [< L. *tres* (*tri-*), three, + *lamina*, plate: see *laminate.*] In *zoöl.* and *bot.*, consisting of three laminæ or layers; trilaminar.

trilateral (trī-lat'e-ral), *a.* [< F. *trilatéral* (cf. *trilatère*), < LL. *trilaterus*, three-sided, < L. *tres* (*tri-*), three, + *latus* (*later-*), side: see *lateral.*] Having three sides.

trilaterality (trī-lat-e-ral'i-ti), *n.* [< *trilateral* + *-ity.*] The character of being trilateral.

Triangle, [distinguished] from every other class of mathematical figures by the single character of *trilaterality.* *Day*, Rhetoric, p. 85.

trilaterally (trī-lat'e-ral-i), *adv.* With three sides.

trilateralness (trī-lat'e-ral-nes), *n.* Trilaterality.

trilemma (trī-lem'ȧ), *n.* [NL., < Gr. *τρεῖς* (*τρι-*), three, + *λῆμμα*, an assumption: see *lemma*[1].] 1. In *logic*, a syllogism with three conditional propositions, the major premises of which are disjunctively affirmed in the minor. See *dilemma.*—2. Hence, in general, any choice between three objects.

triletto (tri-let'tō), *n.* [It., dim. of *trillo:* see *trill*[2].] In *music*, a short trill.

trilinear (trī-lin'ē-ȧr), *a.* [< L. *tres* (*tri-*), three, + *linea* + *-ar*[3] (cf. *linear*).] Composed or consisting of three lines.—**Trilinear coördinates.** See *coördinate.*

trilineate (trī-lin'ē-āt), *a.* [< L. *tres* (*tri-*), three, + *linea*, line, + *-ate*[1].] In *zoöl.*, having three colored lines, generally longitudinal ones.

trilingual (trī-ling'gwal), *a.* [Cf. F. Sp. Pg. It. *trilingue;* < L. *trilinguis*, in three languages, < *tres* (*tri-*), three, + *lingua*, language: see *lingual.*] Consisting of or expressed in three languages.

The much-noted Rosetta stone . . . bears upon its surface a *trilingual* inscription. *Is. Taylor.*

trilinguar (trī-ling'gwär), *a.* Same as *trilingual.*

Trilisa (tril'i-sȧ), *n.* [NL. (Cassini, 1818): an anagram of *Liatris.*] A genus of composite plants, of the tribe *Eupatoricæ* and subtribe *Adenostyleæ.* It is distinguished from the related genus *Lacinaria* by its broad corymbose panicle of small flower-heads, with their membranous involucral bracts forming only two or three rows and but slightly unequal. The 2 species are both natives of North America, growing in damp pine-barrens from Virginia south and west. They are erect perennials with alternate entire clasping leaves, those from the root very much elongated. *T. odoratissima* is known as *wild vanilla* (which see, under *vanilla*), and is also called *deer's-tongue.*

triliteral (trī-lit'e-ral), *a.* and *n.* [< L. *tres* (*tri-*), three, + *litera*, *littera*, letter: see *literal.*] I. *a.* Consisting of three letters, as a word or syllable; also, of or pertaining to what consists of three letters.

Repeating at the same time the *triliteral* syllable AUM.
J. F. Clarke, Ten Great Religions, iii. 5.

Triliteral languages, the Semitic family of tongues: so called because their roots in general consist of three consonants each, which represent the essential idea expressed by the word, while special modifications are produced by certain vowels or additional letters.

II. *n.* A word consisting of three letters.

triliteralism (trī-lit'e-ral-izm), *n.* [< *triliteral* + *-ism.*] The use of triliteral roots; the tendency toward triliterality.

Triliteralism is so prevalent a law in this family [Semitic languages] that sometimes there is a semblance of artificial effort to preserve the triliteral form.
Amer. Jour. Philol., X. 229.

triliterality (trī-lit-e-ral'i-ti), *n.* [< *triliteral* + *-ity.*] The character of being triliteral, or of consisting of three letters.

This [Semitic speech] contains two characteristics—the *triliterality* of the roots and their inflection by internal change. *Whitney*, Life and Growth of Language, p. 248.

triliteralness (trī-lit'e-ral-nes), *n.* Triliterality.

trilith (trī'lith), *n.* [< Gr. *τρίλιθος*, of three stones, < *τρεῖς* (*τρι-*), three, + *λίθος*, stone.] A monument, or part of a monument, consisting of three large stones; especially, in prehistoric

Triliths, Stonehenge, England.

or megalithic antiquities, a group consisting of two upright stones with a lintel-stone resting upon them. Also *trilithon.*

trilithic (trī-lith'ik), *a.* [< *trilith* + *-ic.*] Of the nature of a trilith; consisting of three masses of stone.

trilithon (trī'lith-on), *n.* [< Gr. *τρίλιθον*, neut. of *τρίλιθος*, of three stones: see *trilith.*] Same as *trilith.* *J. Fergusson*, Hist. Arch., I. 26.

trill[1]† (tril), *v.* [Early mod. E. also *tril, tryll;* < ME. *trillen, tryllen,* < Dan. *trille,* roll, trundle (*trille,* a disk, *trillebör,* wheelbarrow), = Sw. *trilla,* roll (*trilla,* a roller); cf. *troll*[1]. The word has been more or less confused with *thrill*[1] and *drill*[1] (to which its resemblance appears to be accidental), and with *trill*[2].] **I.** *trans.* **1.** To turn round rapidly; twirl; whirl.

Trille this pin, and he wol vanishe anon.
Chaucer, Squire's Tale, l. 328.

I *tryll* a whirlygig round aboute. Je pirouette. . . . I holde the a peny that I wyll *tryll* my whirlygig longer about than thou shalte do thyne. *Palsgrave,* p. 762.

The sundrie sodaine smartes
Which daily chaunce as fortune *trilles* the ball.
Gascoigne, Fruits of War.

2. To roll to and fro; rock.

ȝit myȝt the mylde may among
Her cradel *trille* to and fro,
And syng, Osye, thi song!
Holy Rood (E. E. T. S.), p. 213.

3. To throw; cast.

I *Tryll.* Je jecte. *Palsgrave,* p. 762.

4. To pour out.

For her tender Brood
Tears her own bowells, *trilleth* out her blood
To heal her young.
Sylvester, tr. of Du Bartas's Weeks, i. 5.

II. *intrans.* **1.** To roll.

If it [the tennis-ball] *trille* fast on the grounde, and he entendeth to stoppe, . . . he can nat than kepe any measure in swiftnesse of mocion.
Sir T. Elyot, The Governour, i. 27.

2. To rock; swing to and fro; shake; quiver.

As bornyst syluer the lef onslydez
That thike con *tryll* on vcha tynde [branch],
Quen glem of glodez agaynz hem glydez,
Wyth schymerynge schene ful schrylle thay schynde.
Alliterative Poems (ed. Morris), i. 78.

3. To roll down, as water; trickle.

With many a teare *trilling* [var. *triklyng*] on my cheke.
Chaucer, Summoner's Tale, l. 156.

From these hie hilles as when a spring doth fall,
It *trilleth* downe with still and suttle course.
Wyatt, Comparison of Love to a Stream.

A cold sweat *trills* down o'er all my limbs.
Dryden, Tempest, ii. 4.

trill[2] (tril), *v.* [= D. *trillen* = MHG. *trillieren,* G. *trillern,* dial. *trillen* = Dan. *trille,* < F. *triller* = It. *trillare* (ML. *trillare*) (cf. Sp. Pg. *trinar*), trill, quaver; prob. intended as imitative; cf. ML. *trillare,* explained in a German gloss as "*tryllsingen* als *triltril.*" Hence, by variation, *thrill*[2]. Cf. *trill*[1].] **I.** *intrans.* **1.** To sound with tremulous vibrations.

To judge of *trilling* notes and tripping feet. *Dryden.*

Thro' my very heart it thrilleth
When from crimson-threaded lips
Silver-treble laughter *trilleth.*
Tennyson, Lilian.

2. To sing in a quavering manner; specifically, to execute a shake or trill.

I do think she will come to sing pretty well, and to *trill* in time, which pleases me well. *Pepys,* Diary, III. 84.

O Swallow, Swallow, if I could follow, and light
Upon her lattice, I would pipe and *trill,*
And cheep and twitter twenty million loves.
Tennyson, Princess, iv. (song).

II. *trans.* **1.** To sing in a quavering or tremulous manner; pipe.

While in our shades,
Through the soft silence of the listening night,
The sober-suited songstress *trills* her lay.
Thomson, Summer, l. 745.

And the night-sparrow *trills* her song
All night with none to hear.
Bryant, Hunter's Serenade.

2. To pronounce with a quick vibration of the tongue; roll, as the sound of *r.*

trill[2] (tril), *n.* [= F. *trille* = It. *trillo;* from the verb.] **1.** A quavering, tremulous sound; a rapid, trembling series or succession of tones; a warbling.

Within my limits lone and still
The blackbird pipes in artless *trill.*
T. Warton, Inscription in a Hermitage.

2. In *music,* same as *shake,* 5; also, formerly, the effect now called the *vibrato.*

I have often pitied, in a winter night, a vocal musician, and have attributed many of his *trills* and quavers to the coldness of the weather. *Steele,* Tatler, No. 222.

In arioso *trills* and graces
Ye never stray,
But gravissimo, solemn basses
Ye hum away. *Burns,* To J. Smith.

3. A consonant pronounced with a trilling sound, as *r.*—**Passing trill,** in *music,* a melodic embellishment consisting of a rapid alternation of a principal tone with the next tone above.—**Prepared trill.** See *prepare.*

trillabub† (tril'a-bub), *n.* See *trillibub.*

trillando (tril-län'dō), *a.* [It., ppr. of *trillare,* trill: see *trill*[2].] In *music,* trilling.

trillibub (tril'i-bub), *n.* [Also *trillabub;* early mod. E. *trullibubbe, trullybub;* also in dial. *trollibags, trollybags* (appar. simulating *bag*); origin obscure. For the form, cf. *sillibub, syllabub.*] Tripe; figuratively, anything trifling or worthless. [Prov. Eng.]

There cannot be an ancient tripe or *trillibub* in the town but thou art straight nosing it.
B. Jonson, Bartholomew Fair, i. 1.

I forgive thee, and forget thy tricks
And *trillabubs,* and will swear to love thee heartily.
Shirley, Hyde Park, iii. 2.

trillichan (tril'i-ċhan), *n.* [< Gael. *trilleachan,* the pied oyster-catcher.] Same as *tirma.*

trillil†, *v. t.* [Appar. an imitative extension of *trill*[2].] To drink with a gurgling sound. [Rare.]

In nothing but golden cups he would drinke or quaffe it; whereas in wodden mazers and Agathocles' earthen stuffe they *trillild* it off before.
Nashe, Lenten Stuffe (Harl. Misc., VI. 166). (*Davies.*)

trilling (tril'ing), *n.* [< L. *tres* (*tri-*), three, + E. *-ling*[1], after *twilling* (< *two, twi-*).] **1.** One of three children born at the same birth.—**2.** A twin crystal composed of three individuals. Also *threeling.*

trillion (tril'yon), *n.* [= F. *trillion* = Sp. *trillón* = Pg. *trillião,* < It. *trillione,* < L. *tres* (*tri-*), three. Cf. *million.*] In the original and most systematic sense, sometimes called English numeration, though of Italian origin, the third power of a million—a million of millions of millions; in the French numeration, usual in the United States, a thousand billions, or a million millions. In Italian arithmetics from the last quarter of the fifteenth century the words *bilione* or *duilione, trilione, quadrilione* or *quattrilione, quintilione, cinquilione,* or *quinquilione, seilione* or *sestilione, settilione, ottilione, novilione,* and *decilione* occur as common abbreviations of *due volte millioni, tre volte millioni,* etc. In other countries these words came into use much later, although one French writer, Nicolas Chuquet, mentions them as early as 1484, in a book not printed until 1881. The Italians had, besides, another system of numeration, proceeding by powers of a thousand. The French, who, like other northern peoples, took most if not all their knowledge of modern or Arabic arithmetic from the Italians, early confounded the two systems of Italian numeration, counting in powers of a thousand, but adopting the names which properly belong to powers of a million. The result has been that the names *billion, trillion,* etc., have, owing to their ambiguity, been almost discarded. A *trilliar,* or a thousand millions, is called a *milliard* by bankers, and when a name for a thousand milliards comes to be wanted it is probable that some other augmentative form will be borrowed from the Italian or Spanish. Compare *billion.*

trillionth (tril'yonth), *a.* and *n.* [< *trillion* + *-th*[2].] **I.** *a.* **1.** Being last in order of a series of a trillion.—**2.** Being one of a trillion parts.

II. *n.* One of a trillion parts; the quotient of unity divided by a trillion.

Trillium (tril'i-um), *n.* [NL. (Linnæus, 1753), so called with ref. to the numerical symmetry in threes; < L. *tres* (*tri-*), three: see *three.*] **1.** A genus of monocotyledonous plants, of the family *Convallariaceæ.* It is characterized by a solitary flower, usually with the three outer segments green and herbaceous, and the three inner segments larger, colored, and withering-persistent. There are about 28 species, 23 of which are natives of North America; 2 occur in Asia from the Himalayas to Japan. They are singular and attractive plants with a short, thick, fleshy rootstock (see cut under *rhizome*) producing a low unbranched erect stem terminated by a whorl of three broad deep-green leaves, each with three to five nerves, and also finely netted-veined. From their center rises the sessile or pedicelled flower, either reddish, purple, white, or greenish, with a large three-celled and three- to six-angled ovary bearing three slender spreading stigmas, and becoming in fruit an ovoid reddish berry. The contrast presented by the colored petals and prominent green sepals is an unusual one in the order, but it disappears in *T. Govanianum* and in *T. viridescens,* in which the perianth-segments are all colored alike. They are known by the generic name, and as *three-leafed nightshade,* the white species also as *wake-robin, white bath, birthroot,* and in the West as *wood-lily. T. erectum,* the purple trillium, a strong-scented species, is also known locally as *Indian balm, Indian shamrock,* and *nose-bleed.* Of the 9 species in the northeastern United States, some produce white, others dull-purple flowers; in one, *T. undulatum,* the painted trillium, the white petals are beautifully marked with deep-red lines. Two species of North Carolina, *T. pusillum* and *T. stylosum,* bear respectively flesh-colored and rose-colored flowers. The large handsome white petals turn rose-color in *T. grandiflorum* of the Eastern and Central States, and in its Californian representative, *T. ovatum;* in other species they commonly turn greenish. *T. sessile,* the only species extending across the continent, is remarkable for its closely sessile flower; *T. cernuum,* for its nodding peduncle; and *T. petiolatum,* of Oregon, for its extremely short stem. See cuts under *rhizome* and *wake-robin.*

2. [*l. c.*] A plant of the above genus.

A very pretty flower which we began to meet well up on the mountain-side was the painted *trillium.*
J. Burroughs, The Century, XXXVI. 613.

Trillium family, a group of plants including *Trillium,* formerly classed as a family *Trilliaceæ,* or as a tribe *Medeoleæ.* They belong to the family *Convallariaceæ.*

trillo (tril'ō), *n.* [< It. *trillo,* trill: see *trill*[2], *n.*] Same as *trill*[2]. *Blount,* Glossographia (1656).

Myself humming to myself . . . the *trillo,* and found by use that it do come upon me. *Pepys,* Diary, I. 198.

Charming sweet at night to dream
On mossy pillows by the *trilloes*
Of a gently purling stream.
Addison, The Guardian, No. 134.

trilobate (trī-lō'bāt or trī'lō-bāt), *a.* [< L. *tres* (*tri-*), three, + NL. *lobatus,* lobed: see *lobate.*] Three-lobed; having three lobes or foils: noting a part divided from the apex to the middle into three sections which recede somewhat from each other.

Trilobate Leaf of *Pharbitis Leari.*

trilobated (trī-lō'bā-ted), *a.* [< *trilobate* + *-ed*[2].] Same as *trilobate.*

Pointed windows . . . *trilobated* or with elaborate tracery. *Amer. Jour. Archæol.,* VI. 594.

trilobed (trī'lōbd), *a.* [< L. *tres* (*tri-*), three, + E. *lobe* + *-ed*[2].] Same as *trilobate.*

Trilobita (trī-lō-bī'tä), *n. pl.* [NL.: see *trilobite.*] A subclass of articulated animals or *Crustacea* which existed in the Paleozoic period, and have been extinct since the close of the Carboniferous; the trilobites. See *trilobite.* The name is fixed, but the taxonomic value of the group has been discussed, and its systematic position much disputed. It has usually been considered crustacean, sometimes arachnidan, and again intermediate between these classes. The *Trilobita* have also been regarded as related to the *Eurypterida* (see cut there), and there is an obvious similarity between them and the immature stages of the horseshoe-crabs (*Limulidæ*). Their relationship with isopods has been specially noted by various naturalists, and they have even been included in *Isopoda,* or located between that order and *Phyllopoda.* Recent investigations indicate that any attempt to include the trilobites in any of these associations results only in broad generalities and looseness of definition. Their anatomy has now become well known, and it would appear that they are entitled to the rank of a subclass. Also, rarely and more correctly, *Trilobitæ.*

A, head, or cephalon; *B,* thorax; *C,* abdomen or pygidium; 1, marginal band or border of the cephalic limb; 2, marginal groove, internal to 1; 3, occipital segment; 4, glabellum; 5, great or genal suture; 6, eye; 7, axis, or tergum; 8, pleuron; 9, tergal part of pygidium; 10, pleural part of pygidium; *a,* fixed gena; *b,* movable gena; *g,* genal angle.

trilobite (trī'lō-bīt), *n.* [< Gr. τρεῖς (τρι-), three, + λοβός, a lobe, + *-ite*[2].] Any member of the *Trilobita:* so called from the three lobes into which the body is divided by the longitudinal or dorsal furrows. See *Trilobita.* Trilobites are of much popular as well as scientific interest; some of them occur in profusion in Paleozoic formations, and trilobites as a group are among the longest and most widely known of fossils, not yet entirely divested of a problematical character. In the Linnean system all of the few forms then known were considered one species, named *Entomolithus paradoxus,* and a sort of likeness to chitons caused Latreille to range these organisms near those molluska. Trilobites are the most characteristic fossils of their class throughout the Paleozoic rocks. Probably 2000 species have been described, and not far from 200 genera have been named and referred to several higher groups. Upward of 300 species, of about 50 genera, mostly of the Cambrian and Silurian, are described as British; 350 species, of 42 genera, are recorded from the Lower Paleozoic rocks of Bohemia; the Devonian forms are comparatively few; and the series closes with some small Carboniferous species, mostly of two genera. Some of the trilobites are of comparatively gigantic size, as species of *Paradoxides,* 2 feet long. A Silurian trilobite, a species of *Dalmanites,* is figured above. The body of a trilobite is generally of a flattened oval figure, whose upper side presents an obvious transverse division into three parts, besides the median longitudinal division from one end to the other. The head, composed of several coalesced segments, and presenting certain sutures, constitutes a cephalic shield rounded in front, with an axial raised section, the glabellum, on each side of which are large compound eyes (not unlike those of the horseshoe-crab), and whose lateral limbs or borders are prolonged backward to a varying distance on each side of the thorax (in some cases produced beyond all the rest of the body). The second division of the body consists of a varying number (up to twenty-six) of separate thoracic segments, which were more or less freely movable upon one another, so that some trilobites could roll themselves up in a ball, like a sowbug (isopod) of the present day. The raised axis of the thoracic division is the tergum, and parts on each side of it are the pleura. The third division of the body is the abdomen or pygidium, of a variable number (up to twenty-eight) of segments, in general re-

sembling the thoracic segments, and with an axial raised portion, but united together. Of the under surface of a trilobite almost nothing was known until the recent determinations by Walcott and Beecher. A well-developed lip-plate or hypostome had been recognized, but nothing further was known until 1870, when the under side of a species of *Asaphus*, showing indistinct appendages, was described by Billings. Other investigators have pursued this subject, with the result of showing the presence of metastoma, antennæ, biramous articulated appendages, or legs, of which there is a pair to each segment of the body. The ontogeny of trilobites, so far as known, indicates a larval condition or *protaspis* corresponding to the *nauplius* of existing crustacea. What may be inferred of the mode of life of trilobites is that probably their habits were like those of the crabs.—**Dudley trilobite**, the trilobite *Calymmene blumenbachi:* so called from its abundance in the vicinity of Dudley, England.

trilobitic (trī-lō-bit'ik), *a.* [< *trilobite* + *-ic.*] Of or pertaining to trilobites; having the character of trilobites or affinity with them; containing trilobites, as geological strata.

trilocular (trī-lok'ū-lär), *a.* [< L. *tres* (*tri-*), three, + *loculus*, cell, + *-ar*3.] Having three cells or compartments. Specifically—(*a*) In *bot.*, having three cells or loculi: noting a pericarp. (*b*) In *anat.* and *zoöl.*, having three loculi, compartments, or chamberlets: as, the *trilocular* heart of a reptile. Also *triloculate.*

triloculate (trī-lok'ū-lāt), *a.* [< L. *tres* (*tri-*), three, + *loculus*, cell, + *-ate*1.] Same as *trilocular.*

trilogy (tril'ō-ji), *n.* [= F. *trilogie*, < Gr. τρι-λογία, a series of three tragedies, < τρεῖς (τρι-), three, + λόγος, a tale, story, narrative, speech, < λέγειν, say, tell: see *logos*, and cf. *-ology.*] Originally, in the Greek drama, a series of three tragedies, each forming a complete part or stage in a historical or poetical narrative; hence, any literary, dramatic, or operatic work consisting of a sequence of three parts, each complete and independent save in its relation to the general theme. Thus, the name *trilogy* is given to Shakspere's "Henry VI.," and to Schiller's "Wallenstein."

Trilophodon (trī-lof'ō-don), *n.* [NL. (Falconer), < Gr. τρεῖς (τρι-), three, + λόφος, ridge, crest, + ὀδούς (ὀδοντ-) = E. *tooth.*] A genus of mastodons whose molar teeth have crests in three rows. See *Mastodontinæ.*

trilophodont (trī-lof'ō-dont), *a.* [< NL. *Trilophodon*(*t-*).] Having three crests, as the teeth of certain mastodons; belonging or related to the genus *Trilophodon.*

trilost (trī'lost), *n.* [Corn. *trilost*, < *tri* (= W. *tri*), three, + *lost* (= W. *llost*), tail.] A term occurring only in the name *cardinal trilost*, used locally in Cornwall for a sting-ray (*Trygon pastinaca*) having two spines on the tail.

triluminar† (trī-lū'mi-när), *a.* [< L. *tres* (*tri-*), three, + *lumen* (*-in-*), light, + *-ar*3. Cf. ML. *triluminare*, a candlestick with three branches.] Having three lights. *Bailey*, 1727.

triluminous† (trī-lū'mi-nus), *a.* [< L. *tres* (*tri-*), three, + *lumen* (*-in-*), light, + *-ous.*] Same as *triluminar.* *Bailey*, 1727.

trim (trim), *a.* [Early mod. E. also *trimme*, *trym*, *trymme;* an altered form, after the verb, of **trum*, < ME. *trum* (only in comp. *mistrum*, *untrum*), < AS. *trum*, firm, strong, = OLG. *trim*, in the deriv. *betrimmed*, *betrimmd*, decked, trimmed, adorned, *trimmke*, an affected, overdressed person; root unknown.] 1†. Firm; strong.

It taketh no rote in a briery place, ne in marice, nether in the sande that fleeteth awaye, but it requireth a pure, a *trymme*, and a substaunciall grounde.
J. Udall, On Jas. i.

2. In good order or condition; properly disposed, equipped, or qualified; good; excellent; fine: often used ironically.

Thirteene *trim* barkes throughlie furnished and appointed with good mariners and men of warre.
Holinshed, Chron., Edw. III., an. 1372.

I, be Gis, twold be *trim* wether,
And if it were not for this mist.
Mariage of Witt and Wisdome. (*Nares*, under *gis.*)

A *trim* exploit, a manly enterprise,
To conjure tears up in a poor maid's eyes
With your derision! *Shak.*, M. N. D., iii. 2. 157.

The Dr. gave us a sermon this morning, in an elegant and *trim* discourse on the 39th Psalm.
Evelyn, To Dr. Bentley.

3. Neat; spruce; smart.

I will make thee *trim*
With flowers and garlands that were meant for him.
Fletcher, Faithful Shepherdess, iii. 1.

He put his hand around her waste
Soe small, so tight, and *trim.*
Robin Hood and the Tanner's Daughter (Child's Ballads, [V. 385).

But there were *trim*, cheerful villages, too, with a neat or handsome parsonage and gray church set in the midst.
George Eliot, Felix Holt, Int.

trim (trim), *adv.* [Early mod. E. also *trimme;* < *trim, a.*] In a trim manner; trimly.

Young Adam Cupid, he that shot so *trim*
When King Cophetua loved the beggar-maid!
Shak., R. and J., ii. 1. 13.

★ **trim** (trim), *v.*; pret. and pp. *trimmed*, ppr. *trimming.* [Early mod. E. also *trimme, trymme;* < ME. *trimen, trymen, trumen,* < AS. *trymian, trymman,* make firm, strengthen, also set in order, array, prepare, < *trum*, firm, strong: see *trim, a.*] **I.** *trans.* 1. To set in order; put in order; adjust; regulate; dispose.

Beyng ryght wery of that Jorney, ffor the bestys that we rode vpon [were] ryght weke and ryght simple, and evyll *trymed* to Jorney with.

Andrea Bragadino . . . had charge on that part of the castle, . . . *trimming* and digging out new flanckers for the better defence of the Arsenall.
Hakluyt's Voyages, II. i. 122.

Back to my lonely home retire,
And light my lamp, and *trim* my fire.
Scott, Marmion, ii., Int.

You don't care to be better than a bird *trimming* its feathers, and pecking about after what pleases it.
George Eliot, Felix Holt, x.

2. *Naut.*, to adjust or balance, as a ship or boat, by distributing the weight of the lading so equally that it shall sit well on the water. A vessel is said to be *trimmed* by the head or by the stern respectively when the weight is so disposed as to make it draw more water toward the head than toward the stern, or the reverse.

With all hands she did lighten her sterne, and *trimme* her head.
Hakluyt's Voyages, I. 448.

My old friend . . . seated himself, and *trimmed* the boat with his coachman, who, being a very sober man, always serves for ballast on these occasions.
Addison, Spectator, No. 383.

Trim the Boat and sit quiet, stern Charon reply'd.
Prior, Bibo and Charon.

3. To fit out; equip; furnish, especially with clothes; hence, to dress; deck: sometimes with *up* or *forth.*

The Harte, vice admiralle, with the Paunce and Sir Andrewe Dudley, being but single manned, had a greate conflicte with three Scottishe shippes, beeyng double manned and *trimmed* with ordinaunce. *Fabyan*, Chron., an. 1546.

Trimm'd like a younker prancing to his love.
Shak., 3 Hen VI., ii. 1. 24.

See, the jolly clerk
Appears, *trimm'd* like a ruffian.
Ford, Perkin Warbeck, iii. 4.

4. Specifically, to embellish with ornaments; decorate, as with ribbons, fringe, etc.

Who reades Plutarchs eyther historie or philosophy, shall finde hee *trymmeth* both theyr garments with gards of Poesie. *Sir P. Sidney*, Apol. for Poetrie, p. 59.

The Lady Mayoress was dressed in green velvet, lined with white satin, *trimmed* with gold fringe and a border of Brussels lace. *First Year of a Silken Reign*, p. 69.

5. To reduce to a neat or orderly state, as by clipping, paring, pruning, lopping, or otherwise removing superfluous or disfiguring parts.

I *trymme*, as a man dothe his heare or his busshe. . . . *Trymme* my busshe, barber, for I intende to go amongest ladyes to day. *Palsgrave*, p. 762.

Before I went to bed, the barber come to *trim* me and wash me, and so to bed, in order to my being clean to-morrow. *Pepys*, Diary, I. 187.

She inquired when the gardener was to come and *trim* the borders. *Charlotte Brontë*, Shirley, vii.

6. To cut off in the process of bookbinding: said of the ragged edges of paper or the bolts of book-sections.—7. To remove by clipping, pruning, or paring; lop or cut: with *off* or *away:* as, to *trim off* shoots from a hedge.—8. In *carp.*, to dress, as timber; make smooth; fit.—9. To rebuke; reprove sharply; also, to beat; thrash: sometimes indelicately applied to a woman. Compare *untrimmed*, 2. [Colloq.]

An she would be cool'd, sir, let the soldiers *trim* her.
Fletcher (*and another*), False One, ii. 3.

Soh! Sir Anthony *trims* my master: he is afraid to reply to his father — then vents his spleen on poor Fag.
Sheridan, The Rivals, ii. 1.

10. To spend or waste in trimming: with *away.* See II.

He who would hear what ev'ry fool cou'd say,
Would never fix his thought, but *trim* his time *away.*
Dryden.

Rough-trimmed, having only the protruding parts of leaves cut off, but not cut smooth: said of the edges of books.—**To trim the shore**, to follow the shore closely: said of a school of fish.—**To trim the yards** or **sails**, to brace the yards so that the wind will strike the sails at the suitable angle.—**To trim up**, to put in order; arrange; garnish, as a costume or any part of it.—**Trimmed edges**, the edges of books whose leaves are cut off smoothly.—Syn. 1. To arrange.—3 and 4. To adorn, garnish, array, trick out.

II. *intrans.* To keep an even balance; hold a middle course or position, especially in a contest between parties, so as to seem to incline to neither, or to both alike: from the nautical meaning. See I., 2.

He commends Atticus for his *Trimming*, and Tully for his Cowardise, and speaks meanly of the Bravery of Cato.
Jeremy Collier, Short View (ed. 1698), p. 195.

He *trimmed*, as he said, as the temperate zone *trims* between intolerable heat and intolerable cold—as a good government *trims* between despotism and anarchy—as a pure church *trims* between the errors of the Papists and those of the Anabaptists. *Macaulay*, Sir W. Temple.

To trim sharp (*naut.*), to haul up to the wind, and brace the yards sharp.

The next Morning we again *trimm'd sharp*, and made the best of our way to the Lobos de la Mar.
Dampier, Voyages, I. 145.

★ **trim** (trim), *n.* [< *trim, v.*] 1. Adjustment; order; condition; arrangement.

And tooke them in the *trim*
Of an encounter. *Chapman*, Iliad, v. 565.

Ere dusk fires were lit up stairs and below, the kitchen was in perfect *trim;* Hannah and I were dressed, and all was in readiness. *Charlotte Brontë*, Jane Eyre, xxxiv.

2. *Naut.*, the state of a ship, or of her cargo, ballast, spars, etc., with reference to her fitness for sailing.

A nobler ship did never swim,
And you shall see her in full *trim:*
I'll set, my friends, to do you honor,
Set every inch of sail upon her.
Wordsworth, The Wagoner, ii.

We . . . prepared to get everything in *trim* for a long stay. *R. H. Dana, Jr.*, Before the Mast, p. 301.

When they had trimmed, but not yet with the capstan, Arents called to the captain, who returned an answer implying that the ship had come up again, and that the *trim* as it was would serve. *W. C. Russell*, Death Ship, xxiii.

3. Mode of appearance or equipment; guise; garb; especially, the becoming or prescribed mode of dress, ornament, etc.; the fashion; full dress; of a ship, full sail.

I'd court Bellona in her horrid *trim*,
As if she were a mistress.
Massinger, Bondman, i. 1.

Uncomb'd his locks, and squalid his attire,
Unlike the *trim* of love and gay desire.
Dryden, Pal. and Arc., i. 540.

"Why, kings are kittle cattle to shoe behind, as we say in the north," replied the Duke; "but his wife knows his *trim*, and I have not the least doubt that the matter is quite certain." *Scott*, Heart of Mid-Lothian, xxxviii.

6. In *carp.*, the visible woodwork or finish of a house, as the base-boards, door- and window-casings, etc.

No wood having been used in construction except for floors, doors, and *trim.*
New York Evening Post, April 14, 1884.

Out of trim, not in good order; not evenly balanced: specifically said of a vessel with reference to uneven stowage of her cargo.—**Trim of the masts** (*naut.*), the position of the masts in regard to the ship and to one another, as near or distant, far forward or aft, upright or raking.

trimacular (trī-mak'ū-lär), *a.* [< L. *tres* (*tri-*), three, + *macula*, spot, + *-ar*3.] Same as *trimaculated. Encyc. Dict.*

trimaculated (trī-mak'ū-lā-ted), *a.* [< L. *tres* (*tri-*), three, + *macula*, spot, + *-ate*1 + *-ed*2. Cf. *trammel.*] Marked with three spots.

Trimaculated Wrasse; . . . On each side of the lower part of the back fin were two large spots, and between the fin and the tail another.
Pennant, Brit. Zoöl. (ed. 1776), III. 248.

trimastigate (trī-mas'ti-gāt), *a.* [< Gr. τρεῖς (τρι-), three, + μάστιξ (μαστιγ-), whip, scourge, + *-ate*1.] Having three flagella, as a protozoan; triflagellate.

trimembral (trī-mem'bral), *a.* [< LL. *trimembris* (> Sp. It. *trimembre*), having three sets of limbs, triple-membered, < L. *tres* (*tri-*), three, + *membrum*, member: see *member.*] Having or consisting of three members.

trimenstre†, *a.* [ME. *trymenstre* for **trimestre*, < L. *trimestris*, of three months: see *trimester.*] Trimestrial; specifically, ripening three months after sowing.

Trymenstre seede in erthe is nowe to strie.
Palladius, Husbondrie (E. E. T. S.), p. 61.

trimensual (trī-men'ṣū-al), *a.* [< L. *tres* (*tri-*), three, + *mensis*, month: see *mensual.*] Happening every three months.

Trimera (trim'e-rä), *n. pl.* [NL., neut. pl. of **trimerus:* see *trimerous.*] In *entom.*: (*a*) A

division of *Coleoptera*, including those beetles whose tarsi have normally three joints apiece. Also called *Pseudotrimera*. See cut under *ladybird*. Compare *Tetramera* and *Pentamera*, and see *tarsal system* (under *tarsal*). (*b*) A section of the hymenopterous family *Chalcididæ*, including the forms with three-jointed tarsi. They all belong to the subfamily *Trichogramminæ*. See cut under *Trichogramma*. *Förster*, 1856.

trimeran (trim'ẹ-ran), *a.* and *n.* [< *trimer-ous* + *-an.*] **I.** *a.* In *entom.*, same as *trimerous*, 2.

II. *n.* A trimerous insect; any member of the *Trimera*, in either sense.

trimerite (trim'ẹ-rīt), *n.* [< Gr. τριμερής, having three parts (see *trimerous*), + *-ite*2.] A rare mineral consisting of the silicates of beryllium, manganese, and calcium. It occurs in prismatic crystals of hexagonal form, but shown optically to be twins of three triclinic individuals. It is intermediate in form between the manganese silicate (tephroite) and the beryllium silicate (phenacite), and is also related to the latter in form.

trimerous (trim'ẹ-rus), *a.* [< NL. **trimerus*, < Gr. τριμερής, having three parts, tripartite, threefold, < τρεῖς (τρι-), three, + μέρος, a part.] 1. In *bot.*, of three members; having the parts or members three in each cycle. Frequently written 3-*merous*.—2. In *entom.*: (*a*) Divided into three joints; having three segments, as the tarsus of a beetle, thus: ⋋⋌⋋. (*b*) Having the tarsi normally three-jointed, as a beetle; of or pertaining to the *Trimera*. Also *trimeran*.—**Trimerous thorax**, a thorax distinctly divided into three rings, as in most *Neuroptera*. *Kirby*.

trimester (trī-mes'tėr), *n.* [= F. *trimestre* = Sp. It. *trimestre*, < L. *trimestris*, of three months, < *tres* (*tri-*), three, + *mensis*, month: see *month*. Cf. *semester*.] A term or period of three months. *Imp. Dict.*

trimestral (trī-mes'tral), *a.* [< L. *trimestris* (see *trimester*) + *-al.*] Same as *trimestrial*.

> Diurnal, hebdomadal, monthly or *trimestral*.
> *Southey*, The Doctor, ccx.

trimestrial (trī-mes'tri-al), *a.* [< L. *trimestris* (see *trimester*) + *-al.*] Of or pertaining to a trimester; occurring every three months; quarterly. *Imp. Dict.*

trimetallic (trī-me-tal'ik), *a.* [< Gr. τρεῖς (τρι-), three, + μέταλλον, metal: see *metallic*.] Pertaining to or involving the use of three metals, as in currency. [Rare.]

> The metal coinage system of the world is not therefore mono-metallic, nor bi-metallic, but *tri-metallic*.
> *Contemporary Rev.*, LII. 812.

trimeter (trim'ẹ-tėr), *a.* and *n.* [= F. *trimètre* = It. *trimetro*, < L. *trimetrus*, < Gr. τρίμετρος, containing three measures, < τρεῖς (τρι-), three, + μέτρον, measure.] **I.** *a.* In *pros.*, consisting of three measures, especially of three iambic measures.

II. *n.* In *pros.*, a verse or period consisting of three measures. A trochaic, iambic, or anapestic trimeter consists of three dipodies (six feet); a trimeter of other rhythms is a hexapody, or period of six feet. The name is specifically given to the iambic trimeter,

⏑ – ⏑ – | ⏑ – ⏑ – | ⏑ – ⏑ –,

regularly with penthemimeral or hephthemimeral cesura. This is the usual verse of the dialogue of the ancient Greek drama.

trimethylamine (trī-meth'il-am-in), *n.* [< *tri-* + *methyl* + *amine.*] A substituted ammonia in which the three hydrogen atoms are replaced by methyl, $N(CH_3)_3$. It is prepared from herring-brine, or more commonly from a waste product of the beet-sugar manufacture, and is a volatile liquid soluble in water, and having a penetrating fish-like odor. It has been used in medicine for the treatment of rheumatism.

trimetric (trī-met'rik), *a.* [< Gr. τρίμετρος, containing three measures (see *trimeter*), + *-ic.*] 1. Same as *trimeter*. *Amer. Jour. Philol.*, X. 224.—2. In *crystal.*, same as *orthorhombic*, 2.

trimetrical (trī-met'ri-kal), *a.* [< *trimetric* + *-al.*] Same as *trimeter*. *Imp. Dict.*

trimly (trim'li), *adv.* [< *trim* + *-ly*2.] In a trim manner; neatly; finely; well.

> To ioyne learnyng with cumlie exercises, Conto Baldefœr Castiglione, in his booke, Cortegiane, doth *trimlie* teache. *Ascham*, The Scholemaster, p. 66.
>
> This spruce young guest, so *trimly* drest.
> *Barham*, Ingoldsby Legends, I. 227.

★ **trimmer** (trim'ėr), *n.* [< *trim* + *-er*1.] 1. One who or that which trims, in any sense of the word. (*a*) One who arranges or disposes; one who puts or keeps in place: as, a grain-*trimmer*.

> The coal handling plant . . . may be resolved into three parts: The elevators, which discharge the boats, emptying them of their cargo; the *trimmers*, which take the coal from the elevators and deposit it upon the heaps; and finally the reloaders. *Sci. Amer.*, N. S., LXII. 360.

(*b*) One who adjusts as to poise or balance.

> Who knows but what I might have yielded to the law of nature, that thorough *trimmer* of balances?
> *R. D. Blackmore*, Lorna Doone, l.

(*c*) One who finishes with trimming; one who decorates or embellishes: as, a coat-*trimmer*; a bonnet-*trimmer*. (*d*) One who cuts, clips, prunes, or pares; specifically, in old use, a barber.

> At the going out of the halls which belong to the ladies' lodgings were the perfumers and *trimmers*, through whose hands the gallants past when they were to visit the ladies.
> *Urquhart*, tr. of Rabelais, i. 55.

(*e*) A tool used for clipping, pruning, or paring: as, a nail-*trimmer*; a wick-*trimmer*; specifically, a knife or cutting-tool of various forms for trimming the edges of photographs previous to mounting them on cardboard; also, a form of paper-cutter used in bookbinding for trimming the edges of books.

> Wheel print *trimmers*, which cut clean edges much better than do knives. *The Engineer*, LXVII. 298.

2. One who does not openly incline to either side in a contest between parties; hence, one who tries to curry favor with both or with all parties; a time-server. The name was originally given, in English politics, to a party which followed the Marquis of Halifax, during the period from about 1680 to 1690, in trimming between the Whigs and the Tories.

> The innocent word *trimmer* signifies no more than this: That if men are together in a boat, and one part of the company should weigh it down on one side, another would make it lean down as much to the contrary; it happens there is a third opinion, of those who conceive it would do as well if the boat went even without endangering the passengers.
> *Marquis of Halifax*, Character of a *Trimmer*, Pref.
>
> He who perseveres in error without flinching gets the credit of boldness and consistency, while he who wavers in seeking to do what is right gets stigmatized as a *trimmer*. *Irving*, Knickerbocker, p. 270.

3. In *arch.*, a piece of timber inserted in a roof, floor, wooden partition, or the like to support the ends of any of the joists, rafters, etc. See cut under *joist*.—4. One who chastises or reprimands; a sharp, severe person; a strict disciplinarian; also, that by which a reprimand or chastisement is administered; hence, in general, something decisive; a settler. [Colloq.]

> I will show you his last epistle, and the scroll of my answer — egad, it is a *trimmer!* *Scott*, Antiquary, xi.
>
> You've been spelling some time for the rod,
> And your jacket shall know I'm a *Trimmer*.
> *Hood*, *Trimmer's* Exercise.

Bent trimmer, tailors' shears bent at the handle to facilitate the work of cutting cloth on a table.

trimming (trim'ing), *n.* [Verbal n. of *trim*, *v.*] 1. The act of one who trims, in any sense.

> Sudden death . . . hath in it great inconveniences accidentally to men's estates, to the settlement of families, to the culture and *trimming* of souls.
> *Jer. Taylor*, Holy Dying, iv. 5.
>
> All the *trimming* he has used towards the court and Nobles has availed him nothing.
> *Jefferson*, To John Jay (Jefferson's Correspondence, II. 487).

2. Specifically, a dressing; a sharp scolding; a drubbing or thrashing. [Colloq.]

> Young Branghton . . . was again himself, rude and familiar; while his mouth was wide distended into a broad grin at hearing his aunt give the beau such a *trimming*.
> *Miss Burney*, Evelina, xlvii.

3. Anything used for decoration or finish; an ornamental fitting of any sort: usually in the plural: as, the *trimmings* of a harness or of a hat.

> His sheepskin gown had a broad border of otter fur, and on his head was a blue cloth cap with sable *trimmings*.
> *The Century*, XLI. 602.

4. Hence, any accessory or accompaniment: usually in the plural. [Colloq.]

> Whenever I ask a couple of dukes and a marquis or so to dine with me, I set them down to a piece of beef, or a leg of mutton and *trimmings*.
> *Thackeray*, Book of Snobs, xx.
>
> Champion, by acclamation of the College heavy-weights, broad-shouldered, bull-necked, square-jawed, six feet and *trimmings*. *O. W. Holmes*, Professor, iii.

trimming-board (trim'ing-bōrd), *n.* A flat surface of hard wood on which paper is laid to be trimmed by the bookbinders' knife.

trimming-joist (trim'ing-joist), *n.* In *carp.*, one of two joists into which the ends of a timber trimmer are framed. See cut under *joist*.

trimmingly (trim'ing-li), *adv.* In the manner of a trimmer; with or by trimming.

trimming-machine (trim'ing-ma-shēn″), *n.* 1. In *sheet-metal work*, a lathe for forming and finishing the edges of sheet-metal pans and other hollow ware.—2. In *shoe-manuf.*, a machine for ornamenting and finishing the edges of upper-leathers. *E. H. Knight*.

trimming-shear (trim'ing-shēr), *n.* A machine for cutting the edges of mats of coir and other heavy material. *E. H. Knight*.

trimness (trim'nes), *n.* The state or quality of being trim; compactness; neatness; snugness.

trimorphic (trī-môr'fik), *a.* [< *trimorph-ous* + *-ic.*] Same as *trimorphous*. *Darwin*.

trimorphism (trī-môr'fizm), *n.* [< *trimorph-ous* + *-ism.*] 1. In *crystal.*, the property of crystallizing in three fundamentally different forms. Titanium dioxid, TiO_2, is an example of trimorphism. In one form it is the mineral octahedrite or anatase; in another, rutile; in a third, brookite.

2. In *biol.*, existence under three distinct forms. It is not rare among insects.

> There are, also, cases of dimorphism and *trimorphism*, both with animals and plants. Thus, Mr. Wallace . . . has shown that the females of certain species of butterflies, in the Malayan archipelago, regularly appear under two or even three conspicuously distinct forms, not connected by intermediate varieties. *Darwin*.

3. In *bot.*, the occurrence of three distinct forms of flowers or other parts upon the same plant, or upon plants of the same species. In trimorphous flowers there are three sets of stamens and pistils, which may be called respectively long-, middle-, and short-length, and in which the pollen from the long stamens is capable of fertilizing only the long-styled forms, the mid-length stamens the mid-styled, etc. Compare *dimorphism*, and see *heterogonous dimorphism* and *trimorphism*, under *heterogonous*.

Trimorphism in Flowers of *Lythrum Salicaria*.
a, the long-styled form; *b*, the intermediate form; *c*, the short-styled form; *s*, style. The calyx and corolla have been removed.

trimorphous (trī-môr'fus), *a.* [< Gr. τρίμορφος, having three forms, < τρεῖς, τρία (see *tri-*), three, + μορφή, form.] Of or pertaining to, or characterized by, trimorphism; having three distinct forms.

> Some substances are stated to be even *trimorphous*, that is, they crystallize in three different systems.
> *W. A. Miller*, Elem. of Chem., I. iii. 4.

trimtram† (trim'tram), *n.* [A varied reduplication of insignificant syllables; cf. *flimflam*, *whimwham*.] A trifle; an absurdity; a piece of folly or nonsense. *Smollett*, Sir Lancelot Greaves, xiii.

> Our consciences, now quite unclogged from the fear of his [the Pope's] vain terriculaments and rattle-bladders, and from the fondness of his *trimtrams* and gugaws.
> *Patton* (Arber's Eng. Garner, III. 70).

Trimurti (tri-mör'ti), *n.* [Skt. *trimūrti*, < *tri*, three, + *mūrti*, shape.] The name of the later Hindu triad or trinity, Brahma, Vishnu, and Siva, viewed as an inseparable unity. The sectaries of Brahma, Vishnu, and Siva respectively make their god the original and supreme deity; but considered in their connection Brahma is the creating, Vishnu the preserving, and Siva the destroying principle of the deity, while Trimurti is the philosophical or theological unity which combines the three separate forms in one self-existent being. The Trimurti is represented symbolically as one body with three heads, Vishnu at the right, Siva at the left, and Brahma in the middle.

Trimurti, from Coleman's "Hindu Mythology."

trimyarian (trim-i-ā'ri-an), *a.* and *n.* [< Gr. τρεῖς (τρι-), three, + μῦς, a muscle, + *-arian.*] **I.** *a.* Having three muscular impressions or ciboria on the inner surface of the shell, as a bivalve mollusk: correlated with *monomyarian*, *dimyarian*, etc.

II. *n.* A trimyarian bivalve.

trinal (trī'nal), *a.* [< LL. *trinalis*, < L. *trini*, three each, threefold, triple: see *trine*.] Threefold; triple.

> There is a *trinall* kinde
> Of seeming good religion, yet I finde
> But one to be embrac'd, which must be drawne
> From Papist, Protestant, or Puritane.
> *Times' Whistle* (E. E. T. S.), p. 10.
>
> That far-beaming blaze of majesty,
> Wherewith he wont at Heaven's high council-table
> To sit the midst of *Trinal* Unity,
> He laid aside. *Milton*, Nativity, l. 11.

trinary (trī'nā-ri), *a.* [< ML. **trinarius* (equiv. to L. *ternarius*: see *ternary*), < L. *trini*, three each, threefold: see *trine*.] Consisting of three parts, or proceeding by threes; ternary.—**Trinary proposition.** See *proposition*.

> I made a poker o' the spin'le,
> An' my auld mither brunt the *trin'le*.
> *Burns*, The Inventory.

2†. A taper made of a long string of wax rolled or wound into a coil.

Whether they have not removed all images, candlesticks, *trindels*, or rolls of wax.
Abp. Cranmer, Articles of Visitation.

These long strings of wax taper were not very thick, and instead of being cut into sizes short enough for use at the altar and about the church, were left in their one entire length, coiled up, however, into folds, so as to form what we are to understand by *trindles*, or rolls of wax.
Wilkins, Con., iv. 7, in Rock's Church of our Fathers, III. [I. 237, note.

3. In *bookbinding*, one of several pieces of wood or generally metal, of this form ⟨═══⟩, which are put between the cords and boards to flatten the back and the fore edge of the book preparatory to cutting.

Before the face [of a book] is cut, it is necessary to have the back flattened by passing *trindles* through between the cords and the boards. *Encyc. Brit.*, IV. 43.

trindle (trin′dl), *v.*; pret. and pp. *trindled*, ppr. *trindling*. [< ME. *trindlen;* a var. of *trendle, trundle.*] **I.** *intrans.* **1.** To roll.

Trine immersion or **aspersion**, the immersion or sprinkling of a person in baptism thrice—once in the name of each person of the Trinity.

II. *n.* **1.** A set or group of three; a trio; a triad.

Appeare then, O thou treble *Trine*
Of number, with the Muses nine.
Heywood, Prologues and Epilogues (Works, ed. 1874, VI. [351).

A single *trine* of brazen tortoises. *Mrs. Browning.*

2. [*cap.*] Specifically, the Trinity.

If a good Disputant, then, in the stead
Of finding out the Truth, with Truth I wrangle;
Or, if into Arithmeticke incline,
In studying Number, I forget the *Trine.*
Heywood, Hierarchy of Angels, p. 489.

The mighty *Trine* the triple empire shared.
Dryden, Britannia Rediviva, l. 33.

3. In *astrol.*, the aspect of two planets distant from each other 120 degrees, or the third part of the zodiac. The trine was supposed to be a benign aspect.

Fortunate aspects of *trine* and sextile,
Ready to pour propitious influences.

trinitrobenzene (trī-nī-trō-ben′zēn), *n.* [< *tri-* + *nitric* + *benzene.*] A substance, $C_6H_3(NO_2)_3$, prepared by the continued action of nitric acid on benzene, and convertible into picric acid by the action of some oxidizing agents.

trinity (trin′i-ti), *n.* [< ME. *trinitee, trynite*, < OF. *trinite*, F. *trinité* = Pr. *trinitat* = Sp. *trinidad* = Pg. *trindade* = It. *trinità* = G. *trinität* = W. *trindod* = Ir. *trionnoid* = Gael. *trionaid*, < LL. *trinita(t-)s*, the number three, a triad, in theol. the Trinity (the word in all senses being first found in Tertullian), < L. *trinus*, threefold, pl. *trini*, three by three: see *trine*[3].] **1.** The condition of being three; threeness.—**2.** A set or group of three; a triad; a trio; a trine.

The world's great *trinity*, Pleasure, Profit, and Honor.
Roger Williams.

3. [*cap.*] The union of three persons—Father, Son, and Holy Spirit—in one Godhead; the threefold personality of the one divine being. The statements of the doctrine of the Trinity in the creeds of Christendom are the result of attempts to reconcile

the accepted teaching of Scripture (1), with reference to the Father, the Son, and the Holy Spirit, that each possesses the divine attributes, and is worthy to receive divine worship, and (2), as opposed to every form of polytheism, that there is but one God. To harmonize these two propositions has been one of the problems of theology; and the church doctrine of the Trinity has been the result. The most ancient symbol in which there occurs a distinct statement of this doctrine is the Athanasian, in which it is thus stated: "We worship one God in Trinity, and Trinity in unity; neither confounding the Persons, nor dividing the substance." The term *Trinity* is applied, however, in ecclesiastical literature to different philosophical explanations of the Biblical teaching. Some have held to a trinity of manifestation, one God revealing himself to mankind in three persons; some to a unity of will and a difference in other elements of being; others, again, to a subordination, though not an inferiority, of the Son to the Father, and of the Holy Spirit to the Father and the Son; others have attempted a mystical explanation of the Trinity, as, for example, the Swedenborgians, who hold that "the Father, Son, and Holy Spirit are three essentials of one God, which make one, just as the soul, body, and operation make one in man"; while still others have used language in explanation of the Trinity which makes it, as thus explained, approach tritheism — that is, the doctrine that there are three Gods. The received doctrine of the Christian church among Trinitarians may be fairly stated to be that we are taught by the Scriptures to believe that there is but one God, and yet three equal subjects in the one Godhead, who are described as persons, but that we are unable to determine in what sense these three are separate and in what sense they are united in one.

So at his Baptizynge was alle the hool *Trynytee*.
Mandeville, Travels, p. 104.

Jhesu that syttyth yn *Trynyté*,
Blesse the fadur that gate the.
Octavian (ed. Halliwell), l. 958.

O holy, blessed, and glorious *Trinity*, three Persons and one God. *Book of Common Prayer*, Litany.

4. A symbolical representation of the mystery of the Trinity, frequent in Christian art. One of the most general forms in which the Trinity has been symbolized consists of a figure of the Father seated on a throne, the head surrounded with a triangular nimbus, or surmounted with a triple crown, Christ with the cross in

Trinity, late 13th century.— Church of St. Urbain, Troyes, France. (From Viollet-le-Duc's "Dict. de l'Architecture.")

front, and the Holy Spirit, in the form of a dove, resting on the cross. The mystic union of the three persons has also been symbolized by various emblems or devices in which three elements are combined into one whole, as, for instance, by the equilateral triangle, or a combination of the triangle, the circle, and sometimes the trefoil.

5. In *her.*, a bearing compounded of an orle, a pall, and four roundels, three at the angles of the orle where the bands of the pall meet it, the fourth at the intersection of the bands of the pall. This last roundel bears the word *deus;* the other three, the words *pater, filius,* and *spiritus sanctus* respectively; each part of the pall bears the word *est;* each part of the orle the words *non est.*— **Trinity ring,** a finger-ring decorated with three very prominent and emphasized bosses or other ornaments. Such rings in bronze, of three types, have been found in Ireland, and are of very great antiquity. The name was given by ignorant finders, who assumed that they were made for Christian ecclesiastics.— **Trinity Sunday,** the Sunday next after Pentecost or Whitsunday, observed by the Roman Catholic and Anglican churches. It falls upon the octave of Pentecost as the day kept in honor of the three persons of the Trinity. The corresponding Sunday in the Greek Church is called *All Saints' Sunday.* The Anglican Church names the Sundays succeeding this day, until Advent, *first, second, third,* etc., *Sunday after Trinity,* while the Roman Catholic Church reckons these Sundays from Pentecost. — **Trinity term.** See *term.*

trinityhood (trin′i-ti-hůd), *n.* [< *trinity* + *-hood.*] The state or character of being in a trinity. *Westminster Rev.*, CXXVII. 200. [Rare.]

triniunity† (trin-i-ū′ni-ti), *n.* [< L. *trini,* three each, triple (see *trine*[3]), + *unita(t-)s,* unity: see *unity.*] Triunity; trinity. [Rare.]

As for terms of trinity, *triniunity,* . . . and the like, they reject them as scholastic notions not to be found in Scripture. *Milton.*

trink[1]† (tringk), *n.* [Prob. a var. of *trick*[1], taken as the base of *trinkery, trinket*[1]. Cf. E. dial. *trincums,* trinkets.] A trick or fancy. [Rare.]

Hiz beard smugly shaven; and yet his shyrt after the nu *trink,* with ruffs fayr starched, sleeked, and glistering like a payr of nu shooz.
R. Laneham, Letter (1575), in J. Nichols's Progresses, [etc., of Queen Elizabeth, I. 460.

trink[2]† (tringk), *n.* [Origin obscure; Sp. *trinca,* a rope, cord, *trincas,* lashings, = It. *trinca,* a cable. Cf. *trinket*[2].] A kind of fishing-net. *Minsheu,* 1617.

Stat. 2 *Hen. VI.*, xv.

trinkery†, *a.* [< *trink*[1] + *-ery* (cf. *trumpery, a.*).] Ornamental.

Long for thee Princesse thee Moors gentilitye wayted,
As yet in her pincking not pranckt with *trinckerye* trincketes. *Stanihurst,* Æneid, iv.

trinket[1] (tring′ket), *n.* [Early mod. E. also *trinkette, trynket, trynkette, trenket;* < ME. *trynket, trenket, trenkett,* < OF. **trenquet,* also assibilated *trenchet, tranchet,* a shoemakers' knife (= Sp. *trinchete,* a shoemakers' paring-knife, *tranchete,* a shoemakers' heel-knife, a broad curved knife for pruning), < **trenquer, trencher,* F. *trancher,* cut: see *trench.* The order of development seems to have been 'knife,' 'ornamental knife,' 'any glittering ornament.' There may have been some confusion with the diff. word *trinket*[2]. Cf. *trink*[1], *trinkery.*] **1**†. A knife, especially a shoemakers' knife. *Cath. Ang.*, p. 392.

Trenket, sowtarys knyfe. *Prompt Parv.*, p. 502.

2. A trifling ornament; a jewel for personal wear, especially one of no great value; any small fancy article; a cherished thing of slight worth.

I have pullyd down the image of your lady at Caversham, with all *trynkettes* abowt the same, as schrowdes, candels, images of wexe, crowches, and brochys, and have thorowly defacyd that chapell.
Letters relating to the Suppression of Monasteries, 1538 [(Camden Soc.), cix.

Here are my *trinkets,* and this lusty marriage
I mean to visit; I have shifts of all sorts.
Fletcher and Shirley, Night-Walker, i.

The same teachers with Christes doctrine mingled Jewishnes and supersticious philosophie, . . . honouring the sunne, the moone, and starres, with such other small *trinkettes* of this world. *J. Udall,* Colossians, Argument.

I have sold all my trumpery; . . . not a ribbon, glass, pomander, brooch, table-book, ballad, knife, tape, glove, shoe-tie, bracelet, horn-ring, to keep my pack from fasting: they throng who should buy first, as if my *trinkets* had been hallowed, and brought a benediction to the buyer. *Shak.*, W. T., iv. 4. 613.

She wears more "jewelry," as certain young ladies call their *trinkets,* than I care to see.
O. W. Holmes, Professor, i.

trinket[1] (tring′ket), *v. i.* [Formerly sometimes *trinquet;* < *trinket*[1], *n.*] To deal in a small, selfish way; hold secret communication; have private intercourse; intrigue; traffic.

Had the Popish Lords stood to the interest of the Crown, . . . and not *trinketed* with the enemies of that and themselves, it is probable they had kept their seats in the House of Lords for many years longer.
Roger North, Examen, p. 63. (*Davies.*)

Scott, Heart of Mid-Lothian, xviii.

trinket[2]† (tring′ket), *n.* [Perhaps < W. *tranced,* a cup with a handle, appar. confused with *drink,* or with OF. *trinquer* = It. *trincare,* drink, quaff, carouse, < MHG. G. *trinken,* drink: see *drink.*] A vessel to drink or eat out of. See the quotations.

Trinket; a Porringer. *Ray,* Eng. Words (ed. 1691), p. 125.

Mrs. Bargrave asked her whether she would drink some tea. Says Mrs. Veal, I do not care if I do; but I'll warrant you, this mad fellow (meaning Mrs. Bargrave's husband) has broke all your *trinkets.* But, says Mrs. Bargrave, I'll get something to drink in for all that.
Defoe, True Relation of the Apparition of One Mrs. [Veal . . . to One Mrs. Bargrave.

trinket[3]† (tring′ket), *n.* [Also *tringuet, trinkette;* < OF. *trinquet,* the highest sail (Cotgrave), F. *trinquet,* foremast (in lateen-rigged vessels), *trinquette,* forestaysail, storm-jib, = Sp. *trinquete,* foremast, foresail, trinket, also tennis (*trinquetilla,* forestaysail) (Newman), = Pg. *trinquete,* trinket, = It. *trinchetto,* a topsail, etc.; perhaps orig. a 'three-cornered' sail, < L. *triquetrus,* three-cornered, triangular: see *triquetrous.* The nasalization may have been due to association with Sp. *trincar,* keep close to the wind (*trincar los cabos,* fasten the rope-ends), < *trinca,* a rope for lashing fast (see *trink*[2]).] A topsail; perhaps, originally, a lateen sail carried on the foremast.

The *trinket* and the mizen were rent asunder.
Hakluyt's Voyages, III. 411.

A small Sayle of a Shippe, called the *Trinkette,* or foresayle, which is most properly the toppe-sayle of all the Shippe. *Minsheu* (1617).

Sir W. C. writes from Brussels that the French . . . made account to have kept a brave Christmas here at London, and for that purpose had trussed up their *trinkets* half topmast high. *Court and Times of Charles I.*, II. 208.

trinket[4] (tring′ket), *n.* [Appar. for **trinklet,* < *trinkle*[1] + *-et;* a var. of *tricklet.*] A streamlet. [Prov. Eng. and Irish.]

Trinket . . . is used about Dublin, and also in the northern counties, with the sense of "a little stream or watercourse by the roadside." *N. and Q.*, 7th ser., VI. 372.

trinketer (tring′ket-ėr), *n.* [< *trinket*[1] + *-er*[1].] One who trinkets, traffics, or intrigues, or carries on secret petty dealing.

I have possessed this honourable gentleman with the full injustice which he has done and shall do to his own soul, if he becomes thus a *trinketer* with Satan.
Scott, Kenilworth, ix.

trinketry (tring′ket-ri), *n.* [< *trinket*[1] + *-(e)ry.*] Trinkets collectively.

The Moor, who had a little taste for *trinketry,* made out to get into his heap the most of the pearls and precious stones, and other baubles. *Irving,* Alhambra, p. 314.

trinkle[1] (tring′kl), *v. i.*; pret. and pp. *trinkled,* ppr. *trinkling.* [< late ME. *trinklen;* appar. a nasalized var. of *trickle,* prob. due to confusion with *trintle, trindle.*] **1.** To trickle. *Halliwell.* [Obsolete or dialectal.]

Ouer all his body furth get the swete thik,
Lyke to the *trynkland* blak stremes of pik.
Gavin Douglas, tr. of Virgil, p. 307.

And ae he kiss'd her pale, pale lips,
And the tears cam *trinkling* doun.
Lord Lovel (Child's Ballads, ii. 163).

2. To hang or trail down; flow. [Scotch.]

Her yellow hair, beyond compare,
Comes *trinkling* down her swan-white neck.
Burns, Oh Mally's Meek.

trinkle[2] (tring′kl), *v. i.*; pret. and pp. *trinkled,* ppr. *trinkling.* [A var. of *tinkle.*] **1.** To tinkle. [Rare.]

Along the dark and silent night,
With my Lantern and my Light,
And the *trinkling* of my Bell,
Thus I walk, and this I tell. *Herrick.*

2. To tingle; throb; vibrate. [Scotch.]

The main chance is in the north, for which our hearts are *trinkling.* *Baillie's Letters,* I. 445. (*Jamieson.*)

trinkle[3] (tring′kl), *v. i.*; pret. and pp. *trinkled,* ppr. *trinkling.* [Appar. a var. (if so, unusual) of *trinket*[1].] To treat underhand or secretly (with); tamper, as with the opinions of another. *Halliwell.* [Obsolete or prov. Eng.]

Many discontented persons in England . . . were suspected to have *trinkled,* at least with Holland, about raising seditions, and perhaps insurrections in England.
Sir W. Temple, Works, II. 286.

trinoctial (trī-nok′shal), *a.* [< L. *trinoctialis,* for three nights, < *trinoctium,* a space of three nights, < *tres* (*tri-*), three, + *nox* (*noct-*), night: see *night.*] Comprising three nights.

trinoda† (trī-nō′dä), *n.* [ML., fem. of **trinodus,* equiv. of L. *trinodis,* having three knots, hence threefold, < *tres* (*tri-*), three, + *nodus,* knot: see *node, knot*[1].] An old land-measure, equal to three perches.

trinodal (trī-nō′dal), *a.* [< L. *trinodis,* having three knots, < *tres* (*tri-*), three, + *nodus,* knot, node.] **1.** In *bot., zoöl.,* and *anat.,* having three nodes or joints, as a stem or the fingers; triarticulate. — **2.** In *math.,* having three nodes.

trinoda necessitas. [ML., threefold obligation: ML. *trinoda,* fem. of **trinodus,* threefold; L. *necessitas,* necessity, obligation.] In *Anglo-Saxon law,* the three services due to the king in respect of tenure of lands in England; obligations of the military service incumbent on the fyrd, or body of freemen, and corresponding to the feudal services of tenants in later times.

The *trinoda necessitas,* to which all lands were subject. This consisted of the duty of rendering military service (expeditio), and of repairing bridges and fortresses (pontis arcisve constructio). These were duties imposed on all landowners, distinct from the feudal services of later times, thus tending more and more to become duties attaching to the possession of the land owed to and capable of being enforced by the king or the greatman of the district. *K. E. Digby,* Hist. Law of Real Property, p. 13.

trinode (trī′nōd), *n.* [< L. *trinodis,* having three knots, < *tres* (*tri-*), three, + *nodus,* knot: see *node.*] In *geom.*, a singularity of a plane curve formed by the union of three nodes.

trinomial (trī-nō′mi-al), *a.* and *n.* [After F. *trinôme,* < L. *tres* (*trī-*), three, + *nomen,* name

(term), + *-al*. Cf. *binomial*.] **I.** *a.* **1.** In *zoöl.* and *bot.*: (*a*) Consisting of three terms, as the technical name of a subspecies; trionymal: thus, the name *Certhia familiaris americana* is *trinomial*. See *binomial, polynomial*. (*b*) Using or admitting trinomial or trionymal names in certain cases: as, the *trinomial* system of nomenclature. Also *trinominal*.—**2.** In *alg.*, consisting of three terms connected by either of the signs + and −: thus, $a + b + c$, or $x^2 - 2xy + y^2$ is a *trinomial* quantity.

II. *n.* **1.** A technical name consisting of three words, of which the first is the name of the genus, the second that of the species, and the third that of a geographical race, subspecies, or variety; a trionym. The use of trinomials, formerly interdicted and supposed to be contrary to the canons of nomenclature, has of late become common, especially among American naturalists. (See *trinomialism*.) A name of three terms the second of which is a generic name in parenthesis (see *subgenus*) does not constitute a trinomial, and no proper trinomial admits any mark of punctuation, or any word or abbreviation, between its three terms. Thus: *Polygonum lapathifolium incanum* is not a pure trinomial.

2. In *alg.*, a trinomial expression. See I., 2.

trinomialism (trī-nō′mi-ạl-izm), *n.* [< *trinomial* + *-ism*.] The practice of naming objects of natural history in three terms; the use of trinomials, or that system of nomenclature which admits them. Trinomialism is one of the two most distinctive features of what is called the American school in zoölogy and botany, the beginning of the zoölogical system with 1758 (instead of 1766) and of the botanical with 1753 (see *synonym*, 2, 3) being the other; and it has been advocated especially by the ornithologists.

trinomialist (trī-nō′mi-ạl-ist), *n.* [< *trinomial* + *-ist*.] One who uses trinomials or favors the trinomial system of nomenclature.

trinomiality (trī-nō-mi-al′i-ti), *n.* [< *trinomial* + *-ity*.] The character of being trinomial; the expression of a name in three words; trinomialism. See *trinomial*, *n.*, 1.

trinomially (trī-nō′mi-ạl-i), *adv.* According to the principles or by the method of trinomialism; by the use of trinomials: in any given case, as that cited in the quotation, implying the reduction of what had been before rated as a full species to the rank of a conspecies or subspecies.

There has been quite a consensus of opinion among some of the German ornithologists that they [the yellow wagtails] ought to be treated *trinomially*. *Nature*, XXX. 257.

trinominal (trī-nom′i-nạl), *a.* [< L. *trinominis*, having three names, < *tres* (*tri-*), three, + *nomen*, name: see *nominal*. Cf. *trinomial*.] Same as *trinomial*, *a.*, 1. Also *trionymal*.

trinquet†. An obsolete spelling of *trinket*[1], *trinket*[3].

trintle (trint′l), *v.* A dialectal (Scotch) variant of *trindle*.

trinunion† (trin-ū′nyon), *n.* [< L. *trinus*, threefold, + *unio*(*n-*), union: see *trine*[3] and *union*.] A trinity. [Rare.]

But that same onely wise *Trin-vnion*
Workes miracles, wherein all wonder lies.
Davies, Microcosmos, p. 79. (*Davies*.)

trinunionhood† (trin-ū′nyon-hụd), *n.* [< *trinunion* + *-hood*.] Triunity. [Rare.]

Who (were it possible) art more compleate
In Goodnesse than Thine owne *Trin-vnionhood*.
Davies, Muse's Sacrifice, p. 32. (*Davies*.)

trio (trē′ō or trī′ō), *n.* [= F. Sp. Pg. *trio* = G. Dan. Sw. *trio*, < It. *trio*, a musical composition in three parts, a trio, glee, < L. *tres*, neut. *tria*, three: see *three*.] **1.** In *music*, a composition or movement for three solo parts, either vocal or instrumental, usually without accompaniment. Specifically, either (*a*) an instrumental work for three instruments and planned like a quartet, or (*b*) a second or subordinate division of a minuet, scherzo, or march, usually in a contrasted key and quieter in style, so as to be a foil to the principal division: so called because originally performed by a trio of instruments.

2. A company of three vocalists or instrumentalists who perform trios.—**3.** A group, combination, or association of three.

The *trio* were well accustomed to act together, and were linked to each other by ties of mutual interest and advantage. *Dickens*, Old Curiosity Shop, li.

4. In the game of piquet, three aces, kings, queens, or knaves, held in one hand: a counting combination of cards.

triobolar† (trī-ob′ō-lạr), *a.* [Also, erroneously, *triobular*; < L. *triobolus*, < Gr. τριώβολον, a three-obol piece, < τρεῖς (τρι-), three, + ὀβολός, obol: see *obol*.] Of the value of three oboli; hence, mean; worthless.

A trivial and *triobular* author for knaves and fools, an image of idleness, an epitome of fantasticality, a mirror of vanity. *G. Harvey*, Four Letters.

triobolary† (trī-ob′ō-lā-ri), *a.* [As *triobolar*.] Same as *triobolar*. *Howell*, Letters, ii. 48.

triocephalus (trī-ō-sef′ạ-lus), *n.* [NL., irreg. for *triencephalus*.] Same as *triencephalus*.

trioctile (trī-ok′til), *n.* [< L. *tres* (*tri-*), three, + *octo*, eight, + *-ile* (cf. *octile*).] In *astrol.*, an aspect of two planets, with regard to the earth, when they are three octants or eighth parts of ★a circle (that is, 135°) distant from each other.

triod (trī′od), *n.* [< Gr. τρεῖς (τρι-), three, + ὁδός, way.] A sponge-spicule of the triaxon or triradiate type, having three equal rays; a three-way spicule.

Triodia (trī-ō′di-ạ), *n.* [NL. (R. Brown, 1810); named from the three-toothed flowering glume, < Gr. τρεῖς (τρι-), three, + ὀδούς, tooth.] A genus of grasses, of the tribe *Festuceæ*, type of the subtribe *Triodieæ*. It is characterized by panicled spikelets of numerous flowers, the three-nerved flowering glume bearing three teeth or lobes, the middle tooth forming a cusp or awn. The American species that some authors refer to this genus are classed in other genera by American botanists (see below). Excluding these there remain only 4 species, natives of Australia. They are perennial grasses, often hard, rigid, and with ★a branching or stoloniferous base, bearing usually narrow, stiff, convolute leaves, sometimes tapering into a pungent point. The genera *Sieglingia* (Bernhardi, 1800) and *Tricuspis* and *Triplasis* (both of Beauvois, 1812) are included in this genus by many authors. *Tricuspis seslerioides*, known as *tall redtop*, is an ornamental grass of sandy places from New York southward, with a large compound panicle, sometimes a foot broad, bearing very numerous shining purple spikelets. For *Triplasis purpurea*, a small species remarkable for its acid taste, see *sand-grass*, 2. Two other species of *Triplasis* occur on the Atlantic coast in Florida or northward. For *Sieglingia decumbens*, see *heather-grass*.

Triodion (trī-ō′di-on), *n.* [MGr. τριώδιον, < τρεῖς (τρι-), three, + ὁδός, way.] An office-book of the Greek Church, containing the offices from the Sunday before Septuagesima to Easter eve.

Triodites (trī-ō-dī′tēz), *n.* [NL. (Osten-Sacken, 1877), < Gr. τριοδίτης, one who frequents cross-roads, a street-lounger, also common, vulgar, < τρίοδος, also τριοδία, a meeting of three roads: see *triod*.] A genus of bee-flies, of the dipterous family *Bombyliidæ*. They have the appearance of an elongated *Anthrax*, but the eyes of the male are

Triodites mus, female.

contiguous for a short distance on the vertex. The only known species, *T. mus*, of the western United States, is a notable insect in that its larva is a voracious feeder on the eggs of the short-horned grasshoppers, including the destructive Rocky Mountain locust, *Melanoplus spretus*.

Triodon (trī′ō-don), *n.* [NL. (Cuvier, 1829), < Gr. τρεῖς (τρι-), three, + ὀδούς = E. *tooth*.] **1.** A genus of plectognath fishes, typical of the family *Triodontidæ*.—**2.** [*l. c.*] A member of this genus.

Triodontidæ (trī-ō-don′ti-dē), *n. pl.* [NL., < *Triodon*(*t-*) + *-idæ*.] A family of gymnodont plectognaths, typified by the genus *Triodon*. They have an extensive abdominal fold of skin like a dewlap, and rhombiform scales; the upper jaw is divided by a median suture, but the under jaw is undivided, the two jaws thus giving the appearance of three teeth (whence the name). Also *Triodontes*, *Triodontoidei*, *Triodontoidea*.

triodontoid (trī-ō-don′toid), *a.* and *n.* **I.** *a.* Of or pertaining to the *Triodontidæ*.

II. *n.* A triodon, or any member of the above group.

Triœcia (trī-ē′shiạ), *n. pl.* [NL., < Gr. τρεῖς (τρι-), three, + οἶκος, house.] A name at one time proposed by Linnæus for an order of plants of the class *Polygamia*. It was intended to comprise plants with stamens only on one individual, pistils on another, and bisexual flowers on a third. The genus *Ficus* sometimes conforms to this description.

triœcious (trī-ē′shus), *a.* [< Gr. τρεῖς (τρι-), three, + οἶκος, house.] In *bot.*, having male, female, and hermaphrodite flowers, each on different plants; of the Linnean order *Triœcia*.

triœciously (trī-ē′shus-li), *adv.* In a triœcious manner.

trioicous (trī-oi′kus), *a.* In *bot.*, same as *triœcious*.

triole (trē′ōl), *n.* [Dim. of *trio*; cf. *triolet*.] In *music*, same as *triplet*.

Is called a *triole*, and means that the three notes are to be played in the time of [two].
S. Lanier, Science of Eng. Verse, p. 106.

triolein (trī-ō′lē-in), *n.* [< L. *tres* (*tri-*), three, + E. *ole*(*ic*) + *-in*[2].] A glycerol ester containing three oleic acid radicals. It is at ordinary temperatures a clear oily liquid, nearly colorless, and is the chief constituent of all fatty oils.

triolet (trē′ō-let), *n.* [< F. *triolet*, a triolet, OF. *triolet*, a triolet, also trefoil, < It. *trio*, three: see *trio*.] **1.** A poem in fixed form, borrowed from the French, and allied to the rondel and rondeau. It consists of eight lines on two rimes, and is generally written in short measures. The first pair of lines are repeated as the seventh and eighth, while the first is repeated as the fourth. Representing the repeated lines by capital letters the rime-scheme would thus be A, B, a, A, a, b, A, B. In humorous examples a fresh sense is often skilfully given to the fourth line. The first French triolet is said to have been by Adam le Roi (end of thirteenth century). Triolets were written in England as early as 1651 by Patrick Carey, whose efforts Sir Walter Scott published in 1820.

★**2.** In *music*, same as *triplet*.

trional (trī′ō-nal), *n.* A synthetic remedy used as a hypnotic. [Recent.]

Triones (trī-ō′nēz), *n. pl.* [NL., < L. *triones*, the plowing-oxen: see *Septentrion*.] In *astron.*, a name sometimes given to the seven principal stars in the constellation Ursa Major, popularly called Charles's Wain.

Trionychidæ (trī-ō-nik′i-dē), *n. pl.* [NL., < *Trionyx* (*-onych-*) + *-idæ*.] A family of turtles, typified by the genus *Trionyx*; soft-shelled turtles. This family, though not a large one, is an old type, represented from the Cretaceous period onward, and at the present day by several generic types of the warmer waters of both hemispheres, being thus very widely distributed. The body is very flat and subcircular or disk-like, and covered with soft, tough integument instead of a shell; the skin is variously roughened or tuberculous in different cases; the feet are flattened, webbed, and formed for swimming, and end in three claws; the neck is long, and the snout is sharp. These turtles are entirely aquatic, and live in ponds, where they usually lie half buried in the mud. They are chiefly carnivorous, highly predaceous and ferocious, and bite severely. The flesh of some species is highly esteemed. The largest living soft-shelled turtle is *Chitra indica*, sometimes taken as type of a different family. (See *Chitra*, *Chitradæ*.) Several American forms occur in the United States, as *Trionyx* (or *Aspidonectes*) *ferox*, the southern soft-shelled turtle, of the lower Mississippi and of other rivers flowing into the Gulf of Mexico, 12 to 18 inches in length of body; *Aspidonectes spinifer*, with several conical protuberances on the back (see cut under *Aspidonectes*); and *Emyda mutica*, a smaller species, up to 12 inches in length of carapace, inhabiting the middle and upper Mississippi region and some of the tributaries of the St. Lawrence river (see *Amyda*). Also, wrongly, *Trionycidæ*.

trionychoid (trī-on′i-koid), *a.* Resembling or related to a turtle of the genus *Trionyx*; belonging to the *Trionychoidea*.

Trionychoidea (trī-on-i-koi′dē-ạ), *n. pl.* [NL., < *Trionyx* (*-onych-*) + *-oidea*.] The *Trionychidæ* regarded as a suborder of *Chelonia*, of equal rank with *Athecæ* (the *Sphargididæ*) and with *Testudinata*, 2, or *Thecophora* (all other chelonians).

trionym (trī′ō-nim), *n.* [< Gr. τρεῖς (τρι-), three, + ὄνυμα, name.] A name consisting of three terms; a trinomial name in zoölogy or botany; the name of a subspecies in the trinomial system of nomenclature. See *trinomial*, *n.*, and *trinomialism*. *Coues*, The Auk, 1884, p. 321.

trionymal (trī-on′i-mạl), *a.* [< *trionym* + *-al*.] Of or pertaining to a trionym; trinomial. *J. A. Allen*, The Auk, 1884, p. 352.

Trionyx (trī′ō-niks), *n.* [NL. (Geoffroy St. Hilaire, 1809), < Gr. τρεῖς (τρι-), three, + ὄνυξ (ὀνυχ-), a nail: see *onyx*.] A genus of soft-shelled turtles, typical of the *Trionychidæ*: inexactly synonymous with *Aspidonectes*. It is so called from the three claws in which the webbed feet end. See *Trionychidæ*.

Triopa (trī′ō-pạ), *n.* [NL. (Johnston), < Gr. τρεῖς (τρι-), three, + ὀπή, opening, hole.] The

Clubbed Dorid (*Triopa claviger*).

typical genus of *Triopidæ*, having a row of clubbed processes along each side of the mantle, as *T. claviger*.

Triopidæ (trī-op′i-dē), *n. pl.* [NL., < *Triopa* + *-idæ*.] A family of nudibranch gastropods, typified by the genus *Triopa*; the clubbed dorids, having slightly hooked teeth in very numerous

rows on a broad radula, and tentacles retractile within plaited sheaths. See cut under *Triopa*.

trior (trī′ȯr), *n.* [See *trier*.] In *law*, a person appointed by the court to examine whether a challenge to a juror or a panel of jurors is just.

triorchis (trī-ôr′kis), *n.* [NL., < Gr. τρεῖς (τρι-), three, + ὄρχις, testicle.] One who has three testicles.

triorthogonal (trī-ôr-thog′ō-nal), *a.* [< L. *tres* (*tri-*), three, + E. *orthogonal*.] Having three lines, or systems of lines, crossing all at right angles to one another.

Triosteum (trī-os′tē-um), *n.* [NL. (Linnæus, 1753), < Gr. τρεῖς (τρι-), three, + ὀστέον, bone.] A genus of gamopetalous plants, of the family *Caprifoliaceæ* and tribe *Viburneæ*. It is characterized by a tubular bell-shaped corolla gibbous at the base, and a three- to five-celled ovary with one ovule in each cell. There are five species, natives of Asia and the eastern and central United States. They are herbs with a perennial root and little-branched stem with scaly buds. The leaves are sessile, entire, opposite, and somewhat connate at the base. The dull-yellow, purple, or whitish flowers are solitary, or clustered in the axils, or rarely condensed into short terminal spikes. The fruit is a coriaceous or fleshy berry, with smooth, bony, angled or ribbed seeds. *T. perfoliatum*, a rather coarse erect species with purplish flowers and orange-colored berries, occurring from New York to Alabama, is known as *feverroot*, also as *horse-gentian*, *Tinker's-weed*, *wild ipecac*, and *wild coffee*; it produces a long, thick, yellowish or brownish root with a nauseous taste and odor, locally used as a cathartic and emetic. One other species, *T. angustifolium*, with yellowish flowers, occurs in the United States; one, *T. Himalayanum*, with irregular corolla, in the Himalayas; and two others in China, one of which, *T. sinuatum*, extends to Japan.

triovulate (trī-ō′vū-lāt), *a.* [< L. *tres* (*tri-*), three, + NL. *ovulum*, ovule, + *-ate*[1].] In *bot.*, having three ovules; three-ovuled.

trioxid, trioxide (trī-ok′sid, -sid or -sīd), *n.* An oxid containing three oxygen atoms: as, sulphur *trioxid*, SO_3. Also *tritoxid*, *tritoxide*.

trip[1] (trip), *v.*; pret. and pp. *tripped*, ppr. *tripping*. [Early mod. E. also *tryppe*; < ME. *trippen* = MD. *trippen*, step lightly, trip, cause to stumble, D. *trippen*, trip, skip, = Sw. *trippa* = Dan. *trippe*, tread lightly, trip; cf. freq. D. *trippelen* = LG. *trippeln*, > G. *trippeln*, trip; prob. a secondary form of the verb appearing as the source of *trap*[1], *trap*[2], *trap*[3], and ult. of *tramp*.]

I. *intrans.* 1. To run or step lightly; skip, dance, or walk nimbly along; move with a quick, light tread.

> *Robin Hood and the Butcher* (Child's Ballads, V. 37).

=**Syn.** 1. *Hop*, *Leap*, etc. See *skip*[1].

II. *trans.* 1. To perform with a light or tripping step, as a dance.

> Every maid
> Fit for this revel was arrayed,
> The hornpipe neatly *tripping*.
> *Drayton*, Nymphidia.

2. To cause to stumble or fall, make a false step, or lose the footing by catching or entangling the feet or suddenly checking their free action: often followed by *up*.

> A stump doth *trip* him in his pace;
> Down comes poor Hob upon his face.
> *Drayton*, Nymphidia.
>
> Your excuse must be that . . . a mop stood across the entry, and *tript* you *up*.
> *Swift*, Advice to Servants (Footman).

3. To cause to stumble by placing an obstruction in the way; hence, to give a wrong turn to, or cause to halt or stumble, by presenting a mental or moral stumbling-block.

> Be you contented, wearing now the garland, . . .
> To *trip* the course of law and blunt the sword
> That guards the peace and safety of your person.
> *Shak.*, 2 Hen. IV., v. 2. 87.

4. To catch in a fault, offense, or error; detect in a misstep or blunder.

> Yea, what and whosoeuer he be that thinkes himselfe a very good Italian, and that to *trip* others.
> *Florio*, It. Dict., Ep. Ded., p. [5].
>
> He must, sir, be
> A better statesman than yourself, that can
> *Trip* me in anything; I will not speak
> Before these witnesses.
> *Fletcher* (*and another*), Noble Gentleman, iii. 4.

5. *Naut.*: (*a*) To loose, as an anchor from the bottom by means of its cable or buoy-rope. (*b*) To turn, as a yard, from a horizontal to a vertical position.

> The royal yards were all *tripped* and lowered together.
> *R. H. Dana, Jr.*, Before the Mast, p. 218.

6. *Theat.*, to double in the center: said of a drop so situated that there is not room enough to hoist it out of sight.—7. In *mech.*: (*a*) To strike against, as a moving part against an obstruction. (*b*) To release suddenly, as the clutch of the windlass of a pile-driver, or the valve-closing mechanism in the trip-gear of a ★steam-engine, etc.

trip[1] (trip), *n.* [Early mod. E. also *tryppe*; < ME. *trippe* = Dan. *trip*, a short step; from the verb.] 1. A light, short step; a lively movement of the feet.

> More fine in *trip* then foote of running roe,
> More pleasant then the field of flowring grasse.
> *England's Helicon* (1614). (*Nares.*)
>
> "Where gang ye, young John," she says,
> "Sae early in the day?
> It gars me think by your fast *trip*
> Your journey's far away."
> *The Fause Lover* (Child's Ballads, IV. 90).

2. A journey or voyage; an excursion; a jaunt; specifically, in transportation, the performance of service one way over a route, the performance of service both ways being a *round trip*.

> An aungell . . . bad me flee
> With hym and the
> On-to Egipte.
> And sertis I dred me sore
> To make my smal *trippe*. *York Plays*, p. 142.

2. The greater part of the stomach of a ruminant, as the ox, dressed and used for food. Tripe includes the whole of the cardiac division of the stomach — that is, of the two compartments known as the rumen, or paunch, and the reticulum. The former (called *plain tripe*) is the most extensive; the latter is the best, being that called *honeycomb tripe*. See cut under *Ruminantia*.

> How say you to a fat *tripe* finely broil'd?
> *Shak.*, T. of the S., iv. 3. 20.

tripedal (trip'e-dal or trī'ped-al), *a.* [< L. *tripedalis*, < *tres* (*tri-*), three, + *pes* (*ped-*), foot: see *pedal*.] Three-footed: as, a *tripedal* stand.

tripe-de-roche (trēp'dė-rōsh'), *n.* [F.: *tripe*, tripe; *de*, of; *roche*, rock.] A vegetable substance sometimes eaten by hunters and arctic explorers when no better food is to be found. It is furnished by various lichens of the genera *Gyrophora* and *Umbilicaria*. Tripe-de-roche is slightly nutritive, but bitter and purgative. See *Pyxinei*.

tripel (trip'el), *n.* Same as *tripoli*.

tripeman (trīp'man), *n.*; pl. *tripemen* (-men). A man who prepares tripe and hawks it about. [London, Eng.]

> These portions [of the bullock], with the legs (called "feet" in the trade), form what is styled the *tripe-man's* portion, and are disposed of to him by the butcher for 5*s.* 6*d.* *Mayhew*, London Labour and London Poor, II. 9.

tripennate (trī-pen'āt), *a.* [< L. *tres* (*tri-*), three, + *pennatus*, winged: see *pennate*.] In *bot.*, tripinnate.

tripersonal (trī-pėr'son-al), *a.* [< L. *tres* (*tri-*), three, + *persona*, person: see *personal*.] Consisting of three persons.

> One *Tri-personall* Godhead.
> *Milton*, Reformation in Eng., ii.

tripersonalist (trī-pėr'son-al-ist), *n.* [< *tripersonal* + *-ist*.] A believer in the Trinity; a Trinitarian.

tripersonality (trī-pėr-so-nal'i-ti), *n.* [< *tripersonal* + *-ity*.] The state of existing in three persons in one Godhead; trinity.

> As for terms of Trinity, Triunity, Co-essentiality, *Tripersonality*, and the like, they [the Arian and the Socinian] reject them as Scholastic Notions, not to be found in Scripture. *Milton*, True Religion.

tripery (trī'pėr-i), *n.*; pl. *triperies* (-iz). [= F. *triperie* (= Sp. *tripería*), < *tripe*, tripe: see *tripe* and *-ery*.] A place where tripe is prepared or sold. *Quarterly Rev.*

tripes (trī'pēz), *n.*; pl. *tripedes* (-pē-dēz). [NL., < L. *tripes*, having three feet, < *tres* (*tri-*), three, + *pes*, foot. Cf. *trivet*.] In *teratol.*, a monster having three feet.

tripe-stone (trīp'stōn), *n.* A variety of anhydrite occurring in contorted plates, so named from bearing some resemblance to the convolutions of the intestines. It has been found in Poland.

tripetaloid (trī-pet'a-loid), *a.* [< Gr. τρεῖς (τρι-), three, + πέταλον, leaf (petal), + εἶδος, form.] In *bot.*, appearing as if furnished with three petals: as, a *tripetaloid* perianth.

tripetalous (trī-pet'a-lus), *a.* [< Gr. τρεῖς (τρι-), three, + πέταλον, leaf (petal), + *-ous*.] In *bot.*, three-petaled; having three petals or flower-leaves.

tripe-visaged (trīp'viz'ājd), *a.* Having a face resembling tripe, either in paleness or sallowness, or in being flabby, baggy, and expressionless. [Rare and humorous.]

> Thou damned *tripe-visaged* rascal!
> *Shak.*, 2 Hen. IV., v. 4. 9.

trip-gear (trip'gēr), *n.* In a steam-engine, any combination of devices by which, when the piston has reached a definite point in the stroke, or when, as in automatically variable cut-offs, it has reached a point dependent upon the work demanded of the engine, a sudden release of the valve-opening mechanism from the induction-valve is effected, leaving the latter under control of mechanism which rapidly effects closure. The gear is, in this operation, said to *trip* the valve-closing mechanism, and the operation is called *tripping*. An example of such valve-gear is illustrated in a cut under *steam-engine*. Also called *trip cut-off*.

trip-hammer (trip'ham'ėr), *n.* A tilting-hammer or machine-hammer operated by a cam or other device, which trips the lever and allows the hammer to fall. It is essentially the same as the tilt-hammer (where see cut).

triphane (trī'fān), *n.* [< Gr. τριφανής, appearing threefold, < τρεῖς (τρι-), three, + *-φανής*, < φαίνειν, show.] Haüy's name for spodumene, still often used, especially by French mineralogists.

tripharmacum (trī-fär'ma-kum), *n.* [NL., < Gr. τρεῖς (τρι-), three, + φάρμακον, a drug.] A medicine having three ingredients.

Triphasia (trī-fā'si-ą), *n.* [NL. (Loureiro, 1790), < Gr. τριφάσιος, threefold: see *trifarious*.] A genus of polypetalous plants, of the family *Rutaceæ* and tribe *Aurantieæ*. It is characterized by flowers with three calyx-lobes, three petals, six stamens, and a three-celled ovary with a solitary ovule in each cell. The only species, *T. trifoliata*, the lime-berry, is said to be a native of China, and is widely cultivated throughout the tropics. It is a thorny shrub bearing alternate leaves with ovate obtuse and usually crenate leaflets. The fragrant white flowers are solitary in the axils, and are followed by small reddish berries with a sweet pleasant taste, resembling gooseberries in size and shape, and sometimes imported from the West Indies as a preserve. The shrub is known in the West Indies as *lime-myrtle*, and sometimes incorrectly as *bergamot*; it is used in Key West for hedges, and is often confounded with the trifoliate species or variety of *Citrus* in use as a stock on which to graft the orange.

triphony (trif'ō-ni), *n.* [< MGr. *τριφωνία, < τρίφωνος, three-voiced, < Gr. τρεῖς (τρι-), three, + φωνή, voice.] In *early medieval music*, diaphony for three voices.

triphthong (trif'thông or trip'thông), *n.* [= F. *triphthongue* = Sp. *triptongo* = Pg. *triptongo*, *tritongo* = It. *trittongo*, < NL. *triphthongus*, < MGr. τρίφθογγος, with triple sound or vowel, < Gr. τρεῖς (τρι-), three, + φθογγή, φθόγγος, voice, sound.] A combination of three vowels in a single syllable forming a simple or compound sound; a group of three vowel characters representing combinedly a single or monosyllabic sound, as *eau* in *beau*, *ieu* in *adieu*, *eye*, etc.; a vowel trigraph.

triphthongal (trif-thông'gal or trip-thông'gal), *a.* [< *triphthong* + *-al*.] Pertaining to a triphthong; consisting of a triphthong.

triphyline (trif'i-lin), *n.* [< Gr. τρεῖς (τρι-), three, + φυλή, tribe, community (see *phyle*), + *-ine*2.] A mineral consisting of the phosphates of the three metals iron, manganese, and lithium. It occurs usually in cleavable masses of a bluish- or greenish-gray color. Lithiophilite is a variety of salmon-yellow or clove-brown color, containing chiefly manganese and lithium with very little iron.

triphylite (trif'i-līt), *n.* [< Gr. τρεῖς (τρι-), three, + φυλή, tribe, + *-ite*2.] Same as *triphyline*.

triphyllous (trī-fil'us), *a.* [< Gr. τρίφυλλος, three-leaved, < τρεῖς (τρι-), three, + φύλλον, a leaf.] In *bot.*, three-leaved; having three leaves.

Triphysite (trif'i-sīt), *n.* [< Gr. τρεῖς (τρι-), three, + φύσις, nature, + *-ite*2.] One of a party in Spain in the latter part of the seventh century which held that there are three natures in Christ — the human, the divine, and a third nature resulting from the union of the two.

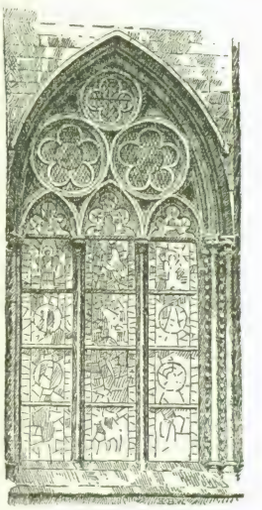
Tripier's operation. See *operation*.

tripinnate (trī-pin'āt), *a.* [< L. *tres* (*tri-*), three, + *pinnatus*, winged: see *pinnate*.] In *bot.*, threefold pinnate: noting a leaf in which there are three series of pinnæ or leaflets, as when the leaflets of a bipinnate leaf are themselves pinnate.

tripinnately (trī-pin'āt-li), *adv.* In a tripinnate manner.

tripinnatifid (trī-pi-nat'i-fid), *a.* [< *tri-* + *pinnatifid*.] In *bot.*, pinnatifid with the segments twice divided in a pinnatifid manner.

tripinnatisect (trī-pi-nat'i-sekt), *a.* [< *tri-* + *pinnatisect*.] In *bot.*, parted to the base in a tripinnate manner, as a leaf.



tripitaka (tri-pit'a-kä), *n.* [Skt., 'three baskets,' < *tri*, three, + *pitaka*, basket.] The complete collection of the northern Buddhist scriptures, in the three divisions of Sutra, Vinaya, and Abhidharma.

triplasian† (trī-plā'si-an), *a.* [< Gr. τριπλάσιος, three times as many, < τρεῖς (τρι-), three, + *-πλάσιος* as in διπλάσιος, twofold.] Threefold; triple; treble.

triplasic (trī-plas'ik), *a.* [< LL. *triplasius*, < Gr. τριπλάσιος: see *triplasian*.] Triple; threefold; specifically, in *anc. pros.*, constituting the proportion of three to one: as, the *triplasic* ratio (of times or semeia in thesis and arsis); characterized by such a proportion of thesis and arsis: as, a *triplasic* foot. The only clear instance of a triplasic foot seems to be an amphibrach standing at the beginning of a colon or verse of Ionics a majore.

> Beside these three ratios of arsis and thesis, . . . Aristoxenus mentions two others: the *triplasic*, in which the two parts of the foot are as 3 to 1 . . . *J. Hadley*, Essays, p. 98.

triple (trip'l), *a.* and *n.* [< F. *triple* = Sp. Pg. It. *triplo*, < L. *triplus* (= Gr. τριπλόος, τριπλοῦς), triple, threefold, < *tres* (*tri-*), three, + *-plus*, akin to E. *-fold*. Cf. *treble*, from the same source, and *thribble*, a mixture of *triple*, *treble*, with *three*.] **I.** *a.* 1. Consisting of three; threefold; characterized by a subdivision into three parts or into threes: as, a *triple* knot; a *triple* window.

Triple Window, Medieval Geometric style of middle of 13th century.— Lincoln Cathedral, England.

> By thy *triple* shape, as thou art seen
> In heaven, earth, hell, and everywhere a queen,
> Grant this my first desire.
> *Dryden*, Pal. and Arc., iii. 232.

2. Three times repeated; treble.

> The glorious Salust, morall, true-divine, . . .
> Makes Heav'n his subject, and the Earth his stage,
> The Arts his Actors, and the *Triple*-Trine.
> *G. Gay-Wood*, Sonnet to J. Sylvester.
>
> The pineapples, in *triple* row.
> *Cowper*, Pineapple and Bee.

3†. Being one of three; third.

> Many receipts he gave me; chiefly one . . .
> He bade me store up, as a *triple* eye,
> Safer than mine own two, more dear.
> *Shak.*, All's Well, ii. 1. 111.

Triple Alliance. (*a*) A league between England, Sweden, and the Netherlands, formed in 1668, and designed to check French aggressions. (*b*) A league between France, Great Britain, and the Netherlands, formed in 1717, and directed chiefly against Spain. After the accession to it of Austria in 1718 it was known as the *Quadruple Alliance*. (*c*) An alliance between Germany, Austria-Hungary, and Italy, formed about 1882, and designed to check Russia and also France. It is chiefly the creation of Prince Bismarck, and by its provisions the three powers are bound to support one another in certain contingencies. Its influence has succeeded to that of the League of the Three Emperors (the German, Austrian, and Russian), which was also largely the creation of Bismarck. — **Triple-coil nest-spring**, a form of spiral spring consisting of three coils fitted one within another. — **Triple congruency**. See *congruency*. — **Triple counterpoint**. See *counterpoint*2, 3 (*c*). — **Triple crown**, in *her.*: (*a*) Same as *tiara*, 5. (*b*) A bearing representing three royal or imperial crowns set one upon another in pale. Such a bearing, having also clouds at the base, forms part of the arms of the London Drapers' Company. — **Triple-cylinder steam-engine**, an engine having three cylinders connected at different angles with the same shaft, used to avoid a dead-center. Another form takes the steam into two cylinders, which exhaust alternately into a large one. — **Triple equality**. See *double equality*, under *equality*. — **Triple expansion-engine**. See *expansion-engine* and *steam-engine*. — **Triple fugue**, a fugue with three subjects. See *fugue*. — **Triple octave**, in *music*, the interval of three octaves, or a tone at such an interval from a given tone. — **Triple phosphate**, phosphate of ammonium and magnesium, found in the urine in the shape of prismatic crystals. — **Triple pile**. See *pile*2. — **Triple plume**, in *her.*, three feathers combined in a plume or set side by side, as in the case of the ostrich-feather badge of the Prince of Wales, which has varied in design at different times. — **Triple point, line, plane**, a point, line, or plane formed by the coincidence of three, and counting as three. — **Triple progression**, in *music*, an old name for a series of perfect fifths. — **Triple ratio**. See *ratio*. — **Triple rhythm**, a three-part rhythm consisting of a heavy beat and two light ones. See *rhythm*, 2 (*b*). — **Triple salt**, a salt formed from a tribasic acid by the replacement of all three hydrogen atoms by different metals or compound radicals. — **Triple screw**, a screw which has three consecutive threads, all of the same pitch. — **Triple suspension**. See *suspension*. — **Triple telephone**, a form of telephone in which the mouthpiece is so placed relatively to two ear-receivers that the mes-

sage may be transmitted and received without moving the position of the head.— **Triple time,** in *music.* See *rhythm,* 2.— **Triple tree,** the gallows: in allusion to the two posts and cross-beam of which it is often composed.

This is a rascal deserves to ride up Holborn,
And take a pilgrimage to the *triple tree,*
To dance in hemp Derrick's coranto.
Randolph, Hey for Honesty, iv. 1.

Triple vase. See *vase.*— **Triple X.** Same as XXX.

II. *n.* 1†. In *music,* same as *treble.*

Againe he heard that wondrous harmonie; . . .
The humane voices sung a *triple* hie.
To which respond the birds, the streames, the winde.
Fairfax, tr. of Tasso's Godfrey of Boulogne, xviii. 24. [(*Richardson.*)

2. *pl.* In *change-ringing,* changes rung on seven bells.

triple (trip'l), *v.*; pret. and pp. *tripled,* ppr. *tripling.* [< F. *tripler* (= Pr. *triplar*), make threefold, < *triple,* threefold, triple: see *triple, a.*] **I.** *trans.* 1. To make threefold or thrice as much or as many; treble.

Enriched with annotations *tripling* their value.
Lamb, Two Races of Men.

2. To be thrice as great or as many as.

Their losse . . . did *triple* ours, as well in quality as in quantity. *Hakluyt's Voyages.*

3. To alter from single or double to triple action, as a single or double expansion-engine into a triple expansion-engine; fit up with triple expansion-engines, as a vessel which has previously used a single or double expansion-engine.

II. *intrans.* To increase threefold.

Their appropriations for this purpose have about *tripled* in twenty years. *New York Evening Post,* Dec., 1890.

triple-awned (trip'l-ând), *a.* In *bot.,* having three awns.— **Triple-awned grass.** Same as *three-awned grass* (which see, under *three-awned*).

triple-crowned (trip'l-kround), *a.* Having three crowns; wearing a triple crown, as the Pope.

triple-grass (trip'l-grâs), *n.* Some species of *Trifolium* or clover; shamrock. *Moore,* Irish Melodies. (*Britten and Holland.*)

triple-headed (trip'l-hed″ed), *a.* Having three heads: as, the *triple-headed* dog Cerberus.

triple-nerved (trip'l-nėrvd), *a.* In *bot.,* noting a leaf in which two prominent nerves emerge from the middle one a little above its base.

triple-ribbed (trip'l-ribd), *a.* Same as *triple-nerved.*

triplet (trip'let), *n.* [< *triple* + *-et.*] 1. A collection or combination of three of a kind, or three united.

At Trani each of the seven arches of the nave has a *triplet* of round arches over it, and a single clerestory window above that. *E. A. Freeman,* Venice, p. 305.

2. In *poetry,* three verses or lines riming together.

He laugh'd as is his wont, and answer'd me
In riddling *triplets* of old time.
Tennyson, Coming of Arthur.

3. In *music,* a group of three tones to be performed in the time of two or four. Such groups are marked $\overset{3}{\frown}$. Compare *sextuplet, decimole,* etc.— 4. A combination of three plano-convex lenses in a compound microscope, which serves to render the object clear and distinct, and free from distortion— an improvement upon the doublet (see *doublet,* 2 (*b*)); also, a hand-microscope consisting of three double-convex lenses.— 5. In *math.,* a system of three families of surfaces such that one of each family passes through each point of space.— 6. One of three children born at one birth. [Colloq.]

We have in mind at this moment a case of three females, *triplets,* all of whom lived past middle age.
Flint, Physiology, p. 941.

7. *pl.* Three links of chain, generally used to connect the cable with the anchor-ring.— 8. A bicycle for three riders.— **Orthogonal triplet,** a system of three families of surfaces cutting one another at right angles.— **Triplet monster,** in *teratol.,* a monster having parts tripled.— **Weingarten triplet,** an orthogonal triplet of which one family consists of surfaces all having the same constant curvature throughout.

tripletail (trip'l-tāl), *n.* A fish, *Lobotes surinamensis,* whose dorsal and anal fins end behind in a figure like that of the caudal fin, giving an appearance of three tails. Also called *flasher* and *black perch.* See cut under *Lobotes.*

triplet-lily (trip'let-lil″i), *n.* Same as *star-flower* (*b*).

triple-turned† (trip'l-tėrnd), *a.* Three times faithless.

This foul Egyptian hath betrayed me.
. . . *Triple-turned* whore! 'tis thou
Hast sold me to this novice.
Shak., A. and C., iv. 12. 13.

★**triplex** (trī'pleks), *n.* [< L. *triplex,* threefold, < *tres* (*tri-*), three, + *plicare,* fold: see *ply.* Cf. *duplex.*] Triple time in music.

The *triplex,* sir, is a good tripping measure.
Shak., T. N., v. 1. 41.

triplicate (trip'li-kāt), *a.* and *n.* [< L. *triplicatus,* pp. of *triplicare,* make threefold, treble, < *triplex,* threefold: see *triplex.*] **I.** *a.* Triple; threefold; consisting of or related to a triad, or three corresponding parts; composed of three similars: as, a *triplicate* certificate.

I did meet with Thadeus, this courier, which brought certain expeditions *triplicat;* the one unto the prothonotar Gambora, the other unto Gregory de Cassali, and the third unto me. *Bp. Burnet,* Records, I. ii. 4.

In several cases [of attempted quantitative spectrum analysis], duplicate and even *triplicate* readings were made with the same specimens.
J. N. Lockyer, Spect. Anal., p. 225.

Triplicate ratio, in *math.,* the ratio which the cubes of two quantities bear to each other, as compared with the ratio of the quantities themselves. Thus, the ratio of a^3 to b^3 is triplicate of the ratio of a to b. Similar solids are to each other in the triplicate ratio of their homologous sides or like linear dimensions.

II. *n.* One of three things corresponding in every respect to one another.

A *triplicate* of said certificate or return shall be issued to the railroad company delivering said property.
New York Produce Exchange Report, 1888–9, p. 211.

triplicate (trip'li-kāt), *v. t.*; pret. and pp. *triplicated,* ppr. *triplicating.* [< *triplicate, a.*] To treble; repeat a second time; make threefold; produce a third corresponding to a first and second.

They had duplicated, *triplicated,* and quadrupled many of the cables upon their systems.
Elect. Rev. (Eng.), XXVIII. 87.

triplicate-ternate (trip'li-kāt-tėr'nāt), *a.* In *bot.,* thrice ternate: same as *triternate.*

triplication (trip-li-kā'shon), *n.* [= F. *triplication* = Sp. *triplicación* = Pg. *triplicação* = It. *triplicazione,* < L. *triplicatio*(*n-*), a tripling, < *triplicare,* triple: see *triplicate.*] 1. The act of trebling, or making threefold, or adding three together.— 2. Threefold plication; formation of triplicates; that which is triplicate or threefold: as, a *triplication* of peritoneum.— 3. In *civil law,* same as *surrejoinder* in common law.

triplicature (trip'li-kā-tūr), *n.* [< *triplicate* + *-ure.*] A fold or folding into three layers; triplication, or a triplication: correlated with *duplicature* and *quadruplicature.*

triplicity (trī-plis'i-ti), *n.* [< OF. **triplicite,* F. *triplicité* = Pr. *triplicitat* = Sp. *triplicidad* = Pg. *triplicitade* = It. *triplicità,* < L. **triplicita*(*t-*)*s,* triplicity, threefoldness, < *triplex,* threefold: see *triplex.*] 1. The state of being triple or threefold; trebleness; threefoldness.

Hauynge onely one god, whom we honour in *triplicitie* of person, . . . we do not woorship that kind of men with diuine honoure.
Peter Martyr (tr. of Eden's First Books on America, ed. [Arber, p. 65).

Your majesty standeth invested of that *triplicity* which in great veneration was ascribed to the ancient Hermes.
Bacon, Advancement of Learning, i.

2. A trinity; a triad.

Many an Angels voice
Singing before th' eternall majesty,
In their trinall *triplicities* on hye.
Spenser, F. Q., I. xii. 39.

3. In *astrol.,* the division of the signs according to the number of the elements; also, each division so formed, consisting of three signs. Every planet governs some triplicity, either by night or by day. See *trigon*[1], 2.

He sees
The powerful planets, how, in their degrees,
In their due seasons, they do fall and rise;
And how the signs, in their *triplicities,*
By sympathizing in their trine consents
With those inferior forming elements, . . .
Drayton, Man in the Moone.

Fiery triplicity. See *fiery.*

triplicostate (trip-li-kos'tāt), *a.* [< L. *triplus,* threefold, + *costa,* rib.] In *bot.,* triplinerved; triple-nerved or triple-ribbed.

tripliform (trip'li-fôrm), *a.* [< L. *triplus,* threefold, + *forma,* form.] Triple in form; triformed; formed by three. [Rare.]

One symbol was *tripliform,* the other single.
T. Inman, Symbolism, Int., p. xii.

triplinerved (trip'li-nėrvd), *a.* [< L. *triplus,* threefold, + *nervus,* nerve, + *-ed*[2].] In *bot.,* same as *triple-nerved.* See *nervation.*

triplite (trip'lit), *n.* [G. *triplit:* < Gr. τριπλόος, triple.] A mineral occurring in brownish-red crystalline masses, often fibrous. It is essentially a fluophosphate of iron and manganese.

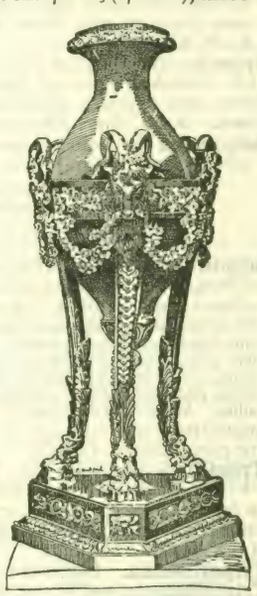
triploblastic (trip-lō-blas'tik), *a.* [< Gr. τριπλόος, threefold, + βλαστός, germ.] Having three blastodermic membranes or germ-layers, consisting of epiblast, mesoblast, and hypoblast; of or pertaining to the *Triploblastica:* distinguished from *diploblastic* as *cœlomatous* from *cœlenterate.* Most animals are triploblastic.

Triploblastica (trip-lō-blas'ti-kä), *n. pl.* [NL.: see *triploblastic.*] Triploblastic animals, or those whose body consists of at least three blastoderms, the endoderm, mesoderm, and ectoderm: an alternative name of the *Cœlomata,* as *Diploblastica* is of the *Cœlentera.* It includes all those metazoic animals which have a true cœlom or body-cavity separate from the intestinal cavity.

triploidite (trip'loi-dīt), *n.* [< *tripl*(*ite*) + *-oid* + *-ite*[2].] A phosphate of iron and manganese occurring in monoclinic prismatic crystals, also in columnar to fibrous masses of a reddish-brown color. It closely resembles triplite, but differs from it in having the fluorin replaced by hydroxyl.

Triplopidæ (trip-lop'i-dē), *n. pl.* [NL., < *Triplopus* + *-idæ.*] A family of extinct Eocene perissodactyls of the tapiroid series, established for the reception of the genus *Triplopus.*

Triplopus (trip'lō-pus), *n.* [NL., < Gr. τριπλόος, threefold, + πούς = E. *foot.*] The typical genus of *Triplopidæ,* related to *Hyrachyus,* but having only three digits in the manus.



triplopy (trip'lō-pi), *n.* [< Gr. τριπλόος, threefold, + ὤψ, eye.] An affection of the eyes which causes objects to be seen triple.

triplum (trip'lum), *n.* [ML., neut. of L. *triplus,* threefold, treble: see *triple, treble.*] In *medieval music:* (*a*) The third part in polyphonic composition, counting upward from the tenor as one; treble. (*b*) A composition for three voices.

triply (trip'li), *adv.* In a triple or threefold manner.— **Triply ribbed,** in *bot.,* triple-ribbed.

trip-madam (trip'mad″am), *n.* [< F. *tripe-madame, trique-madame,* stonecrop.] A species of stonecrop, *Sedum reflexum.*

tripod (trī'pod), *a.* and *n.* [Formerly *tripode;* = Sp. *trípode* = Pg. It. *tripode* = G. *tripode, tripus,* < L. *tripus* (*tripod-*), < Gr. τρίπους (τριποδ-), three-footed, having three feet or three legs; as a noun, a three-legged table, a three-legged stool, a three-footed brass kettle, a musical instrument, etc.; < τρεῖς (τρι-), three, + πούς (ποδ-) = E. *foot.* Cf. *trivet.*] **I.** *a.* Having three feet or legs. — **Tripod vase,** in *art,* a vase with three feet, or supported on a stand, especially if of ornamental character, having the form of a tripod.

Tripod Vase.

II. *n.* 1. In *classical antiq.,* a seat, table, or other article resting on three feet. Specifically — (*a*) A three-legged seat or table. (*b*) A pot or caldron used for boiling meat, and either raised upon a three-legged frame or stand, or made with three feet in the same piece with itself. (*c*) A bronze altar, originally identical in form with the caldron described above. It had three rings at the top to serve as handles, and in many representations shows a central support or upright in addition to the three legs. It was when seated upon a tripod of this nature, over a cleft in the ground in the innermost sanctuary, that the Pythian priestesses at Delphi gave their oracular responses. The celebrity of this tripod, which was peculiarly sacred to the Pythian Apollo and was a usual attribute of him, led to innumerable imitations of it, which were made to be used in sacrifice; and ornamented tripods of similar form, sometimes made of the precious metals, were given as prizes at the Pythian games and elsewhere, and were frequently placed as votive gifts in temples, especially in those of Apollo. See cut on following page, and cut under *Pythia.*

After the Persian war the victors at Platæa dedicated as a thank-offering to the Delphic Apollo a gold *tripod* mounted on a bronze pillar composed of three intertwined serpents. *C. T. Newton,* Art and Archæol., p. 246.

2. Hence, any object having three feet or legs, as a three-legged stool.

The Prophetess . . . was seated on a *tripod* in front of the fire, distilling strong waters out of pennyroyal.
Kingsley, Westward Ho, iv.

3. A three-legged frame or stand, usually jointed at the top, for supporting a theodolite,

Prophetic Tripod of the Delphian Apollo.— From a Greek red-figured hydria, in the Vatican.

compass, camera, or other instrument. See cuts under *rock-drill* and *transit*.—**4.** In *anat.* and *zoöl.*, a tripodal formation; a three-pronged or triradiate structure, as a bone. The premaxillary bone of birds is a tripod.—**Tripod of life, or vital tripod,** the brain, the lungs, and the heart, upon the continuous and consentaneous action of which life rests as on a triple support.

tripodal (trip'ō-dal), *a.* [< *tripod* + *-al*.] Having or forming three feet, in any sense; making a tripod: as, a *tripodal* base of support; a ★*tripodal* bone.

tripodic (trī-pod'ik), *a.* [< *tripod* + *-ic*.] Three-footed. [Rare.]

I have observed this *tripodic* walk in earwigs, water scorpions, aphides, and some beetles.
Nature, XLIII. 223.

tripod-jack (trī'pod-jak), *n.* A screw-jack mounted on three legs connected to a common base-plate to give them a sufficient bearing. *E. H. Knight.*

tripody (trip'ō-di), *n.*; pl. *tripodies* (-diz). [< Gr. τριποδία, < τρίπους (τριποδ-), having three feet: see *tripod*.] In *pros.*, a group of three feet. *Amer. Jour. Philol.*, X. 225.

tripointed (trī-poin'ted), *a.* [< *tri-* + *point*[1] + *-ed*[2].] Having three points. [Rare.]

For, how (alas!), how will you make defence
'Gainst the *tri-pointed* wrathfull violence
Of the drad dart?
Sylvester, tr. of Du Bartas's Weeks, ii., The Lawe.

tripoli (trip'ō-li), *n.* [So called from *Tripoli* in Africa, < Gr. Τρίπολις, a district containing three cities: see *Tripolitan*.] A substance consisting of decomposed impure limestone, extensively used as a polishing-powder: same as *rottenstone*. The name *tripoli* is also frequently given to any kind of silicious material which can be used for the same purpose as the real article of that name, and especially to infusorial silica. Also *tripoly* and *tripel*.

tripoline[1] (trip'ō-lin), *a.* [< *tripoli* + *-ine*[1].] Of or pertaining to tripoli.

Tripoline[2] (trip'ō-lin), *a.* [< *Tripoli* (see def.) + *-ine*[1].] Pertaining to Tripoli or Tripolis, (*a*) a former Turkish vilayet on the northern coast of Africa, or (*b*) the capital of this vilayet, or (*c*) a city of Phenicia.

Tripoli senna. See *senna*.

Tripolitan (tri-pol'i-tan), *a.* and *n.* [= F. *tripolitain*, < L. *Tripolitanus*, of or pertaining to Tripolis, < Gr. Τρίπολις, Tripolis (various districts were so called), lit. 'three cities,' < τρεῖς (τρι-), three, + πόλις, city.] **I.** *a.* Relating or belonging to Tripoli.

II. *n.* A native of Tripoli.

tripolite (trip'ō-līt), *n.* [< *Tripoli* (see *tripoli*) + *-ite*.] In *mineral.*, silicious infusorial earth; tripoli.

tripoly, *n.* See *tripoli*.

tripos (trī'pos), *n.* [An erroneous form, appar. simulating the common ending *-os* of Gr. words, of *tripus*, < L. *tripus* (*tripūs*), < Gr. τρίπους (τριποδ-), a three-footed stool, etc.: see *tripod*.] **1.** A tripod.

Crazed fool, who would'st be thought an oracle,
Come down from off the *tripos*, and speak plain.
Dryden, Don Sebastian, v. 1.

The frieze [of the temple of Melasso] is adorned with *triposes*, bulls heads, and pateras; the cornish and the pediments at each end are very richly ornamented with carvings. *Pococke*, Description of the East, II. ii. 61.

2. In Cambridge University, England, the list of the successful candidates for honors in the departments specified in the quotation; also, the honor examination itself in any of these departments. In the mathematical tripos the three grades of the first part of the examination are respectively wranglers, senior optimes, and junior optimes; in the other triposes, and in Part II. of the mathematical tripos they are first, second, and third classes.

The strange genealogy of the Cambridge term *Tripos*, as equivalent to "Honour Examination," is traced by Mr. Christopher Wordsworth, in "Social Life in the English Universities in the Eighteenth Century," as follows: 1. The B. A. who sits on a three-legged stool to dispute with the "Father" in the Philosophy School on Ash Wednesday, was called Mr. *Tripos*, from that on which he sat. 2. The satirical speech made by him was called the *Tripos* speech; and 3. His humorous verses, distributed by the bedells, were called *Tripos* verses. 4. His office became obsolete in the last century; and similar verses being still circulated by authority, each sheet of verses was called a *Tripos* or "*Tripos* Paper." 5. On the back of each sheet, after the year 1748, a list of "Wranglers" and "Senior Optimes" or of "Junior Optimes" was published. These lists were called the "*Triposes*" or first and second "*Tripos* lists" respectively. 6. The Mathematical Examination, whose interest centred in the list, was called the *Tripos*. 7. When other Honour Examinations were instituted, they were distinguished as the "Classical *Tripos*," etc., from the "Mathematical *Tripos*." There are now nine *Triposes*, . . . founded in the following order: Mathematical, Classical, Moral Sciences, Natural Sciences, Theological, Law, History, Semitic [Languages,] and Indian Languages. [There has also been a Medieval and Modern Languages *Tripos* from 1885.]
Dickens's Dict. Cambridge, p. 124.

trippant (trip'ant), *a.* [< *trip*[1] + *-ant*.] In *her.*, represented as walking or trotting, having usually one of the fore hoofs lifted and the other three on the ground: said of one of the beasts of chase, as the antelope or the hart. Also *tripping*.

Stag Trippant.

The arms on the bishop's tomb were Or, on a chevron vert between three bucks *trippant* proper as many cinque foils of the field, etc.
N. and Q., 7th ser., XI. 115.

trippant-counter (trip'ant-koun″tėr), *a.* In *her.*, same as *counter-trippant*.

trippet, *n.* An obsolete form of *trip*[1], *trip*[2].

tripper (trip'ėr), *n.* [< *trip*[1] + *-er*[1].] **1.** One ★who trips or moves nimbly; also, one who stumbles, or who causes another to do so.—**2.** An excursionist; a tourist. [Colloq.]

There are two men in her, and they've got no oars in the boat. Ignorant *trippers*, I suppose.
Walter Besant, Armorel of Lyonesse, ii.

The dialect is dying out in Manx before the inroads of the *tripper*. *The Academy*, Jan. 4, 1890, p. 3.

3. A street-railroad conductor or driver who is paid according to the number of trips which he makes, or who is employed to make special trips, as in the place of others who are laid off for any cause. [U. S.]—**4.** In *mach.*, a part which causes another part to be suddenly released, or to trip.—**Land-tripper,** the common sandpiper, *Tringoides hypoleucus*. [Local, Eng.]

trippet[1] (trip'et), *n.* [< *trip*[1] + *-et*.] **1.** A hard ball used in the game of trip. *Halliwell.* [Prov. Eng.]—**2.** In *mach.*, any projecting part designed to strike some other part at regular intervals, as a cam, lifter, toe, wiper, or foot. *E. H. Knight.*

trippet[2] (trip'et), *n.* [< *trip*[2] (?) + *-et*.] A quarter of a pound. *Halliwell.* [Prov. Eng.]

tripping (trip'ing), *n.* [Verbal n. of *trip*[1], *v.*] **1.** The act of one who trips.—**2.** A light dance.

Other *trippings* to be trod
Of lighter toes. *Milton*, Comus, l. 961.

3. *Naut.*, the act of loosening the anchor from the ground.

tripping (trip'ing), *p. a.* [Ppr. of *trip*[1], *v.*] **1.** Quick; nimble; stepping quickly and lightly.—**2.** In *her.*, same as *trippant*.

tripping-line (trip'ing-līn), *n.* *Naut.*, a small line attached to the snotter of a topgallant- or royal-yard, by which the lower lift and brace are unrigged from the yard-arm and the yard guided to the deck. Sometimes called *fancy-line*.

trippingly (trip'ing-li), *adv.* In a tripping manner; with a light, nimble, quick step or movement; with agility; nimbly.

Sing, and dance it *trippingly*. *Shak.*, M. N. D., v. 1. 403.
Speak the speech . . . *trippingly* on the tongue.
Shak., Hamlet, iii. 2. 2.

trippingness (trip'ing-nes), *n.* The quality of being tripping; lightness and quickness; nimbleness.

The basso could not forgive the soprano for the *trippingness* of her execution. *The Atlantic*, LXVI. 765.

tripping-valve (trip'ing-valv), *n.* A valve operated to effect the release or tripping of some other part of the machinery.

Tripsacum (trip'sa-kum), *n.* [NL. (Linnæus, 1759); origin obscure.] A genus of grasses, of the tribe *Maydeæ*. It is characterized by peduncled androgynous spikes with two-flowered male spikelets above and one-flowered fertile spikelets below, the latter embedded in each joint of the rachis, and there filling a cavity which is closed by the polished and indurated outer glume. There are about 3 species, natives of warm parts of America, extending from Brazil into the United States. They are tall robust grasses, with long leaves resembling those of Indian corn. *T. dactyloides*, known as *gama-grass* (which see), one of the largest grasses of the United States, is an ornamental reed-like perennial reaching from 4 to 7 feet high, occurring from Connecticut to Florida near the coast, and from Illinois southward, where it is used for fodder, and its seeds are said to have been found available for food. It has also been called *buffalo-grass* and *sesame-grass*.

1, Gama-grass (*Tripsacum dactyloides*); 2, the spikes; 3, lower part of the spikes, showing male and female spikelets; *a*, a male spikelet; *b*, a female spikelet.

trip-shaft (trip'shaft), *n.* A supplementary rock-shaft used to lift and release certain auxiliary toes on the valve-rods of a steam-engine.

tripsis (trip'sis), *n.* [NL., < Gr. τρῖψις, rubbing friction, < τρίβειν, rub, wear away by rubbing.] **1.** The act of reducing a substance to powder; trituration.—**2.** In *med.*, the process of shampooing. See *shampoo*.

trip-skin (trip'skin), *n.* **1.** A piece of leather worn on the right-hand side of the petticoat by spinners with the rock, on which the spindle plays, and the yarn is pressed by the hand of the spinner. *Forby.* (*Halliwell.*)—**2.** The skinny part of roasted meat, which before the whole can be dressed becomes tough and dry, like the piece of leather formerly worn by spinning-women. *Forby.* (*Halliwell.*) [Prov. Eng.]

trip-slip (trip'slip), *n.* A slip of paper in which the conductor of a horse-car punches a hole as record of each fare taken. [U. S.]

tripterous (trip'te-rus), *a.* [< Gr. τρεῖς (τρι-), three, + πτερόν, wing.] In *bot.*, three-winged; having three wings or wing-like expansions.

triptich, triptichy, *n.* See *triptych*.

triptote (trip'tōt), *n.* [= F. *triptote*, < LL. *triptotum* (sc. *nomen*), a noun with only three cases, neut. of *triptotus*, < Gr. τρίπτωτος, with only three cases, < τρεῖς (τρι-), three, + πτῶσις, inflection, case, < πίπτειν, fall.] In *gram.*, a noun having three cases only.

triptych (trip'tik), *n.* [Formerly also, erroneously, *triptich*, *triptic;* also *tryptychon;* < Gr. τρίπτυχον, neut. of τρίπτυχος, consisting of three layers, threefold, < τρεῖς (τρι-), three, + πτύξ (πτυχ-), πτυχή, a fold, < πτύσσειν, fold, double up.] **1.** A picture, carving, or other representation in three compartments side by side: most frequently used for an altar-piece. The central picture is usually complete in itself. The subsidiary designs on either side of it are smaller, and frequently correspond in size and shape to one half of the principal picture, to which they are joined by hinges so that they can be folded over and form a cover to it. The outsides of the folding parts or shutters have sometimes designs painted on them.

The Mantegna *triptych*, from which the detail of "The Circumcision" is taken, is in the tribune of the Uffizi, Florence, and is composed of The Adoration of the Magi, The Circumcision, and The Ascension.
The Century, XXXIX. 400.

2. A series of writing-tablets, three in number, hinged or tied together. When used for spreading with wax, and writing with the stylus, the outer leaves were recessed for the wax on the inside only, the middle leaf on both sides. These are made of fir-wood, beechwood, baked clay, ivory, and other material.

These *triptychs* . . . were libelli of three tablets of wood, cleft from one piece and fastened together, like the leaves of a book, by strings passed through two holes pierced near the edge. *Encyc. Brit.*, XVIII. 154.

triptychon (trip'ti-kon), *n.* Same as *triptych*.

tripudiary (trī-pū'di-ā-ri), *a.* [< L. *tripudium*, a leaping or dancing, a religious dance (see *tripudiate*), + *-ary*.] **1.** Of or pertaining to dancing; performed by dancing.—**2.** Of or pertaining to the divination called tripudium.

Soothsayers in their auguriall and *tripudiary* divinations, collecting presages from voice or food of birds.
Sir T. Browne, Vulg. Err., i. 4.

tripudiate (trī-pū'di-āt), *v. i.*; pret. and pp. *tripudiated*, ppr. *tripudiating*. [< L. *tripudiatus*, pp. of *tripudiare*, OL. *tripodare*, leap, dance,

< *tripudium*, a measured stamping, a solemn religious dance; formation doubtful to the Romans themselves; prob. < *tres* (*tri-*), three, + *pod-* (= Gr. *πod-*), a form of the root of *pes* (*ped-*), foot. According to Cicero, contracted from **terripudium* for **terripavium*, striking the earth, < *terra*, earth, + *pavire*, strike: see *pave*.] To dance.

A sweet chorus of well-tuned affections, and a spirit *tripudiating* for joy. *Culverwell*, The Schisme. (*Latham.*)

tripudiation (trī-pū-di-ā′shọn), *n.* [< *tripudiate* + *-ion*.] The act of dancing. *Carlyle.*

tripudium (trī-pū′di-um), *n.* [L., a leaping or dancing: see *tripudiate*.] In *Rom. antiq.*: (*a*) A solemn religious dance. (*b*) A kind of divination practised by the augurs from interpretation of the actions of birds when fed, in later times always of domestic chickens, which were kept in coops for the purpose. If the fowls ate greedily, the omen was good; if they refused their food, the prognostic was very bad.

tripupillate (trī-pū′pi-lāt), *a.* [< L. *tres* (*tri-*), three, + *pupilla*, pupil.] In *entom.*, having three central spots or pupils close together: noting an ocellated spot.

Tripylæa (trip-i-lē′ạ), *n. pl.* [NL., < Gr. *τρεῖς* (*τρι-*), three, + *πύλη*, a gate.] An order of silicoskeletal *Radiolaria*, whose central capsule has a single nucleus, a double membrane, and more than one perforate area, the polar aperture being supplemented by one or more other openings. The skeleton is diversiform, often composed of tubes, and the capsule is pigmented with phæodium. *Hertwig*, 1879. Also called *Phæodaria*.

tripylæan (trip-i-lē′ạn), *a.* and *n.* [< *Tripylæa* + *-an*.] **I.** *a.* Of or pertaining to the *Tripylæa*, or having their characters; phæodarian, as a radiolarian.

II. *n.* A member of the *Tripylæa;* a phæodarian.

tripyramid (trī-pir′ạ-mid), *n.* [< Gr. *τρεῖς* (*τρι-*), three, + *πυραμίς*, pyramid.] A kind of spar composed of three-sided pyramids.

triquetra[1] (trī-kwet′rạ), *n.* [NL., fem. of L. *triquetrus*, three-cornered: see *triquetrous*.] A symmetrical interlaced ornament, of three arcs or lobes, of frequent occurrence in early northern art in Europe.

triquetra[2], *n.* Plural of *triquetrum*.

triquetral (trī-kwet′rạl), *a.* [< *triquetr-ous* + *-al*.] Same as *triquetrous*.

triquetric (trī-kwet′rik), *a.* Pertaining to the triquetra.

triquetrous (trī-kwet′rus), *a.* [< L. *triquetrus*, three-cornered, triangular, < *tres* (*tri-*), three, + *-quetrus*, prob. a mere formative. Cf. *trinket*[3].] Three-sided; triangular; having three plane or concave sides. (*a*) In *anat.*, noting the triangular Wormian bones of the skull. See *triquetrum*. (*b*) In *entom.*, noting a part or organ whose cross-section is an equilateral triangle. (*c*) In *bot.*, having three acute angles with concave faces, as the stem of many plants; three-edged; three-cornered.

triquetrously (trī-kwet′rus-li), *adv.* In a triquetrous form; triangularly. *Stormonth.*

triquetrum (trī-kwet′rum), *n.*; pl. *triquetra* (-rạ). [NL.: see *triquetrous*.] In *anat.*, one of the irregular, often triangular, Wormian bones found in the lambdoid suture of the skull: more fully called *os triquetrum*, and generally in the plural *ossa triquetra*.

triquinate (trī-kwī′nāt), *a.* [< L. *tres* (*tri-*), three, + *quini*, five each, + *-ate*[1] (see *quinate*[1]).] In *bot.*, divided first into three parts or lobes and then into five.

triradial (trī-rā′di-ạl), *a.* [< L. *tres* (*tri-*), three, + *radius*, ray: see *radial*.] Same as *triradiate*.

triradially (trī-rā′di-ạl-i), *adv.* With three rays.

triradiate (trī-rā′di-āt), *a.* and *n.* [< L. *tres* (*tri-*), three, + *radiatus*, rayed: see *radiate*.] **I.** *a.* 1. Radiating in three directions; sending off three rays or processes; trifurcate.

The well-known *triradiate* mark of a leech-bite. *Huxley*, Anat. Invert., p. 189.

2. In *anat.*, specifically noting one of the lateral fissures of the brain.—3. In sponges, noting a type of spicule. See II.—**Triradiate sulcus.** See *sulcus*.

II. *n.* A triradiate sponge-spicule.

The chief modification of the triradiate spicule is due to an elongation of one ray, distinguished as apical, the shorter paired rays being termed basal, and the whole spicule a sagittal *triradiate*. *Encyc. Brit.*, XXII. 417.

triradiated (trī-rā′di-ā-ted), *a.* [< *triradiate* + *-ed*[2].] Same as *triradiate*.

triradiately (trī-rā′di-āt-li), *adv.* In a triradiate manner; in three radiating lines.

trirectangular (trī-rek-tang′gū-lạr), *a.* [< L. *tres* (*tri-*), three, + *rectus*, right, + *angulus*, angle (see *rectangular*).] Having three right angles, as certain spherical triangles.

trireme (trī′rēm), *n.* [= F. *trirème* = Sp. Pg. It. *trireme*, < L. *triremis*, a vessel with three banks of oars, prop. adj. (sc. *navis*, vessel), having three banks of oars, < *tres* (*tri-*), three, + *remus*, oar.] A vessel with three benches, ranks, or tiers of oars on a side: a type of ancient Greek war-ship of great efficiency, copied by the Romans and other peoples. The trireme was provided with one, two, or three masts, which were unstepped when the vessel was not under sail. At first naval battles were simply contests of weight or force, and the victory fell to the trireme which had the greatest number of fighting men, or the best-disciplined, on board, nautical manœuvers being scarcely attempted. The Athenians, however, in the fifth century B. C., introduced very skilful naval tactics, and made hand-to-hand fighting by the marines subordinate to the attempt to disable the enemy's ship by ramming her amidships, or by crushing her banks of oars. The perfected trireme resembled more closely in theory and tactics the modern steam-ram than any form of ship that has intervened. It was long, narrow, and swift; the modern steam-engine was represented by the mechanical rowing of about 170 men, carefully trained, and under perfect command; and it was entirely independent of its sails, which were not hoisted unless, while cruising, the wind chanced to be favorable.

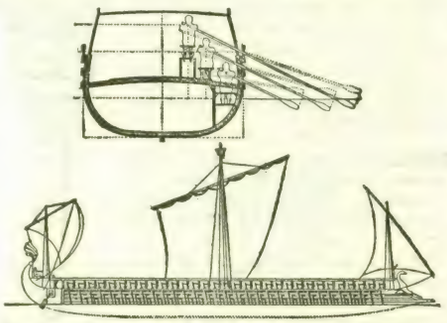

Diagram and Cross-section of an Athenian Trireme, as restored (1883) by M. Raoul Lemaître. (From "Revue Archéologique.")

Thucydides writeth that Aminocles the Corinthian built the first *trireme* with three rowes of ores to a side. *Holland*, tr. of Pliny, vii. 56.

trirhomboidal (trī-rom-boi′dạl), *a.* [< *tri-* + *rhomboidal*.] Having the form of three rhombs.

trisacramentarian (trī-sak″rạ-men-tā′ri-ạn), *n.* [< L. *tres* (*tri-*), three, + *sacramentum*, sacrament (see *sacrament*), + *-arian*.] A name given to those who maintain that three, and only three, sacraments are necessary to salvation—namely, baptism, the eucharist, and absolution.

Trisagion (tri-sā′gi-on), *n.* [< Gr. *τρισάγιος*, thrice holy, < *τρίς* (= L. *ter* for **ters*), thrice (< *τρεῖς* (*τρι-*), three), + *ἅγιος*, holy, sacred.] A hymn of the early and Oriental churches, apparently of Jewish origin, consisting of the words "Holy God, holy (and) mighty, holy (and) immortal, have mercy upon us." It is sung in the Greek Church at the Little Entrance (see *entrance*[1], *n.*), and occurs frequently in the Greek daily office. It is also found in almost all Eastern liturgies. In the West the Trisagion was used in the Gallican liturgy and in the Sarum prime. It is still sung in Greek and Latin at the Reproaches on Good Friday. The anthem "Yet, O Lord God most holy," in the Anglican burial office, represents a form of the Trisagion. The name *Trisagion* is often incorrectly applied to the Sanctus (Tersanctus).

triscele, *n.* See *triskele*.

triset, *v.* and *n.* An obsolete spelling of *trice*[1].

trisect (trī-sekt′), *v. t.* [< L. *tres* (*tri-*), three, + *sectus*, pp. of *secare*, cut: see *secant*. Cf. *bisect*.] To cut or divide into three parts, especially into three equal parts.

trisection (trī-sek′shọn), *n.* [= F. *trisection* = Sp. *trisección* = Pg. *trisecção* = It. *triszezione;* as *trisect* + *-ion*. Cf. *section*.] The division of a thing into three parts; particularly, in *geom.*, the division of a straight line or an angle into three equal parts. The trisection of an angle, geometrically, was a problem of great celebrity among the Greek mathematicians. It has been proved to be impossible with the ruler and compasses alone (though it is of course easy to trisect certain angles), but can be performed with any one of numerous machines which have been invented for the purpose. See cut under *linkage*.

trisectory (trī-sek′tọ-ri), *a.* [< *trisect(ion)* + *-ory*.] Conducive to the trisection of the angle, as certain curves of the third order.

triseme (trī′sēm), *a.* and *n.* [< Gr. *τρεῖς* (*τρι-*), three, + *σῆμα*, sign: see *trisemic*.] **I.** *a.* Consisting of three semeia; trisemic.

II. *n.* A trisemic time or syllable.

trisemic (trī-sē′mik), *a.* [< LL. *trisemus*, < Gr. *τρίσημος*, having three times or moræ, < *τρεῖς* (*τρι-*), three, + *σῆμα*, sign, *σημεῖον*, sign, mora.] In *anc. pros.*, containing or equal to three semeia or moræ: as, a *trisemic* long (one half longer than the usual long); a *trisemic* foot. The trisemic feet (tribrach, trochee, iambus) are all diplasic.

trisepalous (trī-sep′ạ-lus), *a.* [< L. *tres* (*tri-*), three, + NL. *sepalum*, sepal, + *-ous*.] In *bot.*, having three sepals. See cut under *calyx*.

triseptate (trī-sep′tāt), *a.* [< L. *tres* (*tri-*), three, + *septum*, partition, + *-ate*[1].] In *bot.* and *zoöl.*, having three septa or partitions.

triserial (trī-sē′ri-ạl), *a.* [< L. *tres* (*tri-*), three, + *series*, series, + *-al*.] In *zoöl.*, *anat.*, and *bot.*, set in three rows; disposed in three series; tristichous; trifarious. Also *triseriate*.

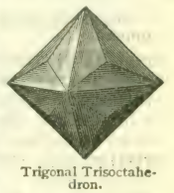
triserially (trī-sē′ri-ạl-i), *adv.* In three series; so as to be triserial.

triseriate (trī-sē′ri-āt), *a.* [< L. *tres* (*tri-*), three, + *series*, series, + *-ate*[1].] Same as *triserial*.

triseriatim (trī-sē-ri-ā′tim), *adv.* [< L. *tres* (*tri-*), three, + *series*, series, + *-atim* as in *seriatim*.] In three ranks or rows; so as to make three series; triserially.

trisetose (trī-sē′tōs), *a.* [< L. *tres* (*tri-*), three, + *seta*, a bristle: see *setose*.] In *entom.*, bearing three setæ or bristles.

Trisetum (trī-sē′tum), *n.* [NL. (Persoon, 1805), < L. *tres* (*tri-*), three, + *seta*, *sæta*, a bristle.] A genus of grasses, of the tribe *Aveneæ* and subtribe *Euaveneæ*. It is characterized by a spike-like or loosely branched panicle; spikelets with two or more bisexual flowers, their axis produced beyond them; and a thin-keeled flowering glume bearing a dorsal awn and two terminal teeth. There are nearly 50 species, widely scattered through temperate and mountain regions. They are chiefly perennial tufted grasses with flat leaves and shining spikelets. *T. subspicatum*, *T. flavescens*, and *T. Pennsylvanicum* occur in the northeastern United States. *T. cernuum* occurs in California and Oregon.



trisinuate (trī-sin′ū-āt), *a.* [< L. *tres* (*tri-*), three, + *sinus*, a fold: see *sinuate*.] In *entom.*, having three sinuses: noting a margin when it has three inward curves meeting in outward curves.

triskele (tris′kēl), *n.* [Also *triscele;* < Gr. *τρισκελής*, three-legged, < *τρεῖς* (*τρι-*), three, + *σκέλος*, leg.] A figure formed of three lines radiating from a common point or small circle, or a modification of this in which each radiating arm has the form of a hook so as to give the appearance of being in revolution, or of a bent human leg. Also called *three-armed cross*. Compare *sunsnake*, *fylfot*.

trismus (tris′mus), *n.* [NL., < Gr. *τρισμός*, a creaking or croaking, < *τρίζειν*, squeak, grind or gnash (the teeth).] A tonic spasm of the muscles of mastication, causing closure of the lower jaw, occurring as a manifestation of tetanus, either alone or in conjunction with other tonic muscular spasms; lockjaw.—**Trismus nascentium**, or **trismus neonatorum**, a form of tetanus occurring in new-born infants; infantile tetanus. The muscles of the neck and jaw are first affected, but usually general tetanic spasms soon follow. The disease occurs with special frequency in the negro race and in tropical countries, though severe epidemics have also prevailed in the extreme north.

trisoctahedral (tris-ok-tạ-hē′drạl), *a.* [< *trisoctahedron* + *-al*.] Bounded by twenty-four equal faces; pertaining to a trisoctahedron, or having its form.

trisoctahedron (tris-ok-tạ-hē′drọn), *n.* [< Gr. *τρίς*, thrice, + E. *octahedron*.] In *crystal.*, a solid bounded by twenty-four equal faces, three corresponding to each face of an octahedron. The trigonal trisoctahedron has each face an isosceles triangle, and in the tetragonal trisoctahedron, or trapezohedron, each face is a quadrilateral. See also cut under *trapezohedron*.

Trigonal Trisoctahedron.

trispast, trispaston (trī′spast, trī-spas′ton), *n.* [< L. *trispastos*, a machine with three pulleys, < Gr. *τρίσπαστος*, drawn threefold (*τρίσπαστον ὄργανον*, a triple pulley, *τρίσπαστον*, a surgical instrument), < *τρεῖς* (*τρι-*), three, + **σπαστός*, verbal adj. of *σπᾶν*, draw: see *spasm*.] A machine with three pulleys acting in connection with each other, for raising great weights. *Brande and Cox.*

trispermous (trī-spėr′mus), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *σπέρμα*, seed.] In *bot.*, three-seeded; containing three seeds: as, a *trispermous* capsule.

trispermum (trī-spėr′mum), *n.* [NL., < Gr. *τρεῖς* (*τρι-*), three, + *σπέρμα*, seed.] A poultice, formerly in vogue, made of crushed cumin-, bay-, and smallage-seeds.

trisplanchnic (trī-splangk'nik), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *σπλάγχνα*, viscera: see *splanchnic.*] Pertaining to the viscera of the three great cavities of the body—the cranial, thoracic, and abdominal: noting the sympathetic nervous system.

trisporic (trī-spor'ik), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *σπορά*, spore.] In *bot.*, having three spores; trisporous.

trisporous (trī-spō'rus), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *σπορά*, spore.] In *bot.*, having or composed of three spores.

trist[1]†, *v.* and *n.* An obsolete form of *trust*[1] and *tryst.*

trist[2]† (trist), *a.* [< ME. *trist*, < OF. (and F.) *triste* = Sp. Pg. It. *triste*, < L. *tristis*, sad, sorrowful. Cf. *tristesse*, *tristful*, *tristy*, *contrist.*] Sad; sorrowful; gloomy.

With that these thre knyghtes be lepte on theire horse, but the tother thre be *trist* and dolent.
Merlin (E. E. T. S.), iii. 572.

tristachyous (trī-stā'ki-us), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *στάχυς*, an ear of corn.] In *bot.*, three-spiked; having three spikes.

Tristania (tris-tā'ni-ạ), *n.* [NL. (R. Brown, 1812), named after *Tristan*, a Portuguese traveler (during 1440–47) on the African coast.] A genus of plants, of the family *Myrtaceæ*, tribe *Leptospermeæ*, and subtribe *Metrosidereæ*. It is characterized by numerous stamens united in five columns opposite the petals. There are about 20 species —9 in Australia, and the others in the Indian archipelago and New Caledonia. They are trees or small shrubs, bearing alternate or somewhat whorled leaves sometimes clustered at the ends of the branches. The flowers are usually small, yellow or white, and grouped in axillary cymes. Several species yield very durable and valuable wood, used for ship- and boat-building, for posts, flooring, etc., as *T. conferta*, known in New South Wales as *red-box*; *T. suaveolens*, called *swamp-mahogany*; and *T. neriifolia*, the ooramilly or water-gum tree. The first is a tree admired for its shade and as an avenue-tree, reaching sometimes 150 feet high; the others are small trees or shrubs, or, in *T. suaveolens*, sometimes becoming a tall tree of 100 feet.

triste†, *n.* An obsolete form of *tryst.*

tristearin (trī-stē'ạ-rin), *n.* [< *tri-* + *stearin.*] A glycerol ester containing three stearic acid radicals: a white crystalline non-volatile solid with a fatty feel, which makes up a large portion of certain solid fats, like tallow.

tristell†, *n.* An obsolete form of *trestle*[1].

tristely†, *adv.* An obsolete form of *trustily.*

tristemania (tris-tē-mā'ni-ạ), *n.* [NL., irreg. < L. *tristis*, sad, + Gr. *μανία*, madness.] Melancholia.

tristesse (tris-tes'), *n.* [ME. *tristesce*, < OF. *tristesce*, *tristesse*, F. *tristesse* = Sp. Pg. *tristeza* = It. *tristizia*, *tristezza*, < L. *tristitia*, sadness, < *tristis*, sad: see *trist*[2].] Sadness; melancholy: in modern use as a French word.

Save only that I crye and bidde,
I amm in *tristesce* alle amidde.
Gower. (*Halliwell.*)

There, I thought, in America, lies nature sleeping, overgrowing, almost conscious, too much by half for man in the picture, and so giving a certain *tristesse*, like the rank vegetation of swamps and forests seen at night, steeped in dews and rains, which it loves; and on it man seems not able to make much impression.
Emerson, Prose Works, II. 299.

tristful (trist'fụl), *a.* [< *trist*[2] + *-ful.*] Sad; sorrowful. [Obsolete or archaic.]

Convey my *tristful* queen;
For tears do stop the flood-gates of her eyes.
Shak., 1 Hen. IV., ii. 4. 434.

Souring my incipient jest to the *tristful* severities of a funeral. *Lamb*, The Wedding.

tristfully† (trist'fụl-i), *adv.* Sadly.

tristichous (tris'ti-kus), *a.* [< Gr. *τρίστιχος*, of three rows or lines, < *τρεῖς* (*τρι-*), three, + *στίχος*, a line, row.] In *bot.*, arranged in three vertical rows or ranks; trifarious. See *phyllotaxis.*

tristigmatic (trī-stig-mat'ik), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *στίγμα* (*στιγματ-*), a mark: see *stigma*[1].] In *bot.*, having three stigmas.

tristigmatose (trī-stig'mạ-tōs), *a.* [As *tristigmat-ic* + *-ose.*] In *bot.*, same as *tristigmatic.*

tristitiate† (tris-tish'i-āt), *v. t.* [< L. *tristitia*, sadness (see *tristesse*), + *-ate*[2].] To make sad; sadden.

Nor is there any whom calamity doth so much *tristitiate* as that he never sees the flashes of some warming joy.
Feltham, Resolves, i. 41.

Tristoma (tris'tō-mạ), *n.* [NL. (Cuvier, 1817), also *Tristomum* (Siebold, 1838), < Gr. *τρεῖς* (*τρι-*), three, + *στόμα*, mouth.] 1. A genus of monogeneous trematoid worms, typical of the family *Tristomidæ:* so called from one large ventral sucker behind two smaller adoral ones. They are of broad and flat oval or discoid form, and infest the skin and gills of fishes.—2. [*l. c.*; pl. *tristomæ* (-mē) or *tristomas* (-mạz).] A worm of the above genus.

Tristomidæ (tris-tom'i-dē), *n. pl.* [NL., < *Tristoma* + *-idæ.*] A family of flukes, typified by the genus *Tristoma*. *Van Beneden.*

tristy† (tris'ti), *a.* [< *trist*[2] + *-y*[1].] Sorrowful; sad.

The king was *tristy* and heavy of cheer.
Ashmole's Theatrum Chemicum, p. 264. (*Latham.*)

tristylous (trī-stī'lus), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *στῦλος*, style: see *style*[2].] In *bot.*, three-styled; having three styles.

Trisula, from figure of Siva at Vellore, India.

trisula, trisul (tri-sö'lạ, -söl'), *n.* [Skt. *triçūla*, < *tri*, three, + **çūla*, spit, spear-head.] In *Hindu myth.*, the three-pointed or trident emblem of Siva: also used attributively: as, a *trisul* cross.

The *trisul* or trident emblem which crowns the gateways may, . . . and I am inclined to believe does, represent Buddha himself.
J. Fergusson, Hist. Indian Arch., p. 97.

trisulc† (trī'sulk), *a.* and *n.* [Also *trisulk*; = Sp. Pg. It. *trisulco*, < L. *trisulcus*, three-pronged, three-forked, three-cleft, lit. 'three-furrowed' (noting a thunderbolt, etc.), < *tres* (*tri-*), three, + *sulcus*, furrow: see *sulk*[2].] **I.** *a.* Three-forked; three-pronged.

One sole Jupiter, . . . in his hand
A *trisulc* thunderbolt, or fulminous brand.
Heywood, Hierarchy of Angels, p. 63.

II. *n.* Something having three forks, as the three-pointed thunderbolt of Jove, the trident of Neptune, or the trisula of Siva.

Hand once againe thy *Trisulk*, and retire
To Oeta, and there kindle 't with new fire.
Heywood, Dialogues (Works, ed. Pearson, 1874, VI. 160).

trisulcate (trī-sul'kāt), *a.* [< *trisulc* + *-ate*[2].] 1. In *bot.*, three-grooved; three-furrowed.—2. In *zoöl.*, tridactyl; divided into three digits or hoofs: as, a *trisulcate* foot. Compare *bisulcate.*

trisulk†, *a.* and *n.* See *trisulc.*

trisyllabic (tris-i-lab'ik), *a.* [< L. *trisyllabus* (see *trisyllable*) + *-ic.*] Pertaining to a trisyllable; consisting of three syllables: as, a *trisyllabic* word or root.

trisyllabical (tris-i-lab'i-kal), *a.* [< *trisyllabic* + *-al.*] Same as *trisyllabic.*

trisyllabically (tris-i-lab'i-kal-i), *adv.* In the manner of a trisyllable; in three syllables.

trisyllable (trī-sil'- or tri-sil'ạ-bl), *n.* [Cf. F. *trissyllabe* = Sp. *trisílabo* = Pg. *trisyllabo* = It. *trisillabo*, < L. *trisyllabus*, < Gr. *τρισύλλαβος*, having three syllables, < *τρεῖς* (*τρι-*), three, + *συλλαβή*, a syllable: see *syllable.*] A word consisting of three syllables.

trit. An abbreviation of the Latin *tritura*, imperative of *triturare*, triturate: used in pharmacy. *Dunglison.*

tritactic (trī-tak'tik), *a.* [< L. *tres* (*tri-*), three, + *tactus*, touch: see *tact.*] Touching in three consecutive points.—**Tritactic point.** See *point*[1].

tritæophya (trit-ē-of'i-ạ), *n.* [NL., < Gr. *τριταιοφυής*, the nature of a tertian fever, < *τριταῖος*, on the third day, + *φύειν*, bring forth, produce.] A tertian malarial fever.

tritagonist (trī-tag'ō-nist), *n.* [< Gr. *τριταγωνιστής*, tritagonist, < *τρίτος*, third, + *ἀγωνιστής*, an actor: see *agonist.*] In the *anc. Gr. drama*, the third actor. His part is usually that of the evil genius, or the promoter of the sufferings of the *protagonist*, or first actor. The third actor was first brought into the drama by Sophocles.

Creon, although said to be the *tritagonist*, entered by the central door. *Athenæum*, No. 3270, p. 841.

trite[1] (trīt), *a.* [= It. *trito*, < L. *tritus*, pp. of *terere*, rub, wear, = OBulg. *trieti*, *trŭti* = Serv. *trti* = Bohem. *trzhíti* = Pol. *trzeć* = Russ. *tereti* = Lith. *triti*, *trinti*, rub. From the L. *terere* are also ult. E. *triturate*, *triture*, *try*, etc., *contrite*, *detritus*, etc.] 1†. Rubbed; frayed; worn.

My accent or phrase vulgar; my garments *trite.*
B. Jonson, Cynthia's Revels, i. 1.

Hence—2. Used till so common as to have lost its novelty and interest; commonplace; worn out; hackneyed; stale.

So *trite* a quotation that it almost demands an apology to repeat it. *Goldsmith*, English Clergy.

trite[2] (trī'tē), *n.* [Gr. *τρίτη*, fem. of *τρίτος*, third: see *third.*] In *anc. Gr. music*, the third tone (from the top) of the conjunct, disjunct, and extreme tetrachords. See *tetrachord.*

tritely (trīt'li), *adv.* In a trite or commonplace manner; stalely.

Other things are mentioned . . . very *tritely*, and with little satisfaction to the reader.
Wood, Athenæ Oxon. (*Latham.*)

triteness (trīt'nes), *n.* The character of being trite; commonness; staleness; the state of being hackneyed or commonplace.

Sermons which . . . disgust not the fastidious ear of modern elegance by *triteness* or vulgarity.
Wrangham, Sermons, Pref.

triternate (trī-tėr'nāt), *a.* [< *tri-* + *ternate.*] In *bot.*, three times ternate: applied to a leaf whose petiole divides and twice subdivides into three; thus bearing twenty-seven leaflets, as in some *Apiaceæ*. Also *triplicate-ternate.*

triternately (trī-tėr'nāt-li), *adv.* In a triternate manner.

tritheism (trī'thē-izm), *n.* [= F. *trithéisme* = Sp. *triteísmo*; < Gr. *τρεῖς* (*τρι-*), three, + *θεός*, god, + *-ism.*] The doctrine that there are three Gods, specifically that the Father, Son, and Holy Spirit are three distinct Gods.

tritheist (trī'thē-ist), *n.* [< *trithe(ism)* + *-ist*: see *theist.*] One who maintains the doctrine of tritheism.

tritheistic (trī-thē-is'tik), *a.* [< *tritheist* + *-ic.*] Of or pertaining to tritheism or tritheists.

tritheistical (trī-thē-is'ti-kal), *a.* [< *tritheistic* + *-al.*] Same as *tritheistic.*

tritheite† (trī'thē-īt), *n.* [< Gr. *τριθείτης*, < *τρεῖς* (*τρι-*), three, + *θεός*, god.] A tritheist.

trithemimeral (trith-ē-mim'ē-ral), *a.* [< Gr. *τριθημιμερής*, consisting of three halves, < *τρίτος*, third, + *ἡμιμερής*, half, < *ἡμι-*, half, + *μέρος*, part.] In *pros.*, of or pertaining to a group of three half-feet; pertaining to or consisting of one foot and a half. Sometimes, incorrectly, *trihemimeral.*—**Trithemimeral cesura**, the cesura after the thesis (metrically accented syllable) of the second foot of a dactylic hexameter. See *cesura*, *hephthemimeral.*

trithing† (trī'ŦHing), *n.* [< ML. *trithinga*, a form of E. *thriding*, **thrithing*: see *riding*[2].] Same as *riding*[2].

The division of Deira into three *Trithings* or Ridings.
J. R. Green, Conq. of Eng., p. 115.

trithing-reeve† (trī'ŦHing-rēv), *n.* The governor of a trithing.

trithionate (trī-thī'ō-nāt), *n.* [< *trithion-ic* + *-ate.*] A salt of trithionic acid.

trithionic (trī-thī-on'ik), *a.* [< Gr. *τρεῖς* (*τρι-*), three, + *θεῖον*, sulphur, + *-ic.*] Containing three sulphur atoms.—**Trithionic acid**, a sulphur acid having the formula $H_2S_3O_6$. It forms a strongly acid, bitter, odorless solution, which decomposes very readily.

Trithrinax (trith'ri-naks), *n.* [NL. (Martius, 1837), from the three petals and three-parted calyx; < Gr. *τρεῖς*, three, + NL. *Thrinax*, a related genus.] A genus of palms, of the tribe *Sabaleæ*. It has bisexual flowers with imbricated petals, filaments united into a tube, and a style terminal in fruit. The 2 or 3 species are natives of Brazil and Argentina. They are thornless palms bearing smooth, roundish, fan-shaped leaves, deeply many-parted into two-cleft indupli-cate segments. The leaf-stalks are sharply biconvex, extending above into a hard cordate ligule, and below into a fibrous sheath which is densely set with erect or reflexed spines. The flowers are small, on the flexuous branches of a spreading, thick-stalked spadix with many obliquely split spathes. Several species are included among the fan-palms of greenhouse cultivation: *T. campestris* is remarkable as one of the most southern of all palms, extending in the Argentine Republic to 32° 40′ south, and is also peculiar for its woody leaves, more rigid than those of any other palm.

tritical† (trit'i-kal), *a.* [< *trite* + *-ical*, appar. in imitation of *critical.*] Trite; common.

A tedious homily or a *tritical* declamation.
I. D'Israeli, Amen. of Lit., I. 326.

tritically† (trit'i-kal-i), *adv.* In a tritical or commonplace manner.

This sermon upon the Jewish dispensation, . . . 'tis all tritical, and most *tritically* put together.
Sterne, Tristram Shandy, vi. 11.

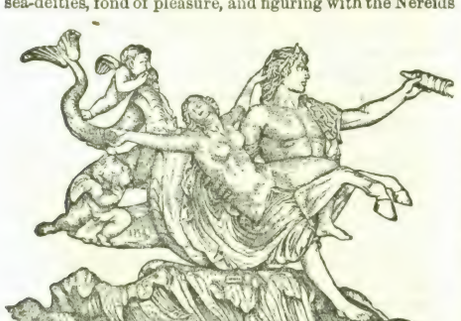
triticalness† (trit'i-kal-nes), *n.* The state or character of being tritical; triteness.

triticeoglossus (tri-tis″ē-ō-glos'us), *n.*; pl. *triticeoglossi* (-ī). [NL., < L. *triticeus*, of wheat (see *triticeous*), + Gr. *γλῶσσα*, the tongue.] A small muscle occasionally found in the human larynx, connected with the triticeous nodule in the posterior thyrohyoid membrane, and passing forward to the tongue.

triticeous (tri-tish'ius), *a.* [< L. *triticeus*, of wheat, < *triticum*, wheat: see *Triticum.*] In *anat.*, small and roundish, like a grain of wheat or millet-seed: nodular.—**Triticeous nodule**, one of the small cartilaginous nodules in the larynx—the cartilago triticeus, or corpus triticeum.

triticeum (tri-tis'ē-um), *n.*; pl. *triticea* (-ạ). [NL., neut. (sc. *corpus*, body) of L. *triticeus*, of wheat: see *triticeous.*] The triticeous body or nodule of the larynx; the triticeus.

triticeus (tri-tis'ē-us), *n.*; pl. *triticei* (-ī). [NL., sc. *cartilago*, < L. *triticeus*, of wheat: see *triticeous*.] The triticeous cartilage of the larynx; the triticeum.



Triticum (trit'i-kum), *n.* [NL. (Tournefort, 1700), < L. *triticum*, wheat, < *terere*, pp. *tritus*, rub, grind, thresh: see *trite*, *try*.] A genus of grasses, of the tribe *Hordeeæ*, type of the subtribe *Triticeæ*. It is characterized by two- to five-flowered somewhat compressed spikelets solitary at the nodes, and by an oblong or ventricose five- to nine-nerved flowering glume, the lateral nerves not connivent. The genus includes the cultivated species or varieties of wheat, long diffused widely through all temperate regions, and about fifteen species in the wild state, natives of the Mediterranean region and of western Asia. They are annual or biennial erect flat-leafed grasses, with a terminal elongated or cylindrical spike, its axis usually without joints, but flexuous with alternate excavations, into which the spikelets are set. For the polymorphous cultivated species, *T. æstivum*, see *wheat*, *spelt*1, *leghorn*, *mummy-wheat*, and cut under *Monocotyledones*; and compare *amel-corn*, *Ægilops*, 2, and *quitch-grass*.

tritocere (trī'tō-sēr), *n.* [< Gr. *τρίτος*, third, + *κέρας*, horn.] That tine of a deer's antler which is third in order of development, or developed after the third year.

tritomesal (trī-tō-mes'al), *a.* [< Gr. *τρίτος*, third, + *μέσος*, middle: see *meson*.] In *entom.*, noting the third longitudinal series of cells in the wing of hymenopters, corresponding to the submedian, second discoidal and first apical cells of modern entomologists. *Kirby*.

tritomite (trī'tō-mīt), *n.* [< Gr. *τρίτομος*, thrice cut, < *τρεῖς* (*τρι-*), three, + *-τομος*, < *τέμνειν*, *ταμεῖν*, cut.] A silicate found in Norway, occurring in forms resembling a triangular pyramid. It contains thorium, the cerium metals, boron, calcium, and other elements.

Triton (trī'ton), *n.* [< L. *Triton*, < Gr. *Τρίτων*, Triton; cf. Skt. *trita*, a superhuman being of uncertain origin and attributes.] **1.** In *Gr.* and *Latin myth.*, a son of Poseidon and Amphitrite, who dwelt with his father and mother in a golden palace on the bottom of the sea, and was a gigantic and redoubtable divinity. In the later mythology Tritons appear as a race of subordinate sea-deities, fond of pleasure, and figuring with the Nereids

in the train of the greater sea-gods; they are conceived as combining the human figure with that of lower animals or monsters. A common attribute of Tritons is a shell-trumpet, which they blow to soothe the restless waves.

> And all the way before them [Neptune and Amphitrite], as they went,
> *Triton* his trompet shrill before them blew.
> *Spenser*, F. Q., IV. xi. 12.
>
> So might I, standing on this pleasant lea,
> Have sight of Proteus rising from the sea,
> And hear old *Triton* blow his wreathed horn.
> *Wordsworth*, Misc. Sonnets, I. 33.

2. In *her.*, a bearded man with a fish's tail, and usually holding a trident. Also called *merman* and *Neptune*.—**3.** In *conch.*: (*a*) A genus of gastropods, giving name to the *Tritonidæ*; the tritons, conchs, trumpet-shells, or sea-trumpets. *Montfort*, 1810. (*b*) [*l. c.*] A member of this genus or family.—**4.** In *herpet.*: (*a*) An extensive genus of newts, efts, or salamanders, named by Laurenti in 1768, since variously applied or divided into several others. (*b*) [*l. c.*] A newt or salamander of this genus or a related form. The name applies chiefly to the aquatic species of the Old World family *Salamandridæ*, but extends to others of similar habits in America, as members of the genus *Spelerpes*, belonging to another family (*Plethodontidæ*). The crested newt or triton of Europe is *Triton* (*Hemisalamandra*) *cristatus* (see cut under *newt*); the smooth triton is *T.* (*Lissotriton*) *punctatus*. Most of the tritons of the Old World fall in the genus *Molge*, as the great marbled newt of Europe, *M. marmorata*, and the red-bellied, *M. alpestris*. A conspicuous triton of cold springs in the United States is *Spelerpes ruber*, chiefly bright-red, but marked with black in very variable pattern. See cut under *Spelerpes*.

Triton tritonis.

tritone (trī'tōn), *n.* [< Gr. *τρίτονος*, having three tones, < *τρεῖς* (*τρι-*), three, + *τόνος*, tone.] In *music*, an interval composed of three whole steps or "tones"—that is, an augmented fourth, as between the fourth and seventh tones of a scale. The older harmonists regarded this interval, even when only suggested, as peculiarly objectionable, whence the proverb "*mi* contra *fa* diabolus est." See *mi*.

Tritonia (trī-tō'ni-ạ), *n.* [NL., < L. *Triton*, < Gr. *Τρίτων*, Triton: see *Triton*.] **1.** A genus of nudibranchiate gastropods founded by Cuvier in 1798, typical of the family *Tritoniidæ*,

Tritonia plebeia. (Line shows natural size.)

with such species as *T. plebeia*.—**2.** A genus of lepidopterous insects. *Geyer*, 1832.—**3.** (Ker, 1802.) A genus of monocotyledonous plants, of the family *Iridaceæ* and the tribe *Ixieæ*. It is characterized by an ovoid or oblong capsule and by a slender perianth-tube not enlarged at the summit, with a concave or bell-shaped, regular or oblique border, upon the base of which the more or less unilateral stamens are inserted. There are about 30 species, all natives of tropical and South Africa. They are ornamental plants from a scaly or mostly solid and fiber-bearing bulb, producing a simple or slightly branching stem and a few narrowly linear or sword-shaped leaves, which are often falcate. The handsome yellow, orange, blue, or white flowers are sessile, and scattered along a simple or branching peduncle, each flower solitary in a short membranous spathe. They are known in cultivation by the generic name *Tritonia*, and sometimes by the name *Montbretia*.

4. [*l. c.*] A plant of this genus.

Tritonidæ (trī-ton'i-dē), *n. pl.* [NL., < *Triton* + *-idæ*.] In *conch.*, the family of canaliferous tænioglossate gastropods whose typical genus is *Triton*. The animal has a moderate foot, truncate in front, and the radula with a wide multicuspid median tooth and narrow denticulate admedian and aculeiform lateral teeth. The operculum is corneous, with an apical or submarginal nucleus. The shell is turreted, and has not more than two varices on each whorl, which generally alternate with those of contiguous whorls. The species mostly inhabit tropical seas, and some reach a considerable size, as *Triton tritonis*. See cut under *Triton*.

Tritoniidæ (trī-tō-nī'i-dē), *n. pl.* [NL., < *Tritonia* + *-idæ*.] A family of opisthobranchiate gastropods, whose typical genus is *Tritonia*. The branchial appendages are disposed in two dorsal rows, a frontal veil is developed, mandibles exist, the teeth of the radula are multiserial, and the liver is compact. Species exist in most temperate and warm seas. Also *Tritoniadæ*. See cut under *Tritonia*.

tritonioid (trī-ton'i-oid), *a.* Of or related to the *Tritoniidæ*.

tritonoid (trī'tō-noid), *a.* Of or related to the *Tritonidæ*.

Triton's-horn (trī'tọn-hôrn), *n.* Same as *conch*, 4.

tritorium (trī-tō'ri-um), *n.* Same as *triturium*.

tritova, *n.* Plural of *tritovum*.

tritovertebra (trī-tō-vėr'tē-brạ), *n.* [< Gr. *τρίτος*, third, + L. *vertebra*, vertebra.] In Carus's nomenclature (1828), a limb-boue, or the bony framework of the limbs considered as vertebral elements developed in special relation with the muscular system, or locomotorium: correlated with *deutovertebra* and *protovertebra*.

tritovertebral (trī-tō-vėr'tē-brạl), *a.* [< *tritovertebra* + *-al*.] Having the character of a tritovertebra; serving a locomotory purpose, as the skeleton of the limbs.

tritovum (trī-tō'vum), *n.*; pl. *tritova* (-vạ). [NL., < Gr. *τρίτος*, third, + L. *ovum*, egg: see *ovum*.] The third stage of an ovum, or an ovum in a third stage, succeeding a deutovum.

tritoxid, tritoxide (trī-tok'sid, -sid or -sīd), *n.* [< Gr. *τρίτος*, third, + E. *oxid*.] Same as *trioxid*.

tritozoöid (trī-tō-zō'oid), *n.* [< Gr. *τρίτος*, third, + *ζῷον*, an animal, + *εἶδος*, form (see *zoöid*).] In *zoöl.*, a zoöid of a third generation, resulting from a deuterozoöid. *H. A. Nicholson*.

tritubercular (trī-tū-bėr'kū-lär), *a.* [< L. *tres* (*tri-*), three, + *tuberculum*, tubercle, + *-ar*3.] Having three tubercles or cusps, as a molar or premolar tooth; tricuspid; characterized by such teeth as a type of dentition; tuberculate; of or pertaining to trituberculism.

trituberculate (trī-tū-bėr'kū-lāt), *a.* [< L. *tres* (*tri-*), three, + *tuberculum*, tubercle, + *-ate*1.] Same as *tritubercular*.

trituberculism (trī-tū-bėr'kū-lizm), *n.* [< L. *tres* (*tri-*), three, + *tuberculum*, tubercle, + *-ism*.] Tritubercular state or condition of teeth; presence of three tubercles on a molar or premolar tooth. *Nature*, XLI. 466.

triturable (trit'ū-ra-bl), *a.* [= F. *triturable* = Sp. *triturable* = Pg. *trituravel* = It. *triturabile*; as if < LL. **triturabilis*, < *triturare*, thresh, triturate: see *triturate*.] Capable of being triturated.

triturate (trit'ū-rāt), *v. t.*; pret. and pp. *triturated*, ppr. *triturating*. [< LL. *trituratus*, pp. of *triturare*, thresh, triturate, < L. *tritura*, a rubbing, threshing: see *triture*.] **1.** To rub, grind, or bruise; specifically, to grind to a powder.

> The *triturated* skeletons of corals and echinoderms and the shells of molluscs, constituting an intensely white coralline sand. *Amer. Jour. Psychol.*, II. 520.
>
> Considering the power which worms exert in *triturating* particles of rock. *Darwin*, Vegetable Mould, p. 258.

2. In *physiol.*, to grind with the grinders; masticate with the molar teeth; chew to a pulp.

triturate (trit'ū-rāt), *n.* [< LL. *trituratus*, pp. of *triturare*, triturate: see *triturate*, *v.*] A form of medicine in which an active substance has been thoroughly powdered and mixed by rubbing up with sugar of milk.—**Tablet triturate**, a small disk of some soluble material, usually sugar of milk, charged with a certain dose of a medicinal substance.

trituration (trit-ū-rā'shọn), *n.* [= F. *trituration* = Sp. *trituración* = Pg. *trituração* = It. *triturazione*, < LL. *triturationi*(*n-*), < *triturare*, triturate: see *triturate*.] **1.** The act of triturating, or reducing to a fine powder by grinding. Trituration is a dry process, and thus distinguished from *levigation*.—**2.** In *phar.*, a finely comminuted powder: as, a *trituration* of elaterin.—**3.** In *physiol.*, reduction to pulp by grinding between the teeth; molar mastication, or some corresponding process: as, the *trituration* of food before swallowing; *trituration* in the gizzard of a bird is assisted by little pebbles swallowed.

triturator (trit'ū-rā-tọr), *n.* [< LL. *triturator*, < *triturare*, pp. *trituratus*, triturate: see *triturate*.] One who or that which triturates; specifically, an apparatus for grinding drugs.

triturature (trit'ū-rā-tūr), *n.* [< *triturate* + *-ure*.] A wearing by rubbing or friction.

triture† (trit'ūr), *n.* [< L. *tritura*, a rubbing, threshing (see *triturate*), < *terere*, pp. *tritus*, rub, grind, thresh: see *trite*.] A rubbing or grinding.

> Goats' whey being a natural infusion, from gentle heat and gentle *triture*, of the fine aromatic and nitrous vegetables on which goats feed.
> *G. Cheyne*, On Regimen, p. 44. (*Latham*.)

triturium (trī-tū'ri-um), *n.*; pl. *trituria* (-ạ). [Also, and prop., *tritorium*, < L. as if **tritorium*, neut. of **tritorius*, < *terere*, pp. *tritus*, rub, thresh. The form *triturium* imitates *tritura*, a threshing (separating grain from straw): see *triture*.] A vessel for separating liquors of different densities.

tritylene (trit'i-lēn), *n.* [< Gr. *τρίτος*, third, + *-yl* + *-ene*.] In *chem.*, same as *propylene*: so named because third in the series of olefines.

Tritylodon (trī-til'ō-don), *n.* [NL., < Gr. *τρεῖς* (*τρι-*), three, + *τύλος*, a knob, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] A genus of Mesozoic mammals from the Upper Triassic of South Africa and Europe, typical of the family *Tritylodontidæ*. *Owen*, 1884.

Tritylodontidæ (trī-til-ō-don'ti-dē), *n. pl.* [NL., < *Tritylodon*(*t-*) + *-idæ*.] A family of prototherian mammals of Triassic age, typified by the genus *Tritylodon*. They had on each side of the upper jaw two incisors, no canine, two premolars, and four molars; the median incisors were scalpriform, the lateral minute, and the molars had trituberculate ridges.

tritylodontoid (trī-til-ō-don'toid), *a.* and *n.* **I.** *a.* Of or relating to the *Tritylodontidæ*.

II. *n.* One of the *Tritylodontidæ*.

Triumfetta (trī-um-fet'ạ), *n.* [NL. (Plumier, 1703), named after an Italian botanist, G. B. *Trionfetti* (1656–1708).] A genus of dicotyledonous plants, of the family *Tiliaceæ* and tribe *Grewieæ*. It is characterized by an echinate or bristly globose capsule. There are about 50 species, natives of warm countries. They are herbs or shrubs with stellate hairs, bearing serrate entire or three- to five-lobed leaves. The flowers are axillary, or opposite the leaves, chiefly yellow, and usually with numerous stamens on an elevated gland-bearing torus. Some of the small-flowered species are very widely distributed; others are mostly confined to Aus-

tralia, Madagascar, or South Africa. A group of American species produces large dense masses of showy cymulose flowers. The fruit is two- to five-celled, and separates into distinct carpels, or is indehiscent and bur-like, its prickles often ending in hooks, as in *T. Lappula*, a common tropical weed known in Jamaica as *greatwort*. The species in general are known in the West Indies as *burweed* or *parrakeet-bur*, the ripe fruit being a favorite food of the green parrakeet. Several species are used medicinally in the tropics on account of their mucilaginous properties; several also yield a tenacious fiber, as *T. rhomboidea*, a widespread tropical weed, and *T. semitriloba* (for which see *burbark*).

triumph (trī'umf), *n.* [< ME. *triumphe, tryumphe,* < OF. *triumphe, triomphe,* F. *triomphe* = Pr. *triomfe* = Sp. *triunfo* = Pg. *triumpho* = It. *trionfo, triunfo* = D. *triomf, triumf* = G. *triumph* = Sw. Dan. *triumf*, triumph (in OF. and It. also a game of cards so called), < L. *triumphus*, OL. *triumpus*, in the earliest use *trumpe, triumpe, triumpe*, an exclamation used in the solemn processions of the Arval brethren; in classical use a solemn entrance in procession, made by a victorious general (see def.), accompanied by the shout *Io triumphe!* hence fig. a victory, triumph; = Gr. *θρίαμβος*, the procession at the feast of Bacchus, also a name for Bacchus; ult. origin unknown. Hence *trump*[3].] **1.** In *Rom. antiq.*, a procession and religious ceremony in honor of a victory and the victorious leader. This, the highest military honor which a Roman commander could attain, was granted by the senate to such as, holding the office of dictator, consul, or pretor, had secured a decisive victory or the complete subjugation of a province. In the triumph the general, crowned with laurel, and having a scepter in one hand and a branch of laurel in the other, entered the city of Rome in a chariot drawn by four horses, preceded by the senate and magistrates, musicians, the spoils, the captives in fetters, etc., and followed by his army on foot, in marching order. The procession advanced in this order along the Via Sacra to the Capitol, where a bull was sacrificed to Jupiter and the laurel wreath was deposited in the lap of the god. Banquets and other entertainments concluded the solemnity, which was generally brought to a close in one day, though in later times it sometimes lasted for three days. During the time of the empire the emperor himself was the only person who could claim a triumph. A naval triumph differed in no respect from a military triumph, except that it was on a smaller scale, and was marked by the exhibition of beaks of ships and other nautical trophies. An ovation was an honor inferior to a triumph, and less imposing in its ceremonies.
